

Phase I Screening Summary

165-20 Archer Avenue, Queens, NY 11433

Block 10155, Lot No. 35

The Site consists of a single, irregular-shaped 0.28-acre (12,103 square foot) tax lot, located on the southwest corner of the intersection between Archer Avenue to the north and Merrick Boulevard to the east, in the Jamaica section of the Borough of Queens, City of New York, Kings County, New York (**Figure 1**). The Site is identified by the street addresses 165-20 Archer Avenue and 92-66 Merrick Boulevard, and as Borough 4, Block 10155, Lot No. 35 (**Figure 2**) on the New York City Tax Maps.

The elevation of the Site is approximately 58 feet above mean sea level (amsl). The depth to groundwater at the Site is approximately 50 feet below grade surface (bgs). Groundwater flows to the south towards the Bergen Basin, and is consistent with the regional trend. The Site is zoned for commercial (C6-2) use.

History:

Site history was determined based on a review of Sanborn fire insurance maps and city directories. The Site was shown as one large tax parcel fronting along Smith Street (present-day Merrick Boulevard) to the east and Long Island Railroad (LIRR) tracks to the south. One, 2-story dwelling was developed along the eastern border; one, 1-story commercial building identified as log sawing was developed along the southern border; and one, 1-story stable was developed along the western border. The remainder of the Site was undeveloped at this time. By 1891, the log sawing building was reidentified as lumber storage. By 1897, the Site was divided into three tax parcels, with a portion of a fourth, fronting to the west along Smith Street. The existing developments remained in place, with the addition of a 2 ½-story dwelling along the southeastern corner. In addition, the lumber storage was reidentified as a temporary carpenter. By 1901 the Site was divided into two tax parcels, with a portion of a third, fronting to the west along Smith Street. The two existing dwellings and stable remained, with an additional stable and 2-story building constructed along the southwestern corner. A portion of a 2-story stable was constructed on the northern portion of the partial lot. The Site remained the same through 1912, at which time the 2-story building along the southwestern corner was identified as a storeroom. By 1925, each of the stables and 2-story building along the southwestern corner were identified as auto garages. By 1942, the Site was vacant and undeveloped. The Site was combined into one tax parcel and redeveloped with a 1-story filling station fronting to the north along Archer Avenue by 1963, with a 1-story addition constructed on the eastern side by 1981. The Site remained relatively unchanged until 1988, at which time it was no longer identified as a filling station and a portion of the Site building was identified as auto laundry. The Site remained the same from 1988 through 2006.

Surrounding properties to the east and south were developed with residential buildings by at least 1886. Areas to the north and west were developed with commercial structures related to the A. Peterson & Co. Planing & Grist Mill, with residential development beyond. Smith Street (present-

day Merrick Boulevard) was adjacent to the west and Puntine Street (present-day 165th Street) was further to the west. LIRR tracks were adjacent to the south, followed by commercial and residential development. By 1891, the A. Peterson & Co. Planing & Grist Mill was identified as the I.C. Hendrickson Planing & Grist Mill. By 1897, areas to the north and west were subdivided into more tax parcels, with residential dwellings and storage to the north. A shed and lumber storage were adjacent to the west, with one, 2-story building identified as I.C. Hendrickson Planing Mill to the northwest. Surrounding properties remained the same through 1901, at which time vacant land and residential development replaced previous developments to the west and northwest. By 1912, a 1-story stable was constructed to the west. By 1925, a garage with a gasoline tank was developed adjacent to the west. This garage was identified as a bowling alley by 1942, with the gasoline tank no longer depicted. Surrounding properties remained the same through 1951, at which time auto parking was adjacent to the north. Commercial stores were further to the east and southwest. By 1963, Archer Avenue was adjacent to the north, following by parking, additional parking was to the northeast and east across Merrick Boulevard, and the bowling alley to the west was identified as a warehouse. By 1967, offices, a warehouse and truck repair were constructed to the east across Merrick Boulevard. By 1981, a social services center replaced developments to the north across Archer Avenue. Surrounding properties remained relatively unchanged through 1993, at which time truck repair was no longer identified to the east and the warehouse to the west was identified as commercial.

The Site address (165-20 Archer Avenue) was listed in the city directories as being occupied by various commercial uses from 1967 through 2005. These listings are summarized below.

165-20 Archer Avenue: Bil Dot Service (1967-1970); X-Cello Service Station Inc. (1970); One Stop Service Inc. (1983); One Stop Car Wash Inc. (1991-2000); Donut World (1991-2005); Archer Car Was (2005); and Ebukune Auto Repair (2005).

The Site address 92-66 Merrick Boulevard was not identified in the city directories.

The surrounding properties were identified predominantly with a number of commercial/retail uses since 1934, the earliest city directory researched that identified listings, with some residential tenants. The commercial/retail uses included a senior center, child-care center, health and hospital center, salon, restaurant, auto repair shops, a recreation center, offices, parking lots and garages, and general retail stores. Given the timeframe for these operations and their potential prior use, the area cannot be confirmed as having no subsurface impacts; however, no specific operation or activity was noted that warrants additional investigation.

In addition, several of the adjacent/surrounding properties were listed on regulatory databases indicating hazardous waste generation, petroleum storage and/or petroleum releases; these listings are detailed below in the Environmental Database Search section, where they were determined unlikely to represent a significant environmental concern to the Site.

EBC's review of historical information revealed that the Site was occupied by a filling station and/or auto repair shop from 1963 through 2005. This long-term historic use of the Site is considered to represent a recognized environmental condition (REC). No additional RECs were identified in connection with the Site or adjacent/surrounding properties.

Site Inspection:

EBC representative Thomas Gallo inspected the Site on May 21, 2019. No representatives of Sunny Builders NY Corp. were present during the site inspection; however, EBC personnel did contact Mr. Gurdial Singh, the owner's representative, who arranged permission and for EBC to access the Site. The reconnaissance included a visual inspection of the building interior (offices, warehouse areas, restrooms, and storage/mechanical space), the sidewalks immediately adjacent to the Site building, and the exterior of adjacent properties.

The Site consists of a single, irregular-shaped tax lot, which is developed with a single 1-story commercial building, with a partial loft area and no basement. The building occupies the southern portion of the Site, fronts to the north along Archer Avenue, and has a reported area of 6,298 square feet (SF). The northern portion of the Site is occupied by a concrete-paved lot. The building was most recently occupied by Archer Car Wash & Detail Center, and consists of a cleaning center, detailing center, storage areas, restrooms, and offices. EBC was unable to access portions of the Site building interior. The building is accessible via two garage door entrances along Archer Avenue (north) and a driveway entrance along Merrick Boulevard (east). Sidewalks border the property to the north and east along Archer Avenue and Merrick Boulevard, respectively.

The building is reportedly heated and supplied hot water by electric-powered and natural gas-fired equipment. No evidence of underground or aboveground storage tanks (USTs/ASTs) (e.g., vent or fill pipes) was observed on the property or reported to EBC at the time of the Site inspection. However, the EDR database identified twelve, 550-gallon steel ASTs which were closed – removed in August 2000 at the Site address. The previous contents of the twelve ASTs were not identified, and no additional information was provided by the database. The Site address was not cross-referenced on the LTANKS or NYSPILLS databases and, as such, the former presence of twelve ASTs is considered unlikely to represent a significant environmental concern.

Several storm drains, with grated steel cover at-grade, as well as one trench drain were observed on the paved parking lot and driveway areas on the western portion of the Site. These drains reportedly discharge to the NYC municipal sewer system. Storm water from the Site flows to curbside drains along the adjacent roads (Archer Avenue and Merrick Boulevard). Curbside drains discharge to the NYC municipal sewer system. No interior floor drains were observed.

Fluorescent light ballasts were observed throughout the building spaces, which based on the age of the building, may contain PCBs. The disposal of leaking PCB ballasts is subject to federal regulations. No evidence of leakage associated with observed light ballasts was apparent as viewed from ground level. Based on the age of the structure and the potential for the fluorescent light ballasts to contain PCBs, the light ballasts are considered an environmental concern for the subject

property. No additional fluid-containing equipment (i.e., hydraulic vehicle lifts, trash compactors, elevators, electric transformers) suspected of containing PCBs was observed onsite.

Suspect asbestos-containing materials including floor tiles and ceiling tiles were observed within the office space observed during the site inspection. The identified suspect materials were generally in good to fair condition at the time of the inspection, with some damaged ceiling tiles visible. In addition, due to the age of the building, it is possible that roofing, roof flashing and other (inaccessible) building materials may contain asbestos.

Interior and exterior painted surfaces were generally in good to fair condition no evidence chipping, peeling and well-worn paint. However, as the building was constructed prior to 1963, the presence of lead-based paint is likely. As the building is used for commercial purposes, the presence of lead-based paint does not represent a significant environmental concern to the Site.

No visual or olfactory evidence of mold or water damage was identified at the Site during the site inspection.

Environmental Database Search:

EDR was retained to provide a computerized database search of the project area within an ASTM-standard radius of the Site. A list of the databases searched and the search radius is shown on the summary table below. EBC reviewed the database output to determine if the property appears on any of the regulatory agency lists.

| SUMMARY OF FEDERAL, STATE AND TRIBAL DATABASE FINDINGS | | | |
|--|-----------------------------|--------------|-------------------------------------|
| Regulatory Database | Approximate Search Distance | Site Listed? | # of Sites within the Search Radius |
| Federal NPL | 1 mile | No | 0 |
| Federal Delisted NPL | ½ mile | No | 0 |
| Federal SEMS | ½ mile | No | 0 |
| Federal SEMS Archive | ½ mile | No | 0 |
| Federal RCRA CORRACTS | 1 mile | No | 0 |
| Federal RCRIS Non-CORRACTS TSD | ½ mile | No | 0 |
| Federal RCRA Generators | Site & Adjoining | Yes | 1 |
| Federal Institutional Control/ Engineering Control Registry | Site | No | N/A |
| Federal ERNS | Site | No | N/A |
| Federal Brownfield Sites | ½ mile | No | 0 |

| SUMMARY OF FEDERAL, STATE AND TRIBAL DATABASE FINDINGS | | | |
|---|-----------------------------|--------------|-------------------------------------|
| Regulatory Database | Approximate Search Distance | Site Listed? | # of Sites within the Search Radius |
| State and Tribal NPL | 1 mile | No | 0 |
| State and Tribal CERCLIS (SHWS) | 1 mile | No | 5 |
| State and Tribal Landfill or Solid Waste Disposal Sites | ½ mile | No | 14 |
| Registered Recycling Facility List (SWRCY) | ½ mile | No | 1 |
| State and Tribal LTANKS/LUST | ½ mile | No | 58 |
| State and Tribal Registered UST | Site & Adjoining | No | 2 |
| State and Tribal Registered AST | Site & Adjoining | Yes | 0 |
| State Chemical Bulk Storage (CBS) | ¼ mile | No | 2 |
| State Major Oil Storage Facility (MOSF) | ½ mile | No | 0 |
| State and Tribal Institutional Control/Engineering Control Registry | Site | No | N/A |
| State and Tribal Voluntary Cleanup Site | ½ mile | No | 3 |
| State and Tribal Brownfield Sites | ½ mile | No | 3 |
| State Spill Sites | 1/8 mile | No | 9 |
| Registered Drycleaners | ¼ mile | No | 1 |
| NYC E-Designated Sites | 1/8 mile | Yes | 20 |
| EDR Historic Auto Stations (HIST AS) | Site & Adjoining | Yes | 0 |
| EDR Historic Cleaners (HIST CL) | Site & Adjoining | No | 0 |
| Manufactured Gas Plants (MGPs) | 1 mile | No | 1 |

The Site address (165-20 Archer Avenue) was identified on the RCRA NonGen, AST, NYC E-Designated Sites, and HIST AS databases. A summary of these listings is provided as follows:

RCRA NonGen: The Site is identified on the RCRA NonGen database under the name Carwash, Inc. According to the database, the Site has operated as a non-generator since at least January 2006 and had an unverified classification in December 1980. No violations were identified for the Site

and, as such, this RCRA NonGen listing of the Site address is considered unlikely to represent a significant environmental concern.

AST: The Site was identified on the NY AST database under the name One Stop Car Wash Inc (Facility ID No. 2-604674). According to the database, the Site is identified with twelve, 550-gallon steel ASTs which were closed – removed in August 2000. The previous contents of the twelve ASTs were not identified, and no additional information was provided by the database. The Site address was not cross-referenced on the LTANKS or NYSPILLS databases and, as such, the former presence of twelve ASTs is considered unlikely to represent a significant environmental concern.

E-Designation: The Site was identified on the E-Designation database as having a HazMat and Air restriction (E-175), which was determined during the Downtown Jamaica Redevelopment completed by the City in September 2007 (CEQR 15DCP081Q). The HazMat E-Designation requires that a facility conduct testing and sampling protocol and remediation where appropriate as well as a mandatory construction-related health and safety plan. The HazMat E-designation requires the issuance of a building permit by the NYC Department of Buildings before the property can be redeveloped.

HIST AS: The Site was identified on the HIST AS database under the name Ebukune Auto Repair. According to the database, the Site operated under the name Fred & George One Stop as a gasoline service station from 1978 to 1993. This historic use of the Site as a gasoline service station is considered to represent a REC.

The database search generated information on the following listings for the surrounding properties within ASTM radius guidelines that could potentially impact the Site:

Federal Resource Conservation Recovery Act Large Quantity Generator (RCRA LQG): One RCRA LQG listing (Con Edison – Manhole 10002, Archer Avenue and Merrick Boulevard) was identified adjacent to the northeast and hydraulically crossgradient of the Site. According to the database, this facility operated as a conditionally exempt small quantity generator (CESQG) in September 2009 and has operated as an LQG since at least March 2010. This facility was cross-referenced on the NJ and NY MANIFEST databases as transporting hazardous lead wastes. No violations were identified for this facility. based on the information in the database, this adjacent RCRA LQG is considered unlikely to represent a significant environmental concern to the Site.

State and Tribal CERCLIS: Five SHWS listings (K – Jamaica Gas and Light MGP, Beaver Road & 158th Street; K – Jamaica Holder Station, 158th Street & Liberty Avenue; 148-28 Hillside Avenue; West Side Corporation, 107-10 180th Street; and 107-35 Merrick Boulevard) were identified within a one-half mile radius of the Site. Given that each of these facilities is located over one-quarter mile in a dense urban area and hydraulically cross- to downgradient it is unlikely that these facilities represent a significant environmental concern to the Site.

State and Tribal Landfill or Solid Waste Facilities (SWF/LF): Five SWF/LF listings (Greenbay Sanitation Corp., 94-10 Merrick Boulevard; Thomas Novelli Contracting, 94-07 Merrick Boulevard; Thomas Novelli Contracting, 94-20 Merrick Boulevard; Jamaica Recycling [Liberty], 94-29 165th Street; and S&S Super Sports Auto Care Inc., 94-40 Merrick Boulevard) were identified within a one-eighth mile radius of the Site. Thomas Novelli Contracting (94-07 Merrick Boulevard) was identified as an inactive construction and demolition (C&D) debris processing facility; Greenbay Sanitation Corp. facility was identified as an inactive waste transfer station; and S&S Super Sports Auto Care Inc. was identified as an inactive vehicle dismantling facility. Thomas Novelli Contracting (94-20 Merrick Boulevard) was identified as an active C&D debris processing facility and Jamaica Recycling was identified as an active waste transfer station. Based upon their inactive status, distances and/or the presumed hydraulic gradient, these facilities are unlikely to represent a significant environmental concern to the Site.

Nine additional SWF/LF listings were identified between one-eighth and one-half mile from the Site; however, based upon their distances in a dense urban area, the presumed hydraulic gradient, and/or that the site and surrounding area is supplied potable water from a municipal source, it is unlikely that these facilities represent a significant environmental risk to the Site.

Registered Recycling Facility List (SWRCY): One SWRCY facility (EWG Glass Recover and Recycling, 94-54 158th Street) was identified within a one-half mile radius of the site. As this facility is located over one-quarter mile from and hydraulically downgradient of the Site, it is unlikely to represent a significant environmental concern to the Site.

State and Tribal LTANKS: Fifty-eight (58) facilities were identified on the State and Tribal LTANKS database within a one-half mile radius of the Site. Fifty-seven (57) of the 58 facility listings received regulatory closure from the NYSDEC and are not expected to be an issue of concern for the Site. One of the listed closed LTANKS listings are associated with an adjacent property, and it is summarized as follows:

- Spill No. 92-12405 – 166-10 Archer Avenue, adjacent to the east across Merrick Boulevard and hydraulically crossgradient of the Site. This spill, which occurred on February 2, 1993, is related to the discovery of contaminated soil. The soil was stockpiled, covered, removed and disposed of, and the NYSDEC closed the spill on June 8, 1993.

A review of the information provided regarding the one remaining active NYSPILLS listing (Jamaica Bus Depot – NYCT, 165-18 South Road), including the nature of the release, its distance and the presumed hydraulic gradient, indicates that this spill is unlikely to represent an environmental concern to the Site.

State and Tribal Petroleum Bulk Storage – Underground and Aboveground Storage Tank Databases (TANKS and PBS-UST/AST): Two State PBS UST facilities are associated with adjacent properties and are summarized as follows:

- 165-10 Archer Avenue (PBS ID No. 2-612903), 165-10 Archer Avenue, adjacent to the west and hydraulically crossgradient of the Site. This property is listed on the PBS-UST database as having one 1,100-gallon steel UST which was closed – removed in May 2015 and two, 550-gallon steel USTs which were closed – removed in May 2015. The previous contents of the three USTs were not identified, and no additional information was provided by the database. This facility was not cross-referenced on the LTANKS or NYSPILLS databases and, as such, is considered unlikely to represent a significant environmental concern to the Site.
- Archer Avenue Terminal (PBS ID No. 2-602785), 166-10 Archer Avenue, adjacent to the east across Merrick Boulevard and hydraulically crossgradient of the Site. This property is listed on the PBS-UST database as having eleven, 550-gallon steel USTs containing gasoline which were closed – removed in January 1993. This facility was cross-referenced on the LTANKS database in connection with one closed spill, which was previously determined unlikely to represent a significant environmental concern to the Site.

State Chemical Bulk Storage Sites (CBS): Two CBS facilities (Pep Boys #0438, 94-47 Merrick Boulevard and Jamaica Bus Depot, 165-18 South Road) were identified on the CBS database within a one-quarter mile radius of the Site. Pep Boys #0438 was identified on the NY AST database as having one, 250-gallon steel AST containing waste oil/used oil which was installed in February 1997 and is in service. The Jamaica Bus Depot was identified on the CBS AST database as having one 1,000-gallon steel AST containing ethylene glycol which was installed in September 1992 and is in service. These facilities were not cross referenced on the LTANKS or NYSPILLS databases and are hydraulically down- to cross gradient of the Site. Therefore, it is unlikely that the listed CBS facilities represent a significant environmental concern to the Site.

NYSDEC Voluntary Cleanup Program (VCP): Three VCP listings were identified within a one-half mile radius of the Site. A summary of these listings is as follows:

- 92-23 168th Street (ID No. 17CVCP070Q), 92-23 168th Street, located approximately 830 feet northeast and hydraulically upgradient of the Site. This facility entered the VCP prior to March 2017. Limited additional information is provided by the database; however, remediation is ongoing. Based on its distance in a dense urban area and that the Site and surrounding area are supplied potable water from a municipal source, it is unlikely that this facility represents a significant environmental concern to the Site.

The two remaining VCP facilities were identified over one-quarter mile and/or hydraulically cross- to downgradient of the Site. Therefore, based on their distance in a dense urban area, the presumed hydraulic gradient, and/or that the Site and surrounding area are supplied potable water from a municipal source, it is unlikely that these facilities represent a significant environmental concern to the Site.

New York State Brownfields Sites (BROWNFIELDS): Three BROWNFIELDS listings (Former Queens Family Courthouse, 89-14 Parsons Boulevard; K – Jamaica Holder Station, 158th Street &

Liberty Avenue; and K – Jamaica Gas & Light MGP, Beaver Road & 158th Street) were identified within a one-half mile radius of the Site. Each of these five facilities is located over one-eighth mile and/or hydraulically cross- to downgradient of the Site. Therefore, based on their distance in a dense urban area, the presumed hydraulic gradient, and/or that the Site and surrounding area are supplied potable water from a municipal source, it is unlikely that these facilities represents a significant environmental risk to the Site.

State Spill Sites (NYSPILLS): Nine facilities were identified on the State and Tribal LTANKS database within a one-eighth mile radius of the Site. Each of the 9 facility listings received regulatory closure from the NYSDEC and are not expected to represent a concern to the Site based on their regulatory status, presumed hydraulic gradient and/or that the surrounding area supplied potable water from a municipal source. In addition, none of the listed closed NYSPILLS listings are associated with an adjacent property.

Registered Drycleaning Facilities (DRYCLEANERS): One DRYCLEANERS listings (Jamaica French/Best Green Cleaners, 169-03 Jamaica Avenue) was identified within a one-quarter mile radius of the Site. This facility was cross-referenced on the RCRA database as a current CESQG hazardous waste generator, with no listed violations. Based on the information in the database report, its distance, the presumed hydraulic gradient, and that the Site and surrounding area utilize water from a municipal source, it is unlikely that this listing represents a significant environmental concern to the Site.

NYCDCP Environmental Designation Sites (E-DES): Twenty (20) E-DES listings were identified within a one-eighth mile of the Site, none of which are located adjacent to the Site. Each of the 20 E-DES listings have the same restrictions as the Site. Therefore, there is no information in the database report that indicates the E DES listing represent a significant environmental concern to the Site.

NYS Manufactured Gas Plants (MGPs): One MGP site (Jamaica Gas and Light, Beaver Road and 158th Street) is listed in the database report. This listed MGP site is located over one-fourth mile and hydraulically downgradient of the Site. Based on its distance and that the Site and surrounding area utilize water from a municipal source, the listed MGP is unlikely to represent a significant environmental concern to the Site.

New York City Department of Buildings Information

Computerized Property Profile Overviews (PPOs) available from the New York City Department of Buildings (NYCDOB) Building Information System (BIS) website were reviewed for information regarding the subject property. Pertinent information regarding the Site is summarized below:

According to the PPO, 18 Actions are listed for the Site: four alterations, dated in 1949, 1954, 1981, and 1987; three Certificates of Occupancy (C/Os), dated in 1953, 1981 and 1989; one demolition permit, dated in 1951; three electric sign notices, dated in 1953, 1978 and 1988; one

letter of no objection, dated in 2008; two miscellaneous notices, both dated in 1952; and four new building notices, dated in 1917, 1921, 1952 and 1981. The 1953 C/O indicates that the Site was developed with one, 1-story commercial building occupied by a gasoline service station, lubritorium, auto repairs, auto laundry, office and sales, and parking and storage of more than five motor vehicles. The 1981 C/O indicates that the Site was developed with one, 1-story commercial building occupied by a gasoline service station and auto repair body shop. The 1989 C/O indicates that the Site was developed with one, 1-story commercial building occupied by a gasoline service station, automobile laundry, office and storage.

No DOB and one Environmental Control Board (ECB) violations are listed for the Site. The one ECB violation, related to occupancy without a valid C/O, is dated in October 1988 and is identified as resolved.

Two Complaints are listed for the Site, dated in August 1993 and June 2010, and related to curb cuts installed without a permit and demolition without a permit. Both Complaints are identified as resolved.

Eleven (11) Jobs/Filings and zero ARA/LAA job are listed for the Site. These Jobs/Filings are summarized as follows:

- No. 400011189, dated June 28, 1989, filing to erect a metal shed for use as a news stand. Job was withdrawn on 11/20/1990;
- No. 400049256, dated January 3, 1990, filing to erect a concession shed, accessory use to car wash;
- No. 401114959, dated June 29, 2000, filing for new extension to storage to existing car wash establishment;
- No. 401129355, dated August 9, 2000, filing to install illuminated non-advertising projecting accessory sign;
- No. 401129364, dated August 9, 2000, filing to install illuminated non-advertising accessory sign inside property line;
- No. 401129729, dated August 11, 2000, filing to install ground structure and illuminated non-advertising accessory sign;
- No. 401129738, dated August 11, 2000, filing to install ground structure and illuminated non-advertising sign;
- No. 401526434, dated September 17, 2002, proposed 2-story extension on front yard;
- No. 421516559, dated June 15, 2017, proposed 10-story hotel;
- No. 421526281, dated July 7, 2017, filing to demolish commercial structure; and
- No. 421579964, dated November 30, 2017, filing for full demolition of existing car wash structure.

Conclusions/Recommendations

Based on the results of the site inspection, records review and interviews, it was determined that there was one recognized environmental condition (REC) identified for the Site. This REC and EBC's recommendations are summarized as follows:

- Information obtained from various historical information sources revealed that the Site was occupied by one or more auto repair shops and service stations from at least 1963 to 2005. In addition, the site was identified on the HIST AS database as operating from at least 1978 through 1993. Given the long-term historical use of the property for auto repair/service station, historic site operations may have resulted in spills/releases which have the potential to have impacted the subsurface. As such, the historic use of the Site is considered a REC. In addition, the Site was identified as an E-HazMat and Air designated site.

Based upon the above findings and conclusions, EBC recommends the following:

- A geophysical survey (e.g., magnetometer and/or ground penetrating radar surveys) should be conducted on the subject property to evaluate the presence of USTs associated with the site, as well as the configurations of existing underground utilities in advance of a soil boring program.

If present, any historic USTs should be removed in accordance with New York State Department of Environmental Conservation (NYSDEC) and New York City Fire Department (FDNY) regulations. Any identified geophysical anomalies should be further investigated through the excavation of test pits, with soil samples collected for laboratory analysis as warranted. It is important to note that excavation areas may be necessary to facilitate the geophysical survey and any subsequent sampling.

- To evaluate potential impacts related to historic usage of the Site and to satisfy the NYCDP and New York City Office of Environmental Remediation (NYCOER) requirements related to the site's listing as an "E"-designated property, a subsurface investigation should be performed. At a minimum, the investigation should include the installation of soil borings with the collection of representative soil, groundwater and/or soil vapor samples for laboratory analysis to document subsurface conditions and determine the nature and extent of contamination (if present).

In addition to the aforementioned RECs, two potential environmental concerns were identified. The environmental concerns and EBC's recommendations are summarized as follows:

- In addition to the E-HazMat designation, the Site was listed on the E-Designation database as having an E-Air restriction (E-175), which was determined during the Downtown Jamaica Redevelopment completed by the City in September 2007 (CEQR 15DCP081Q). The Air E-Designation requires the use of natural gas or electricity for hot water and HVAC

equipment. The Air E-designation requires the issuance of a Notice to Proceed by the NYC Office of Environmental Remediation (OER) before the property can be redeveloped.

- Fluorescent light ballasts were observed throughout the office space, which based on the age of the building, may contain PCBs. EBC recommends that a PCB survey be performed prior to demolition and/or renovation activities. Any PCB-containing equipment affected by the development of the site must be properly managed during demolition and/or renovation activities. In addition, while the disposal of non-leaking PCB ballasts is not currently regulated by the USEPA, EBC recommends that the PCB ballasts be packaged in a lined, steel drum containing an absorbent material and disposed of as PCB-waste to reduce the potential for environmental contamination and potential liability for cleanup of any environmental release of PCBs from the ballasts.
- Suspect asbestos-containing materials including floor tiles and ceiling tiles were observed within the office space observed during the site inspection. The identified suspect materials were generally in good to fair condition at the time of the inspection, with some damaged ceiling tiles visible. In addition, due to the age of the building, it is possible that roofing, roof flashing and other (inaccessible) building materials may contain asbestos.

If activities in the building (i.e., renovation or demolition) will disturb any suspect asbestos material, then EBC recommends that an asbestos survey be performed to determine if ACM are present prior to the proposed work. If ACM are present, then a New York City-licensed contractor must be retained to remove the asbestos in accordance with federal, NYS and NYC regulations.

Ridge, NY 11961
Contact: Keith Butler

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Env. Business Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.
