LIST OF ACRONYMS

Acronym	Definition
µg/Kg	Microgram per Kilogram
AGV	Air Guidance Value
AOC	Area of Concern
ASTM	American Society for Testing and Materials
AWQS	Ambient Water Quality Standards
BASE	Building Assessment and Survey Evaluation
BGS	Below Ground Surface
CAMP	Community Air Monitoring Plan
CFR	Code of Federal Regulations
Cis-1,2-DCE	Cis-1,2-dichloroethene
COC	Contaminant of Concern
CPP	Citizen Participation Plan
CREC	Controlled Recognized Environmental Concern
CSM	Conceptual Site Model
CY	Cubic Yard
DCP	New York City Department of City Planning
DER-10	New York State Department of Environmental Conservation Technical Guide 10
DO	Dissolved Oxygen
ELAP	Environmental Laboratory Accreditation Program
EPA	United State Environmental Protection Agency
ESA	Environmental Site Assessment (ASTM E1527-13)
EV	Electron Volts
FID	Flame Ionization Detector
GPR	Ground-Penetrating Radar
GPS	Global Positioning System
HASP	Health and Safety Plan
HAZWOPER	Hazardous Waste Operations and Emergency Response
HREC	Historical Recognized Environmental Concern
IAV	Indoor Air Value
IDW	Investigation-Derived Waste
IP	Interface Probe
IRM	Interim Remedial Measure
L/m	Liters per Minute
LDPE	Low-Density Polyethylene
Mg/Kg	Milligram per Kilogram
Mg/L	Milligram per Liter
MHZ	Megahertz
MSL	Mean Sea Level
MTA	New York City Metropolitan Transportation Authority
NAPL	Non-Aqueous Phase Liquid
NAVD	North American Vertical Datum

Acronym	Definition
NYC	New York City
NYC DOHMH	New York City Department of Health and Mental Hygiene
NYC OER	New York City Office of Environmental Remediation
NYC VCP	Voluntary Cleanup Program
NYCRR	New York Codes, Rules, and Regulations
NYS DOH	New York State Department of Health
NYSDEC	New York State Department of Environmental Conservation
NYSDOT	New York State Department of Transportation
ORP	Oxidation-Reduction Potential
OSHA	Occupational Safety and Health Administration
PCB	Polychlorinated Biphenyl
PCE	Tetrachloroethylene
PID	Photoionization Detector
PFAS	Per- and poly-fluoroalkyl substances
PFOA	Perfluorooctanoate Acid
PFOS	Perfluorooctane Sulphonate

USGS	United States Geological Survey
UST	Underground Storage Tank
VOC	Volatile Organic Compound
ZOLA	Zoning and Land Use

CERTIFICATION

I, Stephen M. Kline, am a Qualified Environmental Professional, as defined in RCNY § 43-1402(tt). I have primary direct responsibility for implementation of the Remedial Investigation for the 5055 Broadway, (OER Project Number 21TMP1280M, 21EHAN270M, 22CVCP012M). I am responsible for the content of this Remedial Investigation Report (RIR), have reviewed its contents and certify that this RIR is accurate to the best of my knowledge and contains all available environmental information and data regarding the property.

Stephen M. Kline 02/15/2022

Qualified Environmental Professional Date Signature

EXECUTIVE SUMMARY

The Remedial Investigation Report (RIR) provides sufficient information for establishment of remedial action objectives, evaluation of remedial action alternatives, and selection of a remedy pursuant to RCNY§ 43-1407(f). The remedial investigation (RI) described in this document is consistent with applicable guidance.

Site Location and Current Usage

The Site is located at 5055 Broadway in the Inwood section of Manhattan, New York and is identified as Block 2243 and Lot 255 on the New York City Tax Map. The Site is approximately 7,500 SF in area and is bounded by a 6-story residential building with ground floor commercial space to the north, a 1-story commercial building (M&N Management Office) to the south, a 1-story commercial building (Brown Sugar Restaurant and Broadway Mechanic Service) to the east (across Broadway), and a 6-story residential building to the west.

Currently, the Site is rectangular-shaped vacant lot with the surface gradually sloping (EL[1] +36.23 at the southeastern portion to EL + 40.33 at the northwestern portion). In the rear of the lot there is bedrock outcropping that juts out approximately 10 feet from the northwester Site boundary and rises to approximately 16 feet from ground surface (EL +56.3). The northern portion of the Site is covered by a concrete retaining block wall with a grassy area.

Summary of Proposed Redevelopment Plan

The proposed future use of the Site will consist of an 11-story mixed-use commercial and residential building with a partial cellar. The partial cellar will contain storage rooms, an electrical service room, a plumbing room, a fire pump room, a compactor room, a detention tank a bike storage room, and the elevator pit. To make way for the partial cellar, a 3,177 SF area of the property will be excavated down to 12 feet (EL +24.23) and will be mainly located at the southeastern portion of the property. The rest of the building footprint (approximately 1744 SF area) will be excavated down to 4 feet (EL +32.23) for the building foundation elements. A 25 SF area will be excavated down to 18 feet (EL+18.23) for the elevator pit.

[1] EL – Elevations are based on the North American Vertical Datum of 1988 (NAVD88), which is 1.65 feet below the Borough of Manhattan Highway Datum

The northwestern portion of the property will be unexcavated due to the shallow bedrock. In addition, to prevent undermining the foundation of the adjacent properties, small areas (6 feet from south-southwestern boundary and a 90 square feet area at the southeastern corner of the property) will be unexcavated.

The ground level will be occupied by commercial space, residential and elevator lobby, toilet, exercise room, recreational room, and one- to two-bedroom residential units with private terraces extending to the rear yard. The rest of the rear yard will be a publicly accessible open space/ terrace (with 2% slope) covered with concrete pavers on grade with trench drains installed along the northwestern edges adjacent to the bedrock outcrop and the retaining wall.

The second to sixth floors will have residential units with some having their own private terrace space. The seventh to eleventh floors will consist mainly of residential apartments. The current zoning designation is for residential properties (R7D) and commercial properties (C2-4). The proposed use is consistent with existing zoning for the property.

The anticipated volume of soil to be excavated from the Site is approximately 1,728 cubic yards (CY).

Summary of Past Uses of Site and Areas of Concern

The historical documents for as early as 1893 show the Site as vacant land. By around 1994, the Site was used as a parking lot with electronic/hydraulic car lifts. The Site remained as a commercial parking lot until September 2020. On November 23, 2020, the property was sold to 5055 Broadway LP. The parking lot structures were removed in January 2021. During the RI work in June 2021, the property was vacant and surrounded by a chain-linked fence.

The Areas of Concern (AOCs) identified for this site include:

1. Presence of approximately 2.5 feet of historic fill at the Site.
2. On site soil and soil vapor may have been impacted by historic off-site sources.

Summary of the Work Performed under the Remedial Investigation

The RI field work was performed between May 21 and June 26, 2021 and included the following scope of work:

- GZA performed a geophysical survey of the Site to locate subsurface anomalies which may be consistent with underground utilities or other subsurface structures.

- GZA conducted a Site inspection to identify AOCs and physical obstructions (i.e., structures, buildings, etc.).
- Installed seven soil borings across the project Site and collected 12 soil samples for chemical analysis from the soil borings to evaluate soil quality.
- Attempted to install three groundwater monitoring wells throughout the Site to establish groundwater flow. However, either groundwater was not encountered or refusal was encountered. Therefore, groundwater samples were not able to be collected.
- Installed five soil vapor probes around Site perimeter and collected five soil vapor samples for chemical analysis.
- Collected one ambient air sample for chemical analysis.

Summary of Environmental Findings

1. Elevation of the property ranges from 36 feet amsl NAVD88 at the eastern boundary (along Broadway) to 57 feet amsl NAVD at the western boundary.
2. Groundwater was not encountered during the RI above the bedrock surface (or above a maximum investigation depth of 25 feet bgs). However, according to the USGS Groundwater in Bronx, New York, and Richmond Counties (Perlmutter and Arnow, 1953), groundwater is anticipated to be approximately 25 feet bgs in the vicinity of the Site, which may be below the bedrock surface.
3. Groundwater flow is generally southeasterly beneath the Site towards the Harlem River.
4. Bedrock is evident at the western portion of the property and slopes steeply downward from at the ground surface at the western boundary to 25 feet bgs at the eastern boundary of the Site.
5. The general Site stratigraphy consist of the following, in order of increasing depth: Surface cover material comprised of approximately 4-inch-thick asphalt pavement; fill surface cover to a depth of approximately 2.5 feet bgs. This fill material stratum generally consisted of brown to dark gray, fine to medium sand, little trace silt, trace gravel, brick and asphalt fragments; Sand was encountered underneath the fill to a depth of about 6 to 17 feet bgs, extending below the fill to the top of the bedrock. This stratum generally consisted of loose to very dense, brown, fine to medium sand, little to trace amount of gravel, and little to trace amount of silt.

6. Soil/fill samples collected during the RI were compared to the New York State Department of Environmental Conservation (NYSDEC) 6NYCRR Part 375 Section 6.8 Unrestricted Use and Residential Use Soil Cleanup Objectives (SCOs).
    - No VOCs, SVOCs, or PCBs were detected above Unrestricted Use SCOs;
    - Metals including lead (max. of 177 mg/kg) and zinc (max. of 139 mg/kg) were detected at concentrations above their Unrestricted Use SCOs.
    - One pesticide, 4,4'-DDT (at 0.00554 mg/kg), was detected in at a concentration above its Unrestricted Use SCO.
    - Emerging contaminants detections included PFHxA (at 0.000057 mg/kg), PFOS (at 0.000629 mg/kg), and PFOA (at 0.000417 mg/kg).
7. Due to groundwater not being encountered at the deepest boring location and encountered refusals, groundwater samples were not taken.
8. Soil vapor samples collected during the RI were compared to the New York State Department of Health (NYSDOH) Final Guidance for Evaluating Soil Vapor Intrusion matrices dated October 2006.
    - Soil vapor results indicated low levels of petroleum-related VOCs and low levels of chlorinated VOCs.
    - The total concentration of petroleum-related VOCs (e.g., benzene, toluene, ethylbenzene, and xylenes [BTEX]) ranged from 29.62 micrograms per cubic meter ($\mu g/m^3$) to 210 $\mu g/m^3$.
    - Chlorinated VOCs (CVOCs) including tetrachloroethene (PCE) (ranging from 6.18 $\mu g/m^3$ to 9.09 $\mu g/m^3$) and methylene chloride (ranging from 2.25 to 4.41 $\mu g/m^3$) were detected within the soil vapor samples. Other CVOCs 1,1,1-trichloroethane (1-1-1-TCA), carbon tetrachloride, trichloroethene (TCE), and vinyl chloride were not detected within any of the soil vapor samples.
    - Petroleum-related VOCs and CVOCs were not detected within the ambient air sample.

REMEDIAL INVESTIGATION REPORT

1.0 SITE BACKGROUND

5055 Broadway LP c/o Timber Equities LLC retained GZA GeoEnvironmental of New York (GZA) to investigate and remediate a 0.17-acre (7,500 SF) property located at 5055 Broadway in the Inwood section of Manhattan, New York (Site). Mixed commercial and residential use is proposed for the property. The remedial investigation (RI) work was performed between May 21 and June 26, 2021. This Remedial Investigation Report (RIR) summarizes the nature and extent of contamination and provides sufficient information for establishment of remedial action objectives, evaluation of remedial action alternatives, and selection of a remedy that is protective of human health and the environment consistent with the use of the property pursuant to RCNY§ 43-1407(f). Limitations to this RIR are presented in **Appendix A**.

1.1 Site Location and Current Usage

The Site is located at 5055 Broadway in the Inwood section of Manhattan, New York and is identified as Block 2243 and Lot 255 on the New York City Tax Map. **Figure 1** shows the Site location. The Site is approximately 7,500 SF in area and is bounded by a 6-story residential building with ground floor commercial space to the north, a 1-story commercial building (M&N Management Office) to the south, a 1-story commercial building (Brown Sugar Restaurant and Broadway Mechanic Service) to the east (across Broadway), and a 6-story residential building to the west. A map of the site boundary is shown in **Figure 2**.

Currently, the Site is rectangular-shaped vacant lot with the surface gradually sloping (EL[2] +36.23 at the southeastern portion to EL + 40.33 at the northwestern portion). In the rear of the lot there is bedrock outcropping that juts out approximately 10 feet from the northwester Site boundary and rises to approximately 16 feet from ground surface (EL +56.3). The northern portion of the Site is covered by a concrete retaining block wall with a grassy area. A Boundary and Topographic Survey is included in **Appendix B**.

[2] EL – Elevations are based on the North American Vertical Datum of 1988 (NAVD88), which is 1.65 feet below the Borough of Manhattan Highway Datum

1.2 Proposed Redevelopment Plan

The proposed future use of the Site will consist of an 11-story mixed-use commercial and residential building with a partial cellar. The partial cellar will contain storage rooms, an electrical service room, a plumbing room, a fire pump room, a compactor room, a detention tank a bike storage room, and the elevator pit. To make way for the partial cellar, a 3,177 SF area of the property will be excavated down to 12 feet (EL +24.23) and will be mainly located at the southeastern portion of the property. The rest of the building footprint (approximately 1744 SF area) will be excavated down to 4 feet (EL +32.23) for the building foundation elements. A 25 SF area will be excavated down to 18 feet (EL+18.23) for the elevator pit.

The northwestern portion of the property will be unexcavated due to the shallow bedrock. In addition, to prevent undermining the foundation of the adjacent properties, small areas (6 feet from south-southwestern boundary and a 90 square feet area at the southeastern corner of the property) will be unexcavated.

The ground level will be occupied by commercial space, residential and elevator lobby, toilet, exercise room, recreational room, and one- to two-bedroom residential units with private terraces extending to the rear yard. The rest of the rear yard will be a publicly accessible open space/ terrace (with 2% slope) covered with concrete pavers on grade with trench drains installed along the northwestern edges adjacent to the bedrock outcrop and the retaining wall.

The second to sixth floors will have residential units with some having their own private terrace space. The seventh to eleventh floors will consist mainly of residential apartments. The current zoning designation is for residential properties (R7D) and commercial properties (C2-4). The proposed use is consistent with existing zoning for the property. Layout of the proposed site development is presented in **Appendix C**.

The anticipated volume of soil to be excavated from the Site is approximately 1,728 cubic yards (CY).

1.3 Description of Surrounding Property

The current properties within a ¼-mile of the Site consists primarily of multi-story buildings. The table below lists the properties that adjoin the Site and describes their current use.

Direction	Street Address/Location	Name and Current Use
North	5057 Broadway	6-story Residential Building with ground floor commercial space
South	5045 Broadway	1-story Commercial Building (M&N Management Office)
East	5060 Broadway (across Broadway)	1-story Commercial Building (Brown Sugar Restaurant and Broadway Mechanic Service)
West	60 Park Terrace East	6-Story Residential Building

The buildings along Broadway include commercial properties on the ground floor and residences above. Residential apartment buildings are located along Broadway and further west along Park Terrace East. The New York City Metropolitan Transportation Authority (MTA) elevated No. 1 train line runs along 10th Avenue, further east of the Site. There were no sensitive receptors identified within 250 feet of the Site. **Figure 3** shows the surrounding land usage.

2.0 SITE HISTORY

2.1 Past Uses and Ownership

The historical documents for as early as 1893 show the Site as vacant land. By around 1994, the Site was used as a parking lot with electronic/hydraulic car lifts. The Site remained as a commercial parking lot until September 2020. On November 23, 2020, the property was sold to 5055 Broadway LP. The parking lot structures were removed in January 2021. During the RI work in June 2021, the property was vacant and surrounded by a chain-linked fence.

2.2 Previous Investigations

A copy of the previous investigations reports is presented in **Appendix D** and summarized below.

Phase I Environmental Site Assessment (Phase I ESA), Langan, October 26, 2020

Based on information obtained during the visual inspection of the subject property, review of environmental databases and historic information, and contact with federal/state/local official agencies, no RECs were identified by during the Phase I ESA.

The Phase I ESA identified the following:

- De Minimis Conditions

  Minor staining was observed across the asphalt pavement and on a concrete pad beneath the hydraulic lift tank, motor, and three five-gallon buckets of motor oil during the site inspection. The pavement and pad otherwise appeared to be in good condition with no cracks. The staining observed is a housekeeping issue and is unlikely to result in negative impacts to underlying soil or groundwater.

- Business Environmental Risks

  E-Designation for Hazardous Materials and Noise (E-459)

  Based on records maintained online by the NYCOER the subject property is associated with City Environmental Quality Review (CEQR) No. 17DME007M.

- Surrounding Sites

  Potential impacts from current and historical operations conducted at adjacent and nearby properties involving the use of aboveground storage tanks (ASTs), underground storage tanks (USTs), and spills represent a business environmental risk due to the potential for offsite

migration of contaminants to impact sub-slab soil and/or groundwater below the subject site. Specifically, current, and historical adjacent property uses include an automobile repair shop and a former gasoline station at the adjacent property to the southeast located across Broadway at 5060 Broadway. Additionally, there are three open, upgradient spills (NYSDEC Spill Nos. 1501141, 1501142, and 1501143) associated with the Park Terrace Garden Apartment Complex located approximately 175 feet to 583 feet to the northwest of the subject property. According to the case narrative for each of these spill cases, five USTs were reportedly closed in place at the complex in the 1980s. Petroleum product was observed seeping into the basements of three of the residential apartment buildings in the complex in 2015 and monitoring wells were installed for the observation and removal of product. Periodic well gauging and spent absorbent pad removal has occurred since the installation of these wells and product was still observed in several of these wells as recently as December 2019. Due to the E-designation for hazardous materials, a subsurface investigation will be required at the subject property that will identify any impacts that may be present in subsurface soil, groundwater, or soil vapor as the result of these surrounding sites. The findings may also impact any proposed dewatering operations as laboratory analytical results documenting discharge water quality are required for city sewer discharge permits.

- Historic Urban Fill

  Based on the urban density of the area, it is likely that the subject site area contains historic urban fill which is typically characterized by elevated concentrations of poly-aromatic hydrocarbons (PAHs) and metals. Due to the E-designation for hazardous materials, a subsurface investigation will be required that will identify any impacts that are present within the fill material. This information will be used to develop a NYCOER-approved RAWP that will specify that any soil disturbance will need to be completed in accordance with that document; including implementation of soil handling and management procedures to address excavation, reuse, handling, and offsite disposal of this material.

Geotechnical Engineering Report (GER), GZA, June 2021

The following is a summary of the finding of the geotechnical investigation performed by GZA in June 2021 and as reported in the June 2021 GER:

The general Site stratigraphy consist of the following, in order of increasing depth:

- Surface cover material comprised of approximately 4-inch-thick asphalt pavement.
- Fill was encountered below the surface cover to a depth of approximately 2.5 feet bgs. This fill stratum generally consisted of brown to dark gray, fine to medium sand, little trace silt, trace gravel, brick and asphalt fragments.
- Sand was encountered underneath the Fill, extending to the top of the bedrock. This stratum generally consisted of loose to very dense, brown, fine to medium sand, little to trace amount of gravel, and little to trace amount of silt.
- Shallow bedrock is evident at the ground surface on the western portion of the property and slopes steeply downward to the east, ranging to 25 feet bgs at the eastern property boundary.
- Groundwater was not encountered during the subsurface exploration; however, it is anticipated that perched water may be present along the top of the rock. It should be noted that changes in groundwater depths will occur due to variations in seasonal influences, tidal fluctuations, precipitation amounts, local pumping, utility leakage, and other factors different from those existing at the time the observations were made.

2.3 Site Inspection

A Site reconnaissance was performed for the Phase I ESA on September 25, 2020. The inspection included a walk-through inspection of the entire site for the purposes of identifying RECs. As mentioned in the previous section, no RECs were identified. In addition, a Site reconnaissance was performed by GZA's Senior Project Manager, Reinbill Maniquez on June 21, 2021, to review and mark-out the proposed locations for the RI subsurface explorations and sampling.

2.4 Areas of Concern

The Areas of Concern (AOCs) identified for this site include:

1. Presence of approximately 2.5 feet of historic fill at the Site.
2. On site soil and soil vapor may have been impacted by historic off-site sources.

A map showing areas of concern is presented in **Figure 2**.

3.0 PROJECT MANAGEMENT

3.1 Project Organization

The Qualified Environmental Profession (QEP) responsible for preparation of this RIR is Stephen M. Kline, P.E. Fieldwork was performed by Mark Frey and Geder Mena under the supervision of the QEP. GZA is contracted to 5055 Broadway LP c/o Timber Equities LLC, the current Site developer.

3.2 Health and Safety

All work described in this RIR was performed in full compliance with applicable laws and regulations, including Site and Occupational Safety and Health Administration (OSHA) worker safety requirements and Hazardous Waste Operations and Emergency Response (HAZWOPER) requirements.

An OSHA compliant Health and Safety Plan (HASP) that meets OSHA HAZWOPER requirements was implemented during the site work to protect worker safety. The Site Safety Coordinator ensured compliance of the HASP in accordance with applicable health and safety laws and regulations. Field personnel involved in investigation activities participated in training required under OSHA HAZWOPER 29 Code of Federal Regulations (CFR) 1910.120, including 40-hours hazardous waste operator training and annual 8-hour refresher training. Emergency telephone numbers were kept at the Site. A safety meeting was conducted before work began. Topics discussed included task hazards and protective measures (physical, chemical, environmental); emergency procedures; personal protective equipment (PPE) levels and other relevant safety topics including the route to the nearest hospital/emergency room. The meeting was documented in a log book or specific form. Information fact sheets and/or summary tables for each contaminant group were included in the HASP. A copy of the HASP was on-site during each sampling event.

3.3 Materials Management

All material encountered during the RI was managed in accordance with applicable laws and regulations. Investigation-derived waste (IDW). Soil cutting were returned to the boreholes.

4.0 REMEDIAL INVESTIGATION ACTIVITIES

The RI was conducted in accordance with the NYC OER-approved Phase II Site Investigation Work Plan (SIWP) prepared by GZA GeoEnvironmental of New York (GZA) and dated June 2021 (June 2021 Phase II SIWP). The RI field work was performed between May 21 and June 26, 2021, and included the following scope of work:

- GZA performed a geophysical survey of the Site to locate subsurface anomalies which may be consistent with underground utilities or other subsurface structures
- GZA conducted a Site inspection to identify AOCs and physical obstructions (i.e., structures, buildings, etc.).
- Installed seven soil borings across the project Site and collected 12 soil samples for chemical analysis from the soil borings to evaluate soil quality.
- Attempted to install three groundwater monitoring wells throughout the Site to establish groundwater flow. However, refusals were encountered, or the water table was not encountered, and groundwater samples were not able to be collected.
- Installed five soil vapor probes around Site perimeter and collected five soil vapor samples for chemical analysis.
- Collected one ambient air sample for chemical analysis.

Site features and sample locations are shown on **Figure 2.** A Summary of RI sample collection and chemical analyses is provided in **Table 1**. Representative photographs of the field investigation activities are included **Appendix E**.

4.1 Geophysical Investigation and Utility Mark-Out

GZA subcontracted Ground Penetrating Radar Systems, Inc (GPRS) to perform a geophysical survey at the Site on May 21, 2021, to locate and identify anomalies consistent with underground utilities, storage tanks, and other substructures. The geophysical survey equipment consisted of a ground penetrating radar (GPR) with a shielded antenna, a Radio Detection Electromagnetic utility locator, and a magnetometer to detects ferromagnetic objects at depth up to approximately eight feet. The GPR profiles were collected over anomalies and inspected for reflection which

could be indicative of USTs or subsurface utilities. Sample locations were established in areas that did not conflict with potential subsurface structures or utilities. Additionally, prior to invasive work, GZA drilling subcontractors conducted New York 811 and requested a utility mark out to locate underground utilities on the sidewalk and street fronting the Site.

4.2 Borings and Soil Vapor Probes

Drilling and Soil Logging

GZA subcontracted EPhase2, LLC of Huntington Station, New York (EP2) to advance seven soil borings, SB-01 through SB-07, at the Site on June 21, 2021. Five borings (SB-1 through SB-5) were advanced to between 10 and 25 feet bgs (EL+27 and EL+11) using a direct-push Geoprobe® 6712 DT direct-push technology rig with a 2-inch inside MacroCore™ sampler liner. Two additional shallow soil borings (SB-6 and SB-7) were advanced to 2 feet bgs (EL. +38 and EL+43 respectively) and were located outside the building footprint to assess the material that will not be excavated during construction near the northwestern boundary of the Site (near the bedrock outcrop). EPhase2 utilized a Geoprobe® 6712DT direct-push technology drill rig equipped with a 2-inch inside MacroCore ™ soil sampling unit with an acetate liner sleeve. Soil cores were collected at 5-foot intervals.

Soil was classified using the modified Burmister soil classification system. Soil boring locations are shown in **Figure 2**. Boring logs were prepared by GZA's Field Geologist and are provided in **Appendix F**.

Groundwater Monitoring Well Construction

At three boring locations (SB-01 to SB-03), EP2 attempted to install temporary monitoring wells installed using 1-inch diameter PVC well screen and riser into the open borehole. Groundwater was not encountered at SB-01 and refusal was encountered at SB-02 and SB-03.

Soil Vapor Probe Installation

At five soil boring locations, EP2 off-set between five to seven feet and installed five temporary soil vapor probes (SV-01 through SV-05) using a Geoprobe ® 6712DT direct-push technology drill rig equipped with a 2-inch diameter hammer rod. Three soil vapor sample probes (SV-01, SV-02 and SV-04) were installed within one to three feet below the proposed cellar level. SV-01, SV-02, and SV-05 were installed to a depth of approximately 12.0 feet bgs (EL +25 to EL +27)

and SV-04 was installed 9.0 feet bgs (EL+29.5). In the proposed elevator pit location, a soil vapor probe was installed to a depth of approximately 8 feet bgs (EL+31). In addition, an ambient air sample (AA-01) was collected 3 feet above the ground surface.

Polyethylene tubing (1/4-inch) retrofitted with moisture filters were placed in each borehole and backfilled with sand. Bentonite was placed at the top of each soil vapor point to create a seal. Prior sampling, a helium leak-detection test was performed at each soil vapor were purged at a flow rate less than 0.2 liters per minute (L/min) to minimize ambient air infiltration. Methodologies used for soil vapor assessment conformed to the NYSDOH Final Guidance on Soil Vapor Intrusion, October 2006. The soil vapor sampling locations are shown on **Figure 2**. The soil vapor sampling logs are presented on **Appendix G**.

Sample Location Survey

The samples were located using a tape measure from fix locations at the Site.

4.3 Sample Collection and Chemical Analysis

Sampling performed as part of the field investigation was conducted for all Areas of Concern and also considered other means for bias of sampling based on professional judgment, area history, discolored soil, stressed vegetation, drainage patterns, field instrument measurements, odor, or other field indicators. OER-approved media including soil and soil vapor have been sampled and evaluated in the RIR. Discrete (grab) samples have been used for final delineation of the nature and extent of contamination and to determine the impact of contaminants on public health and the environment. The sampling performed and presented in this RIR provides sufficient basis for evaluation of remedial action alternatives, establishment of a qualitative human health exposure assessment, and selection of a final remedy.

Soil Sampling

Soil samples were collected continuously at five-foot intervals from grade to a maximum depth of 25 feet bgs. GZA personnel screened the soils samples for the presence of total organic vapors using a photoionization detector (PID) equipped with a 10.6 electron volts (eV) lamp and observed for evidence of impacts (e.g., odor, staining). At a minimum, two soils samples (one shallow and one deep) were collected for laboratory analysis from soil boring locations within the proposed building footprint. Five (5) shallow soil samples were collected from 0 to 2 feet bgs

from SB-01 throughout SB-05. Five (5) deep samples were collected from depths ranging from 8 to 14 feet bgs. The varying depths of the deep samples were due to drilling refusals (i.e., anticipated to be bedrock surface based on Site conditions) encountered during the RI. Two (2) shallow samples were also collected from the SB-06 and SB-07, the borings outside the proposed building footprint. The soils were field screened using a PID.

For quality assurance/quality control (QA/QC), one trip blank sample was included in the shipment to the analytical laboratory for VOCs analysis. Representative portions of the soil samples were collected into laboratory-supplied containers. Discrete soil samples being submitted for volatile organic compounds (VOCs) were collected using laboratory-supplied TerraCore™ samplers. In total, 12 soil samples were collected for chemical analysis during this RI. Each soil sample was collected and placed into pre-cleaned, laboratory-prepared containers using disposable, one-time use nitrile gloves. The sample jars were uniquely labeled and placed in insulating coolers with ice and submitted under standard chain of custody protocol to Alpha Analytical Laboratories of Westborough, Massachusetts (Alpha), an Environmental Laboratory Approval Program (ELAP)-certified laboratory.

Data on soil sample collection for chemical analyses, including dates of collection and sample depths, is reported in **Table 1**. **Figure 2** shows the location of samples collected in this investigation. Laboratories and analytical methods are shown below.

Soil Vapor and Ambient Air Sampling

Soil vapor samples were collected by connecting the soil vapor probes to 6-liter stainless steel SUMMA ® canister with 2-hour flow regulators via Teflon™ sampling tubing. Soil vapor samples were submitted under standard chain of custody protocol to Alpha. Five soil vapor probes were installed, and five vapor samples (SV-01 through SV-05) were collected for chemical analysis during this RI. In addition, one summa cannister with a dedicated regulator was placed between 3 to 5 feet above ground surface to collect and analyze ambient air during the RI. The soil vapor and ambient air sampling locations are shown in **Figure 2**. Soil vapor and ambient air sample collection data is reported in **Table 1**. Soil vapor sampling logs are included in **Appendix G**. Methodologies used for soil vapor assessment conform to the *NYSDOH Final Guidance on Soil Vapor Intrusion, October 2006.*

Chemical Analysis

Chemical analytical work presented in this RIR has been performed in the following manner:

Factor	**Description**
Quality Assurance Officer	The chemical analytical quality assurance is directed by Reinbill P. Maniquez
Chemical Analytical Laboratory	Chemical analytical laboratory(s) used in the RI is NYS ELAP certified and was Alpha Analytical Laboratories of Westborough, Massachusetts.
Chemical Analytical Methods	Soil analytical methods: • VOCs by EPA Method 8260C (rev. 2006); • SVOCs by EPA Method 8270D (rev. 2014); • Metals by EPA Method 6010D /7000 (rev. 2018); • Pesticides by EPA Method 8081B (rev. 2007); • PCBs by EPA Method 8082A (rev. 2007); • Per- and polyfluoroalkyl substances (PFAS) by EPA Method 537.1 (Jan 2021) Soil vapor analytical methods: • VOCs by TO-15 (rev. 1999).

Results of Chemical Analyses

The laboratory data are summarized for soil in **Tables 2 to 6** and soil vapor in **Table 7**. Laboratory data deliverables for soil and soil vapor samples evaluated in this RIR are provided in **Appendix H**.

4.4 Deviations from Work Plan

The RI was conducted in accordance with the OER-approved June 2021 Phase II SIWP with the following deviations:

- Groundwater was not encountered at SB-01 and refusal was encountered at SB-02 and SB-03. Therefore, groundwater samples were not able to be collected.

- Several locations were advanced to shallower depths due to bedrock refusals; these include SB-03 from proposed 18 feet bgs to 10 feet bgs, SB-04 from proposed 14 feet bgs to 13 feet bgs, SB-06 and SB-07 from proposed 4 feet bgs to 2 feet bgs.

5.0 ENVIRONMENTAL EVALUATION

5.1 Geological and Hydrogeological Conditions

Stratigraphy

Based on a review of the United States Geological Survey (USGS) 7.5 Minute Series 2019 topographic maps of Central Park, New York, Quadrangle, the Site is located approximately at 35 feet above mean sea level (msl) based on the North American Vertical Datum of 1988 (NAVD88). The topographic gradient near the Site slopes gradually downward to the east/southeast. The nearest water body is the Harlem River located approximately 0.25 miles to the east, and the Spuyten Duyvil Creek, located approximately 0.28 miles to the north of the Site. The RI showed a subsurface profile consisting of fill material to a depth of approximately 1 to 2.5 feet bgs, underlain by a sand stratum down to depth of about 6 to 17 feet bgs, and underlain by bedrock. According to the 1990 USGS publication Bedrock and Engineering Geologic Maps of New York County and Parts of Kings and Queens Counties, New York, and Parts of Bergen and Hudson Counties, New Jersey (Baskerville 1990), bedrock in this area is characteristically white calcite dolomite marble (Inwood Marble). No elevated PID readings or evidence of contamination (e.g., staining, odors) were observed in the soil samples. No elevated PID readings were observed during purging of soil vapor samples.

Hydrogeology

According to the USGS Groundwater in Bronx, New York, and Richmond Counties (Perlmutter and Arnow, 1953), groundwater is anticipated to be greater than 25 feet bgs in the vicinity of the Site, which may be below the bedrock surface. Groundwater flow is generally to the southeast towards the Harlem River. Groundwater was not encountered during the RI at depths above the bedrock surface.

5.2 Soil Chemistry

Soil/fill samples collected during the RI were compared to the New York State Department of Environmental Conservation (NYSDEC) 6NYCRR Part 375 Section 6.8 Unrestricted Use and Residential Use Soil Cleanup Objectives (SCOs).

- No VOCs, SVOCs, or PCBs were detected above Unrestricted Use SCOs;

- Metals including lead (max. of 177 mg/kg within SB-01 [0-2’]) and zinc (max. of 139 mg/kg within SB-07 [0-2’]) were detected at concentrations above their Unrestricted Use SCOs.
- One pesticide, 4,4’-DDT (at 0.00554 mg/kg within SB-07 [0-2’]), was detected in at a concentration above its Unrestricted Use SCO.
- Emerging contaminants detections within SB-03 [5-10’] included PFHxA (at 0.000057 mg/kg), PFOS (at 0.000629 mg/kg), and PFOA (at 0.000417 mg/kg).

Data collected during the RI is sufficient to delineate the vertical and horizontal distribution of contaminants in soil/fill at the Site. A summary table of data for chemical analyses performed on soil samples is included in **Table 2 through 6**. **Figure 4** shows the location and posts the values for soil/fill that exceed the 6NYCRR Part 375-6.8 Soil Cleanup Objectives.

5.3 Groundwater Chemistry

Due to groundwater not being encountered at the deepest boring, and the encountered refusals, groundwater samples were not collected.

5.4 Soil Vapor and Ambient Air Chemistry

Soil vapor samples collected during the RI were compared to the New York State Department of Health (NYSDOH) Final Guidance for Evaluating Soil Vapor Intrusion matrices dated October 2006.

- Soil vapor results indicated low levels of petroleum-related VOCs and low levels of chlorinated VOCs.
- The total concentration of petroleum-related VOCs (e.g., benzene, toluene, ethylbenzene, and xylenes [BTEX]) ranged from 29.62 micrograms per cubic meter ($\mu g/m^3$) to 210 $\mu g/m^3$, with the maximum concentration in SV-04.
- Chlorinated VOCs (CVOCs) including tetrachloroethene (PCE) (ranging from 6.18 $\mu g/m^3$ to 9.09 $\mu g/m^3$, with the maximum concentration in SV-01) and methylene chloride (ranging from 2.25 to 4.41 $\mu g/m^3$, with the maximum concentration in SV-02) were detected within the soil vapor samples. Other CVOCs 1,1,1-trichloroethane (1-1-1-TCA), carbon tetrachloride, trichloroethene (TCE), and vinyl chloride were not detected within any of the soil vapor samples.

- Petroleum-related VOCs and CVOCs were not detected within the ambient air sample.

Data collected during the RI is sufficient to delineate the distribution of contaminants in soil vapor at the Site. A summary table of data for chemical analyses performed on soil vapor samples is included in **Table 7**. **Figure 5** shows the location and posts the values for soil vapor samples with detected concentrations.

5.5 Prior Activity

Based on an evaluation of the data and information from the RIR, disposal of significant amounts of hazardous waste is not suspected at this site.

5.6 Impediments to Remedial Action

There are no known impediments to remedial action at this property.

TABLE NOTES:

Exceeds Part 375 Unrestricted Use SCOs

U : Not detected at the reported detection limit for the sample.

J : Estimated Value. The target analyte concentration is below the reporting limit (RL), but above the method detection limit (MDL).

P : The RPD between the results for the two columns exceeds the method-specified criteria.

I : The lower value for the two columns has been reported due to obvious interference.

- : No Standard or Guidance Value.

mg/kg : Milligrams per kilogram.

feet bgs : Feet below ground surface.

mg/kg : Milligrams per kilogram.

TABLE NOTES:

Exceeds Part 375 Unrestricted Use SCOs

U : Not detected at the reported detection limit for the sample.

J : Estimated Value. The target analyte concentration is below the reporting limit (RL), but above the method detection limit (MDL).
P : The RPD between the results for the two columns exceeds the method-specified criteria.
I : The lower value for the two columns has been reported due to obvious interference.
- : No Standard or Guidance Value.
feet bgs : Feet below ground surface.
mg/kg : Milligrams per kilogram.

TABLE NOTES:

NYSDOH : New York State Department of Health.
NYSDOH Fuel Oil 2003: Values are based on NYSDOH 2003 Study of volatile organic chemicals in air of fuel oil heated homes
EPA BASE 2001: Values are based on USEPA Building Assessment and Survey (BASE) database summa canister method
U : Not detected at the reported detection limit for the sample.
ug/m^3: micrograms per cubic meter.
-- : No Standards or Guideance Value.
ft bgs : Feet below ground surface.
Qual : Qualifiers.
177: Italics indicates that the analyte was undetected; however, the reporting limit is greater than the standard or guidance value

	Exceeds both NYSDOH 2003 Upper Fence Limit Indoor Air and the USEPA 2001 90th Percentile Indoor Air values
	Exceeds both NYSDOH 2003 Upper Fence Limit Outdoor Air and the USEPA 2001 90th Percentile Outdoor Air values
	Exceeds NYSDOH Fuel Oil 2003 Upper Fence Limit Indoor Air Values
	Exceeds NYSDOH Fuel Oil 2003 Upper Fence Limit Outdoor Air Values
	Exceeds EPA BASE 2001 90th Percentile Indoor Air Value
	Exceeds EPA BASE 2001 90th Percentile Outdoor Air Value

GENERAL NOTES

1. THE LOCATION OF PROPOSED BUILDING WAS APPROXIMATED BASED ON DRAWING V–001.0.0, TITLED "BOUNDARY & TOPOGRAPHIC SURVEY", PROVIDED BY CONTROL POINT ASSOCIATES, INC. PC DATED MAY 7, 2021.
2. THE PURPOSE OF THIS DRAWING IS TO LOCATE, DESCRIBE, AND REPRESENT THE POSITIONS OF PROPOSED EXPLORATION IN RELATION TO THE SUBJECT SITE. THIS DRAWING IS NOT CONSIDERED A LAND SURVEY. THE LOCATIONS SHOWN SHOULD BE CONSIDERED ACCURATE ONLY TO THE DEGREE IMPLIED BY THE METHOD USED.
3. ALL ELEVATIONS GIVEN ARE REFERENCED TO THE NORTH AMERICAN VERTICAL DATUM OF 1988 (NAVD88).

APPENDIX A

LIMITATIONS

USE OF REPORT

1. GZA GeoEnvironmental, Inc. (GZA) prepared this report on behalf of, and for the exclusive use of our Client for the stated purpose(s) and location(s) identified in the Proposal for Services and/or Report. Use of this report, in whole or in part, at other locations, or for other purposes, may lead to inappropriate conclusions; and we do not accept any responsibility for the consequences of such use(s). Further, reliance by any party not expressly identified in the agreement, for any use, without our prior written permission, shall be at that party's sole risk, and without any liability to GZA.

STANDARD OF CARE

2. GZA's findings and conclusions are based on the work conducted as part of the Scope of Services set forth in the Proposal for Services and/or Report and reflect our professional judgment. These findings and conclusions must be considered not as scientific or engineering certainties, but rather as our professional opinions concerning the limited data gathered during the course of our work. Conditions other than described in this report may be found at the subject location(s).

3. GZA's services were performed using the degree of skill and care ordinarily exercised by qualified professionals performing the same type of services, at the same time, under similar conditions, at the same or a similar property. No warranty, expressed or implied, is made. Specifically, GZA does not and cannot represent that the Site contains no hazardous material, oil, or other latent condition beyond that observed by GZA during its study. Additionally, GZA makes no warranty that any response action or recommended action will achieve all of its objectives or that the findings of this study will be upheld by a local, state or federal agency.

4. In conducting our work, GZA relied upon certain information made available by public agencies, Client and/or others. GZA did not attempt to independently verify the accuracy or completeness of that information. Inconsistencies in this information which we have noted, if any, are discussed in the Report.

SUBSURFACE CONDITIONS

5. The generalized soil profile(s) provided in our Report are based on widely-spaced subsurface explorations and are intended only to convey trends in subsurface conditions. The boundaries between strata are approximate and idealized, and were based on our assessment of subsurface conditions. The composition of strata, and the transitions between strata, may be more variable and more complex than indicated. For more specific information on soil conditions at a specific location refer to the exploration logs. The nature and extent of variations between these explorations may not become evident until further exploration or construction. If variations or other latent conditions then become evident, it will be necessary to reevaluate the conclusions and recommendations of this report.

6. Water level readings have been made, as described in this Report, in and monitoring wells at the specified times and under the stated conditions. These data have been reviewed and interpretations have been made in this report. Fluctuations in the level of the groundwater however occur due to temporal or spatial variations in areal recharge rates, soil heterogeneities, the presence of subsurface utilities, and/or natural or artificially induced perturbations. The observed water table may be other than indicated in the Report.

COMPLIANCE WITH CODES AND REGULATIONS

7. We used reasonable care in identifying and interpreting applicable codes and regulations necessary to execute our scope of work. These codes and regulations are subject to various, and possibly contradictory, interpretations. Interpretations and compliance with codes and regulations by other parties is beyond our control.

SCREENING AND ANALYTICAL TESTING

8. GZA collected environmental samples at the locations identified in the Report. These samples were analyzed for the specific parameters identified in the report. Additional constituents, for which analyses were not conducted, may be present in soil, groundwater, surface water, sediment and/or air. Future Site activities and uses may result in a requirement for additional testing.

9. Our interpretation of field screening and laboratory data is presented in the Report. Unless otherwise noted, we relied upon the laboratory's QA/QC program to validate these data.

10. Variations in the types and concentrations of contaminants observed at a given location or time may occur due to release mechanisms, disposal practices, changes in flow paths, and/or the influence of various physical, chemical, biological or radiological processes. Subsequently observed concentrations may be other than indicated in the Report.

INTERPRETATION OF DATA

11. Our opinions are based on available information as described in the Report, and on our professional judgment. Additional observations made over time, and/or space, may not support the opinions provided in the Report.

ADDITIONAL INFORMATION

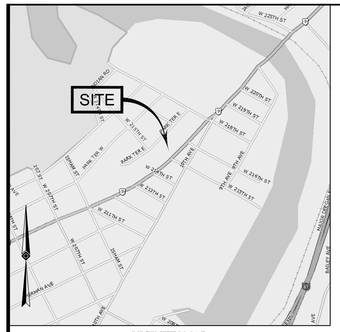
12. In the event that the Client or others authorized to use this report obtain additional information on environmental or hazardous waste issues at the Site not contained in this report, such information shall be brought to GZA's attention forthwith. GZA will evaluate such information and, on the basis of this evaluation, may modify the conclusions stated in this report.

ADDITIONAL SERVICES

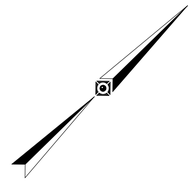
13. GZA recommends that we be retained to provide services during any future investigations, design, implementation activities, construction, and/or property development/ redevelopment at the Site. This will allow us the opportunity to: i) observe conditions and compliance with our design concepts and opinions; ii) allow for changes in the event that conditions are other than anticipated; iii) provide modifications to our design; and iv) assess the consequences of changes in technologies and/or regulations.

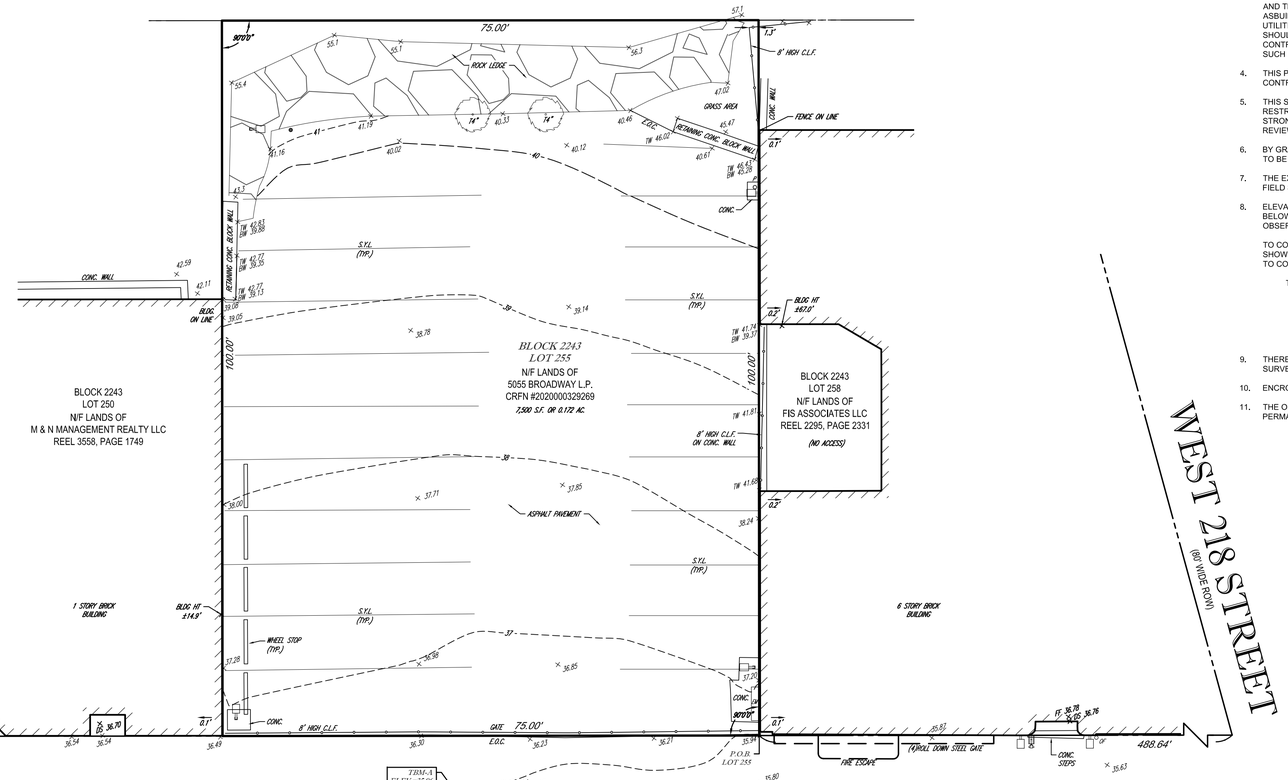
APPENDIX B

BOUNDARY AND TOPOGRAPHIC SURVEY



VICINITY MAP
©2008 DeLorme. Street Atlas USA
(NOT TO SCALE)





NOTES:

1. PROPERTY KNOWN AS LOT 255, BLOCK 2243, AS SHOWN ON THE NEW YORK CITY DIGITAL TAX MAP OF THE BOROUGH OF MANHATTAN, CITY, COUNTY AND STATE OF NEW YORK.
2. AREA = 7,500 SQUARE FEET OR 0.172 ACRES.
3. LOCATION OF UNDERGROUND UTILITIES ARE APPROXIMATE. LOCATIONS AND SIZES ARE BASED ON UTILITY MARK-OUTS, ABOVE GROUND STRUCTURES THAT WERE VISIBLE & ACCESSIBLE IN THE FIELD, AND THE MAPS AS LISTED IN THE REFERENCES AVAILABLE AT THE TIME OF THE SURVEY. AVAILABLE ASBUILT PLANS AND UTILITY MARKOUT DOES NOT ENSURE MAPPING OF ALL UNDERGROUND UTILITIES AND STRUCTURES. BEFORE ANY EXCAVATION IS TO BEGIN, ALL UNDERGROUND UTILITIES SHOULD BE VERIFIED AS TO THEIR LOCATION, SIZE AND TYPE BY THE PROPER UTILITY COMPANIES. CONTROL POINT ASSOCIATES, INC. DOES NOT GUARANTEE THE UTILITIES SHOWN COMPRISE ALL SUCH UTILITIES IN THE AREA EITHER IN SERVICE OR ABANDONED.
4. THIS PLAN IS BASED ON INFORMATION PROVIDED BY CLIENT, A SURVEY PREPARED IN THE FIELD BY CONTROL POINT ASSOCIATES, INC., AND OTHER REFERENCE MATERIAL AS LISTED HEREON.
5. THIS SURVEY WAS PREPARED WITHOUT THE BENEFIT OF A TITLE REPORT AND IS SUBJECT TO THE RESTRICTIONS, COVENANTS AND/OR EASEMENTS THAT MAY BE CONTAINED THEREIN, IT IS STRONGLY RECOMMENDED THAT A COMPLETE TITLE SEARCH BE PROVIDED TO THE SURVEYOR FOR REVIEW PRIOR TO THE PLACEMENT OF OR ALTERATION TO IMPROVEMENTS ON THE PROPERTY.
6. BY GRAPHIC PLOTTING ONLY PROPERTY IS LOCATED IN FLOOD HAZARD ZONE X (AREAS DETERMINED TO BE OUTSIDE THE 0.2% ANNUAL CHANCE FLOODPLAIN) PER REF. #2.
7. THE EXISTENCE OF UNDERGROUND STORAGE TANKS, IF ANY, WAS NOT KNOWN AT THE TIME OF THE FIELD SURVEY.
8. ELEVATIONS REFER TO NORTH AMERICAN VERTICAL DATUM OF 1988 (NAVD88) WHICH IS 1.65' FEET BELOW THE BOROUGH OF MANHATTAN HIGHWAY DATUM. ELEVATIONS ARE BASED ON GPS OBSERVATIONS UTILIZING THE VRS NETWORK (KEYNETGPS).

   TO CONVERT TO MANHATTAN HIGHWAY DATUM SUBTRACT 1.65 FEET FROM THE ELEVATIONS SHOWN.
   TO CONVERT TO NGVD 1929 ADD 1.10 FEET TO THE ELEVATIONS SHOWN.

   TEMPORARY BENCH MARKS SET:

   TBM-A: X-CUT SET IN CONCRETE ON THE WEST SIDE OF BROADWAY.
   ELEVATION=35.96

   TBM-B: X-CUT SET IN CONCRETE ON THE EAST SIDE OF BROADWAY.
   ELEVATION=35.04
9. THERE WERE NO NATURAL STREAMS OR WATERCOURSES VISIBLE AT THE TIME OF THE FIELD SURVEY.
10. ENCROACHMENTS AND VAULTS, IF ANY, BELOW SURFACE NOT SHOWN HEREON.
11. THE OFFSETS SHOWN ARE NOT TO BE USED FOR THE CONSTRUCTION OF ANY STRUCTURE, FENCE, PERMANENT ADDITION, ETC.

EXECUTIVE SUMMARY

This Phase I Environmental Site Assessment (ESA) was prepared by Langan Engineering, Environmental, Surveying, Landscape Architecture and Geology, D.P.C. on behalf of Timber Equities LLC to identify current or potential environmental concerns and Recognized Environmental Conditions (RECs) at the ±7,500 square foot proposed development site consisting of the property at 5055 Broadway (Block 2243, Lot 255) located in New York, New York. The ESA included a site inspection, review of historical information, completion of a federal/state/local environmental database search, and interviews with local and state agencies to assess current and past site conditions.

The subject property is currently occupied by an open-air, at-grade, asphalt-paved parking lot. There is a nine-car, aboveground, hydraulic lift located along the northeastern portion of the property used for the storage of vehicles.

Based on information obtained during the visual inspection of the subject property, review of environmental databases and historic information, and contact with federal/state/local official agencies, no RECs were identified at the site. The following de minimis conditions and business environmental risks that may impact proposed redevelopment of the site were identified:

De Minimis Conditions

A de minimis condition is defined as a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Minor staining was observed across the asphalt pavement and on a concrete pad beneath the hydraulic lift tank, motor, and three five-gallon buckets of motor oil during the site inspection. The pavement and pad otherwise appeared to be in good condition with no cracks. The staining observed is a housekeeping issue and is unlikely to result in negative impacts to underlying soil or groundwater.

Business Environmental Risks

A BER is defined as a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice. Consideration of BER issues may involve addressing one or more non-scope

considerations. It is the opinion of the environmental professional that the following represent business environmental risks:

(E) Designation for Hazardous Materials and Noise

Based on records maintained online by the New York City Mayor's Office of Environmental Coordination (NYC MOEC), the subject property is associated with City Environmental Quality Review (CEQR) No. 17DME007M. In 2018, the City of New York proposed a series of land use and other discretionary actions to implement the Inwood NYC Action Plan to redevelop and revitalize an approximately 62-block area of the Inwood neighborhood, encompassing the subject property. A Final Environmental Impact Statement (FEIS) was prepared in June 2018. According to the FEIS, the subject property would be rezoned as a residential district (R7D) with a commercial overlay (C2-4) and was assigned an (E) designation (E-408) requiring a hazardous materials testing protocol and window wall attenuation/alternate ventilation. The Inwood Zoning Proposal was approved by the City Council on 8 August 2018. According to information maintained online, shortly after the approval of the rezoning, a coalition of community advocates filed a lawsuit arguing that that city did not conduct a proper environmental review or address community concerns during the environmental review process. In December 2019, the New York Supreme Civil Court annulled the 2018 rezoning; however, in July 2020, the State Supreme Court's Appellate Division overturned the lower court ruling and reinstated the rezoning.

The (E) designation for hazardous materials will require completion of an environmental subsurface investigation and submittal of a Remedial Action Work Plan (RAWP) that details remedial measures that will be incorporated into any proposed site redevelopment plans. The (E) designation for noise will also require a RAWP detailing the proposed redevelopment, including the specific window and framing system to be used (with supporting laboratory testing data and catalogue cut sheets) and signed sealed mechanical and architectural plans showing the windows to be used, wall construction and the means with which the alternate means of ventilation will be achieved. Review and approval of these reports by the New York City Office of Environmental Remediation (NYCOER) is required in order to obtain a building permit from the NYC Department of Buildings.

Surrounding Sites

Potential impacts from current and historical operations conducted at adjacent and nearby properties involving the use of aboveground storage tanks (ASTs), underground storage tanks (USTs), and spills represent a business environmental risk due to the potential for offsite migration of contaminants to impact sub-slab soil and/or groundwater below the subject site. Specifically, current and historical adjacent property uses include an automobile repair shop and

a former gasoline station at the adjacent property to the southeast located across Broadway at 5060 Broadway. Additionally, there are three open, upgradient spills (NYSDEC Spill Nos. 1501141, 1501142, and 1501143) associated with the Park Terrace Garden Apartment Complex located approximately 175- to 583-feet to the northwest of the subject property. According to the case narrative for each of these spill cases, five USTs were reportedly closed in place at the complex in the 1980's. Petroleum product was observed seeping into the basements of three of the residential apartment buildings in the complex in 2015 and monitoring wells were installed for the observation and removal of product. Periodic well gauging and spent absorbent pad removal has occurred since the installation of these wells and product was still observed in several of these wells as recently as December 2019. Due to the (E) designation for hazardous materials, a subsurface investigation will be required at the subject property that will identify any impacts that may be present in subsurface soil, groundwater, or soil vapor as the result of these surrounding sites. The findings may also impact any proposed dewatering operations as laboratory analytical results documenting discharge water quality are required for city sewer discharge permits.

Historic Urban Fill

Based on the urban density of the area, it is likely that the subject site area contains historic urban fill which is typically characterized by elevated concentrations of poly-aromatic hydrocarbons (PAHs) and metals. Due to the (E) designation for hazardous materials, a subsurface investigation will be required that will identify any impacts that are present within the fill material. This information will be used to develop a NYCOER-approved RAWP that will specify that any soil disturbance will need to be completed in accordance with that document; including implementation of soil handling and management procedures to address excavation, reuse, handling, and offsite disposal of this material.

1.0 INTRODUCTION

Langan Engineering, Environmental, Surveying, Landscape Architecture and Geology, D.P.C. (Langan) has completed a Phase I Environmental Site Assessment (ESA) of a ±7,500 square foot site located at 5055 Broadway, Manhattan, New York (Figure 1).

This ESA was conducted to identify current or potential environmental concerns and/or Recognized Environmental Conditions (RECs) resulting from past or current activities on the subject property, as well as to evaluate immediately surrounding environs with the potential to impact upon the property. The assessment consisted of a site reconnaissance of all accessible property areas, a review of State and Federal environmental databases as they concern the subject property and surrounding areas, contact with Federal, State and local agencies, a review of Sanborn Fire Insurance Maps of the subject property and surrounding areas, and a review of local/county records.

The ESA was conducted in a manner consistent with industry standard and practice and in accordance with the Standards of the American Society for Testing and Materials (ASTM) E1527-13 Standard Practice for Environmental Site Assessments. Any deviations from this practice are provided in Section 11.0 of this report.

2.0 RELIANCE/LIMITATIONS

This ESA report was prepared for Timber Equities LLC, for the 5055 Broadway property and for the objectives of due diligence. The report is intended to be used in its entirety. Excerpts taken from this report are not necessarily representative of the assessment findings. Langan cannot assume responsibility for use of this report for any property other than the subject property addressed herein, or by any third party, without a written authorization from Langan.

Langan's scope of services, as described in the proposal dated 15 September 2020, was limited to that agreed to with Timber Equities LLC and no other services beyond those explicitly stated are implied. No exploratory borings, sampling of soil, soil vapor, or groundwater, or laboratory analysis were performed by Langan as part of the scope of services. Reliance on this report is conditioned on agreement to the terms and conditions provided with the September 2020 proposal.

This Phase I ESA was not intended to be a definitive investigation of possible environmental impacts at the subject property. The purpose of this investigation was limited to determining if there is reason to suspect the possibility of Recognized Environmental Conditions (RECs) at the subject property. It should be understood that even the most comprehensive Phase I ESA may fail to detect environmental liabilities at a particular site. Therefore, Langan cannot "insure" or "certify" that the subject property is free of environmental impacts. No expressed or implied representation or warranty is included or intended in this report, except that our services were performed, within the limits prescribed by our client, with the customary thoroughness and competence of our profession. The user is cautioned that federal, state, and local laws may impose environmental obligations that are beyond the scope of ASTM Practice E 1527-13.

The conclusions, opinions and recommendations provided in this report are based solely on the following activities:

- Visual observations of the subject property and the immediate vicinity at the time of Langan's site visit;
- Review of relevant available historical information; and,
- Correspondence and/or discussion with personnel knowledgeable about the site.

The conclusions, opinions and recommendations are intended exclusively for the purpose stated herein, at the specified subject property, as it existed at the time of our site visit.

The User is responsible for the review and identification of environmental liens, activity, and use limitations, and for ascertaining reasons for significantly lower purchase property price in accordance with Section 6 of ASTM E 1527-13. A questionnaire covering these above-concerns was provided to Timber Equities LLC and is included as Appendix A. In addition, a similar questionnaire was provided to the property owner but was not returned; as such, a blank questionnaire is included as Appendix B. If any of these above-concerns were uncovered during the course of the Phase I ESA, they are addressed in this report.

The report findings are based in part on information provided by local, county and state officials and environmental databases from Federal and State sources. Langan assumes no responsibility for the accuracy and completeness of this information.

Visual observations discussed in this report represent conditions at the time of the site inspection and may not be representative of the past or future site conditions.

As per ASTM E1527-13, Phase I ESA Report deviations, as well as professional opinions regarding these deviations, are listed in Section 11.0.

This ESA has been prepared for the sole use of Timber Equities LLC. This ESA should not be relied upon by other parties without the express consent of Langan and Timber Equities LLC. In accordance with Section 4.6 of ASTM E 1527-13 and 40 CFR §312.20, a Phase I ESA may be considered valid for one year starting from the commencement date of the assessment listed on the front cover of this report. The formal property acquisition/real estate transaction must take place during this period. However, the following components must be conducted or updated within 180 days (six months) prior to the date of the property acquisition/real estate transaction:

- Interviews with past and present owners, operators and occupants;
- Searches for recorded environmental cleanup liens;
- Review of governmental records;
- Site Reconnaissance of the property and adjoining properties; and,
- The declaration by the Environmental Professional.

3.0 SITE DESCRIPTION

The subject property is designated as Block 2243, Lot 255 by the New York City Department of Finance (Figure 2). The subject property is currently occupied by an at-grade asphalt-paved parking lot.

The subject property is bound to the northeast by a six-story mixed-use residential/commercial building, to the northwest by a six-story multi-family residential building, to the southwest by a one-story commercial/office building, and to the southeast by Broadway followed by a one-story building containing a restaurant, automobile repair shop, and a used automobile dealership.

The property was most-recently zoned as a commercial district (C8-3). However, as part of the Inwood Rezoning Proposal, the property would be rezoned as a residential district (R7D) with a commercial overlay (C2-4) and would be located within the Special Inwood District. The Special Inwood District was to be

established as part of the Inwood NYC Action Plan to promote the development of affordable housing, encourage economic development that benefits the local community, facilitate the development of open space along the Harlem River and preserve community character west of 10th Avenue. The Special District regulations aim to create walkable inviting streets. The Special District also establishes a Waterfront Action Plan to build out public waterfront open space along the Harlem River. As will be discussed in further detail in Section 8.0 and according to the New York City Department of City Planning zoning map dated 8 August 2018, these zoning changes went into effect in August 2018 but were no longer in effect as of December 2019 due to a court order. According to information maintained online however, a subsequent court ruling in July 2020 overturned the prior court order and reinstated the rezoning.

4.0 GEOLOGIC AND HYDROGEOLOGIC CONDITIONS

For the purpose of report completeness and to better understand the subsurface conditions, the geologic conditions in the general area of the subject property are discussed in this section.

The "Surficial Geologic Map of New York" by the New York State Museum State Geological Survey indicates that the surficial geology at the site consists of bedrock which is exposed or generally within one-meter of the surface. According to the "Bedrock and Engineering Geologic Maps of New York County" by Charles A. Baskerville the site is underlain by Inwood Marble which consists of calcitic and dolomitic marble alternating with layers of silicate minerals.

Test pits were completed in the vicinity of the subject property during a geotechnical investigation conducted by Langan in 2007 at a site located approximately 900-feet to the northeast of the subject property on Broadway. The site subsurface conditions documented during this geotechnical investigation consisted of a 3 to 6 foot thick layer of miscellaneous fill underlain by rock fill. Rock was typically encountered at depths between the surface and 8 feet b.g.s. Groundwater was not encountered during the test pit excavations.

Based on site/area topography, groundwater flow within the overburden material is anticipated to be to the southeast, towards the Harlem River.

5.0 USER PROVIDED INFORMATION

A questionnaire was completed by the User and is included in Appendix A. Information obtained from this questionnaire is discussed in the sections below. Documents provided by the User are discussed in this section.

5.1 Title Records

A Title Search was not provided by the User for this ESA. Langan completed a limited review of available online records maintained by the New York City Department of Finance to determine current and former site ownership. These records are discussed in Section 8.0.

5.2 Environmental Liens or Activity and Use Limitations

Reasonably ascertainable recorded land title records and lien records that are filed under federal, tribal, state, or local law should be reviewed to identify environmental liens or activity and use limitations, if any, that are currently recorded against the property. Any environmental liens or activity and use limitations are required to be reported to the Environmental Professional conducting the ESA per ASTM E1527-13.

No environmental liens or use limitations (engineering or institutional controls) were identified for the subject property in the radius report or by the User. Information regarding the 'E'-designation status of the property can be found in Section 8.0 of this report.

5.3 Specialized Knowledge

Specialized knowledge is defined by ASTM E 1527-13 as *"any specialized knowledge or experience that is material to recognized environmental conditions in connection with the property*". For example, a User is involved in the same line of business as current or former occupants of the property or adjoining property and has specialized knowledge of the chemicals and processes used in this line of business.

The User did not provide specialized knowledge material related to recognized environmental conditions in connection with the property as part of this ESA.

5.4 Valuation Reduction for Environmental Issues

In a transaction involving the purchase of a parcel of commercial real estate, the User shall consider the relationship of the purchase price of the property to the fair market value of the property if the property was not affected by hazardous substances or petroleum products. The User should try to identify an explanation for a lower price which does not reasonably reflect fair market value if the property were not contaminated.

No information related to a valuation reduction for environmental issues was provided to Langan.

5.5 Commonly Known Information

If the user is aware of any commonly known or reasonably ascertainable information within the local community about the property that is material to recognized environmental conditions in connection with the property, it is the User's responsibility to communicate such information. This information may include past uses of the property, specific chemicals that were used on site, spills or releases or environmental cleanups that have taken place.

No additional information regarding the environmental condition of the subject site was provided to Langan.

5.6 Documentation Provided by the User

No additional information regarding the environmental condition of the subject site was provided to Langan.

6.0 REVIEW OF PREVIOUS LAND USE

Historic Sanborn Fire Insurance Maps and City Directory Information were requested from Environmental Data Resources (EDR) of Shelton, Connecticut. Provided are descriptions of the materials provided by these resources.

6.1 Sanborn Fire Insurance Maps

Sanborn Fire Insurance Maps of the subject property and surrounding area dated 1893, 1900, 1913, 1935, 1950, 1968, 1969, 1977, 1979, 1980, 1981, 1983, 1985, 1986, 1988, 1989, 1991, 1992, 1994, 1995, 1996, 2001, 2002, 2003, 2004, and

2005 were obtained from Environmental Data Resources and reviewed as part of this ESA. Copies of Sanborn Maps are provided in Appendix C.

Subject Property

In 1893, the subject property is depicted as being vacant. No changes are shown through 1992. In 1994, the subject property is depicted as being a parking lot. No changes are shown through 2005.

Adjacent – Northeast

In 1893, the adjacent property to the northeast is occupied by an unspecified structure. In 1900, the adjacent property to the northeast is occupied by three small interconnected buildings of unspecified use. In 1913, the adjacent property to the northeast is depicted as being vacant. In 1935, a one-story commercial building is present in the northeastern portion of the property. In 1950, the adjacent property to the northeast is occupied by a six-story residential apartment building with a basement and courtyard. No changes are shown through 2005.

Adjacent – Northwest

In 1893, the adjacent property to the northwest is depicted as being vacant. No changes are shown through 1950. In 1968, the adjacent property to the northwest is occupied by a six-story residential apartment building with a courtyard and a garage in the basement. No changes are shown through 2005.

Adjacent – Southwest

In 1893, the adjacent property to the southwest is depicted as being vacant. No changes are shown through 1935. In 1950, the adjacent property to the southwest is occupied by a one-story automobile sales and upholstery building and a courtyard. No changes are shown through 1969. In 1977, the one-story building is labeled as an American Legion Hall. No changes are shown through 1992. In 1994, the one-story building is labeled for commercial use. No changes are shown through 2005.

Adjacent – Southeast

In 1893, the adjacent property to the southeast is depicted as being vacant. No changes are shown through 1913. In 1935, the adjacent property to the southeast is occupied by a one-story commercial building with a horizontal steam boiler and garage in the basement in the southern portion of the property

and a gasoline station in the northern portion of the property with five 550-gallon gasoline storage tanks and an associated one-story commercial building. In 1950, the building in the southern portion of the property is labeled as also having an areas for repairs in the basement garage. In 1968, the building in the southern portion of the property is labeled as an automobile muffler shop and garage. No changes are shown through 1981. In 1983, the gasoline station is no longer shown and the northernmost portion of the property is depicted as being vacant. No changes are shown through 2005.

Sanborn Map Review Conclusions

No historical uses of concern were identified for the subject property based on the review of the Sanborn Maps.

Historical uses of concern were identified on the adjacent property to the southeast, including a gasoline filling station between 1935 and 1981 and automobile repair between 1950 and 2005. It is in the opinion of the environmental professional that the historical uses of adjacent properties to the southeast represent a business environmental risk.

6.2 City Directory Search

City directory information was obtained from EDR in an attempt to identify past uses of the subject property and establishments in the surrounding area. As provided in the City Directory Abstract (Appendix D), business directories including city, cross-reference and telephone directories were reviewed. The site address was not included in any of the city directories searched. The city directories include listings for adjacent properties for the years 1920 through 2017 including 1920, 1927, 1931, 1934, 1938, 1942, 1947, 1950, 1956, 1958, 1963, 1968, 1973, 1978, 1983, 1988, 1993, 1994, 1998, 1999, 2000, 2004, 2006, 2009, 2014, and 2017.

Listings over the years for adjacent properties identified businesses of potential concern including: various automobile service and repair facilities (1947-2017) and gasoline filling stations (1934). Listings over the years for surrounding properties identified businesses of potential concern including: various automobile service and repair facilities (1927-2006) and gasoline filling stations (1938-1950).

City Directory Review Conclusions

Based on the review of the City Directory Abstract and the radius report (discussed in detail below), it is the opinion of the environmental professional that the potential for adverse impacts to the subject property from surrounding sites represent a business environmental risk.

7.0 REGULATORY DATABASE SEARCH

A database search report that identifies sites listed on state and federal databases within the ASTM-required radii was obtained for the property from Environmental Data Resources, Inc. (EDR) of Shelton, Connecticut. A copy of EDR's complete report is provided as Appendix E.

The report included the following databases specified by the ASTM Phase I protocol as well as non-ASTM databases (not listed):

RECOMMENDED/**REQUIRED** SEARCH DISTANCES
1.0-mile
Federal National Priority List (NPL) Federal RCRA CORRACTS Facilities List State- and Tribal-Equivalent NPL
0.5-mile
Federal Delisted NPL Federal CERCLIS/SEMS** Federal CERCLIS NFRAP List/SEMS-Archive** **Federal RCRA non-CORRACTS TSD Facilities List** State- and Tribal-Equivalent CERCLIS State and Tribal Landfill and/or Solid Waste Disposal Site Lists State and Tribal Leaking Underground Storage Tanks (LUSTs) State and Tribal Voluntary Cleanup Sites State and Tribal Brownfields Sites
Subject Property and Adjacent Properties Only
Federal RCRA Generators List State and Tribal Registered Storage Tanks
Subject Property Only
Federal ERNS List Federal Institutional Controls/Engineering Controls Registries State and Tribal Institutional Controls/Engineering Controls Registries

* A description of these databases and a complete listing of sites identified on the above-referenced databases is provided in the EDR Report.

** As of March 2016, SEMS replaced the CERCLIS database and SEMS-Archive replaced the CERCLIS NFRAP database.

Subject Property

The subject property was not listed in any of the databases searched by EDR or orphan site listings.

Surrounding Properties

Based on the large number of database records identified within one mile of the subject property (614), Langan limited the review of surrounding properties to adjacent sites and sites within 1/8-mile from the subject property. It is the environmental professional's opinion that based on the dense development of the site area, and former, current and proposed use of the site that the review of the database pertaining to this more limited area is appropriate.

Langan evaluated the following to determine whether additional environmental records with respect to these facilities, including the orphan sites, should be reviewed:

- Case status (i.e., whether a No Further Action letter has been issued or a case has been closed);
- Type of database and whether the presence of soil or ground water contamination is known;
- Distance of the site from the subject property; and,
- Whether the site is upgradient or downgradient of the subject property based on local topography and the anticipated southeast groundwater flow direction.

Database	No. of Sites within 1-mile	Adjacent sites (Y/N)	No. of Adjacent Sites

NY Spills	59	4 / 70	3	1

Langan reviewed the information provided using the above criteria and the findings for adjacent and notable records are discussed below.

Hudson River PCB Contamination

The Hudson River PCB Site is identified as a 200-miles stretch of the river that is impacted by 1.1 million pounds of PCBs discharged by General Electric Co. over thirty years. PCBs adhered to sediments and accumulated downstream of the discharge. The removal of Fort Edward Dam in 1973 resulted in the remobilization and downstream distribution of sediments that had accumulated upstream of the dam. River scouring and erosion have also contributed to redistribution. Non-aqueous phase PCB-bearing oils leaking into the river serve as a continuing source of contamination. Forty hot spots have been identified as sediments containing greater than 50 parts per million PCBs. The Hudson River PCB Site is found in the following databases: National Priorities List, Comprehensive Environmental Response, Compensation, and Liability Information System, RCRA Large-Quantity Generators, US Engineering Controls, US Institutional

Controls, NY Historic Leaking Tanks, CONSENT, Record of Decision, and NY Manifest. It is the opinion of the environmental professional that the potential for adverse environmental impacts to the subject property from these listings is low.

RCRA Non-Generators (NonGen)

The RCRA NonGen database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). RCRA Non-Generators do not currently generate hazardous waste.

According to EDR, there are 39 RCRA NonGen sites within 1/8-mile of the subject property. Excluding Con Edison sites which are typically associated with isolated hazardous waste generation and cleanup incidents, there are no RCRA NonGen sites located adjacent to the subject property.

Con Edison sites are typically associated with utility vaults under surrounding streets and public sidewalks and reflect isolated hazardous waste generation and cleanup incidents. Therefore, it is the opinion of the environmental professional that the potential for adverse impacts to the subject property from these sites is low.

NY AST

The Aboveground Storage Tank (AST) database contains NYSDEC registered ASTs. ASTs are regulated under Subtitle I of RCRA. The information for this database comes from the NYSDEC Petroleum Bulk Storage (PBS) Database.

According to the Radius Report provided by EDR, there are 31 NY AST sites located within 1/8-mile of the subject property. The following NY AST sites are located adjacent to the subject property:

- FIS Associates LLC c/o Schweid – 5057 Broadway
- 70 Park Terrace East Owners Corp – 70 Park Terrace East
- Broadway Mechanic Serv. – 5060 Broadway

FIS Associates LLS c/o Schweid located adjacent to the northeast and hydraulically down-gradient of the subject property at 5057 Broadway is identified in the NY AST database as an active PBS facility (Facility ID 2-093726) for a 5,000-gallon No. 2 fuel oil AST that is reportedly in service.

70 Park Terrace East Owners Corp located adjacent to the northwest and hydraulically cross-gradient of the subject property at 70 Park Terrace East is identified in the NY AST database as an active PBS facility (Facility ID 2-258954) for a 7,500-gallon No. 4 fuel oil AST that is reportedly in service. The site is also identified in the NY LTANKS database for a spill reported on 31 March 1998 and assigned New York State Department of Environmental Conservation (NYSDEC) Spill No. 9714576. According to the NYSDEC case narrative provided by EDR, a tank test failure occurred on 30 March 1998. A passing tank test was performed on 10 April 1998 and a copy was sent to the department. The case was administratively closed on 4 February 2004.

Broadway Mechanic Serv located adjacent to the southeast and hydraulically down-gradient of the subject property at 5060 Broadway is identified in the NY AST database as an active PBS facility (Facility ID 2-609531) for a 250-gallon waste oil AST that is reportedly in service.

NY LTANKS

The NY LTANKS database contains an inventory of reported leaking storage tank incidents from April 1986 to the present. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents identified within this database are either tank test failures, tank failures or tank overfills.

According to the Radius Report provided by EDR, there are 14 NY LTANKS sites located within 1/8-mile of the subject property; each of the spill cases associated with these sites was administratively closed between 1996 and 2018. The only NY LTANKS site located adjacent to the subject property is 70 Park Terrace East Owners Corp, which is discussed in detail above.

NY Spills

The NY Spills database includes data collected on spills reported to NYSDEC. It includes spills active as of April 1, 1986, as well as spills occurring since this date.

According to the Radius Report provided by EDR, there are 59 NY Spills sites located within 1/8-mile of the subject property; with the exception of those listed below, each of the NY Spills cases were administratively closed between 1986 and 2018. The only NY Spills site located adjacent to the subject property is Spill Number 0201424, located adjacent to the southwest and hydraulically upgradient of

the subject property at 5049 Broadway. Spill Number 0201424 is identified in the NY Spills database for a release reported to the department on 8 May 2002 and assigned NYSDEC Spill No. 0201424. According to the case narrative provided by EDR, a caller stated the owner of a building was stripping paint off the siding and residual product was left on the street causing staining. The case was administratively closed on 8 May 2002.

The following NY Spills sites have open spill cases within 1/8-mile of the subject property:

- Park Terrace – Building C – 65-67 Park Terrace East
- Park Terrace – Building B – 55-57 Park Terrace East
- Park Terrace – Building D – 75-77 Park Terrace West
- Kingsbridge Depot – 4065 10th Avenue

Three of the open spill cases identified above are associated with The Park Terrace Garden Residential Complex that is comprised of five residential buildings located approximately 175- to 583-feet to the northwest and hydraulically upgradient of the subject property at 60-72 Park Terrace West and 55-77 Park Terrace East. As a result of an unknown equipment failure reported on 1 May 2015, the department assigned NYSDEC Spill Nos. 1501141, 1501142, and 1501143 for Building D (75-77 Park Terrace East), Building B (55-57 Park Terrace East), and Building C (65-67 Park Terrace East), respectively. According to the case narratives provided by EDR, all five buildings within the residential complex were each serviced by a fuel oil UST in the past and each UST was located adjacent to its respective building's partial basement containing a boiler room. The five USTs were closed in place in the 1980's and replaced with three ASTs that service the five residential buildings. In 2015, free phase product was noted seeping into the boiler rooms of multiple buildings within the complex (Buildings B, C, and D). Monitoring wells were installed within each of the boiler rooms in these three buildings for product observations. The monitoring wells in each of the boiler rooms were gauged on a monthly basis and absorbent pads were placed within the monitoring wells to recover product. In October 2018, at the request of the department, additional monitoring wells were installed between each of the buildings and the respective UST locations for Buildings B, C, and D.

In Building C, free phase floating product has been observed in the monitoring well located adjacent to the building since it was installed in 2018 and within two of the monitoring wells installed within the boiler room since 2015. The monitoring wells and the sump within the boiler room of Building C have reportedly been inspected on a monthly basis since 2015 and the absorbent pads have been replaced as needed for the removal of product. During the most recent documented inspection in December 2019, an unspecified thickness of product was observed in two of the boiler room monitoring wells and 0.40-feet of product was observed in the monitoring well installed between the building and the UST location, which was reportedly an increase over the recent months. No further information is provided and Spill No. 1501143 remains open.

In Building B, a small amount of free product had reportedly been observed on the absorbent pads in the three monitoring wells installed within the boiler room on only one or two occasions since they were installed in 2015. The monitoring wells and the sump within the boiler room of Building B have reportedly been inspected on a monthly basis since 2015 and the absorbent pads have been replaced as needed for the removal of product. No product has been observed in the monitoring well installed between the building and the UST location since 2018. During the most recent documented inspection in December 2019, little to no free-phase product was reportedly observed within the three boiler room monitoring wells. No further information is provided and Spill No. 1501142 remains open.

In Building D, the boiler room monitoring wells have reportedly exhibited a moderate amount of free-phase product since monitoring began in 2015. No product has been observed within the monitoring well installed between Building D and the UST location since it was installed in 2018, although the initial seepage observed in the boiler room in Building D was reportedly the worst of the buildings. The monitoring wells and the sump within the boiler room of Building D have reportedly been inspected on a monthly basis since 2015 and the absorbent pads have been replaced as needed for the removal of product. Additionally, due to persistent petroleum odors within the western portion of Building D, an indoor air quality investigation was conducted. The results were compared against the New York State Department of Health (NYSDOH) guidelines and no exceedances were identified. However, elevated photoionization detector (PID) readings were observed with the crawlspace above the boiler room and the first floor lobby. As required by the department, a sub-slab depressurization system (SSDS) was installed beneath the western portion of the building and no petroleum odors have

been observed within the building since the installation. No further information is provided and Spill No. 1501141 remains open.

Kingsbridge Bus Depot – NYCT, located approximately 440-feet to the east and hydraulically down-gradient of the subject property at 4065 10th Avenue, is identified in the NY Spills database for a release that was reported to the department on 27 November 1995 and assigned NYSDEC Spill No. 9510775. According to the case narrative provided by EDR, a groundwater well extraction system is present at the site for the removal of free product. Groundwater samples collected in 2015 revealed only low-level detections of methyl tert butyl ether (MTBE). In a letter dated April 2020, it was requested that the NYSDEC allow NYCT to decommission and demolish the remediation system at the Kingsbridge Bus Depot. As detailed in the letter, the system had reached its level of effectiveness and although the Spill case remained open, any future remedial measures would not require the use of the system. In an email dated April 2020, NYSDEC concurred with the decision to decommission the remedial system. However, Spill No. 9510775 remains open.

Despite the ongoing remedial activities discussed above, due to the distance of these sites to the subject property including the presence of other buildings and roadways, it is the opinion of the environmental professional that the potential for adverse impacts to the subject property from these sites is low and these surrounding sites are considered a BER.

Drycleaners

The Drycleaners database is a list of registered drycleaning facilities.

According to the Radius Report provided by EDR, the only NY Drycleaners site located within 1/8-mile of the subject property is Bakerfield/Star Night Cleaners, located approximately 450-feet to the north and hydraulically cross-gradient of the subject property at 518 West 218th Street. Bakerfield/Star Night Cleaners is identified in the NY Drycleaners database with an installation date of 2006 and is identified as a drop shop. The site is also identified as Laverias Manuel in the EDR Hist Cleaners database as a drycleaning facility between the years 1996 and 2008. There are no hazardous waste generator or disposal records associated with the facility which would indicate active onsite drycleaning operations.

Based on the distance from the subject property, the lack of any spills cases or records of releases, and lack of records associated with the generation and disposal of hazardous waste commonly associated with active dry cleaning operations, it is the opinion of the environmental professional that the potential for adverse impacts to the subject property from this site is low.

EDR Hist Cleaners

EDR searched selected national collections of business directories and collected listings of potential dry cleaner sites. The review was limited to those categories of sources that might include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc.

According to the Radius Report provided by EDR, the following EDR Hist Cleaners sites are located within 1/8-mile of the subject property:

- Ventouris Vivian – 5031 Broadway
- Annas Cleaners – 5085 Broadway
- Starlight Cleaners Corp – 510 West 218th Street
- Garcia Leonela – 5009 Broadway

Ventouris Vivian, located approximately 270-feet to the southwest and hydraulically cross-gradient of the subject property at 5031 Broadway, is identified in the EDR Hist Cleaners database as a garment pressing and cleaners agents between the years 1977 and 1985 and a drycleaning facility between the years 1992 and 1993. There are no hazardous waste generator or disposal records associated with the facility which would indicate active onsite drycleaning operations.

Annas Cleaners, located approximately 275-feet to the northeast and hydraulically cross-gradient of the subject property at 5085 Broadway, is identified in the EDR Hist Cleaners database as a drycleaning facility between the years 1991 and 2005. There are no hazardous waste generator or disposal records associated with the facility which would indicate active onsite drycleaning operations.

Starlight Cleaners Corp, located approximately 435-feet to the northeast and hydraulically cross-gradient of the subject property at 510 West 218th Street, is identified in the EDR Hist Cleaners database as a drycleaning facility for the years between 2006 and 2008. There are no hazardous waste generator or disposal

records associated with the facility which would indicate active onsite drycleaning operations.

Garcia Leonela, located approximately 445-feet to the southwest and hydraulically cross-gradient of the subject property at 5009 Broadway, is identified in the EDR Hist Cleaners database as a drycleaning facility between the years 2002 and 2008. There are no hazardous waste generator or disposal records associated with the facility which would indicate active onsite drycleaning operations.

Based on the distance of the sites from the subject property, the lack of any spills cases or records of releases, and lack of records associated with the generation and disposal of hazardous waste commonly associated with active dry cleaning operations, it is the opinion of the environmental professional that the potential for adverse impacts to the subject property from these sites is low.

<u>EDR Hist Auto</u>

EDR searched selected national collections of business directories and collected listings of potential gas station/filling station/service station sites. The review was limited to those categories of sources that might include dry cleaning establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc.

According to the Radius Report provided by EDR, the following EDR Hist Auto sites are located within 1/8-mile of the subject property:

- Broadway Mechanic Service – 5060 Broadway Front 2
- Family Transmissions – 5063 Broadway
- AOS Service Station – 5076 Broadway
- Urreta Service Station Inc – 5080 Broadway
- Vozza Carmine – 5099 Broadway

Broadway Mechanic Service, located adjacent to the southeast and hydraulically down-gradient of the subject property at 5060 Broadway Front 2, is identified in the EDR Hist Auto database as an automotive repair shop between the years 1969 and 2014. The site is also identified in the NY AST database as discussed above.

Family Transmissions, located approximately 110-feet to the northeast and hydraulically down-gradient of the subject property at 5063 Broadway, is identified in the EDR Hist Auto database as an automotive transmission repair shop between the years 1997 and 2013. The site is also identified in the NY Tanks database as an active PBS facility (Facility ID 2-609584); however, no tank details are provided. The site is not identified in the NY Spills or LTANKS databases.

AOS Service Station, located approximately 125-feet to the east and hydraulically down-gradient of the subject property at 5076 Broadway, is identified in the EDR Hist Auto database as a gasoline service station for the years 1975 and 1976. However, the site is not identified in the NY Spills or LTANKS databases and there are no PBS records associated with the site.

Urreta Service Station Inc, located approximately 240-feet to the east and hydraulically down-gradient of the subject property at 5080 Broadway, is identified in the EDR Hist Auto database as a gasoline service station between the years 1976 and 1983 and a general automotive repair shop between 1980 and 1983. The site is also identified in the NY UST database as an active PBS facility (Facility ID 2-600906) for nine 550-gallon empty USTs that were closed and removed at an unreported time and three 4,000-gallon gasoline USTs and a 4,000-gallon diesel UST that are reportedly in service. The site is also identified in the NY LTANKS database for a release reported to the department on 28 October 1992 and assigned NYSDEC Spill No. 9208723. According to the NYSDEC case narrative provided by EDR, the release was discovered during a tank pull. No other information was provided and the case was administratively closed on 12 February 2003.

Vozza Carmine, located approximately 430-feet to the northeast and hydraulically cross-gradient of the subject property at 5099 Broadway, is identified in the EDR Hist Auto database as a gasoline service station between the years 1969 and 1983. However, the site is not identified in the NY Spills or LTANKS databases and there are no PBS records associated with the site.

<u>E-Designation</u>

The E-Designation database is a list of New York City tax lots with potential hazardous material contamination, air, and/or noise quality impacts.

According to the EDR Radius Report, there are 12 E-Designation sites located within 1/8-mile of the subject property. The following E-Designation sites are located adjacent to the subject property:

- Lot 250, Tax Block 2243 – 5045 Broadway
- Lot 18, Tax Block 2232 – 5060 Broadway

Each of these sites is identified as having an (E) designation (E-408) for noise (window wall attenuation and alternate ventilation) and hazardous materials (Phase I and Phase II testing protocol) associated with CEQR No. 17DME007M.

Government Databases Review Conclusions

Based on Langan's review of the sites identified above, environmental impacts to the subject property from the above identified sites are not anticipated. However, it should be noted that 614 sites were identified in the radius report and the potential exists that these urban sites may have a cumulative impact on regional groundwater or soil vapor quality. It is the opinion of the environmental profession that this represents a business environmental risk.

Additionally, the potential for vapor intrusion impacts to the subject property from onsite or nearby sources was evaluated. No specific potential vapor intrusion concerns (pVICs) were identified as part of this Phase I ESA; however, it should be noted that due to the number of spill sites identified in the area of the subject property and the associated potential for groundwater impacts in the site area, vapor intrusion issues at the site may exist. These conditions are consistent with the urban setting in which the subject property is located and do not present a specific or unique concern for the subject property.

8.0 GOVERNMENT AGENCY RECORDS REVIEW

Federal, state and local agencies were contacted via written correspondence, telephone interviews and/or personnel interviews regarding records of environmental concerns, violations, and/or permits, or any other potentially environmentally-relevant records on the subject property. In additional, government information that was readily available online on government websites was also reviewed. A listing of agencies/individuals contacted by Langan as part of this ESA is provided in Table 1. Copies of government correspondence are provided in Appendix F.

US Environmental Protection Agency (USEPA)

Langan reviewed the online USEPA MyProperty database (https://enviro.epa.gov/facts/myproperty/). According to the USEPA database, no records are available for the subject property.

Langan also reviewed the RCRAInfo Search, Enforcement and Compliance History Online, and the Superfund Enterprise Management System (SEMS) databases maintained online by USEPA. No records were identified for the subject property.

US Fish and Wildlife Service (US FWS)

Information regarding critical habitats or endangered species with the vicinity of the subject property was obtained from the US FWS Information Service Information for Planning and Conservation online database (https://ecos.fws.gov/ipac/). No Federally-listed or proposed endangered or threatened species were known to exist at the subject property.

New York State Department of Environmental Conservation Region 2

The NYSDEC Region 2 office was contacted by Langan on 22 September 2020 and online file review requests were submitted for the subject property. In an email dated 22 September 2020, Langan received a response acknowledging receipt of the request. In an email dated 23 September 2020, Langan received a response from NYSDEC indicating that no records are available for the subject property. If any additional pertinent information is provided subsequent to issuance of this report, it will be provided as an addendum. Langan also reviewed the Environmental Site Database records maintained online by the NYSDEC. No spills, storage tanks, or remediation sites were identified for the subject property.

NYSDEC Division of Fish, Wildlife, & Marine Resources

Langan reviewed records maintained online on the NYSDEC Environmental Resource Mapper (http://www.dec.ny.gov/gis/erm/) which revealed that significant natural communities and rare plants and animals are found in the vicinity of the subject property. An online file review request was submitted to the NYSDEC Division of Fish, Wildlife, & Marine Resources, Natural Heritage Program was contacted by Langan and a written file review request was submitted for the subject property. To date, no response has been received by Langan regarding this request. If any additional pertinent information is provided subsequent to issuance of this report that will change the conclusions of this report, it will be provided as an addendum.

New York State Department of Health (NYSDOH)

The NYSDOH Records Access Officer was contacted by Langan and a written file review request was submitted for the subject property. In an email dated 22 September 2020, Langan received acknowledgement from the NYSDOH of the records request. To date, no response has been received by Langan regarding this request. If any additional pertinent information is provided subsequent to issuance of this report that will change the conclusions of this report, it will be provided as an addendum.

New York City Department of Environmental Protection (NYCDEP)

The NYCDEP online FOIL request form was submitted for the subject property. To date, no response has been received by Langan regarding this request. If any additional pertinent information is provided subsequent to issuance of this report that will change the conclusions of this report, it will be provided as an addendum.

According to records maintained online by the NYCDEP Clean Air Tracking System (CATS), no boiler records are documented for the subject property.

New York City Department of Health & Mental Hygiene (NYC DOHMH)

Ms. Rene Bryant, the NYC DOHMH Records Access Officer, was contacted by Langan and an online file review request was submitted for the subject property. In an email dated 25 September 2020, Langan received acknowledgement from the NYSDOH of the records request. To date, no response has been received by Langan regarding this request. If any additional pertinent information is provided subsequent to issuance of this report that will change the conclusions of this report, it will be provided as an addendum.

New York City Mayor's Office of Environmental Coordination (NYC MOEC)

Records maintained online by NYC MOEC through the CEQR Access Portal (https://a002-ceqraccess.nyc.gov/ceqr/) were reviewed on 28 September 2020. According to information maintained online by NYC MOEC, the site is associated with CEQR No. 17DME007M. The City of New York proposed a series of land use and other discretionary actions to implement the Inwood NYC Action Plan to redevelop and revitalize an approximately 62-block area of the Inwood neighborhood, encompassing the subject property. These actions included but are not limited to: zoning map amendments to rezone portions of existing manufacturing, commercial, and residential districts; zoning text amendments to establish the Special Inwood District, Inwood Waterfront Access Plan, and Mandatory Inclusionary Housing (MIH) areas; City Map changes to facilitate the creation of open space and consolidation of

utility operation; the disposition and/or acquisition of properties; and Urban Development Action Area (UDAA) Designation.

A FEIS was prepared in June 2018. According to the FEIS, the proposed actions would result in a net increase of approximately 4,397 dwelling units including up to 1,618 affordable units, 462,282 square feet of community facility space, and 1,216,645 square feet of commercial/retail space and a net reduction in light industrial space. The subject property would be rezoned as a residential district (R7D) with a commercial overlay (C2-4) and would receive an (E) designation for Noise and Hazardous Materials.

The Inwood Zoning Proposal was approved by the City Council on 8 August 2018. According to information maintained online, shortly after the approval of the rezoning, a coalition of community advocates filed a lawsuit arguing that that city did not conduct a proper environmental review or address community concerns during the environmental review process. In December 2019, the New York Supreme Civil Court annulled the 2018 rezoning. However, in July 2020, the State Supreme Court's Appellate Division overturned the lower court ruling and reinstated the rezoning.

New York City Department of City Planning (NYC DCP)

An electronic version (effective zoning date 8 August 2018) of the NYC Zoning Map for the subject property was downloaded from the NYC DCP website (http://www.nyc.gov/html/dcp/html/zone/zh_zmaptable.shtml).

'E'-Designation Status

The New York City Department of City Planning coordinated a program identifying properties for special environmental concerns based on documented historical use, neighborhood noise concerns, and neighborhood air quality issues. These properties are identified on 'E'-designated sites on zoning maps and in the NYC Department of Buildings (NYCDOB) Building Information System (BIS) database. The NYCDOB is restricted from issuing building permits for the property until the NYC Mayor's Office of Environmental Remediation (NYC OER) has reviewed information prepared by an environmental professional and made a determination to issue of "Notice-of-No-Objection" or a "Notice-to-Proceed" to the NYCDOB. Prior to the NYCOER's creation in 2008, the NYC Department of Environmental Protection (NYCDEP) conducted these reviews.

Langan reviewed the following information sources to determine if the subject property is listed as an 'E'-designated property:

- Appendix C: CEQR Environmental Designations List (https://zr.planning.nyc.gov/appendix-c-table-1-city-environmental-quality-review-ceqr-environmental-requirements-e-designations) on 28 September 2020;
- Appendix C: CEQR Restrictive Declaration List (https://zr.planning.nyc.gov/appendix-c-table-2-city-environmental-quality-review-ceqr-environmental-requirements-environmental) on 28 September 2020;
- NYCOER Environmental Project Information Center (EPIC) (https://a002-epic.nyc.gov/app/search/erdproperty) on 28 September 2020; and,
- NYCDOB BIS on 28 September 2020 (http://a810-bisweb.nyc.gov/bisweb/bispi00.jsp)

The subject property is identified as part of the rezoned portion of the Inwood Rezoning action of Manhattan.

As part of the City Environmental Quality Review (CEQR) rezoning process, a FEIS was prepared (CEQR No. 17DME007M) and reviewed by the New York City Department of City Planning (NYCDCP). In order to mitigate potential significant adverse impacts associated with the anticipated redevelopment, the FEIS proposed that an (E) designation be placed on certain properties within the proposed district. The FEIS proposed that Lot 255 (Projected Development Site 3 in the FEIS) receive an (E) designation for Noise and Hazardous Materials. The following, is a description of the requirements set forth in the FEIS for the redevelopment of Lot 255. These requirements must be satisfied in order to receive a Notice to Proceed letter from the NYCOER, the regulatory agency responsible for the oversight of the redevelopment of (E) designated properties. This letter is required by the New York City Department of Buildings (NYCDOB) prior to issuance of any building permits (including foundation permits).

Noise Requirements

The following text is provided in the FEIS as the requirements of the (E) designation for the subject property:

> *To ensure an acceptable interior noise environment, the building façade(s) of future development must provide minimum composite building façade attenuation as shown in Appendix H of the Inwood Rezoning Proposal Environmental Impact Statement in order to maintain an interior L_{10} noise level not greater than 45 dBA for residential and community facility uses or not greater than 50 dBA for commercial uses. To maintain a closed-window condition in these areas, an alternate means of ventilation that brings outside air into the building without degrading the acoustical performance of the building façade(s) must also be provided.*

Based on these requirements the proposed building facades will need to achieve a combined window/wall noise attenuation of 31 dBA. Additionally, the design of the building (through the HVAC system or the use of trickle vents) would need to include an alternate means of ventilation so that fresh air could be supplied to the building with the windows closed. In order to satisfy this requirement, a RAWP must be submitted to the NYCOER detailing the proposed redevelopment, including the specific window and framing system to be used (with supporting laboratory testing data and catalogue cut sheets) and signed sealed mechanical and architectural plans showing the windows to be used, wall construction and the means with which the alternate means of ventilation will be achieved. Following construction, an Installation Report (IR) detailing that the specified windows, wall construction and alternate means of ventilation were installed as identified in the RAWP must be submitted to NYCOER. This IR will need to be signed and sealed by the Licensed Architect of record for the project.

Hazardous Materials Requirements

As identified in Tables 10-3 and 10-4 of the FEIS, Lot 255 was recommended for an (E) designation for hazardous materials due to its reported onsite uses as an automobile repair/service/sales/towing facility and as a garage/parking. Based on these findings the following are the requirements for this (E) designation as stated in the FEIS:

> *The (E) designation would require that the fee owner of a site with an (E) designation conduct a testing and sampling protocol and have an approved remediation plan where appropriate, to the satisfaction of the OER. The NYCDOB will typically issue the foundation permits when OER approves the*

remedial action work plan – the actual remediation is usually done concurrently with the construction. The remediation plan provided to OER to satisfy the (E) designation must also include a mandatory construction-related health and safety plan (CHASP), which must also be submitted to OER.

The Phase I ESA for the subject property has been initiated; however, the (E) designation of the site includes a laboratory testing protocol that includes the sampling and analysis of soil, groundwater and soil vapor. The investigation on the subject property will need to be completed to determine the presence and nature of contaminants of concern and to identify the proper remedial and/or health and safety measures be employed during the proposed redevelopment. The initial submittal to NYCOER will include Phase I ESA and Phase II Workplan. The Phase II Workplan would detail the proposed subsurface investigation activities and provide a health and safety plan that would be implemented during the investigation. Following submission, the NYCOER reserves up to 30-days to review the Workplan and provide any comments or approve as is. Once approved, the investigation, which will consist of soil, soil vapor and groundwater sampling, must be completed in accordance with the Workplan. Upon receipt of the laboratory analytical results, a Phase II Report / Remedial Investigation Report (RIR) summarizing the investigation activities and results of laboratory analysis must be submitted to NYCOER.

If contamination is identified, a hazardous materials RAWP and Construction Health and Safety Plan (CHASP) will be required. The RAWP and CHASP will be submitted to the NYCOER for comment and approval which they also reserve up to 30-days to review. The RAWP and CHASP will require that the consultant be on-site during the disturbance of any contaminated materials, that all of these materials be handled in accordance with the RAWP and CHASP and these materials are disposed of at a NYCOER approved soil disposal facility. All of these documents will need to be signed and sealed by a New York State Licensed Professional Engineer.

Following completion of the remedial action, a Remediation Closure Report (RCR) must be submitted to the NYCOER that details the implementation of the RAWP and any deviations from the approved plan.

Notice to Proceed Letter

Due to the presence of the (E) designation on the subject property, a Notice to Proceed letter is a NYCDOB requirement. Upon approval of the Noise and Hazardous Materials RAWPs, the NYCOER will issue the Notice to Proceed letter to the NYCDOB. Upon

receipt, the NYCDOB will be allowed to issue a building permit with respect to the (E) designation of the subject property.

Following review and approval of the RCRs, the NYCOER will issue a Notice of Satisfaction letter to the NYCDOB which will allow for the issuance of a Certificate of Occupancy for the building.

Fire Department of New York City (FDNY)

Information regarding the presence of petroleum or chemical storage tanks was requested from the FDNY. To date, no response has been received to our written request to the New York City Fire Department. If any additional pertinent information is provided subsequent to issuance of this report that will change the conclusions of this report, it will be provided as an addendum.

New York City Department of Buildings (NYC DOB)

Langan completed a limited review of available records maintained online by the NYC DOB. The Certificate of Occupancy dated December 1954 indicated that the subject property was approved for the use of sales of used motor vehicles and parking and storage of more than five motor vehicles in the open.

New York City Department of Finance (NYC DOF)

Langan completed a limited review of available records maintained online by the NYC DOF to determine current and former site ownership (https://a836-acris.nyc.gov/CP/). According to the DOF Automated City Register Information System (ACRIS), the subject property is currently owned by the United States Department of the Treasury after forfeiture by the previous owner, 215 Broadway Realty Corp. Ownership history was available from 1978 to present. The ownership information reviewed provided no additional information regarding environmental conditions related to past usage different than represented by review of other historical information sources.

9.0 SITE RECONNAISSANCE

Langan conducted an inspection of the site on 25 September 2020. The inspection included a walk-through inspection of the entire site for the purposes of identifying Recognized Environmental Conditions (RECs). Typical RECs may include:

Drum storage	Dumpsters	Aboveground storage tanks	Stained areas
Drains and Sumps	Wells	Underground storage tanks	Pump stations
Waste piles	Landfills	Loading and transfer areas	Boiler rooms
Pits, Ponds, Lagoons	Swales	Process air vents	Process sinks
Storm sewers	Trenches	Detention ponds	PCBs
Impoundments	Lagoons	Floor drains and piping	Transformers
Septic systems	Dry wells	Waste treatment areas	Capacitors
Rail spurs	Incinerators	Compressor discharges	Odors
Pools of liquid	Wastewater	Stressed vegetation	Surface waters

Limiting conditions encountered during the inspection of the site included the following:

- Parked vehicles were observed throughout the subject property, which precluded inspection of the ground throughout the paved areas.

Photographs of the subject property taken during the site inspection are provided in Appendix G. Langan was unaccompanied during the site inspection. A questionnaire was not completed by the property owner, operator, or site manager and a blank copy is included as Appendix B. The inspection included a walk-through inspection of the entire site for the purposes of identifying Recognized Environmental Conditions (RECs) as detailed below.

The site is occupied by an open aired, asphalt-paved, at-grade parking lot. There is a nine-car, aboveground, hydraulic-powered automobile lift along the northeastern portion of the subject property. The hydraulic tank and motor associated with the lift were observed on a concrete pad in the eastern corner of the property. Staining was observed on the concrete pad and onto the surrounding asphalt in the vicinity of the tank. Three five-gallon buckets of hydraulic oil were also observed to be stored on the concrete pad and staining was observed in the vicinity of the buckets. However, the pad and surrounding asphalt pavement appeared to be in good condition and free of cracks. An electrical meter and panel were also observed in the eastern corner of the subject property behind the parking attendants' booth.

Parked vehicles occupied the majority of the hydraulic lifts as well as the southwestern half of the subject property. Surficial staining was observed across the asphalt-paved parking lot. However, the pavement appeared to be in good condition and free of cracks in the vicinity of the staining.

A portable restroom and miscellaneous trash and debris, including a car battery, were observed in the northern corner of the subject property. Rock outcroppings were observed along the northwestern property boundary.

Adjacent Properties

A visual inspection of adjoining properties from the subject property line, public rights-of-way or other vantage point (e.g. aerial photography) including a visual inspection where hazardous substances may be or may have been stored, treated, handled or disposed was also conducted.

Limiting conditions encountered during the inspection of adjoining properties were encountered due to the dense urban nature of the surrounding areas which only allowed for limited line of sight that did not extend to areas where hazardous materials or substances might be stored.

Properties located adjacent to the subject property consist of commercial and residential buildings. Fill and vent pipes likely associated with a heating oil tank was observed on the adjacent properties located at 5057 Broadway and 70 Park Terrace East, to the northeast and northwest, respectively. Additionally, a placard on the southeastern façade of 5057 Broadway indicated the building contained a 5,000-gallon heating oil tank. A vent pipe likely associated with a heating old tank was also observed at the adjacent restaurant to the southeast located at 5060 Broadway. An aboveground waste oil tank within secondary containment was also observed within the automobile shop at this property. No other visual evidence of hazardous material storage, treatment, handling, or disposal areas was observed at adjacent properties.

10.0 ADDITIONAL ISSUES

The following items fall outside the scope of ASTM 1527-13; however, Langan can and often does provide these services to its clients if specifically requested and included in the proposed scope of work or are issues that may impact current or proposed site use.

10.1 Wetlands/Floodplain Designation

Langan reviewed United States Fish and Wildlife National Wetland Inventory (NWI) and New York State Freshwater Wetlands maps. Based on these documents no mapped wetlands are listed on the subject property. No evidence of the presence of existing onsite wetlands was identified during Langan's site

inspection. However, a formal wetland and floodplain designation assessment was not conducted as part of this ESA.

10.2 Protected Endangered Species / Critical Habitats

A determination regarding the potential presence of protected or endangered species and critical habitats on or near the subject property was not conducted as part of this ESA. This determination is often required in order to receive state or federal grants, loans, and/or permits.

Based on historic use of the subject property and the current condition and urban setting of the site, the potential presence of threatened or endangered (T&E) species on the site is low. A request for information regarding T&E species on the site was provided to New York State Division of Fish, Wildlife and Marine Resources (NYSDFWMR) and to the United States Fish and Wildlife Service (USFWS). This correspondence is discussed in detail in Section 8.0.

10.3 Asbestos

In 1973, use of sprayed on fireproofing on structural building components was prohibited by the EPA. On July 12, 1989, EPA issued a final rule banning most friable asbestos-containing products. The following specific asbestos-containing products remain banned: flooring felt, roll board, and corrugated, commercial, or specialty paper. In addition, the regulation continues to ban the use of asbestos in products that have not historically contained asbestos, otherwise referred to as "new uses" of asbestos. Use of asbestos in textured paint and in patching compounds used on wall and ceiling joints was banned in 1977. An asbestos survey was not completed as permanent structures are not present at the site.

10.4 Lead-based Paint

In 1977, the Consumer Product Safety Commission (CPSC) banned the use of lead based paint (LBP) in housing and restricted maximum levels in lead in new residential paint to less than 0.05% by weight. A LBP inspection was not completed as permanent structures are not present at the site.

10.5 Lead in Drinking Water

A lead in drinking water survey was not conducted as part of this ESA.

10.6 Indoor Air / Microbial Assessment (Mold)

A mold survey was not completed as permanent structures are not present at the site.

10.7 Radon

The subject property is located in a Tier 3 Zone as identified by USEPA based on sampling conducted of buildings within the site area. The Tier 3 Zone is considered an area of low radon gas intrusion potential with typically concentrations less than 2 pCi/liter. A radon survey of the existing building was not conducted as part of this ESA. Radon test results from adjacent or surrounding properties are not necessarily indicative of radon conditions on the subject property. As no building specific radon survey documentation was provided to Langan, no opinion regarding potential risks associated with radon gas exposure can be made.

As per USEPA guidelines, the only way to assess potential radon gas exposure risks is to conduct a radon assessment. In addition, the US EPA recommends that follow-up tests on large buildings should be conducted when major modifications are made either to the building structure or HVAC system or the HVAC system's operation settings.

10.8 Historical and Archaeological Review

Langan reviewed the NYCityMap (http://maps.nyc.gov/doitt/nycitymap/) to review the potential presence of historical landmark buildings near the subject property. Surrounding non-adjacent features and buildings located to the south of the subject property were identified as city landmarks:

- Historic Street Lampposts – Along West 215th Street between Broadway and Park Terrace East

In addition, Langan reviewed the New York City Landmarks Preservation Commission (NYCLPC) online historic maps (https://nyclpc.maps.arcgis.com/apps/webappviewer/index.html?id=93a88691cace4067828b1eede432022b). As of 28 September 2020, no Historic Districts or Landmarks were identified on the subject property.

Langan also reviewed the NYSHPO online database (http://nysparks.com/shpo/online-tools/). As of 28 September 2020, no National Register Listed or State Register Listed sites were identified on the subject property. The adjacent building located at 70 Park Terrace East was identified in the NYSHPO database as "undetermined," meaning that the NYSHPO is aware of the historic status of the building but does not have enough information to make a determination about a landmark status.

11.0 DEVIATIONS

This Phase I ESA conforms with ASTM with the following deviations noted:

- Data gaps in excess of 5 years were encountered during the review of historic resources;
- Government agencies that have not responded to record review inquiries are listed above - additional pertinent information provided to Langan subsequent to the issuance of this report will be provided in an addendum;
- Limited access was provided to the subject property as part of this ESA as identified in Section 9.0;
- Based on the large number of database records identified within one mile of the subject property (614), Langan limited the review of surrounding properties to adjacent sites and sites within 1/8-mile from the subject property.
- An assessment of the current property value versus the proposed sale price of the property was not completed as this information was not provided by the User;
- Interviews of former business operators were not conducted;
- Interviews of property owners were not conducted; and,
- Questionnaires were not completed by the property owner, operator, or site manager.

It is the opinion of the reviewing Environmental Professional that the above-deficiencies will not detrimentally affect the identification of potential recognized environmental conditions. This opinion is based on the following factors:

- Based on the Sanborn Maps and the City Directory information reviewed, the use of the property is consistent between the 5 year data gaps. Therefore, operations on the site between these data gaps will not detrimentally affect the identification potential RECs.

- Langan limited the database review to adjacent sites and sites within 1/8-mile from the subject property. It is the environmental professional's opinion that based on the dense development of the site area, and former, current and proposed use of the site that the review of the database pertaining to this more limited area is appropriate and will not detrimentally affect the identification of potential recognized environmental conditions.

12.0 FINDINGS/OPINIONS

Based on information obtained during the visual inspection of the subject property, review of environmental databases and historic information, and contact with federal/state/local official agencies, the following de minimis conditions and business environmental risks that may impact proposed redevelopment of the site were identified:

1. Minor staining;
2. (E) designation for hazardous materials and noise;
3. Surrounding sites; and,
4. Potential presence of historic fill material.

Minor staining was observed across the asphalt pavement and on a concrete pad beneath a hydraulic lift tank, motor, and buckets of motor oil during the site inspection. The pavement and pad otherwise appeared to be in good condition with no cracks. As such, Finding 1 represents a de minimis condition. The subject property has been assigned an (E) designation for hazardous materials and noise. Finding 2 represents a BER. Due to prior site use of the subject property and surrounding sites, the potential exists for the presence of adverse environmental impacts to the subject property from surrounding sites and the presence of historic urban fill; however, due to the (E) designation for hazardous materials assigned to the subject property, any soil disturbance will need to be completed in accordance with a NYCOER-approved RAWP, which will include implementation of soil handling and management procedures to address excavation, reuse, handling and offsite disposal of these materials. Therefore, Findings 3 and 4 will be adequately addressed by the RAWP and are therefore identified as BERs.

13.0 CONCLUSIONS

Langan has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of a ±7,500-square foot site located at 5055 Broadway, Manhattan, New York, the subject property. Any exceptions to, or deletions from, this practice are described in Section 11.0 of this report. Based on information obtained during the visual inspection of the subject property, review of environmental databases and historic information, and contact with federal/state/local official agencies, this assessment has revealed no evidence of recognized environmental conditions (RECs) or controlled recognized environmental conditions (CRECs) in connection with the property.

14.0 QUALIFICATIONS / CERTIFICATION

The following professionals assisted in the completion of this report.

We, the undersigned, declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312 and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property as documented in Appendix H. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

USER QUESTIONNAIRE

LANGAN

ASTM PRACTICE E 1527-13: USER/CLIENT QUESTIONNAIRE

Please complete the below form and return to
Langan Engineering, Environmental, Surveying, Landscape Architecture and Geology, D.P.C.

Providing the following information (if available) to the environmental professional (Langan) is one of the requirements to qualify for one of the *Landowner Liability Protections* offered under CERCLA. Missing or incomplete information could result in a determination that "all appropriate inquiry" is not complete.

General Information

User/Client Name (s): Timber Equities LLC

Property Name: _____

Address: 5055 Broadway, New York NY 10034

_____

Property Type: Surface Parking Lot

Type of Property Transaction:

- Purchase of property [x]
- Financing of property [ ]
- Sale of property [ ]
- Ground Lease [ ]
- Build to Suit Lease [ ]
- Other_____

Reason Why Phase I ESA is required: Pre-development due diligence

Site Contact (s): _____

Required Information

The citation at the end of each item (e.g. 40 CFR 312.XX) is the section of EPA's November 1, 2005 AAI Final Rule which discusses that item.

	Yes	No
(1.) Environmental cleanup liens that are filed or recorded against the site (40 CFR 312.25). Did a search of recorded land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?	[ ]	[ ]
(2.) Activity and Land Use (AUL) limitations that are in place on the site or that have been filed or recorded in a registry (40 CFR 312.26). Did a search of recorded land title records (or judicial records where appropriate) identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?	[ ]	[ ]

LANGAN

	Yes	No
(3.) Specialized knowledge or experience of the person seeking to qualify for LLP (40 CFR 312.28).		
Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	☐	☐
(4.) Relationship of the purchase price to the fair market value of the property if it were not contaminated (40 CFR 312.29).	**Yes**	**No**
(a.) Does the purchase price being paid for this property reasonably reflect the fair market value of the property? [If no, proceed to Parts 4a and 4b.]	☐	☐
(b.) If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	☐	☐
(c.) Identify an explanation for the lower price and provide a written record of such explanation as an attachment.		
(5.) Commonly known or reasonably known or reasonably ascertainable information about the property (40 CFR 312.30).	**Yes**	**No**
Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,	☐	☐
(a.) Do you know the past uses of the property?	☐	☐
(b.) Do you know of specific chemicals that are present or once were present at the property?	☐	☐
(c.) Do you know of spills or other chemical releases that have taken place at the property?	☐	☐
(d.) Do you know of any environmental cleanups that have taken place at the property?	☐	☐
(6.) The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate Investigation (40 CFR 312.31).	**Yes**	**No**
Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?	☐	☐

SIGNATURE:

It is understood that the information presented in this form is an integral part of the Phase I ESA process and that Langan will evaluate and rely on this information in the development of the final Phase I ESA report.

Certified Sanborn® Map Report

09/22/20

Site Name:	Client Name:
5055 Broadway	Langan Engineering
5055 Broadway	300 Kimball Drive, 4th Floor
New York, NY 10034	Parsippany, NJ 07054-2172
EDR Inquiry # 6200390.3	Contact: Ashley Sandve

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Langan Engineering were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Sanborn® Library search results

Certification #: ABA4-41BA-B765

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- ✔ Library of Congress
- ✔ University Publications of America
- ✔ EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Langan Engineering (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 200 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Exclusive Recovered Govt. Archives

NY RGA HWS ..... Recovered Government Archive State Hazardous Waste Facilities List
NY RGA LF ..... Recovered Government Archive Solid Waste Facilities List

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 07/29/2020 has revealed that there is 1 NPL site within approximately 1 mile of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page
HUDSON RIVER PCBS Cerclis ID:: 202229 EPA Id: NYD980763841	***NO STREET APPLICABLE***	***WNW 1/2 - 1 (0.677 mi.)***	***0***	***8***

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/15/2020 has revealed that there are 12 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/15/2020 has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 06/15/2020 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

State- and tribal - equivalent CERCLIS

NY SHWS: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Environmental Conservation's Inactive Hazardous waste Disposal Sites in New York State.

A review of the NY SHWS list, as provided by EDR, and dated 05/12/2020 has revealed that there are 2 NY SHWS sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

NY LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the NY LTANKS list, as provided by EDR, and dated 05/12/2020 has revealed that there are 58 NY LTANKS sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

NY UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the NY UST list, as provided by EDR, has revealed that there are 20 NY UST sites within approximately 0.25 miles of the target property.

NY CBS UST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the NY CBS UST list, as provided by EDR, and dated 01/01/2002 has revealed that there is

EXECUTIVE SUMMARY

1 NY CBS UST site within approximately 0.25 miles of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
KINGSBRIDGE BUS DEPO	***4065 TENTH AVENUE***	***ENE 0 - 1/8 (0.084 mi.)***	***C147***	***379***
Facility Status: 1 Id/Status: 2-000277 Tank Status: 1				

NY MOSF: These facilities may be onshore facilities or vessels, with petroleum storage capacities of 400,000 gallons or greater.

A review of the NY MOSF list, as provided by EDR, and dated 06/22/2020 has revealed that there is 1 NY MOSF site within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Records of Emergency Release Reports

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 05/12/2020 has revealed that there are 59 NY Spills sites within approximately 0.125 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/15/2020 has revealed that there are 111 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there are 2 EDR MGP sites within

approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
CON EDISON - KINGSBR	BLOCK 3236, LOT 25 A	SSE 1/2 - 1 (0.570 mi.)	523	1535

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 5 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 5 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Tank Info:

Tank Number:	015
Tank Id:	18079
Material Code:	0002
Common Name of Substance:	#4 Fuel Oil (On-Site Consumption)

Equipment Records:

	K00 - Spill Prevention - None
	D01 - Pipe Type - Steel/Carbon Steel/Iron
	A00 - Tank Internal Protection - None
	C00 - Pipe Location - No Piping
	F00 - Pipe External Protection - None
	L09 - Piping Leak Detection - Exempt Suction Piping
	E00 - Piping Secondary Containment - None
	G03 - Tank Secondary Containment - Vault (w/o access)
	H00 - Tank Leak Detection - None
	B00 - Tank External Protection - None
	I04 - Overfill - Product Level Gauge (A/G)
	J02 - Dispenser - Suction Dispenser
Tank Location:	Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	01/01/1955
Capacity Gallons:	7500

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

~~Click this hyperlink~~ while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"5/1/2015 - Feng - Duty Desk. Talked to Anthony Lara of Petroleum Tank (917-709-3317, info@PetroleumTEK.com). There are four buildings at the site and spill was reported for each of the buildings: 1) Spill 15-01141, 61-61 Park Terrace West, Manhattan 2) Spill 15-01142, 55-57 Park Terrace East, Manhattan 3) Spill 15-01143, 65-67 Park Terrace East, Manhattan 4) Spill 15-01144, 70-72 Park Terrace West, Manhattan There was a tank test failure and reported a spill (It is spill 13-00122 for fill line failure). There are (3) 5,000-gallon ASTs and there are (5) USTs which were abandoned 15 years ago. These tanks are not in a single tank cavity, but they are in different location for each building. He uncovered two of them and found sand inside the tanks and appeared to be very clean. One of the uncovered tank appeared to be repaired once. He believed they did the conversion from #6 to #2 oil two years ago. He found #6 oil in the sump pit in each of the building. No vapor issue. The oil in the sump pits will be pump out. The course of action will include openning the tanks and inspection, testing all the tanks and lines, search PBS registration/tightness test record and all the investigation for spill. Management: Kathy Sandoval Park Terrace Garden, Inc 65-67 Park Terrace East (212) 567-6376 Kathy.Sandoval@EllimanPM.com Searched the PBS record and spill database: 55-57 Park Terrace East PBS 2-056499, (1) 5,000-gallon UST for #6 oil, closed-in-place. 65-67 Park Terrace East PBS 2-056448, (1) 13,000-gallon UST for #6 oil, in service. Spill 01-09660, reported 1/4/2002, tank test failure, dry leak, spill closed on 11/14/2014. Spill 13-00122, reported 4/4/2013, leaky fill line, the soil around the fillport has been excavated and the endpoints are clean. Called Kathy Sandoval (212-567-6376) and left a message to the receptionist for a call back. Conference call with R. Austin and J. Vought. Dispatched Santosh Mahat for a site inspection. The spill is assigned to Ryan Piper for followup on Monday. 5/27/15: Mahat Work plan and soil boring log has been uploaded on D2 for reference. 9/19/16 - Austin - Spill reassigned from Mahat to DeMeo, due to Santosh's transfer to Air Program. - end 5/9/18 : Sekhon DeMeo : Directed me to schedule inspection for spill # 1501143 5/10/18 : Sekhon Spoke with Denise (212-567-6376)to schedule inspection. Denise advised me to contact Kathy, left voice message/email for her(Kathy): also cc to DeMeo 5/11/18 : Sekhon Got call/email back from Kathy, confirming inspection date/time 5/16 @ 10:30am 5/17/18 :

PARK TERRACE - BUILDING C (Continued) **S117852746**

Sekhon Visited site with DEC T.DeMeo on 5/16 @1030am, met Mr. Paul Collins (Riteway Tanks), Kathy Sandoval from Park Terrace Management and Max (Super). Product observed leaching through wall above ground and floor wall interface due to historical contamination associated with improperly abandoned UST. Multiple PBS violations identified during inspection, partial list below : - Registration information incorrect - Unregistered tanks in service - Incorrect tank labeling - missing color code at fill port - Failure to complete required testing - Invalid monthly reports 5/18/18 TJD Spill reassigned to Sekhon as new project manager. 08/30/18-Hiralkumar Patel. reviewed project with DEC Sekhon as DEC DeMeo is on extended medical leave. 9:07 AM:- spoke with Dave Lorthioir at EnviroTrac. he mentioned that property owner owns five multi-story residential buildings on lots #: 210, 220, 230, 236 and 240 on block # 2243. all five buildings had individual UST system in past which were closed-in-place in 1980s. these five USTs were replaced with three ASTs serving five buildings. the five #6 oil USTs are located adjacent to building foundation wall, outside the boiler room in each building. in 2015, free phase product was noted seeping into multiple buildings. Dave mentioned that all five buildings have partial basement with boiler room only and that must be constructed in bedrock as bedrock is shallow in the area. after noticing oil seepage in 2015, Riteway Tank Maintenance installed multiple monitoring wells in boiler room floor where ol seepage was noted. groundwater was found right beneath the boiler room floor. Riteway has been gauging on-site wells and recovering product, but there are no records available. after noticing oil seepage, Riteway opened up all USTs and noted few tanks partially filled with sand. Riteway cleaned out remaining void space in USTs and filled those tank completely with cement. as these USTs are located adjacent to building wall, investigation between the tank and building wall is difficult. 08/31/18-Hiralkumar Patel. 9:00 AM:- visited site with DEC Sekhon and met Dave (EnviroTrac) and John (building super). John mentioned that five buildings are designated as below: - Building A - 60-62 Park Terrace West on lot # 240 - Building B - 55-57 Park Terrace East on lot # 210 - Building C - 61-67 Park Terrace East on lot # 220 - Building D - 75-77 Park Terrace East on lot # 230 - Building E - 70-72 Park Terrace West on lot # 236 all five buildings have USTs located adjacent to boiler room in basement. these five USTs were closed-in-place in 1980s and were replaced with three AST systems. currently, AST systems are located in Building A, Building C and Building D. oil tank system in Building C supplies service to Building B and Building C. oil tank system in Building D supplies service to Building D and Building E. the site area slops towards northeast, with Building A on hill and Building D at lowest elevation. John mentioned that all five buildings have ONLY partial basement that is occupied by boiler room. he stated that they receive water in boiler room of these buildings during summer months when sprinkler system is on, but no water accumulates in boiler room during winter months. the subject site is Building C which is located along eastern side of the city block # 2243. inspected building basement boiler room which is located in central section along the building's western foundation wall. found old supply/return/gauge lines in boiler room's western wall. no signs of oil seepage noted through boiler room wall below former piping location. found oil seepage through boiler room's western wall, at approx. 4 ft above boiler room floor. the boiler room floor is approx. 15 ft bg. three monitoring wells are installed in boiler room

PARK TERRACE - BUILDING C (Continued) **S117852746**

floor: one well to the south of the boiler and two wells on east side of the boiler. John mentioned that absorbent pads are placed inside monitoring wells and Riteway had monitored and replaced these pads in past. found minor oil seepage from boiler room floor near the three well locations, but no oil was found in sump located in southeast corner of the boiler room. no petroleum odors were noted in the boiler room. a soil boring/well will be installed near the tank end to investigate any impact to water table. asked Dave to install boring to a minimum depth of 3 ft below the boiler room floor. 09/04/18-Hiralkumar Patel. alternate address: none PBS #: 2-056448. as per PBS record, the site has one (1) 13,000 gal #2 oil AST, closed-in-place in Nov. 2016. the PBS record is incorrect due to following: - PBS record does not include any information about the old #6 oil UST system - PBS record shows a closed-in-place 13,000 gal #2 oil AST, but this AST is currently in-service - PBS record shows installation date of AST as Sept. 1939, but the AST must be installed after closure of UST system in 1980s other spills for Building C: 0109660, 0911984, 1300122 spill # 0109660 was reported on 01/04/2002 due to dry leak during tightness test. spill closed stating 'this is dry leak. no product released. no impact to the environment.' spill # 0911984 was reported on 02/12/2010 as 100 gal of #6 oil was spilled onto street only due to broken pump on delivery truck. spill closed. spill # 1300122 was reported on 04/04/2013 due to leak in fill line. contaminated soil was removed from around the fill port. case closed. reviewed work plan submitted by EnviroTrac on 08/24/18. the work plan proposes: - install at least one monitoring well at Buildings B, C and D - install SSDS in crawl space beneath western portion of Building D - weekly gauging of wells 12:20 PM:- sent email to Dave. asked him to submit summary of work performed in Building B/C/D since 2015, including well installation/gauging record. also asked him to submit a revised work plan addressing following comments: - need to add list of three buildings with address and spill #s in subject line - installation of second well at building D - subsurface investigation along the former remote fill line for UST system at building D (under spill # 1411452) email copied to Ms. Sandoval and DEC Sekhon. P. T. Tenants Corp. **property owner** c/o Douglas Elliman Property Management 72 Park Terrace West, Apt E-16 New York, NY 10034 Attn.: Kathy Sandoval Ph. (212) 567-6376 Fax (646) 843-2461 email: kathy.sandoval@ellimanpm.com 12:27 PM:- sent email to Dave and informed him about incorrect PBS record for Buildings A, C and D. asked him to inform property owner to correct PBS records. email copied to Ms. Sandoval and DEC Sekhon. DEC requires: 1) PBS correction, 2) subsurface investigation via installation of boring/well near the UST location 4/12/19 - Sekhon On Sep 19, 2018, EnviroTrac installed one monitoring well, ET-3, along the west side of Building C. After the monitoring well was installed, monthly gauging events were conducted to observe any detection of free-floating product. Free floating product has appeared in ET-3 since October 3, 2018 with usual thicknesses of 0.01 to 0.02 feet. The depth to water rose from 12.88 ft. bgs. on October 3, 2018 to 12.14 ft. bgs. The average depth to water at ET-3 is roughly 13 ft bgs. Throughout the gauging events conducted by EnviroTrac, The greatest amount of product observed in the monitoring well occurred on October 31 2018 at a thickness of 0.15 feet. The following gauging event on November 14, 2018 observed groundwater at 12.78 ft. bgs. and 0.01 feet of product. At all other gauging events where free floating product was noted, only 0.01 to 0.02 feet of product was observed in

PARK TERRACE - BUILDING C (Continued) **S117852746**

ET-3. The interior wells in the boiler room were regularly inspected and absorbent pads were utilized to remove product as needed. The most recent inspections from October 3, 2018 to March 15, 2019, observed free phase petroleum product in Well 2 and a mix of free phase product and water in Well 1 and Well 3. Report DECDOCs. 11/12/19 - Sekhon Email send to David Lorthioir (David Lorthioir, PG) & Chantee Cade (Chantee.Cade@ellimanpm.com -- Property Manager) to get updates. 11/14 - Sekhon Email response from David (EnviroTrac)--11/14/19 @ 11:58am As we discussed on the phone recently, here is a brief update on the status of the above spill. The walls of the boiler room were powerwashed and painted with an epoxy paint during the summer. We have inspected the boiler room on a monthly basis and, to date, we have observed one small stain penetrating the new paint. The wells in the basement floor have exhibited some low to moderate volumes of free petroleum. Same with the sump. The monitoring well located outside the building has constantly exhibited 0.01 feet of free product since shortly after it was installed. We currently have no plans for additional work in this boiler room, but will continue to monitor and remove the free product in the sump utilizing absorbent pads. If the small stain observed on the wall grows in size, we may consider coring through the foundation wall to investigate. Dave Lorthioir 1/31/20 - Sekhon Updated report DECDOCs. The interior wells in the boiler room were regularly inspected and absorbent pads were utilized to remove product as needed. The most recent inspection from December 10, 2019, observed free-phase petroleum product in Wells 2 and 3, and a mix of free phase product and water in Well 1. Monthly gauging events have taken place for the monitoring well (ET-3) since installation and free-phase product has been observed since October 3, 2018. EnviroTrac s most recent gauging events on November 15, 2019 and December 10, 2019, indicated free-floating product was at a thickness of 0.20 and 0.40 feet, respectively. The observed product thickness in ET-3 has increased during the last two months of 2019, it is not known if this increase in thickness is part of a long-term trend."

Remarks: "unknown equipment failure clean up started"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	"5/1/2015 - Feng - Duty Desk. Talked to Anthony Lara of Petroleum Tank (917-709-3317, info@PetroleumTEK.com). There are four buildings at the site and spill was reported for each of the buildings: 1) Spill 15-01141, 61-61 Park Terrace West, Manhattan 2) Spill 15-01142, 55-57 Park Terrace East, Manhattan 3) Spill 15-01143, 65-67 Park Terrace East, Manhattan 4) Spill 15-01144, 70-72 Park Terrace West, Manhattan There was a tank test failure and reported a spill (It is spill 13-00122 for fill line failure). There are (3) 5,000-gallon ASTs and there are (5) USTs which were abandoned 15 years ago. These tanks are not in a single tank cavity, but they are in different location for each building. He uncovered two of them and found sand inside the tanks and appeared to be very clean. One of the uncovered tank appeared to be repaired once. He believed they did the conversion from #6 to #2 oil two years ago. He found #6 oil in the sump pit in each of the building. No vapor issue. The oil in the sump pits will be pump out. The course of action will include openning the tanks and inspection, testing all the tanks and lines, search PBS registration/tightness test record and all the investigation for spill. Management: Kathy Sandoval Park Terrace Garden, Inc 65-67 Park Terrace East (212) 567-6376 Kathy.Sandoval@EllimanPM.com Searched the PBS record and spill database: 55-57 Park Terrace East PBS 2-056499, (1) 5,000-gallon UST for #6 oil, closed-in-place. 65-67 Park Terrace East PBS 2-056448, (1) 13,000-gallon UST for #6 oil, in service. Spill 01-09660, reported 1/4/2002, tank test failure, dry leak, spill closed on 11/14/2014. Spill 13-00122, reported 4/4/2013, leaky fill line, the soil around the fillport has been excavated and the endpoints are clean. Called Kathy Sandoval (212-567-6376) and left a message to the receptionist for a call back. Conference call with R. Austin and J. Vought. Dispatched Santosh Mahat for a site inspection. The spill is assigned to Ryan Piper for followup on Monday. 5/27/15: Mahat Work plan and soil boring log has been uploaded on D2 for reference. 9/19/16 - Austin - Spill reassigned from Mahat to DeMeo, due to Santosh's transfer to Air Program. - end 5/9/18 : Sekhon DeMeo : Directed me to schedule inspection for spill # 1501142 5/10/18 : Sekhon Spoke with Denise (212-567-6376)to schedule inspection. Denise advised me to contact Kathy, left voice message/email for her(

PARK TERRACE - BUILDING B (Continued) **S117852745**

Kathy): also cc to DeMeo 5/11/18 : Sekhon Got call/email back from Kathy, confirming inspection date/time 5/16 @ 10:30am 5/17/18 : Sekhon Visited site with DEC T.DeMeo on 5/16 @1030am, met Mr. Paul Collins (Riteway Tanks), Kathy Sandoval from Park Terrace Management and Max (Super). No operating tank in place at this address. getting supply of #2 oil from tank at 65-67 Park Terrace. 5/18/18 TJD Spill reassigned to Sekhon as new project manager. 08/30/18-Hiralkumar Patel. reviewed project with DEC Sekhon as DEC DeMeo is on extended medical leave. 9:07 AM:- spoke with Dave Lorthioir at EnviroTrac. he mentioned that property owner owns five multi-story residential buildings on lots #: 210, 220, 230, 236 and 240 on block # 2243. all five buildings had individual UST system in past which were closed-in-place in 1980s. these five USTs were replaced with three ASTs serving five buildings. the five #6 oil USTs are located adjacent to building foundation wall, outside the boiler room in each building. in 2015, free phase product was noted seeping into multiple buildings. Dave mentioned that all five buildings have partial basement with boiler room only and that must be constructed in bedrock as bedrock is shallow in the area. after noticing oil seepage in 2015, Riteway Tank Maintenance installed multiple monitoring wells in boiler room floor where ol seepage was noted. groundwater was found right beneath the boiler room floor. Riteway has been gauging on-site wells and recovering product, but there are no records available. after noticing oil seepage, Riteway opened up all USTs and noted few tanks partially filled with sand. Riteway cleaned out remaining void space in USTs and filled those tank completely with cement. as these USTs are located adjacent to building wall, investigation between the tank and building wall is difficult. 08/31/18-Hiralkumar Patel. 9:00 AM:- visited site with DEC Sekhon and met Dave (EnviroTrac) and John (building super). John mentioned that five buildings are designated as below: - Building A - 60-62 Park Terrace West on lot # 240 - Building B - 55-57 Park Terrace East on lot # 210 - Building C - 61-67 Park Terrace East on lot # 220 - Building D - 75-77 Park Terrace East on lot # 230 - Building E - 70-72 Park Terrace West on lot # 236 all five buildings have USTs located adjacent to boiler room in basement. these five USTs were closed-in-place in 1980s and were replaced with three AST systems. currently, AST systems are located in Building A, Building C and Building D. oil tank system in Building C supplies service to Building B and Building C. oil tank system in Building D supplies service to Building D and Building E. the site area slops towards northeast, with Building A on hill and Building D at lowest elevation. John mentioned that all five buildings have ONLY partial basement that is occupied by boiler room. he stated that they receive water in boiler room of these buildings during summer months when sprinkler system is on, but no water accumulates in boiler room during winter months. the subject site is Building B which is located at southeast corner of the city block # 2243. inspected building basement boiler room which is located in central section along building’s northern foundation wall. boiler room floor is approx. 15 ft bg. found old UST supply/return lines in boiler room wall. no signs of oil seepage was noted through boiler room walls, but few oil droplets were noted on water on boiler room floor and sump. sump is located in southeast corner of the boiler room. some oil seepage was noted through sump’s western walls. no petroleum odors were noted in the boiler room. three monitoring wells are installed in boiler room floor: one well to the east of the boiler and two wells on south side

PARK TERRACE - BUILDING B (Continued) **S117852745**

of the boiler. John mentioned that absorbent pads are placed inside monitoring wells and Riteway had monitored and replaced these pads in past. during inspection, noted two sets of supply/return lines from current AST system. John mentioned that original supply/return lines from the AST system were not leaking, but were replaced by lines in secondary containment to prevent subsurface impact in case any leaks from these piping. a soil boring/well will be installed between the tank and building wall. asked Dave to install boring to a minimum depth of 3 ft below the boiler room floor. 09/04/18-Hiralkumar Patel. alternate address: 521-535 W 215th St PBS #: 2-056499. as per PBS record, the site has one (1) 5,000 gal #6 gal UST, closed-in-place. no other spills were reported for Building B. reviewed work plan submitted by EnviroTrac on 08/24/18. the work plan proposes: - install at least one monitoring well at Buildings B, C and D - install SSDS in crawl space beneath western portion of Building D - weekly gauging of wells 12:20 PM:- sent email to Dave. asked him to submit summary of work performed in Building B/C/D since 2015, including well installation/gauging record. also asked him to submit a revised work plan addressing following comments: - need to add list of three buildings with address and spill #s in subject line - installation of second well at building D - subsurface investigation along the former remote fill line for UST system at building D (under spill # 1411452) email copied to Ms. Sandoval and DEC Sekhon. P. T. Tenants Corp. **property owner** c/o Douglas Elliman Property Management 72 Park Terrace West, Apt E-16 New York, NY 10034 Attn.: Kathy Sandoval Ph. (212) 567-6376 Fax (646) 843-2461 email: kathy.sandoval@ellimanpm.com 12:27 PM:- sent email to Dave and informed him about incorrect PBS record for Buildings A, C and D. asked him to inform property owner to correct PBS records. email copied to Ms. Sandoval and DEC Sekhon. DEC requires: 1) subsurface investigation via boring/well installation near the UST location 3/28 - Sekhon Updated report DECDOCs . The interior wells in the boiler room have been regularly inspected and absorbent pads have been used to remove product as needed. The most recent inspections from October 3, 2018 to March 15, 2019, observed little to no product. A small amount of product was observed on the absorbent pads in Well 1. Throughout the inspections this only occurred twice. For Well 2 and Well 3, a small amount of product was observed on the absorbent pads once for each well. EnviroTrac installed one (1) monitoring well, ET-4, in the immediate area of the abandoned UST. No product has been observed in the well since its installation in September 2018. Trace amounts of product have been detected on an intermittent basis in the three (3) interior wells at the Site. The UST to the immediate north of the building was abandoned in the 1980s. Riteway confirmed the UST s abandonment in 2017. No product has been detected in the wells at the site since January 2019. Given that the source of the spill, UST, has been cleaned, the monitoring well installed by the UST (ET-4) has never exhibited free product and that only trace amounts of free phase product have been detected in the interior monitoring wells. Report discussed with DEC Patel. 11/12/19 - Sekhon Email send to David Lorthioir (David Lorthioir, PG) & Chantee Cade (Chantee.Cade@ellimanpm.com -- Property Manager) to get updates. 11/14 - Sekhon Email response from David (EnviroTrac)--11/14/19 @ 11:51am As we discussed on the phone recently, here is a brief update on the status of the above spill. The walls of the boiler room were powerwashed and painted with an epoxy paint during the summer. We have inspected the boiler room on a monthly basis and, to date, we

PARK TERRACE - BUILDING B (Continued) **S117852745**

have not observed any oil stains penetrating the new paint. The wells in the basement floor have exhibited little to no free petroleum. Same with the sump. The monitoring well located outside the building has not exhibited any detectable free product since it was installed. 1/30/20 - Sekhon Updated report submitted. DECDOCs. 1/31/ - Sekhon After well ET-4 was installed, monthly gauging events were conducted to observe any detection of free-floating product. Table 1 provides the monitoring well gauging events from September 18, 2018 to December 10, 2019. Depth to water has fluctuated throughout the gauging events by as much as 0.88 feet, but free phase product has not been detected in ET-4 since its installation. As of December 10, 2019, depth to groundwater was 10.78. The sump pit was inspected each time the interior wells at the site were inspected. EnviroTrac observed little free-phase product in the sump pit throughout the inspection. Building Management has not observed any oil in the pit since September 2018. Building Management s documentation from April 2019 to December 2019 is attached. The three (3) interior wells located in the boiler room have been inspected by EnviroTrac from October 3, 2018 to December 10, 2019 on a monthly basis. Absorbent pads were used in the wells and sump as needed in order to remove any free phase product. Used absorbent pads were disposed of into 55-gallon drums and were stored in the boiler room until proper removal of the drums could be scheduled. Since inspection of the wells by EnviroTrac began, little free-phase product has been observed in the wells. EnviroTrac s interior monitoring well inspection summary is attached to this report. The interior wells in the boiler room have been regularly inspected and absorbent pads have been used to remove free-phase product as needed. The most recent inspections from November 15, 2019 and December 10, 2019, observed little to no free-phase product in wells 1, 2 and 3. "

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Spiller Company:	999
Contact Name:	Not reported
DEC Memo:	"7/17/08 - Raphael Ketani. I spoke to Joe Ostrowski of PTC (718) 624-4842 about the spill. He represents the cleanup company. He said the owner of the restaurant on the corner called in the spill. About 20 gals. spilled onto the street from the back of the delivery truck. There was pressure in the delivery hose when the driver disconnected it. He didn't realize the pressure was still there. Mr. Ostrowski said that his crew is there and they are putting down absorbent and cleaning up the street. He said that NYFD Hazmat is there watching and taking no action. He added that the driver is covered in oil, but they are bringing a change of cloths. The free oil has been sucked up. No drains or sewers were affected. As the cleanup is being handled, and the entire spill is outside, and NYFD is on the scene, I am closing the spill case. Spill #0804412 came in. It indicates that 50 gals. spilled onto the road and that PTC is the responsible party. It is stated that a tank was cleaned out and one of the gates on the truck was open. The pumped out contents are what spilled onto the street. "
Remarks:	"COMPANY RESPONSIBLE IS USEING WATER TO WASH IT AWAY"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was M TIBBE WILL CLEAN UP OIL AND TANK FOR INSPECCTION. OIL IS CONTAINED IN THE BASEMENT. CLEANED BY PTC FOR RP. 7/5/06 - 10:15 AM - Call Petroleum Tank Cleaners concerning spill. Since spill was contained in basement, the spill was cleaned up in its entirety on 6/5/95. A

(Continued) **S102150251**

temporary tank was installed while the original tank was being repaired. The original tank was sandblasted and leak locations were fixed before the tank was returned to the residence. According to the Petroleum Tank representive, in 2002, a second tank failure was recorded. The company reported to the site in which no spill was observed, however the tank was repaired to pass the subsequent tank test. No further problems were reported by Petroleum Tank since 2002. While they couldn't give hard copy records since detailed reports were not kept earlier than 1998, a print screen showing the last tank failure was faxed to the DEC. Called East-West Realty concerning spill as they were the realtor at the time of the spill. They reported that no problems were reported in addition to the tank failures in 1995 and 2002. Based on the information, no further action is needed. 7/5/06 Johnathan Antonizio, NYSDEC - HQ."

Remarks: "LEAK IN TANK/ CREW ON WAY TO FIX - SPOKE TO BOB DECK AT 1:30 P.M., HE HAS SENT CREW TO CLEAN UP APILL WHICH IS COMING OUT OF WEEP HOLES IN THE TANK ROOM OF A 5K TANK. NO SUMP OIR DRAIN IN BASEMENT."

DEC Memo:	"9/14/2006 Sangesland spoke to Rene from Eastmond. Mac Boiler was hired to clean the tank on Monday (9/11). On Wednesday evening (9/13) the super saw some leakage under the tank. Eastmond says they came on Wednesday and found some leakage onto the floor of the boiler room (originally called in as 300 gal, Eastmond lowered this to approx 100gal all contained) Eastmond saw corrosion on the outside of the tank and was going to drain the tank. They will set up a temp tank and do a cleanup. 9/19/2006 City DEP called today to say they were called to the site to investigate a spill. When they arrived they did NOT see any spill. They did see a temporary fuel oil storage tank in front of the building and they called DEC to confirm if we knew about it. 8/3/07 - Austin - Transferred from Vought to Ketani for further review and action - end 8/20/07 - Raphael Ketani. I spoke to Rene Lewis of A.L. Eastmond (718) 378-3000 regarding the spill. He said that it was all cleaned up and the old tank was removed and a new tank installed. He said that all he has to do is send the paperwork (manifests, etc.). The PBS case is #2-338737 and shows a 3000 gal. above ground tank (in contact with the ground)that is in service with #6 oil. I left a message for Rene Lewis that the old tank has to be shown as removed and the new tank as installed. 10/12/07 - Raphael Ketani. I checked the PBS database. The old tank is still listed as in service. I tried to contact Mr. Lewis, but could only leave a message. 12/3/07 - Raphael Ketani. I tried to contact Rene about the cleanup, paperwork and tank registration, but could only leave a message. I checked the PBS. The 3000 gal. tank is still listed as in service. 12/12/07 - Raphael Ketani. There has been no response from A.L. Eastmond, nor the owners of the property. Therefore, I sent a CSL to the management company rep. This is Nancy Rodriguez, Interboro Holding Corp., 141 Halstead Avenue, Mamaroneck, NY, 10543, (914) 813-1956, FAX (914) 813-1960. 12/20/07 - Raphael Ketani. Ms. Rodriguez called to say that Eastmond has been paid the great majority of the money for the work. She said she contacted Isaac before and had asked him to send DEC the paperwork for the cleanup. I told her that DEC hasn't received anything. She said she will give him another call. I also told her that the PBS registration isn't corrrect. That the old tank should be listed as closed and removed and the new tank as installed. She said she will talk to Isaac about this. 1/3/08 - Raphael Ketani. I tried to reach Ms. Rodriguez, but could only leave a message regarding the PBS revision and documentation for the cleanup from Eastmond. I left a message for Rene Louis regarding the cleanup documentation. 1/7/08 - Raphael Ketani. I tried to contact Ms. Rodriguez and Isaac of Eastmond (718) 378-3000, but could only leave messages. 1/9/08 - Raphael Ketani. I tried to contact Ms. Rodriguez (914) 813-1956, but could only leave a voice mail. I tried to reach Isaac of Eastmond, but he never picked up the phone even though I was told he was in. 1/10/07 - Raphael Ketani. Ms. Rodriguez called to say that she sent a certified letter to Eastmond monday requesting the cleanup documentation and that

APARTMENT BUILDING (Continued) **S108294113**

Eastmond take care of the PBS registration changes. She said she has had no response from Eastmond despite leaving many messages. I received the FAXed copy of the letter Ms. Rodriguez had sent to Eastmond requesting submittal of the cleanup documentation and correction of the PBS registration. 2/13/08 - Raphael Ketani. I tried to reach Ms. Rodriguez, but could only leave a message. I spoke to Isaac of Eastmond and asked him where things stood with the remediation. He said that he is still swamped as a result of Rene leaving and he will have to get back to me. I checked the PBS registration. The 3000 gal. tank is still listed as in service and there are no other listings of tanks. 4/2/08 - Raphael Ketani. I tried to reach Ms. Rodriguez (914) 813-1956, but could only leave a message. I tried to reach Isaac Mungra (718) 378-3000, but could only leave a message. 4/4/08 - Raphael Ketani. I sent a CSL out to Ms. Rodriguez with strong language indicating that 95 Park Terrace East Owners, Inc. were in violation of the NAV Law, sections 173 and 176, and in violation of 6NYCRR Part 612.2 and 613.9. I added that the violations can and may be subject to penalties and legal action. I also warned that DEC will take legal action if the remediation report is not received by April 24. 4/10/08 - Raphael Ketani. Isaac Mungra of Eastmond called me and said that he is working on the report for the site. He said I should receive it by 4/14/08. 4/16/08 - Raphael Ketani. Ms. Rodriguez (914) 813-1956 called to ask whether Mr. Mungra had contacted me about the report. I told he had called me on 4/10/08 and said that DEC would get the report by 4/14. I told her he is 3 days late. She said she will have her attorney send another letter to him requesting the report. 4/24/08 - Raphael Ketani. I tried to reach Isaac and Ms. Rodriguez, but could only leave voice mails. 4/29/08 - Raphael Ketani. Mr. Mungra called. He said that he was working on the PBS registration and that DEC should receive the report for the work that was done by this friday, 5/2/08. 4/30/08 - Raphael Ketani. Joannie Welasky, Esq. (212) 421-6565 called. She said she is the attorney for the Board of Directors of the condo. She said that she hasn't heard anything from Mr. Mungra in awhile. I told her that Mr. Mungra called me yesterday and he said that he will get me the report by this friday. 5/20/08 - Raphael Ketani. Ms. Welasky left a message inquiring whether DEC had ever received a report from Mr. Mungra. I returned her call, but could only leave a message that I had tried on numberous occasions to get Mr. Mungra to send the report with no success. I recommended that her client find another remediation company to do the work and generate a cleanup report. 5/21/08 - Raphael Ketani. I checked the PBS registration. It still shows only the old tank that was installed in 1907 as in servcie. I received the Closure Report dated 4/28/08 from Eastmond & Sons. It contained manifests for contaminated soil that was removed, a plan showing the layout of the boiler room and the tank room with the new tank, and a copy of a PBS Application for listing the old tank as removed and the new tank as installed. I called up Ms. Welasky and told her that DEC had received the closure report, but that the PBS registration was still inaccurate. I told her that Ms. Rodriguez had signed the original form on 4/4/30/08, but the new information isn't showing up in the databse. I added that DEC can't close the spill case until the PBS case is straightened out. She said she will talk to Nick Lombardo of the PBS Unit and try to fix the problem. Ms. Welasky called back and said that Mr. Lombardo had fixed the PBS registration. I checked the registration and it lists the tanks properly with their proper status and disposition. As the Closure Report was found to be

APARTMENT BUILDING (Continued) **S108294113**

acceptable, the contaminated soil has been removed, and the PBS registration is correct, I am closing the spill case. "

Remarks: "DURING TANK CLEANING SUPER FOUND SPILL , IS CONTAINED IN TANK ROOM: CLEAN UP COMPANY CAME IN AND CLEANED WHAT THEY COULD UP"

DEC Memo:	"7/17/06 - Raphael Ketani. I spoke to Charles Powers via his cell phone (516) 448-5004. He said that they dug out, cleaned, and removed a 600 gal. gasoline tank last friday, 7/14. He added that 90 to 100 cu. yds. of soil were removed as well. I asked him for end point samples for the former location of the tank and a groundwater sample.

COMMERCIAL PROPERTY (Continued) **S108058486**

He said that end points will be done today, 7/17, but because of room constraints on site the water sample wont be able to be taken until maybe a week later. I told him that will be alright as long as we get the results. I asked him about the presence of any remote fills or pumps islands or pipes. He said that all they had here was a concrete slab and the tank in a vault. He said there was no free product in the vault, only water. He did mention that there were 2 pipes that ran to a holding tank. He said he will check out this tank, also. He said he will send a complete closure package to DEC (minus the groundwater results) soon. I added that he has to get the 600 gal. tank register as it contained gasoline. 7/19/06 - Raphael Ketani. I talked to Jake Krimgold, E.E. II Spills Unit Region 2, regarding the gasoline tank registration. He said that the gasoline tank needs to be registered only if there are other tanks which brings the total site capacity to 1100 gals. or more. Not if there is only one 600 gal. gas tank. 7/24/06 - Raphael Ketani. Mr. Charles Powers (516) 932-3228 from CNS Management called regarding the case. I referred him to Mr. Ryan Piper, who is the case manager. DEC Piper spoke w/ Charles. An additinal 600 gal gas UST was discovered. The tank was removed today and endpoints were collected. Charles will submit closure report when completed. 9/20/06- DEC Piper spole w/ Charles Powers. He will have report in abput two weeks. He is waiting for disposal mainfests from contractor. 12/13/06- DECP iper reviewed tank closure report for site. Two 600 gal tanks were removed along w. contamianted soil from one of the tanks. Endpoints revealed one excedance of crysene in tank #1. No other exceedances. Additionally, a vapor barrier will be installed as per building plan. This spill is closed. See e-docs if warranted."

Remarks: "DURING EXCAVATION OF CONSTRUCTION SITE 1000 GALLON UST WAS OBSERVED: PROCEEDED TO REMOVE TANK AND DISCOVERED PETROLIUM ODOR AND EL;EVATED PID READINGS: SPILL IS IN PROCESS OF BEING CLEANED-UP, REMOVAL OF TANK:"

DEC Memo:	"1/29/2014 - Feng - called the tank tester Michael Sepe (631-714-9156) and left a message for him to call back. 8/28/2015 - email to Jay Shah of NYC Sanitation Jay, The spill was reported on 1/29/2014 for a tank test failure and then nothing has been received. Could you please tell me the status of this case? What happened and what work has been done to address the problem? Thank you, 3/29/2016 - Feng - Called NYC Sanitation (718-334-9138) and talked to Jim Manfredy. Jay is out of the office today. He will leave Jay a message that DEC needs documentation to close the spill. 3/30/2016 Feng This spill is transferred from J. Feng to V. Brevdo as per J. Vought. 3/30/2016 Spill transferred to Alex Z., as per V. Brevdo. AZ 4/26/2016 Spoke with Kevin Shanahan. He will contact DDC and inquire if this spill could be included in their list. AZ 2-15-2017 Reviewed a report by URS dated 11/4/2016. The report stated that water was found on several occasions in the sump and secondary containment of diesel tank #25. Also, the remote fill was excavated and a small leak was found at the top of the Fernco coupling located under the spill bucket. I discussed this spill with Kevin Shanahan over the phone. Soil borings and monitoring wells will be installed to confirm that soil and groundwater are not impacted by the spill. A work plan will be submitted by URS. AZ 6-21-2017 The following e-mail was sent to K. Shanahan and V. Brevdo: Dear Kevin, I have reviewed a Work Plan for this site dated May 8, 2017. URS proposed installation of six soil borings, installation of groundwater monitoring wells at three of those boring locations, and collection/analysis of soil and groundwater samples. I concur with this proposal. The Responsible Party and its contractors are solely responsible for the safe execution of all invasive work performed at the site, and in particular, are responsible for identifying subsurface utilities and safeguarding the structural integrity of any excavations, buildings, utilities, and other structures both on- and off-site that may be adversely affected by the work. The Responsible Party and its contractors must obtain any local, state or federal permits or approvals that may be required to perform the work necessary to address this spill. Furthermore, the Responsible Party and its contractors are solely responsible for the implementation of all appropriate health and safety measures during the performance of this work. Sincerely, Alex Zhitomirsky - Engineering Geologist 2 NYS Department of Environmental Conservation 47-40 21st Street, Long Island City, NY 11101 Phone: 718.482.6387 - Fax: 718.482.6390 Email:

NYC DEPT OF SANITATION (Continued) **S116156833**

alexander.zhitomirsky@dec.ny.gov 8/1/2017 Reviewed a WP dated 5/8/2017. Discussed the site with K. Shanahan. Fill port and the secondary containment piping were leaking and repaired. Three wells and three boring were proposed. URS have not obtained as built drawings for the tanks. URS will inquire from NYC DOS more details regarding the secondary piping location. SB-11, SB-13, and SB-12 will be finished as wells. URS received geophysical results, but have not evaluated them yet. URS will notify DEC regarding results of the geophysical investigation and the secondary piping location. AZ 8/2/2017 Email from K. Shanahan: Alex, One August 1, 2017 we discussed the environmental investigation work plan contained in our report submitted to the NYSDEC on May 8, 2017. Based on our conversation, we agreed to the following approach with respect to planned investigation to address the above referenced spill number. 1. Add tank piping to the proposed investigation plan, if available. 2. Install a monitoring well at proposed boring location SB-11. 3. Install monitoring wells MW-07 and MW-08 at proposed borings locations SB-12 and SB-13. 4. Install borings SB-12 and SB-13 at proposed monitoring well locations MW-07 and MW-08. 5. Install monitoring wells at borings SB-12 and SB-13 if petroleum impacts are detected during drilling. The attached figure illustrates these revisions to the original work plan. Please reply to this e-mail with your approval. Thanks, Kevin J. Shanahan Project Manager, Environment Business Unit, Metro New York Direct 716-923-1215 Cell 716-480-7352 kevin.shanahan@aecom.com 8-3-2017 Email to K. Shanahan/V. Brevdo: Kevin, As per your proposal and the telephone conversation on August 3, 2017, you can move monitoring well MW-09, if feasible. I concur with the Work Plan. The Responsible Party and its contractors are solely responsible for the safe execution of all invasive work performed at the site, and in particular, are responsible for identifying subsurface utilities and safeguarding the structural integrity of any excavations, buildings, utilities, and other structures both on- and off-site that may be adversely affected by the work. The Responsible Party and its contractors must obtain any local, state or federal permits or approvals that may be required to perform the work necessary to address this spill. Furthermore, the Responsible Party and its contractors are solely responsible for the implementation of all appropriate health and safety measures during the performance of this work. AZ 6-14-2018 Reviewed a spill closure report received on 4/2/2018. The following e-mail was sent to K. Shanahan and V. Brevdo: Dear Kevin, I have reviewed a Spill Closure Report for the above site dated March 29, 2017. This spill number was opened after a 3,000-gallon biodiesel UST failed a tightness test. The remote fill was excavated and a small leak was repaired in 2014. The system passed a subsequent tightness test. Five borings and four monitoring wells were installed at the site to investigate whether the spill had impacted the environment. The report stated that no free-phase or dissolved phase groundwater impacts were detected. No petroleum impacts were detected in soil samples. URS recommended closing spill number 1310377. Based on this information this spill is closed. The Department hereby reserves all of its rights concerning, and such forbearance shall not extend to, any further investigation or remedial action the Department deems necessary due to: I. The off-site migration of petroleum contaminants that was unknown at the time of this closure. II. Environmental conditions related to this spill case which were unknown to the Department at the time of this closure. III. Information received, in whole or part, after the

NYC DEPT OF SANITATION (Continued) **S116156833**

Department's spill case closure, which indicates that corrective action was not sufficiently protective of human health and/or the environment. IV. Fraud in obtaining this spill case closure determination. As a precaution, we must bring your attention to our concerns for the future use of this site. If subsurface contamination is encountered while excavating for any construction activity, appropriate remedial and vapor mitigation efforts may need to be taken to fully prevent vapor intrusion into any site development and to ensure human health and safety. This spill closure does not exempt the Responsible Parties from compliance with any applicable laws and regulations. Please be advised that you should maintain a permanent file of all documentation and correspondence regarding this case for future use as the Department's files may not be maintained indefinitely. Sincerely, Alex Zhitomirsky - Engineering Geologist 2 NYS Department of Environmental Conservation 47-40 21st Street, Long Island City, NY 11101 Phone: 718.482.6387 - Fax: 718.482.6390 Email: alexander.zhitomirsky@dec.ny.gov "

DEC Memo:	"08/18/09 - See eDocs for Con Ed report detailing cleanup and closure. Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL E2MIS 137988 7-2-01 @ 02:07 S Walker #11210 reports that While inspecting m412 @ s/w/c w 214 st & 10 ave . C Hartage #18363 discovered 2 ounces of cable oil mixed with 1/2 gallon of water spilled on concrete floor of structrure. A feeder in the structure was found to be the cause of the spill , and there was a drip rate of 1 drop a minute,(ducting of the feeder is 2b2w-s). Walker stated that only one sample could be taken due to the amount of the spill. Environmental yellow tag # 29269 was applied. Water is

MANHOLE 412 (Continued) **S104192853**

standing, no visual water movement. No sewer connection as per coduit plate 80-d. Sump is concrete no sump pump, no earthen sump, no substantial cracks. Oil absorbent pads were applied to the spill. Cleanup is pending inspection and repair of feeder. Update 7-2-01 @ 03:20 D Dinan #12581 reports that at this time there is no leak or damage to the feeder. @13:00 hrs cleanup completed. liquids remove from manhole M412 1/2 gallon and 4 bags of debris d-wash with slix. 1/23/03 The structure was field inspected and found to be oil free. Any necessary repairs had been completed. "

Remarks: "CABLE LEAKING IN MANHOLE. 2 OZ OF FLUID ON 1/2 GALLON OF WATER. CON ED SPILL NUMBER 137988. NO WATERWAYS INVOLVED."

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIBBE 11/15/94: REASSIGNED FROM SIGONA TO ZHITOMIRSKY ON 11/15/94. TRANSFERED FROM HALE TO TIBBE ON 12/28/00. CONTAMINATED SOIL AND ABANDONED DRUMS DISCOVERED DURING EXCAVATION. TANKS WERE SUPPOSED TO BE REMOVED. NYCT TO INVESTIGATE. 01-10-05: Originally reported as 216 9th Avenue. Actually concerns Kingsbridge Depot. Reported as abandoned tanks and contamnated soil dicscovered during excavation in maintenance area of depot. The tanks turned out to be a waste oil tank and a drainage settling basin. Currently, NYCT is installing a system to recover gasoline and diesel from that same maintenance area under spill #'s 9510775 & 9812375. Any contamination that may exist due to this spill will be remediated along with the other contamination. "
Remarks:	"CONTAMINATED SOIL & ABANDONED TANKS DISCOVERED DURING EXCAVATION, ABLEENVIRONMENTAL TO PUMP TANKS & REMOVE."

DEC Memo:	"03/21/13- Zhune spoketo Francine Maibauer from MTA 646-252-5777. She said a faulty seal from a lift caused the 200 gallons of hydraulic oil spill into the secondary container pit. The pit is made of concrete. They are currently removing the oil from the secondary container into 55-gallons drums. No release to the Environment, no release to soil and no release to any cath basin or storm basin. Once pit container empty it will be cleaned. 03/22/13-Hiralkumar Patel. 9:25 AM:- visited site. met Ryan Carroll (212-544-3414) and Suman Patel at the site. inspected area where leak occurred. MTA has fixed the leak. leaked oil was contained in concrete pit under the lift. MTA pumped out oil into drums last night. AARCO is hired to complete the cleanup. Ryan confirmed that pit is not connected to any drain/oil-water separator. 12:49 PM:- received call from Sanjiv Kuray from MTA. he mentioned that during cleaning, they found approx. 200 gal oil in second pit which is connected to the pit under leaking lift, via pipe. there is sump in the second pit which pumps material into oil/water separator. Mr. Kuray mentioned that the sump pumps in second pit were not working for long time and oil was contained inside the pit. he also confirmed that there are no other connections

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans

MTA NYCT- KINGSBRIDGE DEPOT (Continued) **1000140956**

to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.
AIR SYNTHETIC MINOR
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

KINGSBRIDGE BUS DEPOT (Continued) **S118707687**

Francine Ocampo 2 Broadway Floor 27 New York, NY 10004 Spill assigned to Rashad Omar (runner). 5/20/2016: Rashad 4065 10th Avenue has alternate addresses of 4056 9th Avenue, 4065-4079 10th Avenue, and 400-450 West 218th Street. Various other spills exist for this site. PBS 2-190209. Sent email to Francine: Just to let you know, I was also additionally assigned a spill that was called in on Tuesday May 17th, spill#1601622 (PBS# 2-190209) for the Kingsbridge Bus Depot. Thanks, have a nice weekend. 7/7/2016: Rashad Received email from Francine: Please find attached the formal request for closure of Spill #1601622, Kingsbridge Depot, DSL-1 sump failure. If you require any additional information please contact me directly, 646-252-5768. Attached to email was closure report, it has been uploaded to D2. Review of letter is as follows: On May 17th 2016 a hydrostatic test of the sump for the fill port of DSL-1 was tested and failed. The tank was taken temporarily out of service, the assessment indicated one of the pipe penetrations was found to be not tight . The sump was repaired and retested on June 29th and July 1st, the tank is now tight and passed the hydrostatic testing. Spill will be closed as no spill occurred, repairs made, and passing tightness test was conducted."

Remarks: "fill pump failed test. No product loss, tightness test"

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIBBE TRANFERED FROM HALE TO TIBBE ON 12/28/00. INVESTIGATION ONGOING. see also 98-12375 & 90-07496. 11/12/10 - spill re-assigned from Tibbe to Joe O'Connell 5/19/2011 The spill was reassigned from Joe O'Connell to Linda Ross 2/27/12 - Raphael Ketani. The case was assigned to me during the month of February. 4/1/12 - Raphael Ketani. I reviewed the February 2012 Monthly Status Report (dated 4/23/12)for all NYCT sites. The report contained the following latest information about the site. On February 10, 2012, Shaw removed and cleaned the piping from the transfer pump to the inlet of the air strippers. The system ran normally during the month of February 2012. Approximately 8.0 gallons of product were recovered during the month. 9/24/15 - Raphael Ketani. I reviewed the Dvirka & Bartilucci 9/23/15 Groundwater Extraction Well Sampling letter. The VOC analytical results for each of the three extraction wells were entirely non-detect, except for a few low hits of MTBE. I approved the letter and had no comments. May 1, 2018 - V. Brevdo Due to Project Manager Raphael Ketani's retirement on April 27, 2018, Vadim Brevdo became new project manager for this spill case effective April 30, 2018. VB April 10, 2019 - V. Brevdo The site has 0.15-0.40 ft. of free product

KINGSBRIDGE DEPOT (Continued) **S102560139**

in one monitoring well on the site. NYCT intends to complete recover of free product and conduct post-remedial confirmatory sampling. NYCT provided consultant with comments on the work plan for post-remedial confirmatory sampling. Once the work plan is approved by NYCT it will be provided to DEC for review and approval. The site poses no imminent threat to human health and the environment and NYCT is in compliance. VB April 23, 2020 - V. Brevdo Letter and e-mail from NYCT: Hope this email finds you well. So far, things are fine on my side. Attached, please find a letter request to NYSDEC to allow NYCT to decommission/demolish the remediation systems at the Jamaica and Kingsbridge Bus Depots. As detailed in the letter, both systems have reached their level of effectiveness. The NYSDEC spill number(s) for these sites remain open. However, any future measures to be implemented to remediate any residual contamination at these sites will not require the use of these systems. The real estate occupied by these systems is critical to the depots. For instance, at the Jamaica Bus Depot, the area occupied by the remediation shed is to be used for the installation of communication equipment as part of the ongoing NYCT Bus Radio System (BRS) ontract (W-32366). Your response to this request will be greatly appreciated. Best, Gregory Mathelier, CCM Construction Manager UST & Env. Remediation Projects Systems & Security Program, CPM/ MTA NYCT 300 Cadman Plaza, 6th Floor, Rm. 6375 (718) 613-0029/ (646) 879-1970 Gregory.Mathelier@nyct.com April 23, 2020 DEC Concurrence with decommissioning of inactive remedial system: April 23, 2020 Mr. Mathelier: This is in response to your April 23, 2020 email and April 21, 2020 letter, requesting decommissioning of remediation systems at Jamaica and Kingsbridge bus depots. Based on the aforementioned e-mail and letter, the NYSDEC understands that both systems have reached their level of effectiveness, and that any future measures to be implemented to remediate any residual contamination at these sites will not require the use of these systems. MTA-NYCT s request to decommission the remediation systems at Jamaica and Kingsbridge bus depots is hereby approved. This e-mail shall serve as NYSDEC s formal correspondence. Contact me if you have questions. Regards, Vadim Brevdo Vadim Brevdo, P.E. Professional Engineer 2 New York State Department of Environmental Conservation 47-40 21st Street, Long Island City, NY 11101 718.482-4928 vadim.brevdo@dec.ny.gov "

DEC Memo:	"10/12/17-Hiralkumar Patel. 4:50 PM:- spoke with Dan at NYCT. approx. 10 gal diesel spilled into tank top sump. spilled material is contained and cleanup will begin soon. 10/13/17-Hiralkumar Patel. 8:14 AM:- received call from Michael Mandac from NYCT. he mentioned that leak occurred from a line on tank # 3. leak occurred somewhere

KINGSBRIDGE BUS DEPOT (Continued) **S121119627**

between the tank and the pump room. the spilled material discharged into the secondary pipe which drained into tank top sump. Mike confirmed that all spilled material was contained in the sump and the tank is currently out of service for necessary repair. case closed as there is no discharge to the environment and spill has been cleaned up."

Remarks: "spill to containment/clean up crew enroute"

DEC Memo:	"5/1/2015 - Feng - Duty Desk. Talked to Anthony Lara of Petroleum Tank (917-709-3317, info@PetroleumTEK.com). There are four buildings at the site and spill was reported for each of the buildings: 1) Spill 15-01141, 61-61 Park Terrace West, Manhattan 2) Spill 15-01142, 55-57 Park Terrace East, Manhattan 3) Spill 15-01143, 65-67 Park Terrace East, Manhattan 4) Spill 15-01144, 70-72 Park Terrace West, Manhattan There was a tank test failure and reported a spill (It is spill 13-00122 for fill line failure). There are (3) 5,000-gallon ASTs and there are (5) USTs which were abandoned 15 years ago. These tanks are not in a single tank cavity, but they are in different location for each building. He uncovered two of them and found sand inside the tanks and appeared to be very clean. One of the uncovered tank appeared to be repaired once. He believed they did the conversion from #6 to #2 oil two years ago. He found #6 oil in the

PARK TERRACE - BUILDING E (Continued) **S117852747**

sump pit in each of the building. No vapor issue. The oil in the sump pits will be pump out. The course of action will include openning the tanks and inspection, testing all the tanks and lines, search PBS registration/tightness test record and all the investigation for spill. Management: Kathy Sandoval Park Terrace Garden, Inc 65-67 Park Terrace East (212) 567-6376 Kathy.Sandoval@EllinanPM.com Searched the PBS record and spill database: 55-57 Park Terrace East PBS 2-056499, (1) 5,000-gallon UST for #6 oil, closed-in-place. 65-67 Park Terrace East PBS 2-056448, (1) 13,000-gallon UST for #6 oil, in service. Spill 01-09660, reported 1/4/2002, tank test failure, dry leak, spill closed on 11/14/2014. Spill 13-00122, reported 4/4/2013, leaky fill line, the soil around the fillport has been excavated and the endpoints are clean. Called Kathy Sandoval (212-567-6376) and left a message to the receptionist for a call back. Conference call with R. Austin and J. Vought. Dispatched Santosh Mahat for a site inspection. The spill is assigned to Ryan Piper for followup on Monday. 5/27/15: Mahat Work plan and soil boring log has been uploaded on D2 for reference. 6/1/15: Mahat The schedule for the soil boring has been proposed to be on 6/26/15. DEC Mahat received an email from the retained contrator: Dear Kathy/Santosh, I just word yesterday afternoon that the new date for the geo probe is 6/22/2015. I will contact them today to see if we can get anything earlier as we ve been waiting for the 5/26/2015 appointment which was cancelled due to the unavailability of the machine and now re-scheduled because the machine is need of repair. It s a pretty specific size geo probe, so I will see if they can give us a better date, if not I will reach out to another company that may have the geo probe that we need. My apologies for the delays. Best regards, David Chan Riteway Tank Maintenance Corp. 700 Hicks Street. Brookllyn, NY 11231 tel - 718-855-7272 fax - 718-855-7244 DEC is waiting for a soil boring and deleniation report. 9/10/15: Mahat DEC Mahat visited the site and discovered that sump pit area is oil free. 08/30/18-Hiralkumar Patel. reviewed project with DEC Sekhon as DEC DeMeo is on extended medical leave. 9:07 AM:- spoke with Dave Lorthioir at EnviroTrac. he mentioned that property owner owns five multi-story residential buildings on lots #: 210, 220, 230, 236 and 240 on block # 2243. all five buildings had individual UST system in past which were closed-in-place in 1980s. these five USTs were replaced with three ASTs serving five buildings. the five #6 oil USTs are located adjacent to building foundation wall, outside the boiler room in each building. in 2015, free phase product was noted seeping into multiple buildings. Dave mentioned that all five buildings have partial basement with boiler room only and that must be constructed in bedrock as bedrock is shallow in the area. after noticing oil seepage in 2015, Riteway Tank Maintenance installed multiple monitoring wells in boiler room floor where ol seepage was noted. groundwater was found right beneath the boiler room floor. Riteway has been gauging on-site wells and recovering product, but there are no records available. after noticing oil seepage, Riteway opened up all USTs and noted few tanks partially filled with sand. Riteway cleaned out remaining void space in USTs and filled those tank completely with cement. as these USTs are located adjacent to building wall, investigation between the tank and building wall is difficult. 08/31/18-Hiralkumar Patel. 9:00 AM:- visited site with DEC Sekhon and met Dave (EnviroTrac) and John (building super). John mentioned that five buildings are designated as below: - Building A - 60-62 Park Terrace West on lot # 240 - Building B - 55-57 Park Terrace East on

PARK TERRACE - BUILDING E (Continued) **S117852747**

lot # 210 - Building C - 61-67 Park Terrace East on lot # 220 - Building D - 75-77 Park Terrace East on lot # 230 - Building E - 70-72 Park Terrace West on lot # 236 all five buildings have USTs located adjacent to boiler room in basement. these five USTs were closed-in-place in 1980s and were replaced with three AST systems. currently, AST systems are located in Building A, Building C and Building D. oil tank system in Building C supplies service to Building B and Building C. oil tank system in Building D supplies service to Building D and Building E. the site area slops towards northeast, with Building A on hill and Building D at lowest elevation. John mentioned that all five buildings have ONLY partial basement that is occupied by boiler room. he stated that they receive water in boiler room of these buildings during summer months when sprinkler system is on, but no water accumulates in boiler room during winter months. the subject site is Building E which is located at northwest corner of the city block # 2243. inspected building basement boiler room which is located in central section along the building s southern foundation wall. found old supply/return/gauge lines in boiler room wall. no signs of oil seepage noted through boiler room walls or floors. sump located in northern corner of the boiler room. no signs of oil noted on water in the sump. no petroleum odors noted in boiler room. the subject site Building E has two open spill cases (1501144 and 1801775) listed. the subject spill case (1501144) was reported on 05/01/2015 with comments: unknown equipment failure, cleanup started'. but there is no information about any oil spill noted in the subject building. spill case # 1801775 was reported on 05/16/2018 due to oil noted in sump. John mentioned that oil found in sump in May 2018 was result of minor leak from filter on boiler and spilled material entered into sump via floor drain. spilled material has been cleaned. alternate address: 538-540 W 217th St PBS #: 2-043494. as per PBS record, the site one (1) 5,000 gal #6 oil UST, closed-in-place. other spills for Building E: 0105659 was reported on 08/25/2001 due to pesticide fumes in building. case closed and referred to pesticide unit. based on field observations, no further investigation/remediation is required in Building E and both spill #s 1501144 and 1801775 are closed."

Remarks: "Unknown Equipment failure clean up started"

DEC Memo:	"05/16/18 - Lakhani Riteway Paul Collins (516-457-6861) informed that oil was found in the sump at the building. Four (4) other spills are open for the properties under the Park Terrace Garden (Kathy, 212-567-6376) management. Riteway will be pumping out the sump and cleaning the pit. 1/8 -1/4 of product was found atop water in the sump. The product seems to be either #4 fuel oil or weathered #6 fuel oil. 08/31/18-Hiralkumar Patel. spill closed. refer to spill # 1501144 for further details."
Remarks:	"unknown oil found in sump, investigation ongoing"

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Info:

Tank Number:	001
Tank Id:	12928
Material Code:	0003
Common Name of Substance:	#6 Fuel Oil (On-Site Consumption)

Equipment Records:

	A00 - Tank Internal Protection - None
	B01 - Tank External Protection - Painted/Asphalt Coating
	D01 - Pipe Type - Steel/Carbon Steel/Iron
	F01 - Pipe External Protection - Painted/Asphalt Coating
	K00 - Spill Prevention - None
	E00 - Piping Secondary Containment - None
	L09 - Piping Leak Detection - Exempt Suction Piping
	H06 - Tank Leak Detection - Impervious Barrier/Concrete Pad (A/G)
	I04 - Overfill - Product Level Gauge (A/G)
	C03 - Pipe Location - Aboveground/Underground Combination
	J02 - Dispenser - Suction Dispenser
	G02 - Tank Secondary Containment - Vault (w/access)
Tank Location:	Aboveground - on saddles, legs, racks, etc.... Tank bottom is elevated above grade or tank pad, allowing visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported
Install Date:	06/01/1966
Capacity Gallons:	5000

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Contact Name:	LEE SNYDER
DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIBBE LEE SNYDER CELL PHONE 917-864-1582. ONE OF THE RESIDENTS IS A GARDENER (SUZY) WHO POSSIBLY STORES PESTICIDES/HERBICIDES IN A BASEMENT STORAGE ROOM DIRECTLY BELOW CALLER'S APARTMENT. CALLER HAS NOTICED SMEELS SINCE EARLY JULY AND HAS COPMPLAINED TO THE MANAGING AGENT. ACCORDING TO CALLER, THE ODORS WERE SO BAD SATURDAY (8/25/01) THAT SHE HAD TO CALL THE FD. FD RESPONDED AND REMEOVED A DRUM AND SERVERAL BAGS FROM THE BASEMENT STORAGE ROOM. FD ORDERED THE BUILDING MANAGER TO CLEAN THE ROOM, WHICH WAS DONE BY THE MAINTENANCE STAFF. FD REQUIRED MANAGER TO PROPERLY DISPOSE OF AND/OR HANDLE THE MATERIAL AND NOT TO RETURN IT TO THE INSIDEOF THE BULDINGS. DEC ASKED THE MANAGER TO PROVIDE A LIST OF THE MATERIALS INVOLVED TO THE DEC AND THE CALLER BECAUSE CALLER HAS COMPLAINED OF HEALTH PROBLEM. DEC REQUESTED THAT THE MANAGER HIRE A CONTRACTOR TO PROPERLY DISPOSE OF ANY MATERIALS THAT CAN NOT BE IDENTIFIED OR ARE IN POOR CONDITION. THE REST SHOULD BE PROPERLY STORED IN AN OUTSIDE SHED ONSITE, IF THE MATERIAL IS LEGAL TO POSSESS. CALLER IS VERY CONCERNED ABOUT HER HEALTH AND THE ODORS THAT ARE STILL IN HER APARTMENT. DEC REFERED HER TO NYC DOH AND TOLD HER THE MATTER WOULD BE REFERED TO DEC PESTICIDES. REFERED TO DEC PESTICIDES ON 8/27/01."
Remarks:	"EARLY JULY CALLER SMELLED THE FUMES. CALLER STATES FIRE DEPT WAS ON SCENE AND REMOVED A BLK DRUMS AND BAGS OF POISONS. CALL BACK REQUESTED. THE FUMES HAVE MADE FEMALE SICK ALONG WITH FAMILY PETS. FEMALE BELIEVES THAT ITS TOXIC CHEMICALS FROM THE GARDENER."

DEC Memo:	"4/24/2009 TTF letter sent to: Property Manager Northeastern Academy 532 West 215th Street New York, NY 10034 07/14/09. J.Krimgold reviewed the letter report submitted by Atec Environmental and dated May 21, 2009. Based on the report the tank failed the test either due to outdated vent cap or excessive corrosion of the manhole. Both components were repaired and a new manhole gasket was installed. The tank was retested and passed. Excavation of the tank top to perform repair did not reveal soil contamination. NFA. "
Remarks:	"TANK TEST FAILURE ON A 10,000 GALLON UST, DUE TO A ULLAGE LEAK. UNK

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL Con Ed e2mis Notes: 7/5/00 2qts unknown oil on 80gal water in manhole. PCB and ID sample taken. PCB count returned <1ppm. ID analysis could not be completed due to insufficient amount of sample. Oil water mixture was removed via tanker. Flush truck used high pressure hose to double wash the walls and floor with bio-gen solution. Manhole was then rinsed. Generated three plastic bags of non-hazardous waste (PPE and absorbant pads). 1300gal of oil and water was accumulated."
Remarks:	"2 quarts on 80 gallons - clean up pending lab results - ref #132195"

Environmental Interest/Information System:

NEW YORK TELEPHONE CO (Continued) **1000872643**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Registry ID: 110019206964

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.
HAZARDOUS WASTE BIENNIAL REPORTER

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo:	"5/20/10-Vought-Discussed site with DEC Kahn and closed spill #0911418 consolidated with this spill as they are at same address and are governed under NYCHA Consent Order. See spill #0911418 for for further information and history. These notes from closed spill #0911418: Contractor replacing boiler. To do this they are excavating a deeper/larger basement area. Digging in soils to install lines and found low levels of contaminated soil. They're digging out soil now. Question is if they need to chase the bad soil to end points, or just end. Problem is only with SVOCs which they believe are historical. Consultant will send e-mail to Vought with additional information. 5/20/10-Vought-See also PBS #2-475610 and #2-475602. Received message from Doug Schrimpf (Eastern Enviromental Ph:631-727-2700 Fax:631-727-2777). Vought called and spoke to Schrimpf and installing boilers in building including cutting out foundation and installation of new boilers. During excavation, contamination was noted. 50 yards of soil removed down to footing of apartment building and contamination noted at bottom of footing. 300 tons of soil may be removed as part of bid by boiler removal. No delineation performed to

QUEENSBRIDGE PLANT C -NYCHA (Continued) **S121988517**

date. No further soil can be excavated due to footings. Endpoint soil sidewall samples collected. Excavation was performed to groundwater but no bottom groundwater samples collected as delineation was proposed but not authorized. Sheen on groundwater noted. Not sure of source of contamination. Contact for NYCHA is: Maric Mechanical Michael MacMenamie 19-03 75th Street East Elmhurst, NY 11370 Ph: (718)721-5449 Fax: (718)721-8144 Address of NYCHA is: Mr. Ralph Trocchio New York City Housing Authority Technical Service Department 23-02 49th Avenue, 5th Floor Long Island City, NY 11101 Ralph.Trocchio@nycha.nyc.gov Vought drafted letter that was signed by DEC Kann with below requirements and three month deadline. DEC requirements from consolidated Spill #0911418: 1)submission of endpoint samples 2)delineation of contamination including determination of source 3)submission of site plan 4)cc to Eastern (Schrimpf) DEC requirements for this spill: 1)Submission of site plan with leaking USTs that failed TTF 2)TTF letter (isolate/retest system or investigation/excavation). 5/25/10-Vought-Received email from Eastern (Schrimpf) that Jeff -Thank You Very Much For Your Help, I emailed Maric Mechanical the NYSDEC Correspondence and spoke to them ,they still don't feel this is part of contract. They told me there contract was with the housing authority includes removal existing boiler and install a new boiler in basement, remove of oil tank and oil impacted soil which was done by Maric Mechanical . Eastern Environmental only got involved with this when they had stock piled soil that they had already excavated . Eastern excavated some additional soils from excavation bottom and collect endpoint sample and disposed of soil that was previously excavated by Maric Mechanical. Based on the endpoint results and contamination still observed in excavation that could n't be removed due to structural issues ,Eastern provided a cost estimate for full of oil impacted soil and ground water investigation sent in March . I suggested to Maric Mechanical that we meet at site with House Authority Representative to review what the NYSDEC requirements are and to find out what the current contract that Maric Mechanical has with Housing Authority and if this Environmental work would be covered under the contract .Thanks For Your Help Jeff . Vought forwarded email to DEC Kann and replied to Schrimpf that he should keep DEC Kann posted as she is current project manager. 12/27/11: J.kann - Visited site on June 2, 2011. Report received on August 30,2011. Reviewed report and sent comments to NYCHA on 12/23/11. 4/12/12: J.Kann - visited site with G. Breen for a PBS inspection in february 2012. Revised SAR submitted on April 12. 5/29/12: priority of p3 assigned, no exceedences in SIR. 8/7/13: J.Kann - The site was visited on July 31, 2013. The boiler room inspected, not fuel oil staining on boiler room walls. Based on the review of all information submitted to the Department, historic and current, the spill has been closed. This is based on the following: -The September 1995 SBE ISRP indicated and area around B-3 which was impacted. This contamination was likely No. 6 fuel oil. A well was installed in this boring location. A total of four borings were advanced and two wells installed. Groundwater samples analyzed were not impacted (STARS SVOCs and VOCs). USTs at this site were subsequently closed in place (Plant A feeds the boiler at Plant C) - As a part of boiler upgrade work in 2010, soils in the area around B-3 were excavated to allow for the installation of new boilers in the basement of Plant D. - No endpoints were taken as a part of boiler replacement, however, Boring B-5 was advanced by ALC in the vicinity of B-3 in 2011. The B-5 boring log did not show any

QUEENSBRIDGE PLANT C -NYCHA (Continued) **S121988517**

indications of oil impacts and the soil sample collected did not exceed CP-51 soil guidance values. -The ALC report included the advancement of 5 soil borings and the collection of one groundwater sample. All samples met CP-51 and TOGS 1.1.1 criteria. -Site currently operates on firm gas. -NFA "

DEC Memo:	"PBS #2-286613 5,000 gal vaulted #6 oil tank. RP: Goodman Management (Richard Goodman) 718-796-5022 10/25/2007 - PTC was called to site to clean the tank. On inspection they found oil coming through the vault wall into the basement. PTC on site now (10:30AM 10/25) pumping out oil. Will clean & inspect. Unknown if tank can be repaired or must be rebuilt. Unknown how much contamination there is at this time. SS 11/07/07-Vought-Called Ostrowski for update on site. Vought spoke to Ostrowski and he is waiting for tank to be removed so that he can

APT. BUILDING (Continued) **S108956065**

excavate soil. Tank is 5000-gallon AST #6 fuel oil and is wrapped with concrete wall. Front wall was removed and soil contamination present underneath tank. Building will remove tank and soil will have to be excavated. Bottom two feet of wall in grave was removed and oil stopped flowing but tank has to be removed for further remediation. Oil was coming into sump pit by boiler room. Vought called Goodman Management (Richard Goodman 718-796-5022) and agent is Jane Edralin (fax:718-796-5026). Vought left message with Edralin of return phone number and that letter is being sent with below requirements. DEC requires: 1)cleaning of sump 2)delineation of soil and groundwater contamination 3)collection of endpoint samples. Vought sent CSL with above requirements and one month due date to owner as per PBS: Inwood Tenants Corp. 100 Park Terrace West New York, NY 10034 Ms. Jane Edralin Goodman Management Co., Inc. 2736 Independence Avenue Suite A Bronx, NY 10463 Fax: (718) 796-5026 11/08/07-Vought-Received call from and spoke to PTC Salamack and PTC is sub on job and confirmed that tank had to be removed and tank will be removed by Controlled Combustion. 06/05/08-Vought-Received call from Nick Marrone (Miller-516-876-7940 Fax:516-876-7946) and AST encased in vaulted room was leaking and tank was cleaned and removed and temp tank installed. Ground saturated with #6 fuel oil and floor is exposed bedrock. Groundwater entering excavation (perched above bedrock) and additional soils excavated down to bedrock and some oil still recharging into sump. High pressure hot washer used to remove staining and boiler room was painted. A report will be submitted to DEC by 7/31/08. Letter should be sent to above address. 07/25/08-Vought-Received call from and spoke to Jeff Dugan (Ph:212-589-7022 fax:212-245-7132) who is president of coop board. Board looking to put in permanent tank. Dugan requested report review. 07/31/08-Vought-Reviewed Investigation and Remdiation report dated 6/13/08 and received on 6/18 from Miller Environmental (Nick Marrone). Tank was a 5000-gallon tank and boiler room floor and sump were impacted with oil. Seven cubic yards of oil impacted debris was removed from the tankroom. After the debris was removed, oil and groundwater continued to seep into the excavation . Appoximately 1200 gallons of oil water was taken off-site for disposal. Sump was vacuumed out and tank room was high pressure washed. An additional ten yards of oil impacted debris was removed. Sump location currently collecting oil. Assumption that groundwater flow to the northwest due to slope of bedrock towards Hudson River. Weekly VEFR visits being performed and recovery amounts are being evaluated to determine if a in-situ oil recovery system is needed. DEC requires: 1)submission of recovery amounts 2)placement of recovery and seepage location on site plan 3)installation of borings in the basement 4)delineation of groundwater contamination. Vought called and spoke to Nick Marrone and impact to sump pit behind boiler pit due to groundwater seepage. Tank leaked due to rusting and oil seeping through bottom of tank. Tank removed. Tank room excavation limited by structural limitations. Miller will delineate further and then recommend RAP. Nick will email proposal for further delineation and will also make sure Dugan is contacted and that new tank is not installed until delineation and hence RAP is determined. Vought faxed Marrone copy of 11/7/07 letter. 08/05/08-Vought-Received call from and spoke to Jeff Dugan. 09/28/08-Vought-Received call from and spoke to Dugan (Ph:917-482-7337 Fax:212-245-7132) and Miller delineated groundwater contamination and they submitted a report. Dugan requested report review and noted corrected address of: Mr. Jeff Dugan Apt 3E nwood

APT. BUILDING (Continued) **S108956065**

Tenants Corp. 50 Park Terrace West New York, NY 10034 Ms. Jane Edralin Goodman Management Co., Inc. 2736 Independence Avenue Bronx, NY 10463 Fax: (718) 796-5026 10/6/08-Vought-Reviewed Subsurface Investigation and Remediation Work Plan dated 9/18/08 and received on 9/23/08 from Miller (Nicholas Marrone). Ten borings were installed around 9/9/08 and confirmatory samples were collected. No visual #6 oil in borings B1, B2, B3, B4, B5, B8 and B9. Proposal to install system for recovery of heavy oil. Currently the tank room continues to recharge with perched groundwater. All excavated debris has been excavated from the tank room down to bedrock . Proposal to install a new sump and depression pump in the tank room with a 6-8 inch porous gravel pack and then pouring of a concrete slab. Proposal to install skimmer system in sump as well to collect free product that will be connected to an oil/water separator and carbon filter prior to discharge to NYC sewer system. Miller currently VEFRing excavation and sump. Vought called and spoke to Miller (Marrone) to inquire if proposed recovery sump in tank room will be sealed in case of future spills. Marrone assured that recovery sump will be sealed to provide no conduit to groundwater in case of spill. Vought discussed recovery system design with DEC Krimgold due to proposed installation inside tank room and DEC Krimgold had no objections to system design as long as sump was covered. Vought sent letter approving of the plan pending sealing of depression pump/sump system and submission of recovery amounts with cc to Miller. 2/18/10-Vought-Reviewed Spill Closure Request from Miller (Marrone) dated 1/28/10 and received via email. Product recovery system was installed including screen sump recovery area with depression pump. Oil belt skimming system was installed in Sump #1 and oil was dischared into 55-gallon product recovery drum and then carbon drum prior to discharge to sewer. NYCDEP Permit #C-4528. Frequent VEFR on sump and excavation while system was being constructed. Recovery system was fully operational on 4/1/09 and OM&M occurred monthly including product measurement. Report concludes that The site has been free of product in the monitoring well points and sumps since August 28, 2009 and requests spill closure. Vought called Marrone (Ph:845-569-1200) and left message with requirement of collection of dissolved sample and removal of system upon spill closure. Vought sent Marrone email with below requirements. DEC requires: 1)collection of dissolved groundwater sample and decomissioning of recovery system upon spill closure as it is in AST room (albeit covered). 6/11/10-Vought-Spill transferred from DEC Vought to DEC Ketani as per DEC Austin and Vought transfer to Section A. 7/7/10 - Raphael Ketani. Nicholas M. Marrone of Miller Environmental Group, Inc. (845) 569-1200, ext 104 called today. He wanted to know whether I had received the latest groundwater report. I told him that I hadn't. He said that he will send it to me and then, maybe, I will be able to close the spill case. Mr. Marrone sent me the 7/1/10 groundwater analytical report from York Laboratories. All of the analytes in the list were non-detect. As the contaminated soil was removed, and as there was no oil in samples from borings B1 to B5, B8 and B9, and as there has been no oil in the monitoring wells and the sumps since 8/28/09, I am closing the spill case."

Remarks: "JEFF IS FROM CONTROLED COMBUSTION WHO HIRED PETROLEUM TANK; TANK WILL BE PUMPED OUT; CAUSE IS TANK CORROSION;"

Contact Name:	ANTHONY
DEC Memo:	"5/1/2015 - Feng - Duty Desk. Talked to Anthony Lara of Petroleum Tank (917-709-3317, info@PetroleumTEK.com). There are four buildings at the site and spill was reported for each of the buildings: 1) Spill 15-01141, 61-61 Park Terrace West, Manhattan 2) Spill 15-01142, 55-57 Park Terrace East, Manhattan 3) Spill 15-01143, 65-67 Park Terrace East, Manhattan 4) Spill 15-01144, 70-72 Park Terrace West, Manhattan There was a tank test failure and reported a spill (It is spill 13-00122 for fill line failure). There are (3) 5,000-gallon ASTs and there are (5) USTs which were abandoned 15 years ago. These tanks are not in a single tank cavity, but they are in different location for each building. He uncovered two of them and found sand inside the tanks and appeared to be very clean. One of the uncovered tank appeared to be repaired once. He believed they did the conversion from #6 to #2 oil two years ago. He found #6 oil in the sump pit in each of the building. No vapor issue. The oil in the sump pits will be pump out. The course of action will include openning the tanks and inspection, testing all the tanks and lines, search PBS registration/tightness test record and all the investigation for spill. Management: Kathy Sandoval Park Terrace Garden, Inc 65-67 Park Terrace East (212) 567-6376 Kathy.Sandoval@EllimanPM.com Searched the PBS record and spill database: 55-57 Park Terrace East PBS 2-056499, (1) 5,000-gallon UST for #6 oil, closed-in-place. 65-67 Park Terrace East PBS 2-056448, (1) 13,000-gallon UST for #6 oil, in service. Spill 01-09660, reported 1/4/2002, tank test failure, dry leak, spill closed on 11/14/2014. Spill 13-00122, reported 4/4/2013, leaky fill line, the soil around the fillport has been excavated and the endpoints are clean. Called Kathy Sandoval (212-567-6376) and left a message to the receptionist for a call back. Conference call with R. Austin and J. Vought. Dispatched Santosh Mahat for a site inspection. The spill is assigned to Ryan Piper for followup on Monday. 5/27/15: Mahat Work plan and soil boring log has been uploaded on D2 for reference. 9/19/16 - Austin - Spill reassigned from Mahat to DeMeo, due to Santosh's transfer to Air Program. end 5/9/18 : Sekhon DeMeo : Directed me to schedule inspection for spill # 1501141 5/10/18 : Sekhon Spoke with Denise (212-567-6376)to schedule inspection. Denise advised me to contact Kathy, left voice message/email for her(Kathy): also cc to DeMeo 5/11/18 : Sekhon Got call/email back from Kathy, confirming inspection date/time 5/16 @ 10:30am 5/17/18 :

PARK TERRACE - BUILDING D (Continued) **S117852744**

Sekhon Visited site with DEC T.DeMeo on 5/16 @ 10:30am, met Mr. Paul Collins (Riteway Tanks), Kathy Sandoval from Park Terrace Management and Max (Super). Product observed leaching through crack in wall due to historical contamination associated with improperly abandoned UST. Multiple PBS violations identified during inspection, partial list below : - Registration information incorrect - Unregistered tanks in service - Incorrect tank labeling - missing color code at fill port - Failure to complete required testing - Invalid monthly reports 08/30/18-Hiralkumar Patel. reviewed project with DEC Sekhon as DEC DeMeo is on extended medical leave. 9:07 AM:- spoke with Dave Lorthioir at EnviroTrac. he mentioned that property owner owns five multi-story residential buildings on lots #: 210, 220, 230, 236 and 240 on block # 2243. all five buildings had individual UST system in past which were closed-in-place in 1980s. these five USTs were replaced with three ASTs serving five buildings. the five #6 oil USTs are located adjacent to building foundation wall, outside the boiler room in each building. in 2015, free phase product was noted seeping into multiple buildings. Dave mentioned that all five buildings have partial basement with boiler room only and that must be constructed in bedrock as bedrock is shallow in the area. after noticing oil seepage in 2015, Riteway Tank Maintenance installed multiple monitoring wells in boiler room floor where ol seepage was noted. groundwater was found right beneath the boiler room floor. Riteway has been gauging on-site wells and recovering product, but there are no records available. after noticing oil seepage, Riteway opened up all USTs and noted few tanks partially filled with sand. Riteway cleaned out remaining void space in USTs and filled those tank completely with cement. as these USTs are located adjacent to building wall, investigation between the tank and building wall is difficult. 08/31/18-Hiralkumar Patel. 9:00 AM:- visited site with DEC Sekhon and met Dave (EnviroTrac) and John (building super). John mentioned that five buildings are designated as below: - Building A - 60-62 Park Terrace West on lot # 240 - Building B - 55-57 Park Terrace East on lot # 210 - Building C - 61-67 Park Terrace East on lot # 220 - Building D - 75-77 Park Terrace East on lot # 230 - Building E - 70-72 Park Terrace West on lot # 236 all five buildings have USTs located adjacent to boiler room in basement. these five USTs were closed-in-place in 1980s and were replaced with three AST systems. currently, AST systems are located in Building A, Building C and Building D. oil tank system in Building C supplies service to Building B and Building C. oil tank system in Building D supplies service to Building D and Building E. the site area slops towards northeast, with Building A on hill and Building D at lowest elevation. John mentioned that all five buildings have ONLY partial basement that is occupied by boiler room. he stated that they receive water in boiler room of these buildings during summer months when sprinkler system is on, but no water accumulates in boiler room during winter months. the subject site is Building D which is located at northeast corner of the city block # 2243. inspected building basement boiler room which is located in central section along the building s southern foundation wall. the boiler room floor is approx. 20-22 ft bg. John showed patch in boiler room's southern wall where old supply/return lines were located. no signs of oil seepage noted below this patch, but oil seepage was noted through boiler room's southern, western and northern wall near the floor (approx. 3 ft above floor). Dave mentioned that the subject building D is at lowest elevation and large garden area between five on-site buildings is

PARK TERRACE - BUILDING D (Continued) **S117852744**

up-gradient of building D. due to building's lowest elevation, water from garden's sprinkler system may have pushed spilled oil around the boiler room. three monitoring wells are installed in boiler room floor: one well to the east of the boiler and two wells on north side of the boiler. John mentioned that absorbent pads are placed inside monitoring wells and Riteway had monitored and replaced these pads in past. a sump pit is located in northeast corner of the boiler room. no oil was noted in the sump pit. no petroleum odors were noted in the boiler room. there is a crawl space located above the boiler room location. an air scrubber unit has been placed in the crawl space. the scrubber unit was off at the time of inspection. conducted PID survey within the crawl space, an hallway above the crawl space (approx. 3 ft above the crawl space) and building entrance main lobby. 29 ppm recorded on PID within the crawl space, 5 ppm recorded in hallway above the crawl space and 5.5 ppm recorded in main lobby. an air scrubber (which was turned off a day before for inspection) is placed in main lobby also. inspected sidewalk area of remote fill port for the former UST system. John mentioned that the former remote fill line for the UST system was equipped with a closing valve located inside a box next to the fill port. the fill port and valve box were closed in-place when the UST system was taken out-of-service. Dave mentioned that they have proposed to install a venting system in the crawl space. they have also proposed to install one well/boring near the eastern end of the tank. due to oil seepage through boiler room's other walls and presence of odors within crawl space, asked Dave to install an additional boring/well near the western end of the tank. asked him to install borings/wells to a minimum depth of 3 ft below the boiler room floor. also asked him to survey boiler room/crawl space floor for elevation difference. the existing square AST is located to the west of the boiler room. the AST is located at ground level. 09/04/18-Hiralkumar Patel. alternate address: 520-536 W 217th St PBS #: 2-056472. as per PBS record, the site has one (1) 10,500 gal #2 gal AST, closed-in-place in Nov. 2016. the PBS record is incorrect due to following: - PBS record does not include any information about the old #6 oil UST system - PBS record shows a closed-in-place 10,500 gal #2 oil AST, but this AST is currently in-service - PBS record shows installation date of AST as Sept. 1939, but the AST must be installed after closure of UST system in 1980s other spills for Building D: 0011644, 0301752, 0302733, 1411452 spill #: 0011644 was reported on 01/29/2001 as 50 gal #4 oil spilled due to tank overfill. case administratively closed. spill #: 0301752 was reported on 05/19/2003 as 20 gal #4 oil spilled due to tank overfill. case closed. spill #: 0302733 was reported on 06/13/2003 as 25 gal #4 oil spilled due to tank overfill. case closed. spill #: 1411452 was reported on 03/06/2015 as 10,000 gal #2 fuel oil tank system failed a tightness test. the leak was noted in the remote fill line. case closed and merged with the subject spill case. reviewed work plan found under spill # 1501144. Riteway Tank submitted subsurface investigation work plan on 05/07/2015 proposing borings along former UST remote fill line at Building D. reviewed work plan submitted by EnviroTrac on 08/24/18. the work plan proposes: - install at least one monitoring well at Buildings B, C and D - install SSDS in crawl space beneath western portion of Building D - weekly gauging of wells 12:20 PM:- sent email to Dave. asked him to submit summary of work performed in Building B/C/D since 2015, including well installation/gauging record. also asked him to submit a revised work plan addressing following comments: - need to

PARK TERRACE - BUILDING D (Continued) **S117852744**

add list of three buildings with address and spill #s in subject line - installation of second well at building D - subsurface investigation along the former remote fill line for UST system at building D (under spill # 1411452) email copied to Ms. Sandoval and DEC Sekhon. P. T. Tenants Corp. **property owner** c/o Douglas Elliman Property Management 72 Park Terrace West, Apt E-16 New York, NY 10034 Attn.: Kathy Sandoval Ph. (212) 567-6376 Fax (646) 843-2461 email: kathy.sandoval@ellimanpm.com 12:27 PM:- sent email to Dave and informed him about incorrect PBS record for Buildings A, C and D. asked him to inform property owner to correct PBS records. email copied to Ms. Sandoval and DEC Sekhon. 9/5/18 - Sekhon Sub surface investigation (Boring log) results from 6/15/15 discussed with Dave by DEC Kumar and Sekhon, upon discussion DEC plans to add two more boring locations (if practically possible : one on side walk and other inside the property line) along former UST remote fill line due to elevation and sample results from sub surface investigation. Also there are three separate crawl spaces in building D, PID surveys had been performed , only one crawl space has vapor issue. Dave will submit new work plan. Reports from june 2015 uploaded to DECDOCs. 9/18/18 - Sekhon DEC Sekhon and Kumar witnessed monitoring well boring next to the old closed tank in building D. 11/20/18 - Sekhon Updates from David Lorthioir 11/5/18 & 11/19/18 " Kathy is waiting to receive three checks from the management company (Douglas Elliman). When she receives them she is going to send in the corrected PBS registrations for Buildings B, C and D. * Envirotrac gauged the monitoring wells last week. Approximately 2 inches of product in the well behind Building C. A trace amount in one of the wells by Building D. We will be going to gauge the wells again in the middle of the month. We have installed four wells at the site and gauged the wells several times. As shown on the attached table, only well ET-3 has shown any appreciable product. This is surprising as wells ET-1 and ET-2 are located outside Building D, which is where the worst impact has been observed. It should also be noted that the free product was only present on an intermittent basis. It is my opinion that there is not enough data to draw any conclusions at this time. We will continue to monitor these wells on a monthly basis. We also installed two borings along the abandoned fill line for Building D. As part of the closure for the Spill associated with this fill line, Riteway installed several borings. I forwarded you this documentation a few months ago. After reviewing the documentation you asked EnviroTrac to install two borings out in the sidewalk area along the fill pipe and near the old fill port. The fill pipe ran uphill and the two locations investigated by EnviroTrac are topographically the lowest. The borings were installed until bedrock was encountered. No visible petroleum impact was noted and petroleum odors were not present in either boring. The deepest sample from each boring was submitted for laboratory analysis (see attached). No elevated concentrations of VOC or SVOCs were present, although there were a few minor hits. It is our conclusion that this release did not migrate far enough to reach the sidewalk or street and is contained to the general area of the abandoned UST. These soil borings, along with the work performed by Riteway, will be documented in a separate report. At this time the building staff is changing the absorbent pads in the sumps of Buildings B, C and D on a regular basis. EnviroTrac is changing the pads in the boil room monitoring wells at least once a month. This schedule will continue for the time being. With regards to the SSDS proposed for Building D, we plan on

PARK TERRACE - BUILDING D (Continued) **S117852744**

beginning the installation of the system sometime in December. Recent inspections have not identified any noticeable odors or PID readings in Building D. It should be noted that information provided by the maintenance staff indicated that the petroleum odors were worse in the summer, which is the reverse of what should be. Report DECDOCs. 1/9/19 - Sekhon Updated email from Dave - Nothing has really changed at the site. Our next monthly inspection is scheduled for tomorrow (1/9). The December monitoring event indicated a (0.25inches) inch or so of product in the well by Building C. No product in the wells by Building D. We are scheduled to begin the installation of the SSDS under Building D on Tuesday, 1/15. Management asked us to perform an indoor air survey of Building D. This was performed and we are going to send the results to Nate Waltz at NYSDOH for review. After consulting with the gentleman from PBS, we have to change the building registration even more and am in the process of doing that. He told us to condense all of the separate PBS registrations into one. Am trying to finish up the report for the Spill concerning the fill line, just behind on things after taking time off for the holidays. Dave DEC requires: 1) PBS correction, 2) subsurface investigation via installation of two borings: one at each end of the tank, 3) investigation along former UST remote fill line under spill # 1411452, 4) installation of a venting system in crawl space. 7/29/19 - Sekhon Report submitted to DEC for review. DECDOCS Envirotrac Installed two monitoring wells along the south side of the building in the immediate vicinity of the abandoned UST and also two soil borings along the abandoned fill line running south of the building. These borings were to be installed along the eastern portion of the fill line, near Park Terrace East. A review of the two samples collected from ET SB-1 and ET SB-2 exhibited dissolved VOC and SVOC concentrations below laboratory detection levels for all compounds except for three SVOCs in ET SB-2. The detectable concentrations were Fluoranthene (0.084 ug/kg), Benzo(b)fluoranthene (0.052 ug/kg) and Pyrene (0.064 ug/kg). None of the compounds detected in ET SB-2 exceed their respective NYSDEC Soil Cleanup Levels as found in CP-51. Monitoring wells ET-1 and ET-2 have been gauged on a monthly basis since their installation. Depth to water has fluctuated by as much as 0.77 feet in ET-1 and 0.45 feet in ET-2. Free phase product has not been detected in ET-1 and ET-2 since their respective installations. Due to persistent petroleum odors in the western portion of the building, an indoor air quality (IAQ) investigation was performed by EnviroTrac to assess air quality in the following area - First floor apartment, lobby, western crawl space, western 1st floor sairays, western 3rd floor hallway and outside of building D, to the south When comparing the concentrations of compounds exhibited by each sample to their respective NYSDOH guidelines, there are no exceedances of any guideline values for Methylene Chloride, Tetrachloroethene or Trichloroethene.New York State only has air guideline values for five compounds. 11/12/19 - Sekhon Email send to David Lorthioir (David Lorthioir, PG) & Chantee Cade (Chantee.Cade@ellimanpm.com -- Property Manager) to get updates. 11/14/19 - Sekhon email from David (EnviriTrac) - 11/14/19 @1:07Pm As we discussed on the phone recently, here is a brief update on the status of the above spill. The walls of the boiler room were powerwashed and painted with an epoxy paint during the summer. We have inspected the boiler room on a monthly basis and, to date, we have not observed any oil stains penetrating the new paint. We also cored two holes in the outer foundation wall to investigate

PARK TERRACE - BUILDING D (Continued) **S117852744**

groundwater outside the foundation wall. One hole was approximately three feet above the boiler room floor while the other hole is approximately seven feet above the floor. Plugs, equipped with spigots, were inserted into the holes to seal them. During each inspection the spigots are opened and water is allowed to drain out. The water is inspected for the presence of petroleum. While both spigots initially exhibited oil when they were installed, a falling water table caused the upper spigot to go dry for most of the summer and early fall. No oil was observed from the lower spigot during this time. Some heavy rain storms in October have caused the water table to rise, with the upper spigot now producing water, but no oil. The wells in the floor have exhibited moderate amounts of free petroleum. The two monitoring wells located outside the building have not exhibited any free petroleum since the last update report. With the falling water table, the volume of oil entering the sump had fallen sharply. After the above mentioned rain storms, free phase product has started to enter the sump again. We are considering installing holes in the side walls of the sump that would allow the oil trapped beneath the floor to more freely enter the sump, at which point it would be recovered utilizing the current system of absorbent pads. The SSDS beneath the western portion of the building has been completed and, in the spring, the crawl space was lined with a vapor barrier. There have not been any noticeable petroleum odors in the building since the installation of this system. Dave Lorthioir
2/3/2020 - Updated report submitted. DECDOCs The three interior wells located in the boiler room were inspected by EnviroTrac since October 2018 on a monthly basis. Absorbent pads are used in the wells and sump as needed in order to remove any free-phase product. Since inspection of the wells by EnviroTrac began, an oil and water mix has been consistently observed in all three wells during more than half of the interior The sump pit was inspected by EnviroTrac during each monthly inspection. EnviroTrac observed moderate to little amounts of free phase product on the groundwater in the sump throughout the inspections. Building Management has inspected the sump daily for the presence of petroleum from 2015 to December 2019. Absorbent pads are placed in the sump by Building Management and are changed on a daily basis. Building Management has observed low, but consistent, amounts of free product in the sump since August 2018. monitoring well inspections. Building management decided to power wash and paint the walls in all the boiler rooms at the complex. This work was performed on August 22, 2019, after the installation of the core holes. The stained area associated with the two core holes has re-appeared since the painting was completed in September. "

Remarks: "unknown equipment failure clean up is started"

Spiller Name: Not reported
Spiller Company: FUEL DELIVERY TRUCK
Spiller Address: Not reported
Spiller Company: 999
Contact Name: VICTORIA SWAN
DEC Memo: "4/12/2016: Rashad Spoke to Victoria she noted that there is slick oil on street and that it is traveling down street into storm drain. She also said that there is an oil delivery truck on the street however she does not know who the company is. She also said that there is an odor in the area. Called two PBS registrations phone numbers in the vicinity 100 Park Terrace West (PBS2-211133) and 520 West 218th Street (PBS 2-211745), also called Columbias athletic department and a nearby Laundromat. No-one answered except for The laundromat which is located on 510 West 218th street said there was an overfill at 100 Park Terrace west and that another company came to clean it up . I responded to site to inspect area, I observed no product on street or sidewalk. I did observe a sheen on the street on Park Terrace East (not 100 Park Terrace West) however it was not out of the ordinary as it has been raining all day. I spoke to the super at 108 Park Terrace East and he noted that there was an oil truck on the block around 9am however he does not know who the oil company was and did not observe a spill. I also spoke to the super in 100 Park Terrace West, she said there was a delivery today (they have a 5000 gallon #4 fuel oil AST in contact with impervious barrier) however there was no spill, her oil company is Sprague and photograph of delivery ticket states that 2500 gallons was ordered and 2501 was delivered. Inspection of aboveground tank noted no odors or spills, no odors were observed in building and no evidence of discharge was found. Delivery ticket also states that oil level in tank was checked before delivery with petrometer and stick. There was 1500 before delivery and 2501 delivered bringing the total to 4001 gallons. Spill will be closed as per site observations. 4/13/2016: Rashad Photos were uploaded to D2. "
Remarks: "The caller saw the oil running down the street into the storm drain. She saw that when she was driving by . There is like a block with the oil running pretty heave down. She didnt know if the leak was from the tank or from the guys filling oil tanks there."

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Contact Name:	GEORGE CUNNINGHAM
DEC Memo:	"2/22/08 bf: Called George Cunningham of NYCT (646)252-3607 and left message on machine to call me. Sent ttf letter to: James Hauser, OSS, Acting Manager, Environmental New York City Transit 2 Broadway, 27th Floor New York, NY 10004 02-25-08: Transferred from Falvey to Tibbe. Tibbe has an ongoing rememdiation system at this this. Some monitoring wells were showing what appeared to be fresh product, so NYCT was asked to test their system. This resulted in a line test failure - this spill. 2/25/08 Received message on 2/22/08 fropm George Cunningham. The failed line was a discharge line and it was taken out of service. bf 06/26/08: Primary discharge line was repaired. All primary passed retesting. Secondaries keep failing. NYCT researching alternatives for piping run - getting estimates and variences to run piping above ground. Discharge from this spill is being recovered by existing remediation system being handled under Spill # 9510775. "
Remarks:	"LINE TEST FAILED AND NO PRODUCT FOUND':"

Tank Info:

Tank Number:	001
Tank Id:	5501
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

B00 - Tank External Protection - None
F00 - Pipe External Protection - None
G03 - Tank Secondary Containment - Vault (w/o access)
H00 - Tank Leak Detection - None
K01 - Spill Prevention - Catch Basin
L09 - Piping Leak Detection - Exempt Suction Piping
D08 - Pipe Type - Equivalent Technology
E00 - Piping Secondary Containment - None

235 SEAMAN AVENUE (Continued) **U003385283**

A00 - Tank Internal Protection - None
C01 - Pipe Location - Aboveground
I05 - Overfill - Vent Whistle
J02 - Dispenser - Suction Dispenser

Tank Location:	Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service

DEC Memo:	"Prior to Sept, 2004 data translation this spill Lead_DEC Field was KOLLEENY 10/04/05: Spill case transferred from J. Kolleeny to A. Zhitomirsky, who is DEC project manager for this DDC site. - J. Kolleeny 10/07/2005 The site has free product plume. AZ 10/24/2005 Quaterly Report from 5/24/2005 from LiRo was reviewed in July 2005. Reviewed and approved proposed soil boring locations for the first round of soil sampling. AZ 1/24/07 At the meeting with DDC/URS on January 10, 2007, the site was discussed. URS will prepare a site map with existing borings/wells and tank locations. A site visit will be arranged. AZ 3-17-2009 An e-mail was sent to Jane Staten (URS): What's the status of this spill? I do not have any updates since 2007. AZ 3-17-2008 J. Staten replied that she contacted Mike Murphy,DSNY, about this spill number. URS wantS to make sure which tank the spill report is referring to before they spend the money for an investigation. AZ Michael R. Murphy NYC Department of Sanitation Facilities & Equipment 125 Worth Street, Room 823B New York, N.Y. 10013 (T) 646-885-4876 (C) 646-235-3041 (E) mrmurphy@dsny.nyc.gov 9-2-09 URS in their report dated April 24-09 stated that they continue to research spill #9705837. AZ 1-11-10 Reviewed free product recovery and groundwater monitoring data for the period April through June 2009. VOCs were detected in wells LMW-09 and LMW-11 ranging from 1,530 ppb to 1,017 ppb respectively. Contaminant concentrations increased in a couple of wells this quarter. AZ 4-5-2010 Reviewed a URS's report dated February 1, 2010. No free product has been detected at the site in over six months. URS will reduce the frequency of the product recovery visits from monthly to quarterly. VOC concentrations ranged from 6 ppb to 350 ppb. AZ 6-3-2011 An e-mail was sent to K. Shenahan: Dear Kevin, I have reviewed a report covering the period of October - December 2010 and dated April 28, 2010. The report provided a table with bulk storage records. This table indicated that a number of discrepancies exist between the URS records and the current PBS records including contents, status and capacity of tanks. A field inspection should be performed by URS. A reconciliation of existing tanks, past site plans, tank closure reports and NYSDEC's PBS registry data should be performed. URS should verify how many USTs were historically present and/or may still be located on site. Size, status (active/closed in place/removed) and contents of the existing/closed in place/removed tanks should be confirmed. Corrected detailed information should be reported to the DEC PBS Section and included in next monitoring report. AZ 11-7-2011 An email was sent to URS (Kevin Shenahan): Dear Kevin, I have reviewed a report covering the period of January - March 2011 and dated July 28, 2011. The report provided a table with

MANHATTAN DISTR. 8 (OLD BX W. 7) DOS -DDC (Continued) **S102659627**

bulk storage records. This table indicated that a number of discrepancies exist between the URS records and the current PBS records including contents, status and capacity of tanks. During a recent site visit, URS confirmed the accuracy of the status of several tanks. However, the status of many tanks is still unknown. The tank status should finalized in the next monitoring report. Corrected detailed information should be reported to the DEC PBS Section. Sincerely, Alexander Zhitomirsky Engineering Geologist 2 NYSDEC Region 2 Division of Environmental Remediation AZ 7-31-2012 The following e-mail was sent to URS/V. Brevdo/M. Asbagh: Dear Kevin, I have received a groundwater monitoring data report for the first quarter 2012 and dated May 1, 2012. This report evaluated criteria for closure of spill #9705837. According to the report, the source of contamination was at Tank Area 4 and 5, which contained a 2,000-gallon gasoline UST (Area 4) and 1,000-gallon waste oil UST (Area 5). The tanks in Area 4 were removed in 1994 and the tank in Area 5 was replaced in 2000. However, spill report #9705837 states that spill#9705837 was reported when 5,000-gallon #2 fuel tank failed the test. This discrepancy should be resolved. Sincerely, Alexander Zhitomirsky Engineering Geologist 2 NYSDEC Region 2 Division of Environmental Remediation AZ 3/15/2013 Reviewed report dated 10-11-2012. The report requested that this spill number is transferred to Manhattan West 8 site. This spill is already attributed to Manhattan West 8 site. AZ 5/28/2013 Reviewed a proposed Work Plan dated February 20, 2013. Discussed the ste with K. Shenahan over the phone. An e-mail was sent to K. Shenahan/V. brevdo/M. Asbagh: Dear Kevin, I have reviewed a Work Plan for the above site dated February 20, 2013. The Work Plan calls for investigation of a 5,000 gallon UST which failed a tightness test. This tank was presumably closed in place. The Work Plan submitted by URS is conditionally approved. URS should proceed with a geophysical survey of the designated areas. However, the Work Plan has not recommended any investigation of the piping and fill port associated with this UST. Also, only one well was recommended for installation. If soil contamination is encountered, three monitoring wells should be installed. After geophysical survey is completed, a map with the proposed soil boring locations should be submitted to DEC. The Work Plan should be modified to reflect the above mentioned comments and submitted to DEC. Sincerely, Alex Zhitomirsky 5-28-2013 E-mail from K. Shenahan: Alex, Thanks for the conditional approval. We will send you the results of the geophysical investigation and review the best locations for borings and wells. In addition, we will include investigation of remote fill and piping to the extend feasible. This will also be reviewed with you prior to drilling. Kevin J. Shanahan 7-29-2013 Contacted Kevin Shenahan. The geophysical showed potentially 3 USTs. A lot of potential piping was discovered. Nothing has been done at the site before. There two options: 1. Sample soil and ground water and if contamination is found, excavate the tanks and piping, if feasible. 2. Excavate the tanks and piping if feasible. Kevin will contact DDC and look for their input. AZ 8-6-2013 The following e-mail was received from K. Shenahan (URS): Alex, As you requested, URS is re-issuing this e-mail documenting the boring locations and plan to install groundwater monitoring wells in accordance with the approved March 8, 2013 Work Plan. A total of 15 borings are proposed. If petroleum contamination is encountered, we will install at three groundwater monitoring wells around each tank and sample groundwater. We will also install additional wells as

MANHATTAN DISTR. 8 (OLD BX W. 7) DOS -DDC (Continued) **S102659627**

necessary to delineate the extent of free product or dissolved phase contamination. We have also attached the geophysical survey report for your files. Thanks, Kevin J. Shanahan 8-13-2013 The following e-mail was sent to K. Shenahan/V. Brevdo/M. Asbagh/H. Roberts: Dear Kevin, I have reviewed a modified Work Plan to install soil borings and groundwater monitoring wells. The Responsible Party and Contractors are responsible for the safe execution of the Work Plan. Sincerely, Alexander Zhitomirsky 4-10-2014 The following e-mail was sent to K. Shenahan and V. Brevdo: Dear Kevin, I have reviewed an Investigation Summary and Remedial Plan for the above site. The Remedial Plan for this site proposed removal of tank#008 and any remaining piping within the footprint of the excavation. Also, limited soil excavation will be performed. I concur with this Work Plan. Former fill port should located and excavated, if feasible. Post excavation samples should be taken. URS should include proposed number and locations of the post excavation samples in the Design Analysis Report. The Responsible Party and Contractors are responsible for the safe execution of the Work Plan. Sincerely, Alexander Zhitomirsky 9-19-2014 An e-mail was sent to K. Shenahan/V. Brevdo: Dear Kevin, I have reviewed a Design Analysis Report (DAR) for this site received on July 1, 2014. DAR proposed removal of tank#008 and any remaining piping within the footprint of the excavation. Also, limited soil excavation and additional investigation will be performed. I concur with these proposals. Former fill port should be located and excavated, if feasible. Post excavation samples should be taken. The Responsible Party and its contractors are solely responsible for the safe execution of all invasive work performed at the site, and in particular, are responsible for identifying subsurface utilities and safeguarding the structural integrity of any excavations, buildings, utilities, and other structures both on and off site that may be adversely affected by the work. The Responsible Party and its contractors must obtain any local, state or federal permits or approvals that may be required to perform the work necessary to address this spill. Furthermore, the Responsible Party and its contractors are solely responsible for the implementation of all appropriate health and safety measures during the performance of this work. Sincerely, Alexander Zhitomirsky 10-13-2015 Reviewed a monitoring report through the Third Quarter of 2015, and dated December 19, 2014. Tank No. 008 and surrounding soil will be excavated. DEC approved the excavation in September 2014. Two monitoring wells will be decommissioned prior to the remediation work, and replaced once the excavation is completed. It is likely that petroleum contamination is present beneath the building. A chemical oxidant will be placed into the excavation prior to backfill. Free phase product is found in one well at the site. URS will implement the proposed supplemental investigation. AZ 3-9-2016 Reviewed a monitoring report through the Fourth Quarter of 2014 and the first Quarter 2015, and dated June 5, 2015. Tank No. 008 and surrounding soil will be excavated. DEC approved the excavation in September 2014. Two monitoring wells will be decommissioned prior to the remediation work, and replaced once the excavation is completed. It is likely that petroleum contamination is present beneath the building. A chemical oxidant will be placed into the excavation prior to backfill. URS will excavate test pits and collect other information to verify that excavation of the tank is feasible, and to collect information necessary for the final design of the tank removal. AZ 5-9-2016 Reviewed a monitoring report through the second

MANHATTAN DISTR. 8 (OLD BX W. 7) DOS -DDC (Continued) **S102659627**

Quarter of 2015, and dated October 20, 2015. Tank No. 008 and surrounding soil will be excavated. DEC approved the excavation in September 2014. Two monitoring wells will be decommissioned prior to the remediation work, and replaced once the excavation is completed. It is likely that petroleum contamination is present beneath the building. A chemical oxidant will be placed into the excavation prior to backfill. URS will excavate test pits and collect other information to verify that excavation of the tank is feasible, and to collect information necessary for the final design of the tank removal. The dissolved phase contamination and the free product are found only in the immediate area surrounding Tank No. 8. AZ 8-15-2016 Reviewed a monitoring report through the third and fourth Quarters of 2015, and dated January 8, 2016. Tank No. 008 and surrounding soil will be excavated. DEC approved the excavation in September 2014. A test pit was excavated in June 2015 near Tank No.008. Piping was encountered pocket of stained soil was encountered. PID readings were elevated but there were no exceedances in three soil samples. Two monitoring wells will be decommissioned prior to the remediation work, and replaced once the excavation is completed. It is likely that petroleum contamination is present beneath the building. A chemical oxidant will be placed into the excavation prior to backfill. The dissolved phase contamination and the free product are found only in the immediate area surrounding Tank No. 8. About 0.01' of free product was found in July 2015. The petroleum absorbent sock was reinstalled at that time. AZ 1-26-2017 Reviewed a monitoring report through the first Quarter of 2016, and dated June 8, 2016. Tank No. 008 and surrounding soil will be excavated. DEC approved the excavation in September 2014. URS will retain a qualified remediation contractor to conduct the tank removal and soil excavation. URS will proceed with the final design of the tank removal and excavation of surrounding impacted soil. AZ 3-21-2017 Reviewed a monitoring report for the second Quarter of 2016, and dated August 15, 2016. Tank No. 008 and surrounding soil will be excavated. DEC approved the excavation in September 2014. URS will retain a qualified remediation contractor to conduct the tank removal and soil excavation. URS will proceed with the final design of the tank removal and excavation of surrounding impacted soil. MW-06 had 0.1' of product in May 2016 and the absorbent sock was 50% saturated. AZ 5-24-2017 Reviewed a monitoring report for the third Quarter of 2016, and dated November 29, 2016. Tank No. 008 and surrounding soil will be excavated. DEC approved the excavation in September 2014. URS will retain a qualified remediation contractor to conduct the tank removal and soil excavation. URS will proceed with the final design of the tank removal and excavation of surrounding impacted soil. The absorbent sock in wMW-06 was 50% saturated in August 2016. AZ 9-7-2017 Reviewed a monitoring report for the Fourth Quarter of 2016, and dated Feb 16, 2017. Tank No. 008 and surrounding soil will be excavated. DEC approved the excavation in September 2014. URS has retained CGE to conduct the tank removal and soil excavation. URS will proceed with the final design of the tank removal and excavation of surrounding impacted soil. Monitoring well MW-06 had 0.01' of free-phase product in November 2016. AZ 10-26-2017 Reviewed a monitoring report for the First Quarter of 2017, and dated April 19, 2017. DEC approved the excavation in September 2014. It was determined that underpinning would be required during the excavation. However, Tank#8 is located adjacent to the building foundation, preventing access for the underpinning construction. A heavy sheen was observed in monitoring

MANHATTAN DISTR. 8 (OLD BX W. 7) DOS -DDC (Continued) **S102659627**

well MW-06 in February 2017. AZ 2-6-2018 Reviewed a monitoring report for the Second Quarter of 2017, and dated August 8, 2017. DEC approved the excavation in September 2014. It was determined that underpinning would be required during the excavation. However, Tank#8 is located adjacent to the building foundation, preventing access for the underpinning construction. From March through June 2017, no product has been observed in well MW-06. AZ 7-12-2018 Reviewed a monitoring report for the Third Quarter of 2017, and dated November 21, 2017. Product sheen was last observed in well MW-06 in February 2017. URS recommended analyzing groundwater samples for VOCs only including naphthalene. This proposal was approved via e-mail. AZ 8-15-2018 Received URS proposals for advancement of soil borings for further spill delineation. Discussed this proposal with K. Shanahan over the phone. We agreed that the plume is currently delineated. Some remediation of saturated and unsaturated soil is required. Excavation and soil injections are considered as possible remedial options. URS will discuss the site with DDC and revise the proposals accordingly. AZ 8-14-2016 The following e-mail was sent to K. Shanahan: Dear Kevin, I have reviewed a monitoring report for this site dated May 21, 2018. The report suggested analyzing groundwater samples for VOC only, including naphthalene, since no other SVOCs have been detected over the past few years. I concur with this recommendation. Sincerely, Alex Zhitomirsky - Engineering Geologist 2 NYS Department of Environmental Conservation 47-40 21st Street, Long Island City, NY 11101 Phone: 718.482.6387 - Fax: 718.482.6390 Email: alexander.zhitomirsky@dec.ny.gov 11-29-2018 The following e-mail was sent to K. Shanahan and V. Brevdo: Dear Kevin, I have reviewed an Investigation Summary and Remedial Plan Addendum of Work for this site. The plan proposed in-situ chemical oxidation and bioremediation to address the residual petroleum contamination at the site. This proposal is approved. All necessary notifications must be made. The Responsible Party and its contractors are solely responsible for the safe execution of all invasive work performed at the site, and in particular, are responsible for identifying subsurface utilities and safeguarding the structural integrity of any excavations, buildings, utilities, and other structures both on- and off-site that may be adversely affected by the work. The Responsible Party and its contractors must obtain any local, state or federal permits or approvals that may be required to perform the work necessary to address this spill. Furthermore, the Responsible Party and its contractors are solely responsible for the implementation of all appropriate health and safety measures during the performance of this work. Sincerely, Alex Alex Zhitomirsky - Engineering Geologist 2 NYS Department of Environmental Conservation 47-40 21st Street, Long Island City, NY 11101 Phone: 718.482.6387 - Fax: 718.482.6390 Email: alexander.zhitomirsky@dec.ny.gov 7-18-2019 Reviewed a monitoring report for the Third Quarter of 2018, and dated December 20, 2019. Product sheen was last observed in well MW-06 in February 2017. Total VOC concentrations detected in soil saturated zone was up to 203,200 ppb (boring B-10) in 2013. B-12 had 44,000 ppb of naphthalene in soil in unsaturated zone. The latest dissolved VOC concentrations were between 15 ppb and 52 ppb. URS will proceed with Klozur CR injections and install six post-remediation soil borings in the vicinity of previous borings B-11, B-10, B-12, B-14 and B-15. AZ 10-22-2019 Reviewed a monitoring report for the Fourth Quarter of 2018, and dated March 7, 2019. Product sheen was last observed in well MW-06 in February 2017. DEC approved the ISRP proposing Klosur injections on

MANHATTAN DISTR. 8 (OLD BX W. 7) DOS -DDC (Continued) **S102659627**

November 29, 2018. The Klosur injections began in February 2019 and are ongoing. URS will collect soil samples for analytical testing from six post-remediation soil borings.AZ "

Tank Info:

Tank Number:	1
Tank Id:	232063
Material Code:	0008
Common Name of Substance:	Diesel

Equipment Records:

	A00 - Tank Internal Protection - None B01 - Tank External Protection - Painted/Asphalt Coating G09 - Tank Secondary Containment - Modified Double-Walled (Aboveground) H01 - Tank Leak Detection - Interstitial - Electronic Monitoring E00 - Piping Secondary Containment - None I02 - Overfill - High Level Alarm K01 - Spill Prevention - Catch Basin C00 - Pipe Location - No Piping F00 - Pipe External Protection - None D00 - Pipe Type - No Piping L00 - Piping Leak Detection - None J00 - Dispenser - None
Tank Location:	Aboveground - contact with impervious barrier... Tank bottom rests on impervious barrier, allowing visual indication of leaks.
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	Closed - Removed
Pipe Model:	Not reported
Install Date:	12/09/2008

TIME WARNER CABLE (Continued) **A100348622**

Capacity Gallons:	2400
Tightness Test Method:	-

Click Here:

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.
