

Phase I Screening Summary

43-20 52nd Street
Queens, NY 11377
Block 1320, Lot No. 37

Lot Info:

The Site consists of one irregular-shaped land parcel located on the west side of 52nd Street between Queens Boulevard and 43rd Avenue in the Elmhurst neighborhood of Queens, New York (**Figure 1**). The physical address associated with the Site is 43-20 52nd Street, Queens, NY 11377. The Site is identified as Block 1320, Lot No. 37 on the NYC Tax Map (**Figure 2**). The Site has approximately 80 feet of street frontage along 52nd Street extends approximately 73 feet back from the street. The Site's footprint is approximately 4,879 square feet (sf) in area.

Based on a surface elevation of 100 feet above mean sea level, depth to groundwater is anticipated at approximately 51-75 feet below grade. Additionally, the nearest surface water body is the Newtown Creek, present approximately 1.36 miles southwest of the Site. Based on the distance to the nearest surface water body and the topography of the surrounding vicinity, groundwater is expected to flow in a general southwesterly direction towards the Newtown Creek.

The Site is primarily zoned residential (R6) with a commercial (C2-3) overlay. The Site is currently developed with one, 2-story commercial use building, with no cellar. The onsite building is subdivided into three sections, each section with their own bay door. The onsite building is currently vacant and occupies the entire footprint of the Site.

History:

Site history was based on the review of Sanborn Maps, City Directory listings, aerial photographs and available online resources. According to the review of these resources, the Site had been partially developed since 1902. In 1902, the Site was divided into four separate lots. One of the lots was developed with a two-story residential dwelling. By 1914, the Site was occupied by a 2-story residential dwelling and a 2-story store on the southern portion of the Site. The northern half of the Site remained undeveloped. By 1932, the two southern lots on the Site were both occupied with 2-story dwellings. The two northernmost lots merged into one and was occupied by a small store and an office. By 1951, the two 2-story dwellings on the southern portion of the Lot were gone, however, the store remained. The Site remained relatively unchanged until 1988 when the northernmost lot was designated as commercial property. By 1991, the Site was divided into two lots. Both lots were occupied by an auto repair shop, Father and Son Service Station. The Site remained a service station until at least 2006.

In 1902, the surrounding properties were depicted as undeveloped land, small stores or residential dwellings. By 1914, areas to the east, north, and south of the Site were depicted with residential development while the area adjacent to the west remained undeveloped. By 1932, the area to the east and northwest was occupied by multi-car garages. To the west, there was a large

swimming pool and a stone cutting facility to the south. The majority of surrounding areas remained unchanged until around 1981. By 1981, the surrounding parking garages were occupied by commercial buildings and warehouses. The pool to the west was occupied by a warehouse building and the adjacent lot to the south was occupied by a store. From approximately 1982 to 1986, the lot across the street to the east was occupied by Flex-O-Tex Drapery Cleaners, a dry-cleaning facility. The surrounding properties remained relatively unchanged from 1986 to at least 2006.

The Site address (43-20 52nd Street) was listed in the City Directories as being primarily residential and later use as an automobile service station. Listings for surrounding properties were identified as primarily residential and commercial uses including a dry cleaner.

The Site and surrounding vicinity have remained generally unchanged from 1991 through 2006. The onsite buildings are currently unoccupied.

EBC’s review of historical information revealed evidence of two possible recognized environmental conditions (RECs) in connection with the Site or adjoining properties:

- **Auto Repair Facility:** An auto repair was present on Site from circa 1991 through at least 2006. Auto repairs typically involve the use of hydraulic lifts, waste oil drums, oil change pits, storage tanks, and the usage of solvents, lubricants, various fuels, oxidizers and additives. The potential for such materials to impact the Site's subsurface is considered a REC. EBC recommends conducting a Phase II Investigation to assess the potential for impacts associated with the historical presence of an auto repair.
- **Dry Cleaning Facility** – The property adjacent to the east of the Site (up gradient) was historically occupied by a Dry Cleaning facility (Flex-O-Tex Drapery Cleaners) from at least 1982 through 1986. Dry cleaning operations typically involve the usage of halogenated and chlorinated solvents. The potential for a release of such materials to the subsurface of the property and the potential for the materials to travel down gradient to the Site is considered a REC. EBC recommends conducting a Phase II investigation at the Site to assess the subsurface conditions.

Environmental Database Search:

EDR was retained to provide a computerized database search of the project area within an ASTM-standard radius of the Site. A list of the databases searched and the search radius is shown on the summary table below. EBC reviewed the database output to determine if the property appears on any of the regulatory agency lists.

SUMMARY OF FEDERAL, STATE AND TRIBAL DATABASE FINDINGS			
Regulatory Database	Approximate Search Distance	Site Listed?	# of Sites within the Search Radius

SUMMARY OF FEDERAL, STATE AND TRIBAL DATABASE FINDINGS

SUMMARY OF FEDERAL, STATE AND TRIBAL DATABASE FINDINGS			
Regulatory Database	Approximate Search Distance	Site Listed?	# of Sites within the Search Radius
EDR Historic Auto Stations (HIST AS)	Site & Adjoining	No	3
EDR Historic Cleaners (HIST CL)	Site & Adjoining	No	3
Manufactured Gas Plants (MGPs)	1 mile	No	0

The Site was not identified on any of the federal or state databases reviewed as part of this assessment.

The database search generated information on the following listings for the surrounding properties within ASTM radius guidelines that could potentially impact the Site:

Federal Corrective Action Reports (CORRACTS): One CORRACTS listing (Safety-Kleen Systems, 58-05 52nd Avenue) was identified within a one mile radius of the Site. This facility is approximately 0.5 miles south-southeast and hydraulically downgradient of the Site. Based on the information provided in the database report, its distance in a dense urban environment, and the presumed hydraulic gradient, it is unlikely that this facility represents a significant environmental concern to the Site.

Federal Resource Conservation and Recovery Act (RCRA): Seven RCRA generators were identified in the vicinity of the Site; one RCRA-LQG, three RCRA-SQG, and three RCRA-CESQG generators. Information provided within the EDR report indicates that there are no listed violations for these facilities. Therefore, it is unlikely that these facilities represent a significant environmental concern to the Site.

In addition, 25 RCRA-NonGen listings were identified in the vicinity of the Site. A NonGen facility is a former registered/regulated generator which does not presently generate hazardous waste. Information provided within the EDR report indicates that there are no listed violations for these facilities. Therefore, it is unlikely that these facilities represent a significant environmental concern to the Site.

State and Tribal CERCLIS: Four SHWS listings were identified within a one-half mile radius of the Site. A summary of these listings is as follows:

- Dewalt Queens Boulevard (ID No. 444766), 56-15 Queens Boulevard, located approximately 0.2 miles south east and downgradient from the Site. Based upon this information, its distance and the presumed hydraulic gradient, this facility is unlikely to represent a significant environmental concern to the Site.

- Former Cleaners Prod (ID No. 235055), 50-45 Barneyy Avenue, located approximately 0.47 miles north and hydraulically downgradient of the Site. Based upon this information, its distance and the presumed hydraulic gradient, this facility is unlikely to represent a significant environmental concern to the Site.

Two additional SWHS listings (Standard Motor Prod, Northern Boulevard and White Sun Cleaners, 34th Street) were identified between one-half and one-mile from the Site; however, based on their distance in a dense urban area, the presumed hydraulic gradient, and/or that the Site and surrounding area are supplied potable water from a municipal source, it is unlikely that these facilities represent a significant environmental concern to the Site.

State and Tribal LTANKS: Forty-eight (48) facilities were identified on the State and Tribal LTANKS database within a one-half mile radius of the Site. All of the 48 listings received regulatory closure from the NYSDEC and are not expected to be an issue of concern for the Site. In addition, none of the identified closed LTANKS are associated with an adjacent property.

New York State Aboveground Storage Tanks (AST): Fifty five (55) ASTs were within a ¼- mile radius from the Site with none adjacent to the target property. Based upon this information and the distance of the tanks from the target property, they are unlikely to represent a significant environmental concern to the Site.

New York State Underground Storage Tanks (UST): Thirty seven (37) USTs were within a ¼-mile radius from the Site with none adjacent to the target property. Based upon this information and the distance of the tanks from the target property, they are unlikely to represent a significant environmental concern to the Site.

New York State and Tribal Brownfields Sites (NY BROWNFIELDS): One NY BROWNFIELDS facility (Dewalt Queens Boulevard, 56-15 Queens Boulevard) was identified within a one-half mile radius of the Site. Based upon the information in the database report, the distance (over one-eighth mile) in a dense urban area, and the presumed hydraulic gradient, these facilities are unlikely to represent a significant environmental concern to the Site.

State Spill Sites (NYSPILLS): There are 16 listings on the NYSPILLS database within a one-eighth mile radius of the site. All 16 listings received regulatory closure from the NYSDEC and are not expected to represent a concern to the Site based on their regulatory status, presumed hydraulic gradient and/or that the surrounding area utilizes municipally-supplied drinking water. Based on their closed status, these facilities and associated spills are unlikely to represent a significant environmental concern to the Site.

Registered Drycleaning Facilities (DRYCLEANERS): Three DRYCLEANERS sites (Jenny's Cleaners, 41-24 54th Street; Y&P/WU's Cleaners, 51-12 Skillman Avenue; Cadillac/Beauty Cleaner, 49-02 Skillman Avenue) were listed within a one-quarter mile radius of the subject

property. Based on the information listed in the database report, their distance, the absence of violations, and/or the presumed hydraulic gradient, these facilities are unlikely to represent a significant environmental concern to the Site.

NYCDOP Environmental Designation Sites (E-DES): Eleven (11) E-DES listings were identified within a one-eighth mile of the site, one of which was the Site. The target property has an E-designation for hazmat, noise, and air; all of which will be addressed within the remediation project. Based on distance from the Site, the other 10 E-DES listings are unlikely to represent a significant environmental concern to the Site.

EDR Historical Auto Stations (EDR HIST AUTO) – Three EDR HIST AUTO sites (Sunnyside Parking, 50-03 Queens Boulevard; John Dabbraccio & Ni, 5024 Queens Boulevard; Spirit Service center, 4913 Roosevelt Avenue) were listed within a one-eighth mile radius of the subject property. Based on the information listed in the database report, their distance, the absence of violations, and/or the presumed hydraulic gradient, these facilities are unlikely to represent a significant environmental concern to the Site.

Historic Drycleaning Facilities (EDR HIST CLEANER): Three EDR HIST CLEANER sites (Flex-O-Tex Drapery Cleaners, 43-25 52nd Street, OSO Cleaners, 4134 53rd Street, Fallo Jane, 42-24 54th Street) were listed within a one-quarter mile radius of the subject property. Flex-O-Tex Drapery Cleaners (43-25 52nd Street) was up gradient and adjacent to the target property. Although closed in 1986, based on distance and direction of groundwater flow, this site may have potentially impacted the target property. Based on the information listed in the database report, their distance, the absence of violations, and/or the presumed hydraulic gradient, the other two facilities (OSO Cleaners and Fallo Jane) are unlikely to represent a significant environmental concern to the Site.

New York City Department of Buildings Information

Computerized Property Profile Overviews (PPOs) available from the New York City Department of Buildings (NYCDOB) Building Information System (BIS) website were reviewed for information regarding the subject properties. Pertinent information regarding the Site is summarized below:

According to the PPO, Nine actions are listed for the Site: one alteration, dated 1985; one building notice, dated 1983; Four Certificates of Occupancy (C/O), dated 1940 (2), 1986, and one inaccessible; three new buildings, dated 1931 (2) and 1955; and one dismissed DOB violation, dated 1985. In 1938 the C/O identified the Site as a 3-story multiple dwelling. In 1947, the C/O identified the Site as occupied by one, 3-story mixed use commercial and residential building, with cellar. The cellar was used as storage while the 1st floor was occupied by a store and a dwelling and the 2nd and 3rd floors were occupied with dwellings. In 1986, the C/O identified the Site as an automotive repair shop with accessory parking for the automotive shop.

One Complaint was identified for the Site, dated 1998 and related to the C/O not being complied with. The complaint is listed at closed.

One (1) DOB violation is listed for the Site. The violation is listed as dismissed. The file is inaccessible and no further information was provided.

Six (6) Jobs/Filing and no ARA/LAA jobs are listed for Site. The listed Jobs/Fillings are summarized as follows:

- No. 400047212, dated February 3, 1993: permit to erect a one story concrete block side extension to existing one story;
- No. 402064029, dated February 15, 2005: permit to install 4 space heaters and legalize exiting partition;
- No. 402565755, dated March 28, 2007: description n/a;
- No. 421029620, dated January 20, 2015: permit for general construction for vertical enlargement of existing building - Disapproved;
- No. 421058768, dated December 30, 2014: permit for a pavement plan in conjunction with ALT1 # 421029620; and
- No. 421588240, dated February 8, 2018: job filed for demolition of a 2-story building on Site.

Conclusions/Recommendations:

Based upon reconnaissance of the Site and surrounding properties, and review of historical records and regulatory agency databases, two Recognized Environmental Conditions (RECs) were identified for the Site. These RECs are summarized as follows:

- **Auto Repair Facility:** An auto repair was present on Site from circa 1991 through at least 2006. Auto repairs typically involve the use of hydraulic lifts, waste oil drums, oil change pits, storage tanks, and the usage of solvents, lubricants, various fuels, oxidizers and additives. The potential for such materials to impact the Site's subsurface is considered a REC. EBC recommends conducting a Phase II Investigation to assess the potential for impacts associated with the historical presence of an auto repair.
- **Dry Cleaning Facility** – The property adjacent to the east of the Site (up gradient) was historically occupied by a Dry Cleaning facility (Flex-O-Tex Drapery Cleaners) from at least 1982 through 1986. Dry cleaning operations typically involve the usage of halogenated and chlorinated solvents. The potential for a release of such materials to the subsurface of the property and the potential for the materials to travel down gradient to the Site is considered a REC. EBC recommends conducting a Phase II investigation at the Site to assess the subsurface conditions.

Additional Environmental Concerns:

- Due to the age of the onsite building, the potential for the presence of asbestos-containing materials at the Site is considered likely.

- Due to the age of the onsite building, the potential for the presence of lead-based paints at the Site is considered likely.
- The site was listed on the E-Designation database as having E-HazMat, Air, and Noise restrictions (E-163), which was determined during the Maspeth/ Woodside Rezoning completed by the City in June 2006 (CEQR 06DCP065Q). The Hazardous Materials E-Designation indicates that there is a potential for soil and groundwater beneath the Site to be impacted by historic operations at the Site or adjacent properties. The E designation for Air will require any new residential and or commercial development must have heating ventilation and air conditioning stacks located at least 65 feet from the lot line of the adjacent lot facing 51st street or use natural gas as the type of fuel for space heating and hot water systems. The Noise E-Designation requires a minimum 40 decibels (dBA) attenuation level all facades and alternative ventilation to achieve an acceptable indoor noise environment of 45 dBA. The HazMat, Air, and Noise E-designations require the issuance of a Notice to Proceed by the NYC Office of Environmental Remediation (OER) before the property can be redeveloped.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Env. Business Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 200 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by Env. Business Consultants were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

Search Results:**Coordinates:**

P.O.#	NA	Latitude:	40.743398 40° 44' 36" North

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.
