Environmental Interest/Information System

CHRYSLER REALTY CORP (Continued) **1001028378**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "ROMMEL"3/9/00Left message for George at Miller to perform site assessment and submit report to my attention.3/16/00On site, met George and representatives from Gotham Construction.They demolished an old building that had two large bay areas, a total of 6 USTs - 4 gasoline in northeast corner of property and a fuel oil tanks in the northwest corner and in the southeast corner. There were also two floor drains that discharged directly in the ground. They are constructing a 6 story residential building. Miller performed preclass borings and contamination was encountered to a depth of 15 feet. Refusal was hit at 17'. '93 borings were performed by Soil Mechanics along 55th Street. Bedrock (schist) encountered at approximately 40 bg. Water was encountered above the bedrock at Miller will collect endpoint samples at the terminus of excavation. Miller will also submit the analytical from the borings and from the samples collected around the gas tanks for disposal.
Remarks:	during tank removal caller found contaminared soil

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport,

MARTIN MANHATTAN HYUNDAI (Continued) **1000411903**

and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	8/9/12-Vought-Primary off hours responder. This spill assigned to DEC Feroze as part of routine Con Edison minor spill porfolio review and possible closure. Initial EMIS #230918 added to Cross Reference Field, deleted from Proxy and downloaded into E-docs. As per EMIS, "W. Varela of Substation Operations reported that he found 4 gallons of transformer oil on the concrete pad that has leaked from the transformer. He does not know where the leak is atthis time or if it is still leaking. He will start the cleanup.."3/26/13 - Austin - 4 gal. doscivery lead to finding of 700 gals. in vault, from bad

MARTIN MOTOR VOLVO (Continued) **1000411895**

bushing gasket on transformer body - Con Ed contained and cleaned up the spill, and repaired the gasket - See eDocs for further information - Sandy storm related - Spill closed - end

Remarks: Spill was to a concrete pad, no resources effected. Clean-up is in progress.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Tank Info:

Tank Number:	002
Tank Id:	23088
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
J02 - Dispenser - Suction Dispenser
L09 - Piping Leak Detection - Exempt Suction Piping
B01 - Tank External Protection - Painted/Asphalt Coating
F00 - Pipe External Protection - None
I04 - Overfill - Product Level Gauge (A/G)
G03 - Tank Secondary Containment - Vault (w/o access)

VOLKSWAGEN AND AUDI OF MANHATTAN (Continued) **A100354049**

C01 - Pipe Location - Aboveground
H00 - Tank Leak Detection - None
I05 - Overfill - Vent Whistle

Tank Location:	3
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	Administratively Closed
Pipe Model:	Not reported

BROWNFIELDS:

Program:	BCP
Site Code:	337122
Site Description:	The Astor substation site was formerly called the Riverside Substation site. Con Edison, the project applicant, changed the project name to Astor Substation site in response to discussion with various community members in October 2005. The Astor substation site (~ 0.6 acres in size) is located along the eastern side of 11th Avenue between west 49th and West 50th Street in the Clinton section of the borough of Manhattan, city of New York, at latitude 40 degree 45' 57.2" and longitude 73 degree 59' 40.9", and designated as tax parcels Block 1078, Lots 1 and 5 on the Tax Map of the City of New York, New York County. The street address for the parcel is 700 11th Avenue (which also known as 549-551 and 553-557 West 49th Street), New York, NY 10019. During 1930 to 1940, the site had been used for gasoline filling station and automobile service garage. Prior to its acquisition by Con Edison on April 12, 2005, the site was owned and operated by Martin Motors Sales, Inc. (MMS) as a retail automobile sales and service facility. The area around the site is fully developed as commercial, residential and institutional uses to the east, north and south; with another Con Edison electrical substation located west of the site across 11th Avenue. The building on the site had been demolished in connection with Con Edisons

ASTOR SUBSTATION PROJECT SITE (Continued) **S106906504**

redevelopment of the Site into an electrical substation that is needed to meet the increasing demand for power in midtown Manhattan. The site is currently being redevelop and the electrical substation construction is anticipated to be completed sometime in 2008. Investigations completed at the site include a Limited Phase II Environmental Site Assessment (January, 2005) and Remedial Investigation Report (November 2005). The volunteer has submitted and the Department has approved a Remedial Action Work Plan(RAWP) which involves excavation of soil at the entire site and the northern portion of 11th avenue sidewalk area along the western site property line down to top of bedrock surface. Contaminated media will be removal and properly disposed off-site.Implementation of the approved RAWP started on 4/25/06. Remedial construction was completed on February 2007. Remedial Action Report(RAR) date March 2007 and RAR addendums dated April 2007 and November 2007 respectively, collectively equivalent to a Final Engineering Report. FER was approved on 12/21/2007 and a Certificate of Completion was issued on 12/21/2007.

Env Problem: Site investigations conducted prior and after implementation of the BCP agreement revealed that the presence of underground storage Tanks (USTs) that were associated with the former gas station or automobile repair facility; petroleum contamination in the northwest corner of the site (both on-site and off-site) in soil and groundwater, including petroleum product on the groundwater surface(up to 5 feet of separate-phase product has been detected in an off-site well in the vicinity of the former gasoline filling station located in the north west portion of the site); soil and groundwater near the location of a former oil/water separator in the garage area which is located south east of the site had been impacted by the former site uses (automobile service garage); Soil Gas sampling indicates the presence of VOCs, including both gasoline related compounds and chlorinated solvents (PCE, and TCE) that are consistent with findings in soil, groundwater, and pass site use, The remedial investigation report also identify a NYSDEC spill site (spill # 8904939 petroleum origin) is located at the southeast corner of west 51st street and 11th avenue about one block north of Astor substation site, these off-site properties may be contributing to the soil vapor detections; Low level of PAHs and Metals were detected from on site soil; Sediment samples from the floor drain in the service garage indicated the presence of PCE, TCE and gasoline related compounds with concentration above the TAGM4046 recommended soil clean up objective.The applicant had implemented the approved Interim Remedial Measures (IRM) to recover petroleum product identify in the on and off site wells since September of 2005. The thickness of the petroleum product in groundwater monitoring wells show significant drop as the result of the IRM activities.The quality exposure assessment indicated the lack of exposure pathways at the site because of the current ground surface is covered with impervious surface. DEC has determined, in consultation with NYSDOH, that the conditions at this site do not pose a significant threat to human health or the environment. The RAWP dated December 2005 was approved March 31, 2006 has been implemented. The FER has been approved and the COC issued in December 2007.

Health Problem: Public water is provided to the area, thereby preventing exposures to groundwater. The site is currently covered with buildings and pavement, preventing direct contact exposures.

DEC Region: 2
DER Facility ID: 216711
DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "VOUGHT"7/1/02 TJDReceived work plan from Emteque (John Raguso). Expedited review at consultant's request. Unable to approve plan as report missing key information and site not complete deliniated. Consultant directed to provide a modified plan which includes installation of wells and contains missing report data. Missing data includes: boring logs, MTBE analysis, plume boundaries, scaled map which includes all tanks and relevant site features, groundwater flow direction etc..7/1/03 TJDStu Bassel (LMS 845 735 8300) contacted DeMeo to inform DEC that LMS had taken over project. A work plan will be submitted to remove tanks, excavate accessible soils, use bio-remediation to treat groundwater contamination and soil vapor extraction to remediate the soil contamination. LMS was also directed to provide any recent sampling data & all relevant information regarding the proposed bio-remediation application. In addition LMS was informed hydraulic control would be required if bio remediation is approved for the site.8/29/03 TJDReassigned to Vought9/18/03: Martin Motors submits Supplemental Conceptual Remedial Plan prepared by LMS. In cover letter, Martin Motors reports that approximatley 5 feet of product was found in well MW-2 on or around July 28. Manual bailing program initiated - approx. 20 gallons product recovered through 8/21/03. Product thickness in well dropped to approx 2 feet as of 8/21. (JHO, 1/13/05)1/6/05-Vought-Vought spoke David Rubin (Con Ed 718-204-4219) who is looking to install a substation at this site. Con Ed looking to resolve open spill issue and have BCP pre-application meeting. Con Ed will notify current owner of meeting.1/10/05Spill reassigned to O'Connell. Con Ed will be attending pre-app meting with DEC on 1/21/05. Con Ed apparently conducted preliminary off-site investigation, but no report was submitted to the Department. Will request copy at pre-app meeting. (JHO)5/10/07: On-site cleanup was completed by Con Edison under a Brownfield Cleanup Agreement (site no. C231047, Astor Substation). There is still off-site gasoline contamiantion that remains beneath the sidewalk and street on 11th Avenue. This spill number is being transferred to the Petroleum Remediation group for follow up with the responsible party.
(JHO)

----------8/28/08: Reassigned from Vadim Brevdo to Kartik Chanda. (Chanda)9/3/08: Chanda updated this spill site and discussed with Mark Tibbe and Bryan (NYSDEC) regarding the off-site contamination originated from this site. It is concluded that a Stipulation Agreement (STIP) with a Corrective Action Plan (CAP) will be sent to RP (previous owner of this site).9/8/08: Chanda sent a STIP and CAP to RP (Anthony Chianese, vice president of Martin Motors) via certified mail. (see eDocs)9/19/08: The letter was undeliverable. Chanda made a phone call to David B. Rubin, Con Edison to get the previous property owner's name and address. Mr. David B. Rubin (Con Edison) sent the following contact information:The RP name is: Martin Schlanger Martin Motor Sales, Inc. 677 11th Avenue New York, NY 10019The RP's Attorney is: Mr. Joseph P. Baratta Baratta & Goldstein 597 Fifth Avenue New York, NY 10017 Ph. (212) 750-97009/22/08: Chanda discuss with Mark Tibbe(NYSDEC)and resent a

ASTOR SUBSTATION BCP SITE (Continued) **S108058473**

STIP and CAP to RP (Martin Schlanger, Martin Motors) via certified mail and a copy to RP's Attorney via regular mail.10/09/08: The letter comes back to DEC. Chanda discussed with Mark Tibbe and John Urda regarding this site. John Urda search NYS Department of State database and find out the following information:* Chairman or Chief Executive Officer:Janet Schlanger1281 Gulf of Mexico DR/#802Long Boat Key, Florida, 34228* Principal Executive OfficeMartin Motors Sales Inc.677 11th AvenueNew York, New York 1001910/14/08: Chanda performed a site visit at 700 11th Avenue (Astor Substation) and across the street at 677 11th Avenue (Martin's Manhattan). The Martin Motor Business is still at 677 11th Avenue. Chanda has taken several photographs regarding the current location of Martin Motors.10/16/08: Chanda discussed with Mark Tibbe and John Urda (NYSDEC) and sent another letter to Ms. Janet Schlanger (Florida)via certified mail and Martin Motors via DEC's Conservation Officer.10/24/08: Chanda received a phone call from Andrew E. Skroback. he is the environmental attorny for this site. He request time extension to submit the signed STIP. Chanda received an extension request via the fillowing email:" Dear Mr. Chanda:It was a pleasure speaking with you today. As discussed, I write onbehalf of Martin Motor Sales, Inc. to request an extension of ourdeadline to respond to your letter of September 22, 2008, such that ourresponse to your letter would now be due on or before Monday November24, 2008. Please confirm this extension by return email.Once we have time to review the past technical reports, I propose thatwe arrange a meeting between NYDEC, myself and ERM to discuss the scopeof what should be done at the site and the scope of the proposedcorrective action plan, as well as other potential sources of areacontamination. I look forward to working with you on this matter.Best regards,Andrew E. Skroback (Drew)Stroock & Stroock & Lavan LLP180 Maiden Lane New York, NY 10038(212) 806-6446askroback@stroock.com " 10/28/08: Chanda discussed with Mark Tibbe (NYSDEC) and approved one month extension to submit the signed STIP. The signed STIP must be submitted to DEC by November 24, 2008.12/08/08: Transferred from Chanda to Tibbe. STIP effective 12/05/08. 9/20/09 - Austin - closed and referred spill # 0609005 to this one, a report from Con Ed of finding gasoline contaminated soils in the immediate vicinity of this site. See report and eDocs - end 11/12/10 - spill re-assigned from Tibbe to Joe O'Connell11/28/11 - Obligado - Spill re-assigned from O'Connell to Obligado

Remarks: site work found contaminated soil.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Classification: Not a generator, verified

Date form received by agency: 04/07/2000
Facility name: SAAR CO LLC - 601 WEST 50TH STREET
Classification: Small Quantity Generator

Violation Status: No violations found

FINDS:

Registry ID: 110004558666

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

SAAR CO LLC - 601 WEST 50TH STREET (Continued) **1001968903**

events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	spill from boiler on floor. approx 500-1000 gallons down drain. Surface cleanup is relatively small. Drain is believed to go to Amtrak tracks below. I spoke with AMtrak rep who walked the tracks. they found no oil. DEP was informed and surface spill was taken care of. Followup for closure.Release to city sanitary system. Surface cleanup complete and repairs have been made. Spill closed.
Remarks:	Tommy reported to Castle Oil over 1000 gallons in basement down the drain - No cleanup noted as of yet - possibly from a boiler malfunction

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE

ONE SOURCE NY INC (Continued) **1000555828**

OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Waste code: D007
Waste name: CHROMIUM

Waste code: D008
Waste name: LEAD

Waste code: D035
Waste name: METHYL ETHYL KETONE

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No
On-site burner exemption:	No
Furnace exemption:	No
Used oil fuel burner:	No
Used oil processor:	No
User oil refiner:	No
Used oil fuel marketer to burner:	No
Used oil Specification marketer:	No
Used oil transfer facility:	No
Used oil transporter:	No

Historical Generators:

Date form received by agency:	01/01/2006
Facility name:	NEW YORK TELEPHONE CO
Classification:	Conditionally Exempt Small Quantity Generator

NEW YORK TELEPHONE CO (Continued) **1000136854**

Date form received by agency: 07/08/1999
Facility name: NEW YORK TELEPHONE CO
Classification: Not a generator, verified

Date form received by agency: 05/11/1993
Facility name: NEW YORK TELEPHONE CO
Classification: Small Quantity Generator

Violation Status: No violations found

FINDS:

Registry ID: 110004389741

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number:	001
Tank Id:	39823
Material Code:	0001
Common Name of Substance:	#2 Fuel Oil (On-Site Consumption)

Equipment Records:

B00 - Tank External Protection - None
H00 - Tank Leak Detection - None
C00 - Pipe Location - No Piping
F00 - Pipe External Protection - None
I04 - Overfill - Product Level Gauge (A/G)
A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
J02 - Dispenser - Suction Dispenser
L09 - Piping Leak Detection - Exempt Suction Piping
G00 - Tank Secondary Containment - None

Tank Location:	1
Tank Type:	Steel/Carbon Steel/Iron
Tank Status:	In Service
Pipe Model:	Not reported

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SANGESLAND"On August 15, 2001, DEC Sigona received spill closure report from AKRF dated August 14, 2001. See file for details and copy of report.12/01 Spill re-assigned to SangeslandAKRF submitted a letter dated Dec 27, 2001 which included a second copy of the Aug 14, 2001 report and a series of photographs showing the complete excavation of the city block down to bedrock.There was a problem with the PBS registration on the site. Sangesland asked AKRF to re-submit the PBS forms with the correct address (old PBS had the wrong city block) along with info on ALL of the tanks found and removed from the site.From a technical/environmental point of view the site is clean and will be closed out as soon as all of the administrative paperwork has been submitted and reviewed. 2/4/2002 AKRF has submitted copies of all updated PBS registration forms (PBS # 2-604810). All tanks have been removed from the site. The whole site has been excavated

660 12TH AVE (A/K/A) (Continued) **S104877137**

down to bedrock. All petroleum related contamination on this site has been removed.Spill Closed.

Remarks: UNDERGROUND STORAGE TANK FAILED OVER TIME AND CAUSED SOIL CONTAMINATION - SOIL WILL BE STOCKPILED

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo:	9-18-0 @ 12:05P Keelan #19995 reports that while refueling the diesel vault @ w 49 st sub station (637 w 49 st). W Zwirz #20206 discovered that 10 gallons of diesel fuel had spilled onto the concrete floor of the structure. There was or is no smoke or fire involved . No sewer or waterway affected. No injuries and weather had noaffect. Spill was caused by overfilling the tank and it spilled from the diesel tank vent line. No measuring device used to determine the amount of the spill. No private property affected. Oil absorbent pads and socks were applied to contain the spill. Cleanup pending .....J Moran CIG P Didonato # 01669 notified @ 12:33 J Moran #09/18/03While filling up the main diesel tank the day tank overflowed spilling approx ten gallons of oil out of the vent line on the corrugated roof of the desiel generator. The oil ran down the sides of the shed onto concrete. Speedy dry and pads were used to clean the roof walls and concrete. The day tank oil level was lowered and there is no further leaking equipment. Spill cleanup was supervised by Mike Butchar using SSM personnel.P.Keelan
Remarks:	contained inside the structure - clean up pending - ref #150395

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "O'CONNELL"Con Ed e2mis #119949:9/22/98 1210pm2 drops dielectric fluid leaking from 5" pipe of feeder M55 going to the cooling plant in the fire pump room. Leaked onto concrete floor. 10/14/98 Area was

WEST 49TH ST SUB-STATION (Continued) **S104496063**

cleaned and containment set up. Sample was taken but there was insufficient material to run sample. A sample will be taken prior to disposal. Repairs pending outage.On January 7, 2003 a inspection was performed of W49 St substation. Joe Susco, Robert Sanchez, Patrick Keelan, Mike Butchar represented SSO. Kerry Foley represented the DEC. This incident was inspected and all agreed that the source of the initial spill was a leaking valve that was reported under incident # 129845.Ms. Foley agreed to close out this incident and keep the incident for the source of the spill open until repairs are completed. Clean up of this incident was completed and the spill tag was removed.DEC Notes:9/22/98 ERT Dan Shah-1:20pm, he is going to instruct station not to sample but to clean as 50-499ppm PCB.1/7/03 Inspected equipment. No leaks were seen. Cleanup appears to have been completed. (KMF)

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "ENGELHARDT"Con Ed e2mis #118907:8/7/98 1412hrsLeaked 4oz tranmission feeder oil from pothead flanges of fdr 38M74 and 45. Hit bluestone.8/26/98 TO Tallini reports one flange was re-tightened and the leak from that flange was stopped. Second flange requires an outage for repairs.Used absorbants to remove residual fluids. Removed/recovered liquids/solids. Removed visible traces of oil. Washed stained areas. Cleanup completed on 10/9/98 1400hrs.DEC Notes:1/7/03 Inspected. No evidence of spill or leak apparent. (KMF)
Remarks:	4 ounces spilled out of defective pothead onto bluestone

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Spill Record Last Update: 7/27/2004
Spiller Name: Not reported
Spiller Company: Not reported
Spiller Address: Not reported
Spiller City,St,Zip: ***Update***, ZZ
Spiller County: 001
Spiller Contact: ROGER ROMANCE
Spiller Phone: (646) 772-5889
Spiller Extention: Not reported
DEC Region: 2

(Continued) **S106719412**

DER Facility ID: 227269
DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "KRIMGOLD"Same as spill # 0403162. Corner building has two addresses. YK.
Remarks: Oil tank was overfilled in basement of commercial building. Oil company rep. en route to assess. Unknown quantity has spilled onto basement floor.

Material:
Site ID: 279927
Operable Unit ID: 886579
Operable Unit: 01
Material ID: 490667
Material Code: 0001A
Material Name: #2 Fuel Oil
Case No.: Not reported
Material FA: Petroleum
Quantity: 0
Units: Pounds
Recovered: No
Resource Affected: Not reported
Oxygenate: False

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:
Date form received by agency: 01/01/2006
Facility name: ST CLARES HOSP & HEALTH CTR#
Classification: Conditionally Exempt Small Quantity Generator

Date form received by agency: 12/31/1979
Facility name: ST CLARES HOSP & HEALTH CTR#
Classification: Not a generator, verified

Violation Status: No violations found

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

ESOTERIX GENETIC LABORATORIES LLC (Continued) **1001224129**

Waste code: D011
Waste name: SILVER

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste code: U122
Waste name: FORMALDEHYDE

Waste code: U123
Waste name: FORMIC ACID (C,T)

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D008
Waste name: LEAD

Waste code: D009
Waste name: MERCURY

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

INTERNATIONAL FLAVORS & FRAGRANCES INC (Continued) **1006810640**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the

423 WEST 55TH STREET (Continued) **1005517907**

estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	need to send a TTF letter11/7/05 - Raphael Ketani. I am sending a TTF letter today regarding the site. I will send one copy to Angela Donnolo, ATC Management, 1501 Broadway, NY, 10036, and one to 605 West 48 Street, LLC. Nov. 7, 2005A "Tank Test Failure Letter" was sent to:Joseph DounoloAdvanced Cout. Corporation605 West 48th St.New york, NY 1003612/1/05 - Raphael Ketani. Letter received from Thomas Leddy, President of Pro Test ((718) 815-6292. Piping is disconnected from the two tanks. Tanks are partially excavated. Studying feasibility of removing the tanks or bioremediation of soil around and under tanks.12/21/05 - Raphael Ketani. I spoke to Mr. Leddy and he said that one tank was pumped out, but the other is still leaking into the sub-basement. Nothing has happened at the site, as far as he knows, and he doesn't know if another contractor was hired to cleanup the site. 1/4/06 - Raphael Ketani. I spoke to Mr. Joe Bernotas of ATC Management ((917) 337-1702). He is not the owner, but works for the owner. He said that the tanks are out of the ground and empty, but he is waiting for the environmental company to clean out the tanks and get rid of them. 2/8/06 - Raphael Ketani. Jerry Tiss of JLC ((212) 420-8119/ (917) 617-3894) called me to say that they removed the tanks. He said that the problem was a leaking fill line. I told him

ATC MANAGEMENT (Continued) **S107417116**

all of the contaminated soil has to be removed. He asked whether the soil under the sidewalk had to be removed. I told him "yes." He said he couldn't get too close to a neighboring building to get more contaminated soil as the wall is brick. I told him I would need an engineers letter telling me that he can't go any further. He said he would get it. Mr. Tiss said that he will take 2 end-point samples after removing the contaminated soil. I told him to send me the results. He said he would. 2/13/06 - Raphael Ketani. I received a FAX from Mr. Tiss. The letter discusses whether there is a need to remove more soil, but doesn't address safety, structural integrity issues. The letter states that the site has been satisfactorily remediated, pending the results of samples that were sent to the lab.2/15/06 - Raphael Ketani. I received a revised 2/10/06 letter from Mr. Tiss of JLC. It states that they can't go any further without damage to the foundation and structural elements. 3/2/06 - Raphael Ketani. I tried to call Mr. Tiss, but could only leave a message.3/15/06 - Raphael Ketani. I spoke to Mr. Tiss today. I asked him what is happening on the site. He said that they filled in the pit and have received the analytical soil results. I asked him to send the results. 3/16/06 - Raphael Ketani. I received the soil analytical results today. 3/17/06 - Raphael Ketani. I reviewed the soil analytical results and found them as either non-detect or a few SVOCs that were just above TAGM. In light of the received documentation and the engineer's letter, I am closing the case.3/29/06 - Raphael Ketani. Mr. Bernotas of ATC Management called to request an NFA letter. I told him I will send one out for the site.

Remarks: no remarks.

Hazardous Waste Summary:
Waste code: D008
Waste name: LEAD

Violation Status: No violations found

FINDS:

Registry ID: 110012216565

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:

U.S. importer of hazardous waste:	No
Mixed waste (haz. and radioactive):	No
Recycler of hazardous waste:	No
Transporter of hazardous waste:	No
Treater, storer or disposer of HW:	No
Underground injection activity:	No

POTAMKIN TOYOTA (Continued) **1000149843**

On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Historical Generators:
Date form received by agency: 01/01/2006
Facility name: POTAMKIN TOYOTA
Classification: Not a generator, verified

Date form received by agency: 07/14/1999
Facility name: POTAMKIN TOYOTA
Classification: Small Quantity Generator

Date form received by agency: 04/29/1986
Facility name: POTAMKIN TOYOTA
Classification: Large Quantity Generator

Facility Has Received Notices of Violations:
Regulation violated: Not reported
Area of violation: Generators - Manifest
Date violation determined: 01/27/1987
Date achieved compliance: 01/28/1987
Violation lead agency: State
Enforcement action: WRITTEN INFORMAL
Enforcement action date: 01/27/1987
Enf. disposition status: Not reported
Enf. disp. status date: Not reported
Enforcement lead agency: State
Proposed penalty amount: Not reported
Final penalty amount: Not reported
Paid penalty amount: Not reported

Evaluation Action Summary:
Evaluation date: 01/27/1987
Evaluation: NON-FINANCIAL RECORD REVIEW
Area of violation: Generators - Manifest
Date achieved compliance: 01/28/1987
Evaluation lead agency: State

Registry ID: 110001595550

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants.

POTAMKIN TOYOTA (Continued) **1000149843**

AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

BROWNFIELDS:
Program: BCP
Site Code: 390497
Site Description: Location:The Mid Block #57 Project site is located in Manhattan at 615-649 West 57th Street, between 11th and 12th Avenues. The site consists of Tax Block 1105, Lots 14, 19, 43, and part of Lot 5, in the Borough of Manhattan. The surrounding neighborhood is mixed residential and commercial.Site features:This site is approximately 1.36 acres in size. Former on-site buildings have been demolished and the site is currently vacant.Current zoning/uses:Remedial action began in March 2010 and as such is currently vacant. Remedial action is currently on hold until autumn of 2011 due to some changes in building design and associated permit requirements. East of the Site and bordering 11th Avenue is The Helena, an active rental residential tower with market and affordable housing, and Manhattan Mini Storage. The Helena is located at 601 West 57th Street (southeast corner of block) and Manhattan Mini Storage is located at 847-853 Eleventh Avenue (northeast corner of block). West of the Site at 830 12th Avenue is a vacant lot, which formerly contained an Airborne Express parcel warehouse and Artkraft Strauss Building (formerly manufactured signs and billboards). Potential contamination on this property to the west is being investigated as an off-site project (see C231062A).Historical use:The Site formerly contained an Airborne Express parcel warehouse and vehicular maintenance building (631-649 West 57th Street), a Potamkin Toyota auto service repair facility (623-629 West 57th Street), the Copacabana Night Club (615-621 West 57th Street), and Dynasty Auto Body Facility (616-618 West 58th Street). The site was originally proposed to be redeveloped as a school, but now is planned for residential use with ground level retail and a sub-grade parking level.Site geology and hydrogeology:The topography of the site slopes gently to the west toward the Hudson River, which is situated approximately 250 feet

OFF-SITE MID-BLOCK #57 PROJECT (Continued) **S108984485**

west of the site. The site geology is characterized by fill material overlying sand and till, weathered rock, and bedrock. A Brownfield Cleanup Agreement (BCA) was executed in December 2008, and on February 17, 2009 an amendment to the BCA was signed by new volunteers. The Remedial Action Work Plan (RAWP) was approved in March 2010. The Volunteer intends to complete a Track 1 cleanup for Unrestricted Use.

Env Problem: Nature and extent of contamination:The Remedial Investigation (RI) found contamination in soil, groundwater, and soil vapor. Contaminants of concern at the Site are petroleum-related compounds. Contamination in each of these media is discussed below.Soil:Twenty three (23) soil samples were analyzed. Analytical results revealed volatile organic compounds (VOCs) in soil exceeding Part 375 Unrestricted Soil Cleanup Objectives (UUSCOs). This includes ethylbenzene, detected at 275 parts per million (ppm) in comparison to the UUSCO of 1 ppm; 1,2,4-trimethylbenzene at 317 ppm compared to the UUSCO of 3.6 ppm; and total xylenes at 1,380 ppm compared to the UUSCO of 0.26 ppm. Semi-volatile organic compounds (SVOCs) were also identified in soil in multiple samples at concentrations above the UUSCOs. This includes chrysene which was detected at 5.5 ppm compared to the UUSCO of 1 ppm and naphthalene at 38 ppm compared to the UUSCO of 12 ppm. Metals identified in soil samples at concentration above the UUSCOs include mercury at 46 ppm compared to the UUSCO of 0.18 ppm; chromium at 65.8 ppm compared to the UUSCO of 30 ppm; lead at 4,420 ppm compared to the UUSCO of 63 ppm; and zinc at 1,250 ppm compared to the UUSCO of 109 ppm. Groundwater:Eleven (11) groundwater samples were analyzed. The analytical data revealed VOCs at concentrations exceeding NYS Technical and Operational Guidance Series (TOGS) Ambient Water Quality Standards. Benzene was detected at 1,500 parts per billion (ppb) compared to the TOGS standard of 1 ppb; 1,2,4-trimethylebenzene at 2,400 ppb (TOGS standard is 5 ppb); and total xylenes at 4,900 ppb (TOGS standard is 5 ppb). A few SVOCs were detected at concentrations exceeding TOGS standards include naphthalene as high as 190 ppb (TOGS standard is 10 ppb); benzo(a)pyrene as high as 8.3 ppb (TOGS standard is non-detect); and chrysene as high as 10 ppb (TOGS standard is 0.002 ppb). Metals detected in groundwater at concentrations exceeding TOGS standards include: lead as high as 900 ppb in unfiltered samples compared to the TOGS standard of 25 ppb; mercury as high as 11.9 ppb (unfiltered) (TOGS standard is 0.7 ppb); chromium as high as 139 ppb (unfiltered) (TOGS standard is 50 ppb); and arsenic as high as 38 ppb (unfiltered) (TOGS standard is 25 ppb). None of these metals were detected in filtered groundwater samples. Manganese and sodium were the only metals detected in both unfiltered and filtered samples at concentrations above TOGS standards. Soil vapor:Twelve (12) soil vapor samples were analyzed. Analytical data revealed the presence of VOCs in these soil vapor samples, including benzene at a maximum concentration of 831 micrograms per cubic meter (ug/m3), 1,2,4-trimethylbenzene at 37,600 ug/m3, tetrachloroethane (PCE) at 240 ug/m3, and total xylenes at 21,400 ug/m3. Special resources impacted/threatened:There were no significant ecological resources identified at the site during the investigation.Significant threat:Based on the results of the Remedial Investigation, NYSDEC and NYSDOH have determined that the Site represents a significant threat to human health and the environment. This decision is based on the nature of the existing contaminants identified at the Site; the potential for off-site migration of contaminants in the groundwater;

OFF-SITE MID-BLOCK #57 PROJECT (Continued) **S108984485**

and the potential for human exposure to site-related contaminants via soil vapors.

Health Problem: The site is vacant, therefore, contact with contaminated soil is unlikely. Drinking water with site-related contaminants is not expected as the area is served by public water. Since on-site soil vapor contains elevated levels of volatile organic compounds, inhalation of site-related contaminants via soil vapor intrusion in future on-site buildings may be possible. Vapor intrusion into off-site structures is a potential exposure pathway that needs to be investigated.

Program: BCP
Site Code: 419512
Site Description: This project was initiated to address off-site impacts from the Mid-Block #57 Brownfield Cleanup Program (BCP) project C231062. There is also a stipulation agreement for the Site, under Spill 9810172.Location:This Site is located at 615-649 West 57th Street and 830 12th Avenue in the Borough of Manhattan, Block 1105, Lot 1 and part of Lot 5. It is immediately west of BCP Site C231062. To the west is 12th Avenue and the Hudson River; north is 58th Street and the 59th Street Con Edison steam generating facility; and to the south is 57th Street and several businesses, including parking facilities, auto dealership service stations, and offices of NYC Sanitation Department. The surrounding neighborhood is mixed residential and commercial. Site features:The Site is a rectangular lot of 1.17 acres. Former on-site buildings have been demolished and the Site is currently vacant. Current zoning/uses:The site is currently vacant, following demolition of the on-site buildings. Construction on this site is planned to be performed in conjunction with work on the BCP site to the east. Proposed development is for residential and commercial use.Historical use:Prior to 1951, the western portion of the site formerly contained the Brockway Motor Truck Company and Stutz (or State) Service Station. By 1951 a private garage and repair shop occupied the 2-story building. By 1976 the building was used by the Artkraft Strauss Sign Company for the manufacturing of signs and billboards for Times Square. The first floor of the building was used at this time for parts storage, metalworking and woodworking equipment, painting, and storage of vehicles. After Artkraft Strauss left the building was subsequently served as studio space for artists. This building was demolished in early 2011. The eastern portion of the site formerly contained the Colt Stewart Co. Chrysler Service Station followed by United Parcel Service, Inc. who occupied the building by 1940. Underground Storage Tank (UST) leaks were reported to the Fire Department during that time. The building was subsequently used by New York Telephone, who installed 2 USTs, and later by Airborne Express as a parcel warehouse. The building was demolished in 2001 and subsequently used as a parking lot.Site geology and hydrogeology:The Site topography slopes west toward the Hudson River with an elevation ranging from 13 feet above Manhattan Bureau Datum on the eastern portion of the Site to 7 feet above Manhattan Bureau Datum on 12th Avenue. In general, regional topography slopes gently to the west. The nearest surface water body is the Hudson River located approximately 250 feet west of the Site. The Site geology is characterized by fill material of varying thickness overlying sand and till, decomposed rock, weathered rock, and bedrock.
Env Problem: Nature and extent of contamination:Soil:Petroleum-related

OFF-SITE MID-BLOCK #57 PROJECT (Continued) **S108984485**

contaminants at levels exceeding unrestricted use soil cleanup objectives (UUSCOs) exist in discrete locations on the site. These areas were largely addressed via Interim Remedial Measures (including UST removal and excavation of surrounding impacted soil). Following the IRM work, end-point samples in the northern excavation show remaining contamination that requires further remedial action, including benzene at 0.21 ppm (UUSCO is 0.06 ppm); ethylbenzene at 8.5 ppm (UUSCO is 1 ppm); total xylenes at 8.1 ppm (UUSCO is 0.26 ppm); 1,2,4-trimethylbenzene at 33 ppm (UUSCO is 3.6 ppm); and 1,3,5-trimethylbenzene at 16 ppm (UUSCO is 8.4 ppm). In addition to this area, two other discrete areas on the site will be excavated to remove soil with elevated concentrations of benzene under the approved Remedial Action Work Plan (RAWP). Semi-volatile organic compounds (SVOCs) have also been found site-wide, at concentrations that indicate this is part of site background conditions. One area of elevated SVOCs (LB-17) requires remediation under the RAWP. SVOCs detected here include: benzo(a)anthracene at 12 ppm; benzo(a)pyrene at 10; benzo(b)fluoranthene at 12 ppm; and chrysene at 10 ppm (UUSCO for these contaminants is 1 ppm). Tetrachloroethylene (PCE) previously detected in one boring at 1.76 ppm was removed during the IRM work; chlorinated VOCs were not detected in any other borings.Groundwater:In on-site groundwater, VOCs detected in previous investigations have been largely reduced. In 2007 tetrachlorethene was detected in one groundwater sample and vinyl chloride in a separate groundwater sample; these have not been detected in any groundwater samples since. The only contaminants detected in on-site groundwater at concentrations exceeding the NYS Technical and Operational Guidance Series (TOGS) Ambient Water Quality Standards, during the recent Remedial Investigation, include: 1,2,4-trimethylbenzene at 8.1 ppb and isopropylbenzene at 42 ppb. Off-site monitioring wells have detected (in historical sampling) benzene at 20.3 ppb (compared to the TOGS standard of 1 ppb); Ethylbenzene at 61 ppb (compared to the TOGS standard of 5 ppb); and total xylenes at 39.5 ppb (compared to the TOGS standard of 5 ppb). Groundwater contamination appears to be coming from the adjacent BCP site C231062 (Mid-Block 57 Site). Soil vapor:Historical soil vapor sampling (2007) and RI soil vapor sampling initially identified high concentrations of chlorinated VOCs in soil vapor in a few discrete locations including tetrachloroethylene (PCE) as high as 46,500 ug/m3 and trichloroethene (TCE) as high as 1400 ug/m3. Following the IRM work, these concentrations were greatly reduced but are still present (post-IRM soil vapor samples identified PCE at a maximum of 125 micrograms per cubic meter (ug/m3) and TCE at a maximum of 67.2). Petroleum-related contaminants are also present in soil vapor, including benzene at 130 ug/m3 and ethylbenzene as high as 82 ug/m3. The approved RAWP includes installation of a sub-slab depressurization system.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	Vivek Nattanmai. December 29, 2005Reviewed the spill report, identified the property owner and sent a letter dated 12/28/05 to the property owner requesting for information.January 9, 2006The letter was undelivered because of 'insufficent address'.The report is closed because this is above ground tank and there are no testing requirements for above ground tanks. In addition to this, no spillage occurred.SPILLS CLOSED ON JANUARY 9, 2006. VIVEK NATTANMAI.
Remarks:	Caller reporting a tank test failure it was an above ground tank and a pressure test was used no spillage

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DER Facility ID:	179047
DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SANGESLAND/DO"6/7/06- DECP iper took lead from Sue LAsdin due to associated spill at same address.According to Environ, talks w/ employees revealed that there was a UST on site that has recently been abandoned in place. The Dept has no information on this tank and may be less than 1100 gal. Regardless, soil analytical and/or passing results before abandonment has not been received. Address currently using 2 manifolded 275 AST though used old fill line. This fill line has recently been replaced. If passing tank results cannot be provided, then boring will need to be performed.9/28/06= DEC Piper reviewed subsurface investigation report. Due to refusal at shallow depths<3 ft., soil samples were not able to be collected. No organic vapors detected in these borings around tank. Borings around fill line revealed soil contamiantion. Further work is warranted. 6/19/07 DEC Piper spoke w. Drew Bonas w. Environ, He has been back and forth w. owner and will let me know outcome of upcoming meeting .12/12/07- DEC Piper reviewed case. Based on spill info and site consitions, spill to subsurface was minimal and poses no significant threat to health and env. Residual contamination exists. This spill will be consolidated into 0514611. 0209507 will be closed.
Remarks:	recommend uncover, reapir & retest

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SANGESLAND"A.L. Eastmond was originally called out to the site. Smell in the resturant from the oil tank in the basement.Eastmond found an open flap on the top of a 275gal? tank in the basement. Eastmond Cleaned the tank and rewelded the patch. Eastmond also said that the area was clean.8/13/2001 Sangesland went to the site and met Bonnie Weiss from Ferrantino Fuel Oil (718-832-6700) and the property owner. The building is empty except for the resturant. The upper floors are under renovation for new apartments.The tank had a cement case built around it. Upon inspection, an area of heavy black oil was coming out from under this enclosure. Sangesland said that the area must be opened up to look under the tank, if a leak existed, then the floor around the tank would need to be inspected and if cracks were found, the floor would need to be opened. Ms. Weiss suggested that the owner would probably install a new 275 gal tank elsewhere in the basement and totally remove the old tank and enclosure. Sangesland requested a reinspection when the area was cleaned. Sangesland will send a letter to Ms. Weiss with detail directions of what to do.9/6/2001 Sangesland re inspected the site today. Cement enclosure around the tank had been removed, tank was cleaned and free standing on the floor. 1" thick skim layer of cement floor had been chopped up under the tank. Cement floor under this 1" thick layer appeared to be solid and secure. Area was clean and no sign of further contamination.Spill Will Be ClosedNOTE: DEC will require follow up documentation within 3 months (by Dec. 6, 2001) that either a new oil tank was installed at this site, OR the existing tank was reinstalled and then pressure tested to confirm the tank's structural integrety. 11/19/2001 - Bonnie Weiss called to find specific details of what additional work the DEC required for the newly installed tank. DEC

ANNA'S (Continued) **S105058468**

requested a notice from the tank company describing what work they did and that the tank was tested and passed(by what method?)Tank work is being done now, Bonnie will forward this information to the DEC when it is done.

Remarks: OIL TANK LEAKING IN THE BASEMENT. THERE IS A STRONG ODOR AND IT IS VERY UNHEALTHY.

Environmental Interest/Information System

MOBIL OIL CORP SS #511 (Continued) **1000553807**

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo: Tracking of site remediation has been consolidated under spill no. 90-09804. See also spill nos. 91-05201, 91-08084, 91-08497, 95-01523, and 04-03370.7/28/1997: A stipulation agreement was executed between Mobil Oil Corporation and the Department. (Harrington)8/4/2003: This spill site has been transferred from Sigona to Harrington (central office) for management. (Sigona)7/8/2005: Sent a letter to Exxon Mobil approving the interim RAP. The interim RAP calls for the evaluation of high-vacuum dual-phase extraction. Also sent them the necessary NYCDOT road-opening permit letter for test well installation along the east side of 11th Avenue. (Harrington)2/2/2006: Sent an e-mail to Exxon Mobil approving the supplemental SI report. The high vacuum dual-phase extraction (HVDPE) feasibility study has been initiated. The FS report is due in the Spring of '06. (Harrington)4/5/2006: Sent an e-mail to Exxon Mobil

FORMER MOBIL #17-511 (Continued) **S100168138**

approving the final RAP. The RAP calls for the installation of a HVDPE system, which is scheduled to be in place by late summer. (Harrington)6/5/2006: Approved modification to the IRMs being conducted on-site (EFR events reduced from monthly to quarterly @ wells MO-2, MO-3, MW-12, and MW-14; EFRs can be eliminated @ MW-12 if an absorbent sock is installed to recover free product). Approval sent to Exxon Mobil via e-mail. (Harrington)2/14/2007: Transferred from Harrington to Milack. (Milack)5/24/2007: Remedial system is in place but still has not received necessary electrical inspection and discharge permits. (Milack)12/07: System began operating and Kleinfelder will be submitting a startup report.May 2010 - The supplemental CAP, received January 29, 2007, outlines the operation of a High Vacuum Dual Phase Extraction (HVDPE) system, as well as continued quarterly enhanced fluid recovery (EFR) events, until the system begins operation. The supplemental CAP was approved April 12, 2007. A Site Status Update report was received on August 20, 2007. The remedial system began operating the week of November 26, 2007. A Site Status Update Report (SSUR) was received February 29, 2008. A HVDPE Remediation System Start-up Report was received on March 27, 2008 and a SSUR was received on May 22, 2008. A site visit was made on July 9, 2008, and the weekly OM&M is continuing. The HVDPE system continues to operate successfully with levels in the groundwater dropping from 20 ppm levels in several wells to ppb/low ppm levels in twoyears. Based on this trend, the consultant is hopeful that the system can be shut down in 2010. The latest SSUR was issued March 25, 2010. The latest groundwater sampling was conducted in January 2010 and showed consistent results with previous rounds. Weekly OM&M of the HVDPE system continues.The HVDPE system was non-operational for much of May and early June 2010 due to access issues caused by a sidewalk replacement project. Operation was resumed 6/13/2010 and continues to date. (11/22/10)Nov. 2011 - A 9 month temporary shutdown of the on-site High Vacuum Dual Phase Extraction System (HVDPE) combined with initiating monthly Enhanced Fluid Recovery (EFR) events was approved in June 2011 and is ongoing.Dec. 2011 - DEC was informed that Groundwater and Environmental Services (GES) will be the new remedial consultant for this spill as of 1/1/12. Karen Bourque (866)839-5195 ext. 3833 is the contact person at GES.April 2012 - A reduction in the number of monitoring wells to be included in tri-annual sampling was approved.June 2012 - Results of May 2012 sampling were generally consistant with previous sampling results.

Remarks: LINE TEST ONLY, FAILED PETRO TITE, WITH A LEAK RATE OF -.26GPH, TYREE WILL EXCAVATE, ISOLATE & RETEST.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This

NYC DEPT OF SANITATION - J SCHIAVONE (Continued) **1000141017**

information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo:	10-09-09 The spill report was previously assigned to Imdadul Islam. The spill was reassigned to Alex Zhitomirsky on 10/09/09 since AZ handles the other spill at the site. AZ contacted Jane Staten URS. The spill was caused by 10,000 gal tank which failed the tightness test. The tank number is either #15 or #29. The tank probably contained heating oil. Two 10,000 gal tanks were removed in 2003 by Edward Levinson Company.I requested that URS identifies the tank location and include the tank area in their investigative plan to be submitted to DEC. AZ7-20-2010 Received a letter from URS dated July, 2010. The letter states that during the site visit URS observed that the building is still under construction. It's not feasible to install any wells. Therefore, remedial work is on hold. AZ2-16-2012 Contacted K. Shenahan (URS). DEC approved excavation in May 1999. Excavation was performed. URS requested closure in June 2009. In October 2009 DEC rejected the request since no confirmation sampling

NYC DEPT OF SANITATION - J SCHIAVONE (Continued) **1000141017**

has not been done. WP was submitted in March 2010. DEC requested to move wells where the product was previously detected. There is a new giant building at the site, so the wells are limited to the sidewalk. June 22, 2010, URS visited the site to adjust the well locations. Scaffolding was on the sidewalk and the sidewalk was not accessible. In October 2011 URS checked the status of the sidewalk and the scaffolding is gone. URS will submit a figure with the modified well locations within next two weeks. Product plume location will be indicated on the maps. AZ2-21-2012 Proposed well locations submitted to DEC and edoc'ed. AZ2-22-2012 K. Shenahan forwarded an updated version of proposed well locations. AZ3-1-2012 Reviewed and discussed a modified version of the the proposed well locations. It was decided that locations proposed in 3/10 will be actual well locations. Also, an additional well will be installed opposite WB-1 near the former fill port, if feasible. An email was received from K. Shenhan:"Alex,Thanks you for discussing the proposed field investigation URS has proposed for this site. Based on our discussions this afternoon, URS will proceed with the original well locations indicated on the attached Figure as 3/10 and not the revised locations identified as 2/12. In addition, URS will include a fifth well in the sidewalk of 56th Street on the eastern end of the site near the label "oil fill". AZ4-26-2012 An e-mail was sent to K. Shenahan and V. Brevdo:"Kevin,I am sorry, but on the plan which you have sent me I do not see the "fifth well in the sidewalk of 56th Street on the eastern end of the site near the label "oil fill" which you have mentioned in your mail.Could you clarify?Thanks,Alex"5-1-2012 An e-mail from K. Shenahan:"Alex,You are correct, the fifth well is not on Figure 2. We will add the fifth well and re-issue the report to you with the current date.Kevin J. ShanahanProject Manager

NYC DEPT OF SANITATION - J SCHIAVONE (Continued) **1000141017**

DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "ZHITOMIRSKY"10/10/95: This is additional information about material spilled from the translation of the old spill file: CONTAM. SOIL & G/W.TRANSFERRED FROM Y.KRIMGOLD.10/05/05 The facility was demolished and will undergo reconstruction. Sanitation will excavate for the basement and underground parking to about 20 feet depth. New spill was called in by Con Ed. They discovered soil heaily contaminated with gasoline in front of the facility. I notified S. Frank (LiRo). See also spill #0508045 AZ 1/17/2006 Excavation is pending. New consultants should submit their plan and timetable. AZ4/11/2006 I contacted Jane Staten (URS). The site was last time sampled in 2002. Groundwater contamination was found but not delineated. Free phase and dissolved phase up to 16, 000 ppb . Excavation is still pending. AZ9/26/2006 I contacted Jane Staten (URS). They demolished the existing facility, removed the tanks. Closure reports were never submitted by demolition contractors (EPM -environmental consultants), although heavy contamination was encountered. Jane Staten requested tank closure report from EPM. AZ1/24/2007 At the meeting with DDC/URS on January 10, 2007, the site was discussed. The facility construction is near completion. The tanks were removed. No end point samples were taken. No tank closure reports were issued. Bovis is the construction CM. URS will arrange a site visit with DOS. AZ9/25/2007 Received e-mail from Jane Staten (URS). There is no information about the area which was excavated for the construction purposes. The construction is still ongoing. I called Jane Staten. She notified me that no post-excavation samples were reported. The area is currently unaccessible. I requested that URS/DDC notify DEC when the construction ends. Excavation and end point sampling should be coordinated with NYC DOS. When the area is accessible URS should submit a sampling Plan based on the previous investigation. AZ3-17-2009 Inquired about the site status (J.Staten -URS)via e-mail. AZ10-09-09 Discussed the site with Jane Staten. Excavation was performed at the site by Bovis for solely construction purposes. No post-excavation samples were taken. Excavation was not coordinated with DDC. Environmental work/observations/sampling was not performed during the excavation. I informed Jane Staten that an investigation of soil and groundwater should be performed at the site. The investigation plan based on the results of the previous investigation and monitoring should be submitted to DEC. The area of the former free product plume and soil/groundwater contamination should be investigated. Request for closure was rejected. AZ 3-22-2010 An e-mail was sent to J. Staten (URS):"I am reviewing Field Investigation Work Plan for the above site. Unfortunately, the submitted Work Plan doesn’t contain results of the previous investigations. Please submit soil and groundwater plume maps and tables which show results of the previous investigation(s). After review of these materials, DEC will finish reviewing the proposed work plan." AZ3-23-2010 An e-mail sent to J. Staten: :"Thanks Jane.Your e-mail does help in terms of well placements. However, results of the previous investigations should be included in the work plans for future investigations. Please, resubmit the work plan for this site and include hard copies of the plume maps and tables.Contacted J. Staten." Contacted J. Staten. She informed me that according to Cal Gerson, the CM for the new construction, the interior of the building is off limits because a "pressure slab currently exists under the entire footprint of the former facility that is reflected on the LiRo drawing. A pressure slab does not exist

NYC DEPT OF SANITATION - J SCHIAVONE (Continued) **1000141017**

outboard of the footprint of the former facility (that is to say - a pressure slab does not exist under the sidewalks and under a 10FT. +/- strip between the sidewalk and the new facility)." Specifically, "the area of the former UST's has currently become a Basement level, with 24" reinforced concrete pressure slab and a Bontonite Waterproofing membrane (both of which are several feet below the water table)" which should not be penetrated. AZ5-10-2010 Reviewed Revised Field Investigation Work Plan. Contacted Kevin Shanahan (URS). Requested submittal of groundwater and soil plume maps with the locations of proposed wells.AZ5-27-2010 Contacted Don McCall (URS). Upon DEC request, he sent DEC a plan with proposed well locations (4 wells). I asked Don if it's feasible to move wells closer to the former free phase plume area and to the wells MW-2 and MW-13 where most of the dissolved phase contamination was previously encountered. AZ2-21-2012 Received the following email from K. Shenahan:"Alex,URS issued a report for this site on March 25, 2010, which discussed how the former facility was demolished and a new DOS facility was constructed. The report is attached. Also attached you will find a pdf of a memo from the construction manager indicating that the site was excavated to bedrock and that the material was transported off-site for disposal (see photograph illustrating 20 foot deep excavation). The March 2010 report contained a plan to install and sample four groundwater monitoring wells located along the sidewalk to provided sufficient data for DEC to evaluate closure of the open spill numbers. Access to the sidewalk had been blocked by scaffolding until October 2011. The attached pdf illustrates existing site conditions from Google maps.On March 27, 2010 you provided verbal comments regarding shifting one or two of the well locations closer to the area where product was detected by Liro (see attached Liro report Figure 4-3) and closer to wells MW-02 and MW-13 where high VOCs were detected prior to remedial excavation (see Liro report Figure 4-2). To address your request, we have shifted the locations as shown on the attached pdf identified as "Figure 2 - Proposed MW Locations". Also shown on this figure is the estimated groundwater flow direction to the southwest. As you will see, three of the four proposed wells are down gradient of the areas where product was detected and high VOCs in groundwater. We have evaluated the existing conditions and have located the wells at the best locations possible to facilitate drilling. Since artesian conditions exist at this site, we will install the wells in accordance with the March 25th work plan but will keep the wells relatively shallow. URS would like formal approval of the revised well locations so we can schedule the drilling and sampling." AZThanks,Kevin J. ShanahanProject Manager5-16-2012 The following e-mail was sent to K. Shenahan/M. Asbagh/V. Brevdo:"Dear Kevin, I have reviewed a Work Plan modified on May 2, 2012. The Work Plan calls for installation of five monitoring wells. The Work Plan is approved. If contamination is found in the proposed area of investigation, it should be delineated. The Responsible Party and its contractors are solely responsible for the safe execution of all invasive work performed at the site, and in particular, are responsible for identifying subsurface utilities and safeguarding the structural integrity of any excavations, buildings, utilities, and other structures both on- and off-site that may be adversely affected by the work. The Responsible Party and its contractors must obtain any local, state or federal permits or approvals that may be required to perform the work necessary to address this spill. Furthermore, the Responsible Party and its

NYC DEPT OF SANITATION - J SCHIAVONE (Continued) **1000141017**

contractors are solely responsible for the implementation of all appropriate health and safety measures during the performance of this work. Sincerely, Alexander ZhitomirskyEngineering Geologist 2NYSDEC Region 2Division of Environmental Remediation" AZ

Remarks: WHILE INSTALLING MONITORING WELLS, CONTAMINATED SOIL & G/W WERE DISCOVERED. WILL EXCAVATE CONTAMINATED SOIL- CONTINUE INVESTIGATION FOR SOURCE.

DER Facility ID: 309155
DEC Memo: Sangesland spoke to rep from Gannet Flemming - no need to send a CSL - They know the process and will submit a report as soon as the work is complete9/9/05-Vought-Spoke to Joel Rogers (Gannett Flemming 516-671-8440) and contaminated soil was removed and endpoint samples were collected. One fuel oil UST and one gasoline UST onsite. Groundwater was present in the bottom of the excavation. Samples were also collected from piping runs and remote fills. One groundwater sample was collected. Active construction going on. Endpoint samples did show TAGM exceedences. Site is DEP E site and vapor barrier will be installed. Groundwater at 12' below grade. Groundwater samples were below TOGS and therefore no passive ventilation system. Site will be excavated down to bedrock over most of site. Minor PAH exceedences attributable to fill material. One soil sample had 63000ppb napthalene. Additional soil excavation required at area of excavation. After excavation for foundation is complete sidewall samples and bottom groundwater samples will be collected. Dewatering will occur for building construction. Groundwater samples show minor PAH and MTBE exceedence. See also spills 0506800, 0507015. Two additional 550-gallon USTs discovered. DEC requires: soil endpoint samples and groundwater samples upon reaching limits of excavation for foundation.10/18/05-Vought-Site visit by Vought on 10/14/05. Onsite was Jessica Ferngrem(Gannett Fleming) and Jerome Kung (Verizon 646-483-6554). Also on site were owners of 607 West 47th Street (Felix Guralnik) See also spill #. Free product coming from under 607 West 47th Street and flowing into groundwater in excavcation of adjacent Verizon site. Site visit to 607 West 47th street showed waste oil tanks in very poor condition and numerous puddles of waste oil on garage floor. DEC required Verizon: 1)collection of one endpoint soil sample from sidwall under 607 West 47th st 2)submission of analyticals of free product sample 3)regular interrmittent sampling of dewatering effluent as remedial method 4)submission of PBS registration. NYCDEP discharge permit obtained by Verizon. Vought called Joel Rogers and left message that he will be faxed a copy of the letter. Vought also faxed copy to Ferngrem and emailed to Kung. 11/28/05-Vought-Received message from Rogers that hydraulic line ruptured. Vought returned call and line broke from construction equipment. Spill on perched water on bedrock and will be cleaned using adsorbent pads and boom. No further action on this minor spill required. 05/05/06-Vought-See also closed spill #0507015 at same location.05/17/06-Vought-Spill transferred from DEC Vought to DEC Ketani as per DEC Austin.6/22/06 - Raphael Ketani. I spoke to Ms. Jessica Ferngren ((516) 669-1504)of Gannett Fleming. She said they are almost ready to send DEC the closure report. She said that the wall of the neighboring building was waterproofed. [This spill is downgradient from a garage (605 W. 47 St.) with 2 waste oil tanks and sloppy housekeeping.]7/10/06 - Raphael Ketani. I spoke to Ms. Ferngren. She said the closure report will probably be sent in August. Right now it is being reviewed by the client.8/17/06 - Raphael Ketani. I tried to reach Ms. Ferngren, but could only leave a voice mail.9/6/06 - Raphael Ketani. Ms. Ferngren left me a message requesting my mailing address. I sent her a message back with the

VERIZON (Continued) **S107408696**

correct address.9/15/06 - Raphael Ketani. The following tanks were removed from the site: 3000 gal., 5000 gal., five 550 gal., and a 275 gal. However, there are no PBS records or registrations for the site. I finished reviewing the September 2006 Underground Storage Tank and Spill Closure Report. There were moderate to extremely high concentrations of SVOCs at some of the boring locations. Most of these locations are associated with tanks that have been removed or their piping,though a few are not.9/18/06 - Raphael Ketani. I spoke to Ms. Ferngren about the need to register the tanks and about the very high SVOC concentrations at some of the former tank locations. She said that the soils at the tank locations looked clean, but staff in her office couldn't figure out why the results were so high. She just figures there was urban fill mixed in. I told her that these high sites were at the former locations of the tanks. She said that the soil looked clean and that all of the soil was removed anyway and delivered to a facility that takes very contaminated soil. She said she will send in a PBS registration form. 9/20/06 - Raphael Ketani. Nick Lombardo of the PBS Unit came over to me to discuss the PBS registration for the site. He said that Ms. Ferngren had told him that the site is registered. He showed me a PBS registration for the neighboring property, 610-630 W. 48 Street. He said that Ms. Ferngren told him this was the same property as the new owners had combined both 617-623 and 610-630, and planned to build on both. The registration for 610-630 is #2-344818 and shows all of the tanks listed in the September 2006 Underground Storage Tank and Spill Closure Report as closed and removed, and even lists other tanks not indicated in the report for 617-623. I spoke to Ms. Ferngren and told her DEC would prefer that the form list 617-623 as this is where the majority of the tanks came from. She asked whether both addresses can be listed on the registration form. I spoke to Mr. Lombardo and he said that she should get Verizon to submit a letter to DEC requesting that both addresses be listed. I relayed the message to Ms. Ferngren. She agreed to do this.Based upon the Underground Storage Tank and Spill Closure Report and the PBS registration #2-344818, I am closing the spill case.

Groundwater was present in the bottom of the excavation. Samples were also collected from piping runs and remote fills. One groundwater sample was collected. Active construction going on. Endpoint samples did show TAGM exceedences. Site is DEP E site and vapor barrier will be installed. Groundwater at 12' below grade. Groundwater samples were below TOGS and therefore no passive ventilation system. Site will be excavated down to bedrock over most of site. Minor PAH exceedences attributable to fill material. One soil sample had 63000ppb napthalene. Additional soil excavation required at area of excavation. After excavation for foundation is complete sidewall samples and bottom groundwater samples will be collected. Dewatering will occur for building construction. Groundwater samples show minor PAH and MTBE exceedence. See also spills 0506800, 0507015. Two additional 550-gallon USTs discovered. DEC requires: soil endpoint samples and groundwater samples upon reaching limits of excavation for foundation10/13/05-Vought-Spoke to Joel Rogers and see also spill #0506652, 0506800, 0507015 and 0508375. All three spill numbers will be addressed in one report. Three spill numbers will be consolidated once bedrock is reached and dewatering begins.10/18/05-Vought-Site visit by Vought on 10/14/05. Onsite was Jessica Ferngrem(Gannett Fleming) and Jerome Kung (Verizon 646-483-6554). Also on site were

VERIZON (Continued) **S107408696**

owners of 607 West 47th Street (Felix Guralnik) See also spill #. Free product coming from under 607 West 47th Street and flowing into groundwater in excavcation of adjacent Verizon site. Site visit to 607 West 47th street showed waste oil tanks in very poor condition and numerous puddles of waste oil on garage floor. DEC required Verizon: 1)collection of one endpoint soil sample from sidewall under 607 West 47th st 2)submission of analyticals of free product sample 3)regular interrmittent sampling of dewatering effluent as remedial method 4)submission of PBS registration. NYCDEP discharge permit obtained by Verizon. Vought called Joel Rogers and left message that he will be faxed a copy of the letter. Vought also faxed copy to Ferngrem and emailed to Kung. 10/21/05-Vought-Received call from Greg Earnst (Gannett Flemming). Vought returned call and left message to return call. Vought spoke to Earnst and west side of 607 West 47th Street had product coming from under building. Vought did not require new spill number due to existing spill number 0508375. Product will be vaccumed out and underpinning will be installed. Paint on membrane will be applied to underpinning and voids will be filled with cement slurry.10/25/05-Vouight-ECO will be performing site visit to 607 West 47th Street on 10/24/05. Vought received call from Joel Rogers. Vought returned call and left message to return call. Vought received second call from Rogers. Vought returned call and spoke with Rogers.11/15/2005-Vought-Spoke with Joel Rogers and he will include tank closure report with above requirements and report will be submitted by 1/15/06. 05/05/06-Vought-This spill closed and referred to open spill #0506652 at same location.

Remarks: DURING EXCAVATION, SOIL CONTAMINATION WAS FOUND, POSSABLY BELEIVEDTO BE GASOLINE, UNKNOWN AT THIS TIME. SAMPLES WERE TAKEN

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SANGESLAND"3/21/2002 Sangesland received a message from Curt Schmidt (from ATC) (212-353-8280 ext 326). He said he sent in a report in July 2001 and would like closure on the site. Sangesland asked him to resubmit the report, which he will now do.Mr. Schmidt said he believes the tank failed a tank test, ATC did some borings around the tank in the courtyard which came back below STARS. The remote fill was replaced and the tank then passed the tank test. No contaminated soil was found.If the report submitted backs up the summary above, the spill number will be closed out.4/13/2002 Sangesland received another copy of this report. Cover letter from Curt Schmidt (ATC) dated 4/3/2002 states that the tank in question (4,000 gal - #2 oil) has been re-lined; The manway has been rebuild and the UST has passed a pressure test on Aug 10, 2001.UST Tank location is in the courtyard at the rear of the apartment building at 425 West 48th St. In June 2001, ATC advanced 5 borings to a level "just below" the bottom of the tank. 4 on each side of the tank and 1 in the presumed downgradient direction. ATC says "no physical or olfactory evidence of fuel oil was detected..... no groudwater was encountered". Samples were tested for VOC's and SVOC's (Methods 8021 & 8270). Trace levels

TERRIFIC TENEMENTS (Continued) **U001837807**

of VOC's were found, but none exceeded the TAGM 4046 Levels. Based on the sampling data presented by ATC and the documentation of the tank being rebuilt and retested, the DEC will close this spill number out.4/13/2002 - Spill Closed.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "KRIMGOLD"Contaminated soil letter sent to:Raber Enterprises LLCAttn: Marc Levine175 Canal St.New York,NY 10013Mr. Levine says a phase II investigation was done as part of a property sale. The new owner has hired Langan Engineering to remove the tank and any contaminated soil.Contact at Lang an Engineering is: Tarek Khouri 212-479-54005/6/2004 Sangesland spoke to Mr. Khouri from Langen Engineering. He confirmed that the area will be excavated and the tank removed. They will take photographs of the hole and will take endpoint samples to be tested for VOC's & Sock's. A final report will be prepared and forwarded to Jake Krimgold.5/11/04. J.Krimgold @ site. Contractor unable to remove the tank due to a structural constraints. Will excavate contaminated soil around tank and close tank in-place. Agreed that at least three post-excavation samples will be taken.J.Krimgold observed excavation and found two more UST partially filled with gasoline and water. Preliminary observation suggests that the size of tanks 1080 and 550 gal. The current owner has no knowledge of these tanks. Also no records was found in PBS DB. J.Krimgold requested immediately register all tanks at this site with PBS unit before continuation of tank closure.11/17/04. J.Krimgold has

605 WEST 47TH STREET (Continued) **S106471516**

reviewed the report dated June 28, 2004 submitted to the Department by Langan Engineering regarding the above mentioned site. Based on the information provided, the petroleum release which was on this site has been satisfactorily cleaned up and all USTs has been closed in place or removed. PBS application was filed. Therefore, no further investigation or response will be required concerning the petroleum contamination at these specific sites at this time. NFA letter.

Remarks: WILL BE REMOVING TANK AND SOIL:

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "VOUGHT"10/16/02 SA/OD TTF LETTER SENT.FILE TRANSFERRED FROM VOUGHT TO OBLIGADO1/19/06- Obligado - File review. From spill report, apparently a tank test failure for diesel tank, soil affected. From PBS, number is 2-602720. There are 2 underground storage tanks at the site. The site was inspected on 11/4/04 by DEC Rossan. A NOV letter was subsequently sent. Among violations for USTs was a failure to test tanks and unreconciled inventory records. Check tank tightness records and there is no file for this site. Call number on PBS report, spoke to the President, George Greeve at (201)529-3666 (ext 1306), said they spend $600,000 to fix the problem and to call Rich Vihonski at (201) 225-7557 who can give all neeeded information. Called Nich and left message. 2/1/06 - Obligado - received email from Austin. Apparently this site has already been referred to legal for enforcement by Tipple. The text of email read as follows:231032 Coach USA Bus Garage (Tipple)no reference spill # 520 West 46th Street, ManhattanRI end 01/31/06status Notes: RP has failed to perform the required investigation & remediaiton. Repeated attempts to obtain required documentation have been unsuccessful. Case has been referred to DEC legal for enforcement.9/18/06 - Obligado - Close and

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "DEMEO"SEE ALSO SPILL # 03300699/24/02 TJDDiesel fuel leaking from tunnel wall from an unknown source. Location of leak is western tunnel wall beneath 45th street between 10th and 11th Ave. Demeo has site meeting 9/25 to investigate spotential source.9/26/02 TJDDemeo inspected site with Patrick Teeter (Amtrack). Inspection consisted of accessing tracks at 38th Street and walking along track to impacted area north of 45th street. Track Bed is approximately 25 feet below street level. Oil was observed dripping slowly from bedrock fractures along west wall. Oil suspected to be either diesel or #2 Oil is running down from rock fracture along rock face and accumulating both on ground surface and in debris lying along the track bed. The petroleum is also impacting a catch basin adjacent to track with an unknown discharge point.Two buildings along 45th Street were inspected as potential sources. The first a bus Company (PBS 2-602720) has (2) Diesel UST's. The second an apartment building (PBS 2-605827) has (1)#2 Oil UST. No obvious sign of a problem at either location and no other obvious sources in immediate vicinity of spill. Both above facilites sent letters requiring owners to test tanks. Awaiting results. 5/8/03 TJDBus Garage passed tank test. Apt. Bldg failed test. See also spill 0206999.4/15/04 TJDInvestigation of the apartment building UST revealed they were not the source of the petroleum disharge which is impacting the Amtrak ROW. Upon completion of the investigation of 525 West 45th Street, DEC again contacted the Bus Garage (Coach USA) to inform their management additional investigation of their property was necessary. Coach USA was given the option of performing the necessary investigation with their contractor of choice or allowing a state contractor access to the property to conduct an investigation on DEC's behalf. Coach USA decided to perform the investigation themselves.Coach USA retained the services of Bristol Contracting to perform the required investigation. The initial investigation by Bristol revealed a loose pipe fitting at the bottom of the remote fill spill bucket. The two UST's at the bus garage were filled via a single remote fill. The remote fill was directly connected to the 2000 gal UST, a crossover line was connected to the 4000 gal UST. This design created significant backpressure during deliveries. Excavation in the vicinity of the remote fill revealed a large volume of contaminated soils. The contaminated soils extended to the south & east beneath the driveway area. Upon excavation of approximately 50 cubic yards of contaminated soils down to bedrock, several fractures were identified as suspected pathways for the product to migrate to the railway cut where diesel fuel was leaching out of the rockface and accumulating along the Amtrak Right Of Way. The connection between the bedrock fractures and the impact area was confirmed by several dye tests. Upon confirmation of the hydraulic connection, Coach USA was informed that the Department rrequires them to remediate all petroleum contamination both on their property and off-site on the Amtrak

COACH USA/AMTRAK TUNNEL (Continued) **S105997011**

property. A field meeting with all involved parties was held on April 1, 2004.A new spill (0330069) was reported following discovery of the contaminated soils beneath the remote fill on 2/23/04.A letter of responsibility, Stipulation Agreement and a corrective action plan was mailed to Coach USA on 4/15/04. 2/23/05 - Austin - Project reassigned from DeMeo to Tipple8/23/05 - Raphael Ketani. Case transferred to Jeff Vought.9/19/06 - Obligado - Site site was left off the original list of sites to be transferred to Obligado from Vought. Transfer from Vought to Obligado. Was previously researching case under a different spill number 0207355. Closed that spill number and consolidated with this open spill number 0206549. 04/30/07-Vought-After review of notes above including fact that Coach USA was the source as owner of remote fill that was the source of the spill, Coach entered a Stipulation Agreement under spill #0330069 this PIN closed and case referred back to DEC Obligado who reopened spill #0330069. DEC Vought, DEC Obligado, DEC Piper and DEC Urda had meeting and DEC Urda will not close case referral originally submitted by DEC Demeo until follow up is received from Obligado. Spill closed by Vought. 10/01/07-Vought-Recevied notice from AGs office that Coach payed NYS amount of 2999.86 for cost of cleanup. Costs were possibly low as per DEC Austin. Vought called DEC Demeo as per Austin to confer that only 2999.86 was incurred by state.11/27/07 - Obligado - After review of the file, this spill should be reopened because Coach USA has not provided documentation that remediation of the Amtrack right of way has been performed as per September 23, 2004 letter from Tim Demeo to Richard Vihonski. This spill number is also listed on the Stipulation Agreement, which Coach signed and agreed to remediate both spill numbers 0206549 and 0330069. This spill number is reopened.I called Richard Vihonski (201)225-7557 to get an update on Demeo's requirements. Left message to call back the DEC.11/30/07 - Obligado - Called Mr. Vihonski again. Left a message.12/12/07 - Obligado - Have not heard from Mr. Vihonski. Called again and left a message to call back DEC. As Mr. Vihonski has not been returning my calls I trided calling the Coach President - George Greeve 201)529-3666 (ext 1306). I left a message to call back the DEC.George Greeves called me back shortly after. I discussed with him the 2 spill numbers and the September 23, 2004 letter from DEC DeMeo. He asked me to fax the letter to him and he would contact the appropriate person. I faxed him the letter.2/27/08 - Obligado - Received a voice mail from Mr. Greeves. He was following up on our previous conversation. He inquired if Mr. Vilhonski had taken care of our requirements3/3/08 - Obligado - Called back Mr. Greeve. I left message saying the DEC requirements have not been met.3/26/08 - Obligado - Had meeting with Richard Vilhonski (Coach USA), Jinesh Sheth (Bristol Contracting), and Dennis Occonner (Bristol Contracting). According to Richard, a package was submitted to the DEC in response to the September 23, 2004 letter. This was submitted to Michelle Tipple after Tim DeMeo left. They said the package addressed most of these comments in the letter and they will resubmit it to me within 4 weeks. 8/19/08 - Obligado - Email from Jinesh. They will submit the report via cd.10/22/08 - Obligado - AFter review of report emailed Jinesh with following comments: "Please submit a revised and scaled Figure 2 Site Map that shows all of the following: - Entire layout of property between West 45th and 46th St, including adjacent Amtrak property. - Location of existing USTs, dispensers, lines, and fills ports.- Location of former abandoned/removed USTs- Boring/Monitoring Well locations- location/extent of surface spill on
