

Phase I Screening Summary

44-12 Douglaston Parkway, Queens, NY 11363
Block 8092, Lot No. 25

The Site consists of a single, irregular-shaped 0.24-acre (10,552 square foot) tax lot, located on the western side of Douglaston Parkway, between Church Street to the north and Northern Boulevard to the south, in the Douglaston-Little Neck section of the Borough of Queens, City of New York, Queens County, New York (**Figure 1**). The Site is identified by the street addresses of 44-12 and 44-14 Douglaston Parkway, and as Borough 4, Block 8092, Lot No. 25 (**Figure 2**) on the New York City Tax Maps.

The elevation of the Site is approximately 57 feet above mean sea level (amsl). The depth to groundwater at the Site is approximately 40 feet below grade surface (bgs). Groundwater flows to the west-northwest towards Little Neck Bay, and is consistent with the regional trend. The Site is zoned for residential (R1-2) use with no commercial overlay.

History:

Site history was determined based on a review of Sanborn fire insurance maps and city directories. The Site was shown as one tax parcel fronting to the east along Douglaston Boulevard (now Douglaston Parkway) in 1917. The eastern portion of the Site was developed with one, 2 ½-story dwelling while the remainder of the Site was vacant. By 1934, a small, 1-story shed had been developed along the southwest border. Both the dwelling and the shed were demolished by 1980, and the Site was vacant and undeveloped. The Site has remained relatively unchanged from 1980 to the present day.

Surrounding properties were primarily undeveloped, with sparse residential development to the north, east and south, by at least 1917. Areas to the west of the Site were undeveloped. Douglaston Boulevard (now Douglaston Parkway) was adjacent to the east, 44th Avenue (now Church Street) was further to the north, Northern Boulevard was further to the south, and Little Neck Bay was further to the west. By 1934, dense commercial retail development was to the southeast across Douglaston Parkway. By 1980, Guildford House Apartments were constructed adjacent to the north, and a garage was adjacent to the south. Additional commercial development, including a filling station, were further to the south. Surrounding properties remained relatively unchanged from 1980 to the present day.

The Site address (44-12 Douglaston Parkway) was identified as occupied by residential tenants from 1934 through 1945. The Site addresses were not identified for any remaining years.

The surrounding properties were identified predominantly as commercial/retail uses, with a number of residential tenants since 1934, the earliest city directory researched that identified listings. These included restaurants, locksmiths, laundromats, medical offices, skin care salons, grocery stores, pharmacies, and general commercial offices/retail uses. Given the timeframe for these operations and their potential prior use, the area cannot be confirmed as having no

subsurface impacts; however, no specific operation or activity was noted that warrants additional investigation. In addition, several of the adjacent/surrounding properties were listed on regulatory databases indicating hazardous waste generation, petroleum storage and/or petroleum releases; these listings are detailed below in the Environmental Database Search section, where they were determined unlikely to represent a significant environmental concern to the Site.

EBC's review of historical information did not reveal evidence of recognized environmental conditions (RECs) in connection with the Site or adjoining properties.

Site Inspection:

EBC representative Nick Randazzo inspected the Site on August 5, 2019. Mr. Randazzo was unaccompanied at the time of the Site inspection. The reconnaissance included a visual inspection of the Site, the sidewalks immediately adjacent to the Site building, and the exterior of adjacent properties.

The Site consists of a single, irregular-shaped tax lot, which is currently undeveloped and occupied by vegetated land. A chain-link metal fence borders the eastern boundary and portions of the northern and southern boundaries. Adjacent buildings border the Site to the north and south, with no developments along the western boundary. The Site is accessible via one gated entrance along Douglaston Parkway (east). Sidewalks border the property to the east along Douglaston Parkway.

No evidence of underground or aboveground storage tanks (USTs/ASTs) (e.g., vent or fill pipes) was observed on the property or reported to EBC at the time of the Site inspection. The EDR database report did not identify any registered ASTs or USTs for the Site, and there are no known spills/releases attributed to the property.

No storm drains were observed during the Site inspection. Storm water from the Site flows to curbside drains along the adjacent road (Douglaston Parkway). Curbside drains discharge to the NYC municipal sewer system.

No fluid-containing equipment (i.e., hydraulic vehicle lifts, trash compactors, elevators, electric transformers) suspected of containing PCBs, suspect asbestos-containing materials, or suspect lead-based paint was observed onsite during the site inspection.

Environmental Database Search:

EDR was retained to provide a computerized database search of the project area within an ASTM-standard radius of the Site. A list of the databases searched and the search radius is shown on the summary table below. EBC reviewed the database output to determine if the property appears on any of the regulatory agency lists.

SUMMARY OF FEDERAL, STATE AND TRIBAL DATABASE FINDINGS

Regulatory Database	Approximate Search Distance	Site Listed?	# of Sites within the Search Radius
Federal NPL	1 mile	No	0
Federal Delisted NPL	½ mile	No	0
Federal SEMS	½ mile	No	0
Federal SEMS Archive	½ mile	No	0
Federal RCRA CORRACTS	1 mile	No	0
Federal RCRIS Non-CORRACTS TSD	½ mile	No	0
Federal RCRA Generators	Site & Adjoining	No	0
Federal Institutional Control/ Engineering Control Registry	Site	No	N/A
Federal ERNS	Site	No	N/A
Federal Brownfield Sites	½ mile	No	0
State and Tribal NPL	1 mile	No	0
State and Tribal CERCLIS (SHWS)	1 mile	No	2
State and Tribal Landfill or Solid Waste Disposal Sites (SWF)	½ mile	No	0
Registered Recycling Facility List (SWRCY)	½ mile	No	0
State and Tribal LTANKS/LUST	½ mile	No	17
State and Tribal Registered UST	Site & Adjoining	No	2
State and Tribal Registered AST	Site & Adjoining	No	0
State Chemical Bulk Storage (CBS)	¼ mile	No	0
State Major Oil Storage Facility (MOSF)	½ mile	No	0
State and Tribal Institutional Control/Engineering Control Registry	Site	No	N/A
State and Tribal Voluntary Cleanup Site	½ mile	No	0
State and Tribal Brownfield Sites	½ mile	No	0
State Spill Sites	1/8 mile	No	5
Registered Drycleaners	¼ mile	No	1

SUMMARY OF FEDERAL, STATE AND TRIBAL DATABASE FINDINGS			
Regulatory Database	Approximate Search Distance	Site Listed?	# of Sites within the Search Radius
NYC E-Designated Sites	1/8 mile	No	0
EDR Historic Auto Stations (HIST AS)	Site & Adjoining	No	0
EDR Historic Cleaners (HIST CL)	Site & Adjoining	No	0
Manufactured Gas Plants (MGPs)	1 mile	No	0

The Site was not identified on any of the databases reviewed as part of this assessment. However, the Site was assigned HazMat, Noise and Air restrictions (E-494), which were determined during the Douglaston Parkway & Northern Boulevard Redevelopment completed by the City in August 2018 (CEQR 06DCP092Q). The HazMat E-Designation requires that a facility conduct testing and sampling protocol and remediation where appropriate as well as a mandatory construction-related health and safety plan. The HazMat E-designation requires the issuance of a building permit by the NYC Department of Buildings before the property can be redeveloped. The Noise E-Designation requires that closed windows have a minimum of 28 dB(A) window/wall attenuation on all facades in order to maintain an interior noise level of 45 dB(A), with an alternate means of ventilation provided. The Air E-Designation requires the use of natural gas for hot water and HVAC equipment, with a height restriction for the stacks. The HazMat, Noise and Air E-designation requires the issuance of a Notice to Proceed by the NYC Office of Environmental Remediation (OER) before the property can be redeveloped.

The database search generated information on the following listings for the surrounding properties within ASTM radius guidelines that could potentially impact the Site:

State and Tribal CERCLIS: Two SHWS listings (Citizens Development Co., 47 Northern Boulevard and Mayflower Cleaners, 489 Great Neck Road) were identified within a one-half mile radius of the Site. Given that each of these facilities are located over one-half mile in a dense urban area and hydraulically cross- to downgradient, it is unlikely that these facilities represent a significant environmental concern to the Site.

State and Tribal LTANKS: Seventeen (17) facilities were identified on the State and Tribal LTANKS database within a one-half mile radius of the Site. Each of the 17 facility listings received regulatory closure from the NYSDEC and are not expected to be an issue of concern for the Site. One of the closed LTANKS listing is located adjacent to the Site, and is summarized as follows:

- Spill No. 01-05567 – The Princeton, 44-20 Douglaston Parkway, adjacent to the south and hydraulically crossgradient of the Site. This spill, which occurred on August 23, 2001, is related to a tank test failure. The NYSDEC closed this spill on September 24, 2003 after the tank in question passed the tank tightness test.

State and Tribal Petroleum Bulk Storage – Underground Storage Tank Database (PBS-UST): Two State PBS-UST facilities are associated with adjacent properties and are summarized as follows:

- The Princeton (ID No. 2-600719), 44-20 Douglaston Parkway, located adjacent to the south and hydraulically crossgradient of the Site. This facility was cross-referenced on the PBS-UST database with one, 5,000-gallon steel UST containing #4 fuel oil which was installed in November 1966 and closed in place in February 2015. This facility was cross-referenced on the LTANKS database in connection with one spill, which opened in August 2001 when a tank failed a tank tightness test. This case was closed by the NYSDEC on September 24, 2003 when the tank in question passed the tank tightness test.
- 43-60 Douglaston Parkway (ID No. 2-609595), 43-60 Douglaston Parkway, located adjacent to the north. This facility was cross-referenced on the PBS-UST database with one, 10,000-gallon steel UST containing #6 fuel oil which was installed in February 1964 and closed in place in June 2015. This facility was not cross-referenced on the LTANKS or NYSPILLS databases.

Based on the information provided by the database, their distance in a dense urban area, the presumed hydraulic gradient, and/or that the Site and surrounding area are supplied potable water from a municipal source, it is unlikely that these facilities represent a significant environmental concern to the Site.

State Spill Sites (NYSPILLS): Five facilities were identified on the State and Tribal NYSPILLS database within a one-half mile radius of the Site. Each of the five listings received regulatory closure from the NYSDEC and are not expected to represent a concern to the Site based on their regulatory status, presumed hydraulic gradient and/or that Site and surrounding area are supplied potable water from a municipal source. In addition, none of the listed closed NYSPILLS listings are associated with an adjacent property.

Registered Drycleaning Facilities (DRYCLEANERS): One DRYCLEANERS listing (Douglaston French Cleaners, 242-01 Northern Boulevard) was identified within a one-quarter mile radius of the Site. This facility was cross-referenced on the RCRA database as a small quantity hazardous waste generator, with no listed violations. Based on the information in the database report, its distance, the presumed hydraulic gradient, and that the Site and surrounding area are supplied potable water from a municipal source, it is unlikely that this listing represents a significant environmental concern to the Site.

New York City Department of Buildings Information

Computerized Property Profile Overviews (PPOs) available from the New York City Department of Buildings (NYCDOB) Building Information System (BIS) website were reviewed for information regarding the subject property. Pertinent information regarding the Site is summarized below:

According to the PPO, no Actions, DOB or Environmental Control Board (ECB) violations, or Complaints are listed for the Site.

Two Jobs/Filing and no ARA/LAA job are listed for the Site. The listed Jobs/Filings are summarized as follows:

- No. 420788810, dated December 28, 2012, application for a cub cut; and
- No. 420843001, dated May 17, 2003, application filed for site safety; temporary concrete pad to be installed.

Conclusions/Recommendations

Based on the results of the records review and interviews, it was determined that there were no recognized environmental conditions (RECs) identified with regard to the Site. However, the following environmental concern was identified:

- The Site has been assigned an E-designation for HazMat, Noise and Air restrictions (E-494) as part of the Douglaston Parkway & Northern Boulevard Rezoning completed by the City in March 2019 (CEQR 06DCP092Q). The HazMat, Noise and Air E-designations require the issuance of a Notice to Proceed by the NYC Office of Environmental Remediation (OER) before the property can be redeveloped.

An E-designation does not interfere with the present use of the Site; however, E-designations do prevent the release of building permits subject to a detailed environmental review and release by the NYC Office of Environmental Remediation. As such, EBC recommends the Site owner submit a soil and groundwater testing protocol to the NYC Department of Environmental Protection, Office of Environmental Planning and Assessment, and begin remediation activities once approved.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Env. Business Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 200 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.
