

**Phase I Screening Summary**

2371 Eighth Avenue, New York, New York 10027  
Block 1954, Lot No. 31

**Property Information:**

The Site consists of a single 0.05-acre (2,100 square foot) tax lot located on the western side of Eighth Avenue (Fredrick Douglass Boulevard), between West 127<sup>th</sup> Street to the south and West 128<sup>th</sup> Street in the Harlem section of the Borough of Manhattan, City of New York, New York County, New York (**Figure 1**). The Site identified by the street addresses of 2371 Eighth Avenue, and as Borough 1, Block 1954, Lot No. 31 (**Figure 2**) on the New York City Tax Maps.

The elevation of the Site is approximately 40 feet above mean sea level (amsl). As no water table maps are published for the site vicinity, evaluation of the surface topography and available geologic information indicates that shallow groundwater, if present, is likely perched above bedrock and recharges through precipitation, storm water run-off and possibly leaking utilities. Groundwater, if present in unconsolidated materials, likely flows to the west towards the Hudson River. The Site is zoned for R8A residential use, with a C2-4 commercial overlay.

**History:**

Site history was determined based on a review of Sanborn fire insurance maps and city directories. The Site shown as developed with a 5-story building, fronting east toward Eighth Avenue and occupying the majority of the site footprint in 1902. A small undeveloped yard area is west of the building. The 1912 map identifies the building as containing a basement and occupied by a retail store and apartments. Between 1976 and 1978, the retail store was converted to a church, with the upper floors comprised of eight (2 per floor) apartments. The building was demolished in 2012, with the property remaining undeveloped through the present.

Surrounding properties were densely developed with low-rise retail and residential buildings by at least 1902, with several boarding or livery stables further to the northwest and southwest. Eighth Avenue was adjacent to the east, with West 128<sup>th</sup> Street further to the north and West 127<sup>th</sup> Street further to the south. By 1912, a movie theater was across West 127<sup>th</sup> Street further to the south. By the early 1950s, the movie theater to the south was replaced with a church and the buildings across Eighth Avenue to the east were being demolished to facilitate the construction of the existing St. Nicholas housing (apartment) complex, which was completed circa 1951. Public School No. 154 was constructed further to the east-southeast by the early 1960s. By the mid-to late-1970s, several undeveloped parcels were to the northwest and further to the west along West 127<sup>th</sup> Street. The northern adjacent parcel was undeveloped by the mid-1980s, with an additional undeveloped parcel at the southwestern corner of Eighth Avenue and West 128<sup>th</sup> Street, and several undeveloped parcels to the southwest, beyond West 127<sup>th</sup> Street. By the early-1990s, a surface parking lot was present on the southeastern corner of West 127<sup>th</sup> Street and St. Nicholas Avenue. The northern adjacent properties and vacant land along the north side of West 127<sup>th</sup> Street were developed with the existing mid-rise retail/residential buildings in the late-2000s to early-2010s.

The Site address (2371 Eighth Avenue) was listed in the city directories as being occupied by individuals (residential tenants) from 1920 (earliest available listing) through 2006, with several commercial retail listings. These include Dermatological Products Corp. (1938), Post Glass Co. (1956-1968), and AAA Hell Whitewashing Co. (1963). The surrounding properties were identified primarily as residential properties from the 1920s through the present, with various retail and restaurant uses along Eighth Avenue to the east. Several garages, auto repair shops and auto painting operations were also identified along West 128<sup>th</sup> Street from the 1930s through the 1990s. In addition, laundries, several dry cleaners, medical offices and beauty salons were also identified along West 127<sup>th</sup> Street (south) and Eighth Avenue between the 1930s and 2000s, with most listed between the 1950s and 1970s.

EBC's review of historical information did not reveal evidence of recognized environmental conditions (RECs) in connection with the adjoining properties. However, EBC notes that the several adjacent/nearby properties were listed in the regulatory database report as dry cleaners, petroleum storage facilities and/or associated with closed spill incidents. These listings are detailed below (Environmental Database Search section), where they are determined unlikely to represent a significant environmental concern to the Site.

**Site Inspection:**

EBC representative, Maggie Ellis, inspected the Site on October 10, 2017. No representatives of 2371 Eighth LLC, the property owner were present during the site inspection, however, EBC personnel did contact Mr. Joshua Asherman of TCX Development, who arranged permission and for EBC to access the Site.

The property is undeveloped, unpaved and overgrown with dense vegetation. The eastern site perimeter is enclosed with chain-link fencing with a gated entrance leading from the sidewalk area along Eighth Avenue (south). The remaining site perimeters are bounded by the adjacent mixed-use buildings, except for the aforementioned portion of the eastern boundary. Minor amounts of non-hazardous household trash were strewn across the property.

No aboveground storage tanks or evidence of underground storage tanks (e.g. fill port, vent pipe) were observed by or reported to EBC. In addition no evidence of storm drains or petroleum staining was observed onsite.

Adjacent properties consist of a mixed-use retail/residential building, including Express Drugs & Surgical (2381 Frederick Douglass Boulevard), followed by West 128<sup>th</sup> Street to the north; a mixed-use retail/residential building, including Harlem Bar-B-Q and Nabe Harlem (2367 Frederick Douglass Boulevard), followed by West 127<sup>th</sup> Street to the south; Frederick Douglass Boulevard (Eighth Avenue), followed by the St. Nicholas Houses (apartment complex) to the east; and The Balton, a mixed-use commercial/residential building (311 West 127<sup>th</sup> Street) to the west.

**Environmental Database Search:**

EDR was retained to provide a computerized database search of the project area within an ASTM-standard radius of the Site. A list of the databases searched and the search radius is shown on the summary table below. EBC reviewed the database output to determine if the property appears on any of the regulatory agency lists.

SUMMARY OF FEDERAL, STATE AND TRIBAL DATABASE FINDINGS			
Regulatory Database	Approximate Search Distance	Site Listed?	# of Sites within the Search Radius
Federal NPL	1 mile	No	1
Federal Delisted NPL	½ mile	No	0
Federal SEMS	½ mile	No	0
Federal SEMS Archive	½ mile	No	0
Federal RCRA CORRACTS	1 mile	No	1
Federal RCRIS Non-CORRACTS TSD	½ mile	No	0
Federal RCRA Generators	Site & Adjoining	No	1
Federal Institutional Control/Engineering Control Registry	Site	No	N/A
Federal ERNS	Site	No	N/A
Federal Brownfield Sites	½ mile	No	1
State and Tribal NPL	1 mile	No	0
State and Tribal CERCLIS (SHWS)	½ mile	No	2
State and Tribal Landfill or Solid Waste Disposal Sites	½ mile	No	0
Registered Recycling Facility List (SWRCY)	½ mile	No	0
State and Tribal LTANKS/LUST	½ mile	No	70
State and Tribal Registered UST	Site & Adjoining	No	2
State and Tribal Registered AST	Site & Adjoining	No	1
State and Tribal Institutional Control/Engineering Control Registry	Site	No	N/A

<b>SUMMARY OF FEDERAL, STATE AND TRIBAL DATABASE FINDINGS</b>			
<b>Regulatory Database</b>	<b>Approximate Search Distance</b>	<b>Site Listed?</b>	<b># of Sites within the Search Radius</b>
State and Tribal Voluntary Cleanup Site	½ mile	No	14
State and Tribal Brownfield Sites	½ mile	No	1
State Spill Sites	1/8 mile	No	7
Registered Drycleaners	¼ mile	No	3
NYC E-Designated Sites	1/8 mile	Yes	34
EDR Historic Auto Stations (HIST AS)	Site & Adjoining	No	0
EDR Historic Cleaners (HIST CL)	Site & Adjoining	No	1
Manufactured Gas Plants (MGPs)	1 mile	No	2

The site was listed on the E-Designation database as having an E-HazMat, Noise, and Air restriction (E-212), which was determined during the West 128<sup>th</sup> Street and St. Nicholas Avenue Rezoning completed by the City in January 2008 - Revised (CEQR 03HPD020M). The HazMat E-Designation indicates that there is a potential for soil and groundwater beneath the Site. Therefore, the owner must conduct a testing and sampling protocol and remediation (if applicable) to the satisfaction of the NYC Office of Environmental Remediation (NYCOER), NYCDEP and/or other agency. The Noise E-Designation requires a minimum 30 decibels (dBA) attenuation level for indoor spaces and alternative ventilation to achieve an acceptable indoor noise environment of 45 dBA. The Air E-Designation requires any new residential building constructed on the site to be equipped with natural gas-fired heat and hot water systems. The E-designations require the issuance of a Notice to Proceed by the NYCOER before the property can be redeveloped.

The database search generated information on the following listings for the surrounding properties within ASTM radius guidelines that could potentially impact the site:

Federal National Priorities List (NPL) database: One NPL listing, Hudson River PCBs, was identified within a one-mile radius of the Site. The Hudson River PCBs facility is identified as approximately 0.75 mile west of the Site. This is consistent with the location of the Hudson River; however, the NPL listing is limited to a 40-mile section of the river located between Mechanicsville and Fort Edward, New York. Bottom sediments in the area of the river have been impacted by dumping of PCB wastes generated by General Electric. Based on this information and the NPL listing's actual location it is unlikely that the Hudson River PCBs database listing represents a significant environmental concern to the Site. The Hudson River PCBs facility is also listed on the federal CERCLIS (SEMS), RCRA-LQG, FINDS, CONSENT, USEC, USIC, PRP and ROD databases, and the New York State Hist-LTANKS and NYSPILLS databases.

Federal RCRA CORRACTS: One CORRACTS facility was identified within a one-mile radius of the site, and it is summarized below:

- Ashland, Inc., 609 West 131<sup>st</sup> Street, approximately 2,990 feet northwest and hydraulically cross- to downgradient of the Site. The database indicates that a RCRA Facility Assessment was completed in November 1985 and September 1992, and the facility assigned a “low corrective action priority” status. Two closed/resolved RCRA violations are listed for this facility. The Ashland facility is also listed on the RCRA-NonGen and MANIFEST databases.

Based on this information, its distance, the presumed hydraulic gradient, and that the Site and surrounding area utilize potable water from a municipal source, it is unlikely that this facility represents a significant environmental concern to the Site.

Federal Resource Conservation and Recovery Act (RCRA): One RCRA-CESQG facility was identified adjacent to the Site, and is summarized below:

- St. Nicholas Playground North Comfort Station (ID No. NYR000053264), 237 West 127<sup>th</sup> Street, adjacent to the east, across Eighth Avenue, and hydraulically upgradient of the subject property. This facility is a RCRA-CESQG that formerly operated as a SQG from at least October 1984 through April 1998, and as a CESQG since at least April 2010. This facility is cross referenced on the MANIFEST database and is identified as generating lead and pharmaceutical wastes. No RCRA violations were listed for this facility, and there is no information in the database report that indicates this facility represents a significant environmental concern to the Site.

Federal Brownfields Sites: One US Brownfields listing (West 135<sup>th</sup> Street – Garbage MTS property, West 135<sup>th</sup> Street) were identified within a one-half mile radius of the Site. The USEPA provided funding to conduct a Phase I ESA of this property Limited additional information is provided in the database; however, the facility is located over one-quarter mile north and hydraulically cross gradient. Based on its distance in a dense urban environment, the presumed hydraulic gradient and that the site and surrounding area utilize potable water from a municipal source, it is unlikely that the US Brownfield listing represents a significant environmental concern to the Site.

State and Tribal CERCLIS: Two SHWS listings (2350 Fifth Avenue Corp., 2350 Fifth Avenue and Film Storage Warehouse, 230-209 West 146<sup>th</sup> Street) were identified within a one-mile radius of the Site. Both of these facilities is located over one-half mile and hydraulically cross- to downgradient of the Site. Therefore, it is unlikely that these facilities present a significant environmental risk to the Site. The 2350 Fifth Avenue Corp. is also cross-referenced on the VAPOR database, but is identified as “Complete-Mitigated”.

State and Tribal LTANKS: Seventy facilities were identified on the State and Tribal LTANKS database within a one-half mile radius of the Site. Sixty-five of the 70 listings received regulatory closure from the NYSDEC and are not expected to be an issue of concern for the Site. In addition, none of the closed LTANKS listings are associated with an adjacent property.

A review of the information provided regarding the five remaining active LTANKS listings (285 St. Nicholas Avenue, 203 West 131<sup>st</sup> Street, 204 West 134<sup>th</sup> Street, 560 West 126<sup>th</sup> Street; and 416 East 137<sup>th</sup> Street), including the nature of the releases, their distance and the presumed hydraulic gradient, indicates that these spills are unlikely to represent an environmental concern to the Site.

Petroleum Bulk Storage – Underground and Aboveground Storage Tank Databases (TANKS and PBS-UST/AST): Two PBS UST facilities and one PBS-AST facility are associated with adjacent properties, and they are summarized as follows:

- St. Nicholas Houses (PBS ID No. 2-474894), 2406 Eighth Avenue, adjacent to the east, across Eighth Avenue, and hydraulically upgradient of the Site. This property is listed on both the PBS-UST and PBS-AST databases as having two 20,000-gallon fiberglass coated steel USTs containing fuel oil, installed in 2001; three 15,200-gallon steel USTs, containing fuel oil, closed/removed in 2001; and two 30,000-gallon steel ASTs containing fuel oil, installed in 1970 and closed-in-place in 2000. This property was cross-referenced on the NYSPILLS database related to two closed spill incidents which are detailed in the NYSPILLS section, where they were determined unlikely to represent an environmental concern to the site.
- NYCHA (PBS ID No. 2-480134), 2406 Eighth Avenue, adjacent to the east, across Eighth Avenue, and hydraulically upgradient of the Site. This property is listed on the PBS-UST databases as having three 15,000-gallon steel UST containing fuel oil, closed/removed prior to 1991. This property was cross-referenced on the NYSPILLS database related to two closed

spill incidents which are detailed in the NYSPILLS section, where they were determined unlikely to represent an environmental concern to the site.

Voluntary Cleanup Program (VCP) Sites: Fourteen VCP listings were identified within a one-half mile radius of the subject property, and they are summarized as follows:

- 284 West 127<sup>th</sup> Street, approximately 203 feet southeast and hydraulically cross- to upgradient. This property was a former undeveloped lot. Soil was contaminated related to the presence of historic fill materials. The site was redeveloped with a 4-story residential apartment building. Impacted soils were excavated and disposed of offsite, with a vapor barrier installed to address residual contamination and protect future building occupants.
- 2329 Fredrick Douglass Boulevard (8<sup>th</sup> Avenue), approximately 480 feet south-southwest and hydraulically cross- to downgradient. This facility was formerly developed with multiple commercial and residential buildings. Soil and groundwater were contaminated related to the presence of historic fill materials and industrial use of the property. The site was redeveloped in 2012. Impacted soils were excavated and disposed of offsite, with a vapor barrier and a sub-slab depressurization system (SSDS) installed to address residual contamination and protect future building occupants.

Based upon the information provided in the database report, remedial work conducted at these facilities, their distance in a dense urban environment and the presumed hydraulic gradient, these VPC listings are unlikely to represent a significant environmental concern to the site.

The 12 additional VCP listings are each located over one-eighth-mile and hydraulically cross- to downgradient of the subject property. As such, they are unlikely to represent a significant environmental concern to the subject property.

New York State Brownfields Sites (BROWNFIELDS): One BROWNFIELDS listing (Former Shell Station, 225-237 St. Nicholas Avenue) was identified within a one-half mile radius of the Site. This facility is located over one-quarter mile southwest and hydraulically crossgradient of the Site. Therefore, it is unlikely to represent a significant environmental risk to the Site.

State Spill Sites (NYSPILLS): There are eight listings on the NYSPILLS database within a one-eighth mile radius of the site. Each of the eight listings received regulatory closure from the NYSDEC, and are not expected to represent a concern to the site based on their regulatory status, presumed hydraulic gradient and/or that the surrounding area utilizes municipally-supplied drinking water. Two of the closed NYSPILLS listings are associated with an adjacent property, and they are summarized as follows:

- Spill No. 95-11225 – St. Nicholas Houses, 2406 Eighth Avenue, adjacent to the east, across Eighth Avenue, and hydraulically upgradient of the Site. This spill, which occurred on December 6, 1995, is related to the release of approximately two gallons of fuel oil due to an equipment failure during filling of a tank. No additional information is provided; however, the NYSDEC closed the spill on the same day
- Spill No. 93-15510 – St. Nicholas Houses, 2406 Eighth Avenue, adjacent to the east, across Eighth Avenue, and hydraulically upgradient of the Site. This spill, which occurred on March 30, 1994, is related to the release of approximately 75 gallons of fuel oil due to a broken fuel line. The spill was contained within the tank vault and remediated by a third-party contractor. The NYSDEC closed the spill on March 31, 1994.

Registered Drycleaning Facilities (DRYCLEANERS): Three DRYCLEANERS listings (D&O Professional Cleaners, 2366 8<sup>th</sup> Avenue; Superbrite/S&S Cleaners, 303 West 125<sup>th</sup> Street; and 131<sup>st</sup> Street Cleaners, 2439 8<sup>th</sup> Avenue) were identified within a one-quarter mile radius of the site. The 131<sup>st</sup> Street Cleaners was cross-referenced on the RCRA database as generating hazardous wastes; however, no RCRA violations are listed for this facility. The D&O and Superbrite Cleaners facilities are identified as closed and were cross-referenced on the RCRA-NonGen (former generators) database with no listed violations. Based on the information in the database report, the absence of listed violations, the presumed hydraulic gradient, and that the site and surrounding area utilize water from a municipal source, it is unlikely that these listings represent a significant environmental concern to the Site.

NYCDCEP Environmental Designation Sites (E-DES): Thirty-four (34) E-DES listings were identified within a one-eighth mile of the site, none of which were located adjacent to the site. Therefore, there is no information in the database report that indicates the nearby E DES listings represent a significant environmental concern to the site.

Historic Cleaners Database (HISTCL): There are four HISTAS properties listed in the database report, one of which (Co-Op Cleaners, 2379 Eighth Avenue) is associated with an adjacent property. No additional information is provided in the database report, except that this facility operated between 1980 and 1993. This address was identified on the RCRA-NonGen database under the name ALP Cleaners and was identified as having one closed violation and was not cross-referenced on any other regulatory database indicative of a chemical/petroleum release. Therefore, this listing is unlikely to represent a significant environmental concern to the site.

Manufactured Gas Plants (MGPs) - Two MGP facilities (Con Edison West 132<sup>th</sup> Street Station, 12<sup>th</sup> Avenue between 131<sup>st</sup> and 133<sup>rd</sup> Streets and Con Edison 132<sup>nd</sup> Street Works, 12<sup>th</sup> Avenue between 131<sup>st</sup> and 133<sup>rd</sup> Streets) were identified within a one mile radius of the Site. Each of the listed MGPs are located over one-half mile southeast and hydraulically cross- to downgradient of the Site. Therefore, the listed MGPs are it is unlikely that these listings represent a significant environmental concern to the Site.

### **New York City Department of Buildings Information**

The Department of Buildings (DOB) computerized Property Profile Overviews (PPOs) were reviewed.

According to the PPO, five Actions are listed for the Site: three alteration permits, each dated in 2001; one Certificate of Occupancy (C/Os), dated in 2001; and one plumbing repair slip, dated in 1986. The 2001 C/O, actually dated July 20, 1973, states that the site is improved with a 5-story residential apartment building with a basement. The site building was reportedly supplied heat and hot water from an adjacent building.

Nineteen DOB and 14 Environmental Control Board (ECB) violations are listed for the site. Eighteen of the DOB and eight ECB violations are listed as closed/resolved; however, one DOB and six ECB violations remain open. The open DOB violation is dated January 4, 2012 and is related to an unspecified emergency condition. The six open ECB violations are dated between February 2006 and February 2009, are related improper and unlit sidewalk sheds, construction without permits and failure to maintain exterior building walls.

Twenty Complaints were identified for the Site, dated between October 2005 and August 2012 and related to demolition, construction and building maintenance issues. Nineteen of the 20 Complaints is listed as closed/resolved. The open Complaint, dated in May 2012 notes that the building is under structural monitoring. While the identified open/active violations and Complaint do not appear to represent an environmental concern, action should be taken to resolve them with the appropriate agency.

Six Jobs/Filing and no ARA/LAA jobs are listed for Site. The listed Jobs/Fillings are summarized as follows:

- No. 121204277, dated October 10, 2017, an application was filed to construct a new 6-story residential building;
- No. 121103091, dated July 5, 2012, a permit was issued for the installation of a heavy duty sidewalk shed;
- No. 121084904, dated July 5, 2012, a permit was issued for the installation of pipe scaffolding;
- No. 120988645, dated March 13, 2012, a permit was issued for the installation of a heavy duty sidewalk shed during building demolition;
- No. 120989877, dated December 6, 2006, a permit was issued for the demolition of an existing building; and
- No. 104351853, dated February 10, 2006, a permit was issued for the installation of a heavy duty sidewalk shed for façade repairs.

## **Conclusions/Recommendations**

Based on the results of the site inspection, records review and interviews, it was determined that there were no recognized environmental conditions (RECs) identified with regard to the Site. However, several environmental concerns was identified. The environmental concerns and EBC's recommendations are summarized as follows:

- The site was listed on the E-Designation database as having an E-HazMat, Noise, and Air restriction (E-212), which was determined during the West 128<sup>th</sup> Street and St. Nicholas Avenue Rezoning completed by the City in January 2008 - Revised (CEQR 03HPD020M). The HazMat E-Designation indicates that there is a potential for soil and groundwater beneath the Site. Therefore, the owner must conduct a testing and sampling protocol and remediation (if applicable) to the satisfaction of the NYC Office of Environmental Remediation (NYCOER), NYCDEP and/or other agency. The Noise E-Designation requires a minimum 30 decibels (dBA) attenuation level for indoor spaces and alternative ventilation to achieve an acceptable indoor noise environment of 45 dBA. The Air E-Designation requires any new residential building constructed on the site to be equipped with natural gas-fired heat and hot water systems. The E-designations require the issuance of a Notice to Proceed by the NYCOER before the property can be redeveloped.
- The site was formerly developed with a 5-story residential building, with a ground floor retail store or church by at least 1902 through 2012. This structure contained a basement. Following demolition, the building basement was backfilled to grade. Fill material may have included construction and demolition (C&D) debris associated with the building demolition and/or material from an unknown off-site source. As no documentation regarding the nature or source of the fill materials utilized to backfill the basements of the former buildings following their demolition was provided for review. There is a potential for contaminated and/or structurally unsuitable fill materials to be present on the site.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 200 feet of the target property.

A summary of the information obtained is provided in the text of this report.

### RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.
