**NOTICE OF COMPLETION**

**Notice Holder(s):** 511 Holdings LLC

**Site Information:** Site Name: 511 Meeker Avenue  
Site Owner: 511 Holdings LLC  
Street Address: 511 Meeker Avenue, Brooklyn, NY  
Block 2727, Lot 47  
OER Site Number: 22CVCP071K

**Project Description:** The redevelopment project consisted of constructing a new 4-story apartment building with a penthouse, and a partial cellar area. The building is approximately 2,020 SF and covers about 66% of the lot with the remainder of the Site consisting of an approximate 200 SF concrete capped inner courtyard and a concrete capped rear yard that is approximately 850 SF. The cellar, which covers approximately 36% of the site, consists of the electric meter room, the sprinkler room, the hot water heater room, a refuse storage room, and a laundry room. The 1st floor consists of a residential lobby/entrance, the inner courtyard area, recreation room, and two residential apartments. The 2<sup>nd</sup> to 4<sup>th</sup> floors consists of residential apartments and the 5th floor consists of the penthouse apartment with access to the 4th floor roof.

Approximately 25% of the Site was excavated to a depth of 11 ft below sidewalk grade for the partial cellar and inner courtyard with additional excavation to a depth of 14 ft below grade for the cellar/courtyard footings (approximately 14% of the Site). The rear half of the at-grade building area (approximately 8 % of the Site area) was excavated to 2-4 ft below grade with additional excavation to 4 to 6 ft for footings (approximately 9% of the Site area). Due to the change in excavation for the inner courtyard, the front portion of the at-grade building area (approximately 10 % of the Site area) was sloped from 6 ft to 14 ft in order to install the cellar wall and inner courtyard footings. Sloped excavation from grade to 4 ft was performed between the rear yard and first floor area in order to install the first-floor footings (approximately 3% of the Site area). Over excavation was performed to a depth of 12 ft below sidewalk grade in the cellar area to remove the 10x10 SB1 lead hotspot (approximately 3 % of the Site area). Approximately 28% of the Site remained unexcavated for the rear yard area.
