Amtrak property- Any other pertinent informationPlease also revise Figure 3 and Figure 4 so that the initial/final extents of excavation and soil sampling locations are overlaid on the new site map.Thank you. Please revise the figures and resubmit them to me as pdf files via email within 30 days. Please call me if you wish to discuss this matter."3/26/09 - Obligado - Still have not received revised maps. Sent email to Jinesh requiring maps within 15 days or case would be referred to legal for enforcement.6/10/09 - Obligado - Reviewed revised Maps submitted by Jinesh on 4/20/09. The maps address the above comments. After review of all documentation I called Jinesh for some follow up questions. 1) Where does the drain pipe on the amtrak property go? According to Dennis Occonor who was also on the call, those pipes were damaged and not functional. 2) Did they broom sweep and inspect the bedrock on the amtrak property for fractures or possible conduits, as they had done on the Coach USA property. They said they did and they did not find any fractures or conduits through which the product could have traveled. The bedrock was previously blasted out in order to build the tunnel and it acted as a basin to trap the product. 3) Are there walls or foundations north and west of the remote fill that would have prevented migration in those directions. According to Jinesh, yest there were building foundations to the west and north down to bedrock that prevented the movement of product in those directions. They also opened up the tank area to inspect and retrofit tanks and lines. They did not see any signs of leakage and they found no evidence of contamination. 4) Finally, I asked Jinesh to provide a photograph of the amtrak outcrop to show there is no more leakage. 6/29/09 - Obligado - Received photodocumentation of clean outcrop. AFter discussion with DEC Tibbe, sent No Further Action letter to Coach USA, cc to Jinesh.

Remarks: oil on callers property from unk source.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "DEMEO"4/15/04 TJDSee also spill #02065494/28/04 TJDReceived call from Rich Vihanski @ Coach USA requesting an extension regarding the signing of the Stipulation Agreement and Corrective Action plan dated April 15, 2004. An extension was granted until May 14, 2004 to respond.2/23/05 - Austin - transferred from DeMeo to Tipple3/25/05 - Austin - transferred from Tipple to Vought4/24/06- Transferrred to DEC Piper. Piper left message w/ Rich requesting call back and info.There is another spill at address related to this event. See spill 0206549. This spill closed.11/26/07 - Obligado - After review of the file, this spill should be reopened because Coach USA has not fulfilled all the requirements the September 23, 2004 letter from Tim Demeo regarding the Stipulation Agreement, in which Coach USA agreed to investigate and remediate spill #s0330069 and 0206459. This spill number is reopened. Notes for this spill will be entered under spill remarks for 0206459, as this is where Tim Demeo entered most of his remarks. 6/10/08 - Obligado - This spill is closed and consolidated with 0206549 as per Vadim's consolidation initiative.
Remarks:	Contaminated soil discovered. Source is from a leaking loose fitting on buried spill bucket (remote fill). Location is being investigated as source of discharge regarding DEC Spill #0206549.

ST BENEDICT MOORE CHURCH (Continued) **S105997176**

DER Facility ID: 99882
DEC Memo: Prior to Sept, 2004 data translation this spill Lead_DEC Field was "DEMEO"11/4/02 TJDLocation is a church. Site visit on 11/2/02. Petro underestimated volume of spill and impacts. Overfill of AST resulted in impacts to sidewalk from discharge from vent pipe and additional impacts to tank room floor, sump and tank enclosure. Estimated 15 gallons of fuel found in sump, pump was not connected. Floor of tank room stained and stored items were impacted by petroleum. An inspection of tank vault revealed staining up from floor approximately 6 inches, this staining and evidence of a release from weep holes in enclosure is indicative of oil leaching out of enclosure.At time of site visit Petro had two workers attempting to clean spill with absorbents. DeMeo contacted oil manager (Bob Carini) and directed him to retain the sevices of an environmental contractor as his cleanup crew would be unable to remediate impacts from overfill. Petro retained Milro Associates to perform cleanup.11/21/03 TJDSpill cleaned by Milro. No documentation submitted. Spill closed.
Remarks: TANK OVERFILL CAUSED SPILL OF MATERIAL ONTO BASEMENT FLOOR THAT RAN INTO A PIT AND ALSO A SEWER. CLEANUP CREW ENROUTE.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "VOUGHT"3/17/2003 Zhao/DO: TTF letter sent.3/14/2003-Vought-Spill transferred from Rommel to Vought. Odors reported at adjacent residence located at 12 West End Avenue (see spill #0212324). FDNY on-site and issued citation. FDNY left site by time of NYSDEC call-back.4/24/2003-Vought-Site visit by Steve Muller (516-395-5957) on 3/17/2003. No detectable odors in adjacent residences found with PID in building directly adjacent to north. Steve spoke with Rommel and Rommel requested soil borings. Steve submitted proposal to Gaseteria and will send it to NYSDEC upon their approval.1/27/2004-Vought-File review by Vought:Tank Test Failure Letter from DEC(Zhao)-3/17/03.Email from Gannett Fleming(Manfred Bohms) to DEC(Rommel) 1/16/04. Gannett Fleming performed Phase II at 2-10 West End Avenue and wishes to submit results to DEC and discuss proposed remedial measures. Contact info for Bohms is (516)671-8440x1308 and fax 516-671-3349.Phone Conversation between DEC(Vought) and Bohms-1/23/04. Removal of three active USTs and ten more USTs suspected on-site. Gasoline contaminated soil and groundwater discovered. Gaseteria no longer owner of site. New owner is 2-10 West End Avenue Association, LLC. 419 Park Avenue South NYNY Mr. Terry Soskin 212-889-3500. Site will become apartment complex via excavation to bedrock or below groundwater (whichever is encountered first). Dewatering permits will be obtained if necessary.Phase II Report-Gannett Fleming-Manfred Bohms-1/21/03. Phase II conducted at 2-14 West End Ave. Gaseteria formerly located at 2-10 West End Ave and a former auto repair garage located at 14 West End Ave at the corner of W60th St. Naeva Geophysics conducted radar survey on 12/8/03 and found three (4000-gallon) gasoline USTs, three dispenser islands and "three areas that USTs were suspected to be located south of the northernmost in-service 4000-gallon UST". The three areas are suspected of housing nine USTs and one additional UST was discovered totalling thirteen USTs. The radar survey of 14 west end Ave did not detect the presence of USTs but two 275-gallon ASTs were observed the in the basement. Nine geoprobes were performed at 2-10 West End Ave and one boring was performed at 14 West End Ave. Four groundwater samples were also collected. Soil analyticals show 73ppb benzene(SB3), 2900ppb xylene(SB3), 3000ppb MTBE(SB3), 440ppb

GASETERIA (Continued) **S106866617**

MTBE(SB5), 10000ppb xylene(SB5), 820ppb benzene(SB4), 21000ppb benzo(a)anthracene(SB1), 19000ppb benzo(a)pyrene(SB1), 14000ppb napthalene(SB7). Soil analyticals also show minor SVOC TAGM 4046 exceedances attributable to fill material. Groundwater analyticals show 230ppb benzene(SB3GW), 190ppb benzene(SB4GW), 800ppb benzene(SB5GW) and 14ppb benzene(SB6GW), 17ppb napthalene(SB3GW), 52000ppb MTBE(SB3GW), 38000ppb MTBE(SB4GW), 420ppb MTBE(SB5GW), 88ppb napthalene(SB5GW) and 19ppb MTBE(SB6GW). NYSDEC requires:1)updated PBS registration 2)Stipulation Agreement due to scheduled construction of residential building 3)delineation across West End Avenue, across 59th Street and on southwest corner of 59th Street and West End Ave 4)EPA Method 8260 and 8270 analysis due to napthalene, benzo(a)anthracene and VOCs in groundwater. Vought called Bohms to explain requirements and left message to return call to DEC. Vought sent STIP with above requirements on 1/29/2004.
1/29/2003-Vought-Spoke with Steven Muller (516-395-5957). New owner is Cambridge Company. Money held in escrow for Gaseteria to clean up site. Gannett Fleming will prepare RAP. DEP also involved in site. Gaseteria shutting down dispensers and fencing property today. Gaseteria will perform standard tank pull and remove concrete and prepare Tank Closure Report and review RAP with respect to Gaseteria property. Gaseteria will remediate groundwater within discharge limits. Amtrak tunnel adjacent to property. 2/3/04-Vought-Received call from Barbara Herr(Ten West End Development Corp. 212-453-3785) that incorrect two different spill numbers are on STIP package sent 1/28/04. Vought corrected STIP, refaxed and remailed with 3/5/04 deadline.2/9/04-Vought-Received email from Bohms. "An Amtrack rail line passes diagonally across West End Avenue from north to south between W. 58th Street and W. 60th Street". DEC's requested well locations are positioned on top of rail line. "Additionally, Amtrack and IRT yards are located further to the west".2/18/04-Vought-Received certified letter return as underliverable due to "attempted not known". Vought called Herr and left message to return call to DEC either confirming receipt or with correct address. 2/25/04-Vought-Spoke with Muller and Gannett Fleming will be preparing a RAP which includes STIP requirements. Muller will confirm that wells cannot go across street due to location of the tunnel.2/27/2004-Vought-Received signed Stipulation Agreement from Cambridge Companies (Perry Soskin) executed on behalf of 10 West End Development Corp, LLC. Stipulation was implemented by DEC Kunkel on 3/11/04. Implemented Stipulation was not sent to 10 West End Development due to expected Stipulation Agreement from Gaseteria regarding 2-10 West End Avenue. Vought wanted to ensure that Gaseteria sign Stipulation due to the majority of contamination originating from Gaseteria property. Vought received Hazardous Waste Mitigation Plan from Gannett Fleming.3/18/04-Vought-Site meeting with Vought(DEC), Muller(Applied Geosolutions), Porcelli(Gaseteria), Madigan(Gannett Fleming), Bohms(Gannett Fleming) and Soskin(Cambridge). Stipulation Agreement signed by Gaseteria after assurance by DEC that Gaseteria would only be held for contamination eminating from 2-10 West End and not 14 West End. Gaseteria will peform test pits to identify areas of soil contamination and find stockpiling sites. If contaminated soil is found in test pits it will be excavated and endpoint samples will be collected. Construction of the residence scheduled to begin in July/August 2004. Standing water present in railroad tracks containing algae inferring that the water has been there for long time and is groundwater (depth corresponds

GASETERIA (Continued) **S106866617**

approximately with expected depth to groundwater). No sheen or odor from water in railroad tracks. DEC will not require off site water samples from far side of tracks AS OF YET due to lack of hydraulic connection to site inferred by water in tracks. Meeting resulted in the following requirements: 1)EPA Method 8260/8270 due to gasoline, fuel oil, waste oil and hydrualic oil. 2)Regular intermittent (initial, during and final) sampling of dewatering water for 8260/8270 for study of groundwater contamination and remediation 3)Due to adjacent railroad tracks no offsite wells are required (dewatering samples will be used for groundwater investigation).3/25/04-Vought-Review of Hazardous Material Mitigation Plan (Gannett Fleming) dated February 2004. "This Mitigation Plan is required by the New York City Department of Planning and DEP for the redevelopment of the site". Plan included installation of monitoring wells (not feasible after rexamination of railroad tracks). Soil planned to be excavated to groundwater or bedrock (two story underground garage planned for new building). Plan also proposed installation of a foundation vapor barrier, removal of all onsite USTs, removal of contaminated soil, community air monitoring program and dewatering activities. In addition to above requirements, DEC approves workplan except for: 1)installation of monitoring wells 2)Method 8021 (DEC requires 8260). 3/25/04-Vought-Sent letter to Gaseteria and 10 West End Development approving of Mitigation Plan with additional requirements of: 1)EPA Method 8260/8270 on all samples due to gasoline, fuel oil, waste oil and hydrualic oil. 2)Regular intermittent (initial, during and final) sampling of dewatering water for 8260/8270 for study of groundwater contamination and remediation 3)Due to adjacent railroad tracks, no offsite wells are required (dewatering samples will be used for groundwater investigation) DEC requires removal from plan of: 3)installation of monitoring wells 4)Method 8021 (DEC requires 8260). Vought sent letter summarizing above on 3/25/04.4/5/04-Vought-Reviewed DRAFT mitigation plan incorporating above requirements as requested by Gannet Flemming prior to submission to DEC. Vought sent email to Bohms and Muller with edits.4/6/04-Vought-Received phone call and email from Bohms discussing edits and Mitigation Plan approved by DEC Vought. Vought sent letter to Bohms approving of plan.4/13/04-Vought-Received letter sent to Soskin returned to sender as "not deliverable as addressed". Letter was addressed as:Mr. Perry Soskin2-10 West End Associates, LLC.419 Park Avenue SouthNew York, NY 10016Fax: 212-889-5131Vought called Herr and requested call back to DEC with correct mailing address. 5/4/04-Vought-Spoke to Steve Muller and two additional USTs discovered (one 275-gallon) waste oil and one (2000-gallon) heating oil. Muller will update PBS registration. Excavation still continuing until clean soil detected. Site visit scheduled for 4/17/04. 5/13/04-Vought-Vought spoke to Muller and site visit arranged for 5/17/04 to examine limits of excavation and locations of endpoint samples.5/19/04-Vought-Performed site visit on 5/17/04. Approximately 1700 tons of impacted soil was removed. USTs removed included three (4000-gallon) gasoline USTs, fifteen (550-gallon) gasoline USTs, one (1000-gallon) fuel oil UST, one (550-gallon) waste oil UST, one (2000-gallon) fuel oil UST and one (275-gallon) waste oil UST. Building excavation will continue to sidewalk and to groundwater. Dewatering projected to begin in 9/03. UST closure report expected to be received by 7/1/04.9/16/04-Vought-Called Bohms for an update. Muller preparing draft UST Closure Report. Dewatering plan not drafted as excavation

GASETERIA (Continued) **S106866617**

for foundation has not started. DEC will be notified upon beginning excavation.10/6/04-Vought-New file review by Vought:Split Spoon Sample Analysis (Gannett Fleming)-6/14/04. "As you are aware, Gannett Fleming split two post excavation soil samples..." There are some discrepancies between our results, mainly the xylenes concentrations in the northeast sample". Applied Geosolutions sample showed 1660ppb xylene and Gannett Fleming sample showed 10700ppb xylene.Additional Soil Sampling (Gannett Fleming)-6/14/04. "...we are submitting the analytical data from additional soil sampling performed by Gannett Fleming..." "This soil sampling was conducted to confrim our belief that soils in the eastern portion of the property were cross-contaminated during soil remediation activities". "Please note that these results do not represent post-excavation conditions. Additional excavation is planned at the site".Groundwater Sample Analysis (Gannett Fleming)-6/18/04. "....Gannett Fleming collected three groundwater samples from test pits excavated by Gaseteria on June 8 and 9, 2004". Groundwater analyticals show 170ppb MTBE(NWTPGW), 360ppb benzene(SWGW), 2500ppb toluene(SWGW), 1200ppb ethylbenzene(SWGW), 5800ppb xylene(SWGW), 7200ppb MTBW(SWGW), 16ppb benzene(WGW), 15ppb toluene(WGW), 44ppb xylene(WGW) and 1100ppb MTBE(WGW).DEC requires: 1)collection of endpoint soil samples at final terminus of excavation for foundation. Vought sent email to Muller and Bohms with above requirement and requesting status of further excavation for foundation and dewatering.10/7/04-Vought-Received call from Bohms. Vought returned call and left message to return call.10/8/04-Vought-Received message from Bohms and returned call and left message.10/19/04-Vought-Site visit by Vought to witness collection of endpoint soil samples. Onsite were Gannett Fleming(Dennis), Applied Geosolutions(Muller) and Perry Soskin. Soskin requested letter from DEC stating that we were satisfied for cleanup for application for foundation permit. Soil still present in excavation (not excavated to bedrock yet) and fieldstone from former building foundations for sidewalls. Since further excavation is planned, these endpoints will not be considered. During collection of endpoint soil sample from under UST location, free product and heavy gasoline odors noted. Vought called Perry Soskin and left message in order to notify him that DEC would not produce the letter due to oustanding DEC requirements for remediation, non adherence to the CAP and possible H&S impacts to future residents.11/23/04-Vought-Reviewed Underground Storage Tank Closure Report (Applied Geolsolutions) dated 11/9/04. "The service station was comprised of three petroleum USTs in two tank cavities and three pump islands with seven dispensers". To the north of the site is an office building (to be razed for the new residential apartment tower), to the east is an automotive repair facility, to the south is a multi-level parking garage and to the southwest is an IRT building housing a power plant for the subway system, to the west is a parking lot". Sensitive receptor survey shows closest receptor as school located 500’ to the north. Bedrock encountered 5" below grade in northeast corner of the site. Wood, coal ash and slag found in the southern portion of the site. Groundwater present at 15’ below grade. Former site assessment by Gannett Fleming showed groundwater concentrations of groundwater concentrations up to 43ppb toluene, 1500ppb ethylbenzene, 9400ppb xylene and 6600ppb 1,2,4-trimethylbenzene. Tank removals included three (4000-gallon) gasoline USTs, one (550-gallon) waste oil UST, ten (550-gallon) gasoline USTs, one (1000-gallon) heating oil UST, one (275-gallon)

GASETERIA (Continued) **S106866617**

motor oil UST, and one (2000-gallon) heating oil UST. Report contains many endpoint analyticals from various eexcavation pits that were created (some of which were filled back in) however the Department is only concered with endpoint sampling from the final limits of excavation. Approximately 4042 tons of impacted soil were removed from the site. Community Air Monitoring as per DER-10 was performed during soil excavation and disposal. Report concluded that "based on the UST removal and site remediation activities, Gaseteria has adequately delineated the petroleum contamination in the onsite soils and conducted sufficient excavation to remove the petroleum contaminated soil from the site". No requirements issued as further excavation and dewatering will occur due to foundation construction.1/6/05-Vought-Spoke to Manfred and DOB will not issue permits until they receive regulatory letter. Manfred will draft a letter and send it to DEC for signature and revision.1/31/05-Vought-Reviewed manfreds draft letter and all points of letter approved by DEC in 4/7/04 approval letter of Plan. Vought called Manfred back who will call Cambridge to have them contact DEC.3/4/05-Vought-Received message from Manfred. Vought returned call and spoke to Manfred who is completing test pit report. Six test pits were installed (two on Gaseteria property). Test pits were dug to groundwater. Groundwater at 15' below grade across entire site. Bedrock at 11' on east side. Groundwater samples collected during test pit installation. In 3/04 or 4/04 general excavation will begin and contaminated soil will be segragated and disposed of accordingly. Letter referred to above on 1/6/05 will be cc'd and sent to NYCDEP.3/18/05-Vought-Received and reviewed Test Pit report (Gannett Fleming) dated 3/8/05 and received on 3/10/05. "As part of pre-construction work, Gotham Greenwich Construction (Gotham) excavated seven test pits at 2-16 West End Ave..." "During excavation petroleum contaminated soil was observed immediately above the groundwater interface and petroleum sheen on the groundwater surface in TP-1 and TP-3. Since TP-1 and TP-3 were not located on the former Gaseteria property and the contamination observed in these pits is not likely to be assoicated with NYSDEC Spill Number 0212404, Gannett Fleming notified NYSDEC and Spill number 0412188 was assigned to the property. Six groundwater samples were collected. Groundwater analyticals show 600ppb benzene(TP5), 700ppb toluene(TP5), 810ppb ethylbenzene(TP5), 2100ppb xylene(TP5), 3200ppb MTBE(TP5), 26ppb benzene(TP6), 16ppb toluene(TP6), 150ppb ethylbenzene(TP6), 310ppb xylene(TP6) and 510ppb MTBE(TP6). "Contaminated groundwater will be removed from the site as part of the dewatering system operated during foundation construction as indicated in the approved Hazardous Material Mitigation Plan".3/18/05-Letter from Gannett Fleming to NYCDEP Cabbagestalk dated 3/9/05. The remaining work to be completed is excavation of remaining contaminated soil, treatment and discharge of contaminated groundwater and installation of a vapor barrier. "Since these three items are an integral part of the construction phase of site development, a Department of Buildings permit for the construction of the building must be secured before the remaining remedial measures can be implemented. Therefore we request that you provide the necessary approval so the construction permit can be obtained".3/19/05-Vought-Received call from ASR Muller who was requesting concentration limitations for treatment. Vought gave Muller NYCDEP Nazaire to call for limits.6/3/05-Vought-Received message from Manfred Bohms (Gannett Flemming). Vought returned call and spoke to Bohms. In sidewalk in southwest corner of site a utility

GASETERIA (Continued) **S106866617**

structure was found made of bricks extending to 30' below grade with oil at bottom. Sample collected for fingerprinting. No excavation performed as of yet as piling will be driven soon. Soil to begin being removed next week. Dewatering unit will be delivered and set up next week and will be running in a few weeks and predwatering sample will be collected. Bohms will contact DEC upon obtaining dewatering permit from DEP.6/9/05-Vought-Received call from Bohms that product in sidewalk vault is dielectric fluid with no PCB content. Vought returned call and calls were placed to ConEd and will be reporting spill to hotline and no product recovery as of yet.
6/16/05-Vought-Letter from ASR Muller to DEC Vought-6/10/05. "In a correspondence dated October 15, 2004 (attached) the requirement of a vapor barrier and/or passive venting system to prevent vapor migration was added to the Stipulation Agreeement implemented by the NYSDEC on March 11, 2004. Based on the following information this additional requirement is no longer needed". Info provided: 1)basement of building will be garage and "as part of construction a ventiulation system will be installed in the basement to evacuate vehicle exhaust" 2)removal of 4042 tons of impacted soil 3)dewatering of site 4)removal of any new contaminated soil encountered during dewatering 4)installation of "structural waterproofing membrane" to prevent groundwater intrusion into the subfloors. "Therefore I kindly request that the added requirement of a Vapor Barrier of any kind be removed from the Stipulation Requirements". Vought sent letter no longer requiring installation of vapor barrier provided the installation of the vehicle exhaust system and the waterproofing membrane.6/16/05-Vought-Letter from Gannett Fleming (Bohms) to DEC Vought-6/10/05. "As requested we have prepared this letter to document the actions taken regarding the discovery of dielectric fluid in a utility vault under the sidewalk immediately southwest of 10 West End Avenue". Free product about 10" thick and new spill was called in by ConEd. Oil is "100% Feeder 51 dielectric fluid". Analytical fingerprint results included with letter.6/20/05-Vought-Received call from Steve Hicks (Gannett Fleming). Vought returned call and spoke to Hicks and WR Grace vapor barrier system is being installed. Vought faxed him copy of 6/16 letter and June 10, 2004 letter.7/19/05-Vought-Site visit by Vought with Gannet Flemming(Bohms and Hicks) and ASR Muller. Dewatering system started on 7/11/05 and initial water samples collected same date. Analyticals of groundwater still not back from lab. Sheen observed on groundwater (no free product). Dewatering system will be sampled monthly and will have 2-3 extraction points. Expected time of system operation is five months. Dewatering not taken place due to awaiting discharge permit from NYCDEP. Additional contaminated soil to be removed. No vapor complaints received to date and non-detected during site visit. DEC requires: 1)endpoint samples to be taken at terminus of excavation despite depth below groundwater. No dielectic fluid observed in excavation.9/12/05-Obligado- Spill transferred from Vought to Obligado.9/30/05- Obligado- Called Steve Muller at ASR to inquire about dewatering activities. Left message.10/3/05- Obligado - Spoke with Manfred Bohms (516) 671-8440. Said they took an soil endpoint sample, tried to call DECVought prior to sampling, but unable to reach him, so they took sample anyway. Site status - excavation, dewatering, gw sampling, is ongoing and should continue for about 2 months before foundation is laid. A letter report containing results of soil and gw sampling should be received by the department in about 3 weeks.10/4/05 - Obligado - Spoke with Steve

GASETERIA (Continued) **S106866617**

Muller, site meeting scheduled for 10/6/05 at 1000. 10/5/05- Obligado - Phone conversation with Manfred Bohms, Fleming will be onsite on 10/6/05 to take soil samples from bottom of footing excavation. Agree to meet Dennis Matigan on site.10/6/05- Obligado - Site visit with DEC Sun, Dennis Mattigan (516)578-9415 (Ganette Fleming), Muller (ASR) and Tomasello (ASR). Excavation ongoing, down to approximately 30 ft bgs beneath former gaseteria portion of site (southern half). Excavation proceeded down into bedrock, and footings will be installed into bedrock so soil samples from footing excavation could not be taken. DEC requires: Since base of excavation is in bedrock, 1) no enpoint soil samples need to be collected. 2) Collect one ground water sample from sump pit dug down into bedrock. At time of site visit, sump pit dry due to dewatering, so Fleming and ASR will each collect 1 ground water sample the following morning, when sump pit has recharged.10/24/05 - Obligado - Review closure request by ASR, based on ground water sample collected from sump pit in bedrock below limits and soil on Gaseteria half of property completely removed. Request NFA. Wait to get results from Gannete Fleming, who also collected samples and has been taking monthly ground water samples from dewatering system.10/25/05 - Obligado - Dennis Mattigan (Gannet Fleming) called from Gannet Fleming. Said they had reached the extent of excavation (approximately 35 ft bgs)in northwestern portion of the site. Did not encounter bedrock at base of this area of excavation. Told Dennis to collect two soil endpoint samples.10/26/05 - Obligado - Steve Muller called, said that they were installing a moisture barrier on the southern half of the site. 10/27/05 - Obligado - Call Dennis Matigan, inform him that DEC will visit site to see membrane installation.11/16/05 - Obligado - Received call from Dennis Matigan, he will be collecting a soil sample from below a footing in the northern portion of the site.11/29/05 - Obligado - Spoke to Manfred Bohms, said he will send GW results from dewatering tomorrow. Soil excavation almost complete. No more soil endpoint samples will be collected due to bedrock.12/7/05 - Obligado - Meeting with Gaseteria. NFA granted. Sent letter 12/8/05

DEC Memo:	2/11/05-Vought-Received message from Manfred Bohms (Gannett Fleming 516-671-8440x1308) that sheen was detected on groundwater during excavation for new foundation. See also open spill #0212404 at same location. Vought called Bohms and seven test pits were dug for geotechnical investigation. Spill at 12 and 16 west end Avenue. Petroleum contaminated soil at interface and sheen on groundwater (at 16' below grade). Area going to be excavated and dewatered via remedial plan on 0212404. Soil samples and groundwater samples were collected. Report shall be received to DEC by 3/1/05.6/7/05-Vought-Spoke to Manfred Bohms and one (550-gallon) UST was discovered. Two drums of impacted soil was removed from underneath UST and endpoint samples were collected. No PBS registration required as site is under 1100 gallons for PBS requirements. All soil will be excavated down to groundwater.9/12/05-Obligado- Spill transferred from Vought to Obligado.5/11/06 - Obligado - Called Manfred Bohms, he said closure

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "HARRINGTON"This spill site has been transferred from DEC Sigona to RemedialBureau B, on August 4, 2003.This spill site has been consolidated under Spill No. 8806783.Reassigned from O'Dowd to Sigona on 11/6/00 DEC's comments regarding a proposed Work Plan for On-Site and Off-Site Investigation by Roux Associates, dated April 30, 2003. Based on the results of our site visit on March 7, 2003, and evaluation of the proposal by Roux Associates, the DEC accepts ExxonMobil's Work Plan and Schedule to evaluate the on-site and off-site contamination at this location. Exxon-Mobil must now complete the implementation of the Work Plan according to the proposed schedule. The results of this investigation must be compiled into a Subsurface Investigation Report prepared in accordance with Section No. 3, paragraph 3.14 of the Division of Environmental Remediation's Draft DER-10 Technical Guidance for Site Investigation and Remediation, dated December 2002. A complete Remedial Investigation Report must be submitted for DEC review and approval according to the proposed implementation scheduled.

DEC Memo:	Spoke to Dr. Sandoval who represents Whitehouse - the tenant/builder/runner of future club. Swingtime is the owner of the property. According to a report written by Swingtime's consultant, American Envmtl Assessment(AEA), there was no contamination.DEC Saccacio required more work.PDM performed own investigation for Whitehouse and found contamination. Whitehouse's attorney(Michael Perle) will send DEC letter. Reassigned from Saccacio.5/9/03 Reassigned from Rommel to Harrington. 1/5/05 Reassigned from Harrington to Foley. Changed address back to 609-611 11th Avenue. Address was 561 11th Ave and listed ExxonMobil as RP. Two PBS registrations, one at each location. Appeared to have been consolidated under spill #8806783 in error. Cross-reference open

SWING TIME LLC (Continued) **S103824901**

#9501693 for 609-611 11th Ave. (KMF)From closed spill file: (KMF, 3/24/05)10/24/00 Letter from PDM Environmental Services addressed to Mr. Oscar Sandoval of The White House. PDM reviewed the American Environmental Assessment Corp Summary Report for Soil Removal. They noted that in some samples the reported values were greater than the guidance values. Also noted that some samples were contaminated and above STARS guidance values. Sample results indicate that soils beneath the 11th Avenue property line show the greatest levels in exceedance of criteria and will probably require further remediation. PDM noted complications with obtaining a certificate of occupancy until contaminants have been removed to below acceptable levels.A letter was issued by S. Saccacio on 11/22/00 which states that the spill number will not be considered for closure until additional investigation is conducted and the Dept reviews the results.See spill #s 0001837, 0001719, 9501693.

DEC Memo:	4/12/04-Vought-Spill transferred from Tibbe to Rommel as per Rommel.12/7/04 Reassigned from Rommel to Foley. Issued certified letter (Robert Gans, Swing Time LLC Corp., 1270 Saw Mill River Rd, Yonkers NY 10710) requiring site assessment for ten gas USTs removed 7/99. Report to be submitted by 3/7/05.12/21/04 Certified letter returned as attempted, unknown.12/22/04 Resent certified letter to Robert Gans (617 11th Avenue, NY NY 10036).12/27/04 Spoke to Perry Burkett(same address as R. Gans-617 11th Ave, NY NY 10036 (212-582-1951, 212-246-0856(fax)), general counsel for Robert Gans, Swingtime LLC. Will send correspondence and reports that were previously submitted to Steven Saccaccio. Stated that Saccaccio had approved remediation and subsequent construction of building currently on property.1/4/05 Received reports from P. Burkett. 1) Letter workplan dated 5/22/00.2) Letter and fax from B. Pachmohr dated 6/5/00 including field notes and proposal for an additional monitoring well.3) Fax from S. Saccacio to former tenant, Dr. Oscar Sandoval and his atty M. Perle, indicating the planned building will not interfere with the remaining spill investigation and potential remedial obligations.4) Soil Removal Summary Report from American Environmental Assessment Corp. dated 7/5/00.10 gasoline USTs had been located in the SE corner of the property. They were removed prior to the construction work and the site assessment that was performed at the time did not reveal any contamination around the tank field. American Environmental Assessment Corp.(AEAC) was contracted to further investigate. On 5/24/00, AEAC installed three test pits. Soil around the former tank field had been impacted by gasoline. Between 5/31 and 6/14/00, 860 tons of contaminated soil were removed. GW was encountered at 13’bgs. Two samples at 10’bgs showed elevated concentrations of VOCs (total BTEX at 4133ppb(E-5), and 2525ppb(E-4)). Rock was encountered at a depth of approx 6’bgs which dropped off towards the SE corner to 10-12’bgs.1/6/05 Received copy of tank removal affadavit from Petroleum Technology stating ten 550gal gas tanks were removed on 7/20/99.1/10/05 Issued letter requiring installation of three monitoring wells. Two along 11th Ave (adjacent to soil sample locations E-4 and E-5) and one along 45th St (btwn S-2 and S-3). Report due 4/15/05.See spill #s 0001837, 0001719.3/24/05 Met with M. Roux, Roux Associates. If bedrock is

609-611 11TH AVE (Continued) **S104652652**

encountered, they will core through bedrock (only at location closest to E-5, highest soil cont.). Will take soil samples at all locations(highest PID and at gw interface). GW samples will be taken if encountered before bedrock. 4/20/05 Met Roux(Marty) and ADT Drilling on-site. Refusal at 9'bgs in first boring on northside of W45th St. Second boring(northernmost) on 11th Ave had some hits on the PID up to 700ppm. Sample from 15-17'bgs was wet. ADT installed monitoring well. Third boring to be drilled later.4/28/05 Spoke to M. Roux. Report expected to be submitted by 5/20/05.6/15/05 Reveived Ltd. Subsurface Investigation Report dated 6/14/05. Attempted to install three wells. Two were successful(MW-2 and MW-3). Soil had some detections of BTEX below TAGM RSCOs. Groundwater showed lower levels of BTEX in MW-2(68ppb benzene, 4ppb toluene, 300ppb ethylbenzene, 232ppb xylenes). GW in MW-3 showed one hit for MTBE at 10ppb, with no other VOCs detected. 6/16/05 Letter sent to R. Gans requesting confirmatory GW sample be collected at end of July 2005.8/19/05 Letter from Roux Assoc. with results of gw analysis from 7/27/05. Concentrations of BTEX above GWQS in MW-2 (30ppb benzene, 240ppb ethylbenzene, 182ppb xylenes). Concentrations in MW-3 were below GWQS. This appears to be due to residual soil contamination as indicated by boring logs. Potential for exposure from soil vapor is not expected, however, according to the report, a vapor barrier had been installed beneath the building.

Remarks: ENVIRONMENTAL SITE STUDY DONE - GROUND CONTAMINATION FOUND RESULTING FROM TANK LEAKING. PROPERTY IS ABANDONED GAS STATION. 10TH AVE CORP. OWNER ISAAC GATWEN, 18 WOODHAVEN, NEW YORK CITY

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "DEMEO"PBS #2-60582710/7/2002 DeMeo responded to the site and witnessed the tank test failure.5/8/03 TJDDemeo contacted by Paul Stewart (ACT) who has been retained by Dime Savings Bank to perform an investigation at 525 W45th Street due to tank test failure. Mr. Stewart stated (4)borings were installed soil/groundwater samples taken from each location. He reports no contamination found. Mr. Stewart was not aware the Department is pursuing an enforcemnt case against registered tank owner for non-compliance. Mr. Stewart will be submitting a work plan to further investigate this property including either removing tank or sampling soils beneath tank and investigating buried fill line. See also spill 02065495/22/03 TJDSite visit. Demeo on site to witness uncovering of 2,000 UST. When manway was accessed tank contained approximately 60 gallons of #2 Fuel Oil. Tank had previously been pumped dry and cleaned by PTC. Unknown how oil reemerged into tank. A small hole was cut into tank bottom and a soil sample was collected. No visual or olfactory indicators or contamination were present in sample. Laboratory analysis subsequently revealed all petroleum constituents are below TAGM. Fill and vent lines were removed from tank and properly disposed.5/29/03 TJDSite visit. Demeo on site to witness excavation, removal and inspection of feed and return product lines. Action Environmental performing work under supervision of ACT. Product lines were excavated from tank to perimeter of tenant space. A small excavation was opened inside tenant space where product lines penetrate foundation wall (beneath slab) from boiler room. No visible or olfactory indicators of petroleum contamination was identified in area of piping runs.6/3/03 TJDClosure report submitted by ACT. NFA letter issued.Additional notes:9/24/02 Amtrack spill reported (0206549)9/28/02 Letter sent to Tokay Realty requiring tightness test10/7/02 Tightness test conducted (tank failed)10/22/02 Letter requiring retest and/or tank closure sent10/22/02 Tightness test

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SUN"11/06/01: MF-R9 OTHER SPILLS AT SITE 9314775, 8807198,CLOSED 9516313,CLOSED, 9604842, CLOSED, 9415731, CLOSED.02/18/2004- AUSTIN - REASSIGNED TO SUN10/15/04-On 10/15/04 Sun sent a letter to Michael Matri of Hess requiring by 11/30/04 to submit the following information: 1)Tank Closure Report, 2)Locations of tank and/or line test failure, 3)Subsurface investigation report, including current and historical soil and groundwater analysis, and 4)A surrounding property sketch including property layout and usage.10/18/04-On 10/15/04 Sun received from Micael Matri of Hess a Revised Spill Closure Report, prepared by EnviroTrac, dated December 2002. The report indicated that Hess removed 2,150 tons of soil from the site. Out of 20 soil samples collected following the UST removal, VOCs were detected in excess of their respective TAGM guidelines in only 3 (SP-2, SP-3 ans SP-10). Semi-VOCs were detected above their respective TAGM guidelines in only 2 of the samples (SP-14 and SP-20). Since there are no potable water supply well within a 1/4-mile radius of the site and this spill occurred prior to the removal of the 2,150 tons of soil that Hess removed during the UST removal, and only few VOC and SVOC concentrations higher than the NYSDEC standards,this spill is closed.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "RODRIGUEZ"E2MIS 15123822-NOV-2003 12:16Operator M. Bland (I.D.# 50412) while attempting to lubricate 114 Boiler feed pump could not correctly determine the level of oil in the resevoir and as a result overfilled the oil resevoir. the oil drained out of the top of the resevoir and on to the floor where it entered the floor drain. The

59TH ST STATION (Continued) **S104503157**

oil was noticed streaming into the drain collection pit as an oil and water mixture. The drain was blocked off and and spill pads were placed in the pit. No oil, or oil sheen was observed draining into the sump pit where there is a pump that sends water to an oily water seperator. Cleanup is continuing and is expected to be completed within the 2 hour constraint. Notified CIG operator S. Mckeever at 11:56 and received ERT contact at 12:11 A. Fiore.Sewer/Waterway: NOFire/Smoke: NOSubstance: Lube oilSource: 114 BFP LO ReserviorCause: Over fillPrivate Property: NOClean up completed at approximately 14:00. There was NO entry in to waterways or sewers. The spill was contained within the station.After investigation it was determined that initial report of 12 gallons spill was incorrect. It appreas the correct amount is approximately 4 gallons. Operator onlyuse four buckets (12 gallons total) to filled reservoir and oil leaked durting last bucket fill. Operator was filling reservoir with buckets through funnel. After filling with four buckets, the oil leaked because of overfilling. There is a level indication on the reservoir but it is not readable.ROOT CAUSE: Inattention to detail and unreadable level indication.CORRECTIVE ACTION: Operator was instructed regarding attention to detail and work order was entered to repair of replace level indicator.Update: 01-MAR-2005 by J. BurkeLevel sight glass on 114 BFP reservoir was replaced and the level can be easily seen in sight glass at present time. This incident is being submitted to theNYSDEC for review and closure.

Remarks: overfilled resevoir tank - clean up in progress - spill went into floor drain that leads to sump pit - spill has been contained

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "FOLEY"~~~~~~~~~~~~~~~~~~~~~~Con Ed e2mis #149200:At 00:53 it was observed by operator L. Tucker that oil was pouring out of #1 and #2 fuel oil tanks which is located inside of a moat in the fuel oil tank room. At this time fuel was being transferred from a barge on pier 98. The fuel transfer was stopped immedietly. The approx. amount of the spill is estimated to be about 200 gallons. The spill is contained in the moat in the fuel oil room. Operations personnel placed spill pillows around the spill on the floor, and also covered it with spill pads. Notification was made to CIG,EHS Manager, and Operations Manager. It was noticed by Shift Supervisor A. Rodney that 3 of the 4 tank level indicators in the control room were defective with a zero tank level indication, while the fourth tank (tank #4) was indicating 99.4%. Ops. Manager locating cleanup vendor to report to site to assist ops. personnel.Clean Harbors on site at 0530 to start setup for cleanup. All gross oil removed from top of tank; sides and floor of fuel oil room. Cleanup operations suspended for weekend. Cleanup of cosmetic residual oil to continue Monday, July 14th.Clean up completed 15-JUL-2003. Repairs to Magnetrol for High-High Alarm and Trip completed on 23-JUL-2003. Operation personnel conduct Trip testing of #6 fuel oil tanks and 500 valve. #1 tank was filled to 90%, the pump suction supply valve was closed ... the recirc valve to #1 tank open ... the recirc. valves to the other tank were closed. At 90% the Hi-level alarm went off. This practice was conducted on the remaining tanks, #2, #3 and #4. Below is the sequence:-#1 tank -- Trips 500 vlv. at 96.1%#2 tank -- Trips 500 vlv. at 97.8%#3 tank -- Trips 500 vlv. at 96.5%#4 tank -- Trips 500 vlv. at 96.4%.Note:- The actual Trip Value is 95%, but the tanks level indication is about 1.5% higher on average.
Remarks:	SPILL IS CONTAINED BY CON ED AT THIS TIME-CLEANUP TO CONTINUE.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "O'CONNELL"While maintenance crew were lowering four 55 gallon lube oil drums with lift crane, the drums broke away from the pallet and crashed to the floor. Multiple drum leakage resulted in 15 gallon spill to floor. No lube oil entered trenches and no worker was injured. The four lube oil drums were received shrink wrapped on a pallet. During the transfer from the 34' level to the basement the drums broke free of the shrink-wrap and landed on the basement floor. 15 gallons of lube oil leaked from multiple drum leaks. The oil was contained and the damaged drums placed in over pack drums. To prevent a reoccurrence of this type of spill, oil drums will be individually moved with the uses of a barrel lifter.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "RODRIGUEZ"INSPECTOR NOTES:DURING A SPDES INSPECTION, J. LAMALFA INFORMED THAT APPROXIMATELY 1 GALLON OF #6 OIL SPILLED ON THE DOCK. THE OIL SEEPED THROUGH THE DOCK OPENINGS AND WENT INTO THE WATER INSIDE THE BOOMED AREA. KEN'S MARINE ALREADY HAD CLENED THE WATER AND LEFT. CON EDISON WILL FINISH CLEANING THE OIL STAIN IN THE DOCK. CON EDISON WAS INSPECTING THE EXISITING #6 LINE ON THE DOCK TO CERTIFY IT GAS FREE FOR A FUTURE WELDING OPERATION. THE PROJECT IS TO WELD TOGETHER THE EXISITING #6 PIPELINE TO A NEW PORTION OF PIPELINE THAT WILL GO FROM THE DOCK TO INSIDE THE STATION.(ARs)11/20/2002: STATION CLEANED THE SPILL. THE CHECK VALVE IS IN PLACE AND OPERATIONAL. THE STATION IS USING THE #6 LINE AND THEY WERE PUMPING OIL DURING THE INSPECTION. THERE IS A STAIN ON THE DOCK, BUT NO FREE PRODUCT WAS VISIBLE. THE DOCK IS MADE OF WOOD AND THE STAIN WILL NOT COME OUT. (ARS)~~~~~~~~E2MIS NOTES 0206371While preparing the dock fuel oil line for cleaning by the Jet Trader, 1 gallon of No. 6 Fuel oil sprayed out of the check valve on to the dock and into the water. The Operators on the dock had prepared an area with plastic and pads to prevent oil from getting on the dock. The spray of oil went past the protected area and into boomed area around the Jet Trader.Ken's Marine was called 12:24. Ken's Marine arrived on-site with wrong boat at 13:15. Response boat arrived at 13:30. Clean up complete 15:30. Checked with ERT S. Mahoney, USCG is not responding to this spill. Released Ken's Marine after visual inspection showed no visible floating globules or visible sheen in water. Two 55 gallon drums of waste generated to be disposed of as non-hazardous waste. Investigation in progress.INVESTIGATION REPORTOn September 19, 2002, Operations was preparing to clean the dock fuel oil line in preparation for tie-in work starting September 21, 2002. Three operating mechanics were assigned to work the job. The OMA's and the Shift Supervisor discussed the operation. It appeared to have four phases:1. Removal of residual oil from the west end of the fuel oil line west of the check valve.2. Removal of residual oil from the east end of the fuel oil line east of the check valve (east & west sections separated by check valve)3. Removal of the check valve flapper by opening the top flanged cover4. Removal of the remaining oil with steam and vacuum after replacing top flange cover. There was never any written station procedure and there was no operating order. The Jet Trader was contracted to collect the residual fuel oil and

59TH ST STATION (Continued) **S104503157**

the steam/water from cleaning the 6" fuel oil line. Initially, the Jet Trader applied suction on a 3" connection on the west flange of the dock line. This removed residual oil from the check valve west of gate valve V049 to the west end of the line. A vent valve west of the check valve was throttled open to facilitate flow. The evolution was stopped after 2 hours when the tankerman on the Jet Trader felt (by hose pulsing) that they were drawing more air than residual oil. The next evolution was to remove oil from the pipe east of the check valve. The Jet Trader was repositioned and Ken's Marine was called to boom the Jet Trader. The Jet Trader's suction hose was attached to a 3/4" drain at the east end of the line. Gate valves P61 and V049 were open, the MOV Emergency Shut Down Valve was closed (this valve remained closed during all phases of this evolution) and the vent valves east and west of the check valve were throttled open. Prior to start applying vacuum, the Shift Supervisor and one of the OMA's left the dock for approximately 20 minutes to get some flexible hoses to apply steam to the line for a later stage. After 10 to 15 minutes of suction, the two OMA's dedused that because they felt suction at the vents with the vacuum in progress, the line was empty and pressure free, and that the line was clear enough to remove the cover on the check valve. The area around the check valve had plastic sheeting and pads deployed to minimize any residual oil that might spill during removal of the check valve cover and flapper. The OMA's were in the process of loosening the bolts on the check valve cover when the cover "popped" and sprayed about 1 gallon of No. 6 oil about 5 feet in a northerly direction. The oil went past the pre-deployed pads which were positioned to reach approximately 2 feet in all four directions from the check valve. The oil seeped through voids in the pier deck timbers and entered the water within the boomed area.ROOT CAUSES:1. There had been no written procedure that detailed the steps of this evolution, along with indicators that each step was successful.2. There was no proof positive that the line was pressure free.3. The OMA's did not realize that having the vent valve west of gate valve P61 open "short-circuited" the suction process and left residual oil in the section west of the vent valve. The OMAs didn't realize that suction at the two vent valves was not an indicator that the oil line was pressure free.4. A leg of oil (approx 2 feet of head) probably existed immediately east of the check valve.5. The leg of oil probably dropped, flooding the 6" suction line enabling a pressure condition at the check valveCORRECTIVE ACTION:Operations needs to develop a written procedure for this and other non-routine dock evolutions.

BROWNFIELDS:
Program: BCP
Site Code: 332564
Site Description: The Site is situated on an approximately 1.09-acre area bounded by West 61st Street to the north, West 60th Street to the south, the Track 4 area, a school, and a residential building to the east, and residential buildings, a school, and a commercial automobile parking garage to the west. The Site is located in the County of New York, New York and is identified as Block 1152 and former Lots 5, 8, 10, 11, 12, 13, part of 43, 52, 53, and 55 (current Lot 8 and part of Lot

WEST 61ST STREET SITE (Continued) **S106704107**

13) on the New York City Tax Map. The street address of this Site is 229-251 West 60th Street and 218-240 West 61st Street, New York, NY 10023.The results of the remedial investigation, conducted at the Site during 2005, indicated several areas of concern within the Site, associated with past on-site uses. Former Site uses included a gasoline station, an automobile repair shop, an iron works, and automobile parking areas. Several aboveground storage tanks (ASTs) and the likelihood of several USTs were noted during the Phase I ESA. A commercial-industrial facility located east of former Lot 13, which produced buttons and fabric, was noted in the report. Records indicated that the facility utilized two petroleum storage tanks during its operation from 1926 to 2003. Three schools and a NYC Parks Department pool and a community center are present in the surrounding neighborhood. The proposed development on the Site includes the construction of a mixed-use residential and office complex with a parking garage. The proposed project will contain a total of 384,000 gross square feet of residential space (buildings would be a 27 story tower with two lower and mid-rise components of 9 and 14 stories), totaling approximately 505 units; 31,000 gross square feet of medical office space; court yard area with tennis court and an underground garage for 282 parking spaces. The remedial program was conducted in accordance with the March 2006 Remedial Work Plan and included excavation, removal of all soil within the Site boundary to the bedrock (8-22 feet deep) and transportation and disposal at off-site approved facilities. A total of twenty-six (26) tanks, including ASTs and USTs, were encountered during demolition, excavation, and remediation activities on the Site. All twenty-six tanks encountered on-site were removed for off-site disposal/recycling. Contaminated groundwater was removed for off-site disposal. A waterproofing layer has been installed beneath the new construction. The Remedial construction was completed in November 2007. A Final Engineering Report was approved on December 21, 2007 for a Track 1 cleanup for unrestricted Site usage. Redevelopment of the Site is on-going. A Certification of Completion was issued on December 21, 2007.

Env Problem: June 2003 Phase I Environmental Assessment Report identified environmental conditions for the site and indicated evidence of up to 16 storage tanks (UST/ASTs) were present. These tanks were used for storing gasoline, fuel oils, lubricants, waste oils and other materials. These operations have resulted in environmental contamination. Remedial Investigation commenced in late summer of 2005 and was completed by January 2006. The Remedial Investigation Report (RIR) indicated the presence of seven on-site areas of concern. These areas include (1) three locations where underground storage tanks were discovered, (2) one location of elevated lead in the soil (Lot 43), (3) one location where acetone-contaminated soil (Lot 5) was detected, (4) one location of a suspected vaulted tank in a former basement, and (5) one location of petroleum-contaminated soil and groundwater. Groundwater contained benzene, two pesticides and several metals above groundwater standards. The primary contaminants and impacted media at the site include an area of petroleum-contaminated soil; historical fill containing atypical concentrations of contaminants (e.g. metals and SVOCs); and limited VOCs, pesticides and metals in groundwater. An Interim Remedial Measure (IRM) work plan was prepared in February 2006 to investigate and remove some of the areas of concerns identified in RI report. Exceedances of standards, criteria and guidance primarily include total VOCs (max: 8,900 ug/ kg), total SVOCs (max: 243,260 ug/ kg) and

WEST 61ST STREET SITE (Continued) **S106704107**

some metals (including lead (max: 2980 mg/kg), chromium (max: 278 mg/Kg), mercury (max: 2.5 mg/kg) and arsenic (max: 16.8 mg/ kg)) for soil and VOCs in groundwater (benzene at 20 ppb; toluene at 5.8 ppb, ethylbenzene at 8.3 ppb and xylene at 33 ppb) and one SVOC (naphthalene at 13 ppb), low levels of metals and low levels of two pesticides (4,4"-DDD and heptachlor epoxide). A Remedial Action Work Plan (RAWP) was prepared in April 2005 to address all contamination from this property including underground tanks and associated contaminated soils, petroleum-contaminated soils, historic fill and C & D debris. Remediation proceeded for Track 1 Cleanup standards for unrestricted usage. A total of 36,617 tons of petroleum-contaminated soil, 77 tons of characteristic hazardous waste (lead) soil, 43,961 tons of soil containing low-level contaminants, and 1,892 tons of soil containing rock and/or concrete pieces greater than 8 inches were excavated and disposed of off-site. Twenty-six (26) tanks, including ASTs and USTs, were encountered during demolition, excavation, and remediation activities on the Site. All 26 tanks were removed for off-site disposal/ recycling. Approximately 533,490 gallons of groundwater were pumped through the filter system and approximately 888,897 gallons were transported via tanker trucks for off-site disposal. All on-site sources of groundwater contamination were removed during remedial activities. The sub-grade slabs and foundation walls are waterproofed with a barrier and seal system, which also functions as a vapor barrier.All remediation is completed and a Final Engineering Report was approved on December 21, 2007.The site does not present a significant threat to the environment.

Health Problem: Volatile and semi-volatile compounds are present in soils at this site. Exposure to groundwater is not likely since the area is served by public water. The site is paved and is currently used as a parking lot, therefore current exposure to contaminated soils is unlikely. Soils will be removed and excavated to bedrock thereby removing all site-related contamiantion. Soil vapor intrusion into the proposed building will be unlikely since all contamination is being removed as part of the remedy. A soil vapor survey was conducted at the perimeter of the site to evaluate the potential for off-site receptors to be effected. Low levels of volatile organic compounds were detected, but the concentrations do not pose a health concern.

Date form received by agency: 02/27/1998
Facility name: CON ED - V 3685
Classification: Not a generator, verified

Date form received by agency: 02/26/1998
Facility name: CON ED - V 3685
Classification: Large Quantity Generator

Violation Status: No violations found

LTANKS:
Site ID: 90896
Spill Number/Closed Date: 8901904 / Not Reported
Spill Date: 5/24/1989
Spill Cause: Tank Test Failure
Spill Source: Gasoline Station
Spill Class: Known release that creates a file or hazard. DEC Response. Willing Responsible Party. Corrective action taken.
Cleanup Ceased: 4/28/2005
Cleanup Meets Standard: False
SWIS: 2401
Investigator: RVKETANI
Referred To: 032913 APPRVD 032213 PROGRESS REPORT
Reported to Dept: 5/24/1989
CID: Not reported
Water Affected: Not reported
Spill Notifier: Tank Tester
Last Inspection: 2/28/2008
Recommended Penalty: False
UST Involvement: True
Remediation Phase: 4
Date Entered In Computer: 5/25/1989
Spill Record Last Update: 3/29/2013
Spiller Name: Not reported
Spiller Company: AMOCO

DEC Memo: 3/14/03 REASSIGNED FROM SULLIVAN TO VOUGHT. 10/27/03 Also see spill # 0307900.11/25/03 Reassigned from Vought to Foley.11/25/03 Received Delta Dispenser Upgrade Report dated 11/10/03 on 11/17/03. Lab analysis of post-ex soil samples collected from beneath four

CON ED - V 3685 (Continued) **1007205266**

dispensers identified VOC concentrations in excess of TAGM 4046 soil cleanup objectives in three dispenser locations (D-1, D-2, D-3). Delta will delineate the soil impacts beneath the product dispensers. 4/19/04 Received SHAR. On 3/17/04, four borings were advanced by Geoprobe in the vicinity of the dispensers. DTW 13-20'bgs. Nine soil samples were collected at the depth interval exhibiting the highest PID reading or immediately above the water table. SB-1 (3.5-4.5'), SB-1 (17-18'), SB-2(19-20'), SB-3(2.5-3.5'), SB-3 (12-13'), SB-4(2.5-3.5'), SB-4(7-8'), SB-4(12-13'). Analysis by 8260 showed hits for VOCs above cleanup levels in five of nine soil samples in all four borings. Total BTEX conc ranged from ND (SB-1, 3.5-4.5' and SB-2, 3.5-4.5') to 1,076,900ppb in SB-4(12-13').The four borings were converted to 1" temporary wells. Four groundwater samples were collected and analyzed for VOCs. DTW 18-24'bgs. MWs were advanced to 23-26'bgs. Temporary wells were removed. No LNAPL was detected. Total BTEX ranged from 3,732ppb (MW-1) to 45,380ppb(MW-4). Total VOC range from 17,061ppb(MW-2) to 69,062ppb(MW-1). MTBE ranged from 9,050ppb(MW-4) to 64,600ppb(MW-1). 12/21/04 4Q04 report received(samples collected 11/23/04). BTEX ranged from 38ppb(MW-5) to 38810ppb(MW-4). MTBE ranged from 33ppb(MW-5) to 174000ppb(MW-1). DTW approx 12-15'bgs.6/28/04 Investigation report received. On 4/23/04, one 1" well(MW-3) was installed through existing soil boring SB-3 and one 2" well(MW-4) was installed through previously advanced soil boring SB-4. Wells were advanced to 25.5 and 26.5' respectively. GW was encountered at 17.15'bgs in MW-3 and 17'bgs in MW-4. No soil samples collected due to previous investigation.On 5/24/04, three 2" wells (MW-1, MW-2, MW-5) were installed to 24', 20', and 20' respectively. GW encountered at 11.7' and 16.8'bgs. Four soil samples were collected. Hits for VOCs in SB-5/MW-2(10-11'), SB-5/MW-2(12-13'). On 5/28/04, five GW samples were collected. GW was identified at 11'-14.5'bgs. Flow was interpreted as NW. BTEX ranged from 74ppb(MW-5) to 45550ppb(MW-4). MTBE from 19ppb(MW-5) to 192000ppb(MW-1).9/30/04 3Q04 monitoring report received. BTEX from 57ppb(MW-5) to 39150ppb(MW-4). MTBE from 17ppb(MW-5) to 164000ppb(MW-1). DTW 11-14'bgs. Need to delineate downgradient and sidegradient.3/10/05 Received 1Q05 monitoring report. BTEX ranged from 65ppb(MW-5) to 38730ppb(MW-4). MTBE from 12ppb(MW-5) to 204000ppb(MW-1).3/15/05 Issued sidewalk permit letter to install three MWs along the west sidewalk of 4th Ave.3/15/05 Stip issued. Due 4/29/05.4/21/05 Received stip signed by C. Wein on 4/19/05.4/27/05 Portfolio meeting- Vadose and saturated soil impacts at northern border and SW portion of property. PS #51 300' NW. Impacts across street(total BTEX 100ppb). Service station and taxi stand on Sanborns for property across street.4/28/05 Stip executed by T. Kunkel. An Investigation Summary report is due 6/27/05. RAP due 8/26/05.6/13/05 Received subsurface hydrocarbon assessment report dated 6/7/05. MW-6,7,8 installed off-site. Soil results show impacts at MW-7(11-12'bgs & 15-16'bgs). Adjacent to U-Haul and Taxi Stand with garage. Total BTEX in GW was 1ppb(MW-6), 272ppb(MW-7) and ND(MW-8). MTBE concentrations were 2ppb(MW-6), 3ppb(MW-7) and 13ppb(MW-8).6/24/05 Received Investigation summary report dated 6/22/05. On-site vadose zone soil impacts in and around dispensers are from historical release. Elevated MTBE concentrations in MW-1 and MW-2 may be related to more recent release. This is also supported by analysis of BTEX ratios. Off-site soil and GW impacts were detected across 4th Ave at MW-7 and MW-8, which appear to be from U-Haul or taxi stand(impacts as shallow as 11'bgs).9/6/05 Received well

CON ED - V 3685 (Continued) **1007205266**

installation report documenting installation of EW-1, MW-9 and MW-10. MPE pilot conducted 8/16/05. Pilot test feasibility report to be submitted.12/30/05 Received 3Q05 monitoring report. DTW 11.37-14.90'bgs. BTEX ranged from ND(MW-8) to 50320ppb(MW-4). MTBE ranged from 5.1ppb(MW-6) to 170000ppb(MW-1).2/23/06 Received letter from Delta requesting extension to stip and summarizing MPE pilot test results which was conducted in 8/05. Since 8/05, Delta has tried to identify an appropriate remedial alternative to address site impacts within the vadose, smear and saturated zones on-site. On 11/4/05, Delta sampled on and off-site wells for geochemical parameters and stable carbon isotope ratio analysis. Delta is currently reviewing the results as they relate to the potential use of aerobic stimulation(sparging). Request extension to submit RAP by 5/14/06.3/9/06 4Q05- DTW 11.96-14.63'bgs. BTEX ranged from ND(MW-8) to 44200ppb(MW-4). MTBE ranged from 1ppb(MW-8) to 81900ppb(MW-10).3/16/06 Met with BP and Delta. MW-6,7,8 installed in 4/05. Pilot for MPE completed in 8/05 which determined it is not an option. Geochemical sampling completed 10/05 which showed no degradation. DTW 11.5-14.5'bgs. Very high MTBE concentrations. Sensitive receptors include utility vaults along 4th Ave. Delta was planning to submit biosparge proposal. Vic Kremesec, BP, requested Delta look into something more agressive.5/9/06 Received feasibility pilot testing and analysis report for Multi-Phase Extraction and a Remedial Action Plan.6/8/2006 - Feng - project reassigned to RJFeng. (RJF)7/28/2006 - Feng - Quarterly Monitoring Report, 1Q2006, 6/6/2006, submitted by Delta. As of sampling on 3/6/2006, groundwater flows to northwest at the depth of 10.89' to 15.17' bg. 11 monitoring wells. W-1, 9,350 ppb BTEX (3,410 ppb B, 1,050 ppb T, 1,480 ppb E, 3,410 ppb X), 21,100 ppb MTBE. W-2, 2,840 ppb BTEX (1,170 ppb B, 163 ppb T, 811 ppb E, 696 ppb X), 3,330 ppb MTBE. W-3, 20,990 ppb BTEX (3,070 ppb B, 6,800 ppb T, 2,120 ppb E, 9,000 ppb X), 10,400 ppb MTBE. W-4, 38,920 ppb BTEX (4,400 ppb B, 17,300 ppb T, 3,220 ppb E, 14,000 ppb X), 33,500 ppb MTBE. W-5, 35.4 ppb BTEX, 4.6 ppb MTBE. W-6, 1.42 ppb BTEX, 4.6 ppb MTBE. W-7, 677 ppb BTEX (22.8 ppb B, 8.9 ppb T, 304 ppb E, 341 ppb X), 8.1 ppb MTBE. W-8, ND. W-9, 16,780 ppb BTEX (2,180 ppb B, 1,890 ppb T, 2,210 ppb E, 10,500 ppb X), 14,200 ppb MTBE. W-10, 17,760 ppb BTEX (3,810 ppb B, 3,180 ppb T, 2,890 ppb E, 7,880 ppb X), 44,900 ppb MTBE. EW-1, 12,180 ppb BTEX (2,110 ppb B, 1,780 ppb T, 1,940 ppb E, 6,350 ppb X), 8,260 ppb MTBE. (RJF)8/1/2006 - Feng - Remedial Action Plan, 5/8/2006, submitted by Delta Environmental. Delta proposed MultiPhase Extraction System to be installed to address FP, soil vapor and gw contamination. Delta conducted pilot test twice. The 1st time it was concluded that "The results of this MPE pilot event conflicted with the expected response from the site's lithology". During the 2nd pilot test, 5 air samples collected at specific intervals to quantify specific vapor VOC concentration being removed. The recovery rates are 0.19 lb/hr BTEX, 0.091 lbs/hr MTBE, 4.89 lbs/hr TPH. For the groundwater drawdown reading, W-9 at 0.28' which located 5 feet away from EW-1. Delta explained that "The limited groundwater drawdown ROI from extraction well EW-1 is likely due to the more transmissive subsurface soils which allow more significant groundwater recharge into the cone of depression generated by MPE operation at the extraction well EW-1". The system components included 4 extraction wells, phase separator, liquid ring pump, system control panel, for vapor and liquid treatment are being designed. System flow chart is provided. By running the MPE, there is better hydraulic control and source

CON ED - V 3685 (Continued) **1007205266**

removal. RAP is approved conditionally: 1) add the air exhaust in the system flow chart. 2) reinstall the MW-1, MW-3 and MW-4 due to their screen interval starts at the water table or below the water table. 3) Investigate the impact to the subway tunnel right next to the station (N, R and F trains run along 4th Ave). (RJF)8/2/2006 - Feng - Approval of MPE letter sent to BP and cc to Delta. (RJF)9/26/2006 - Feng - Quarterly Monitoring Report, 2Q2006, 9/7/2006, by Delta. Sampled and monitored on 6/19/2006. DTW 10.60' to 14.42' bg, flows to northwest. 10 of 11 monitoring wells were sampled. MW-2 was not accessible. MW-1, 8,012 ppb BTEX, 28,200 ppb MTBE. MW-3, 16,430 ppb BTEX, 8,540 ppb MTBE. MW-4, 37,250 ppb BTEX, 32,400 ppb MTBE. MW-5, 59.1 ppb BTEX, 5.4 ppb MTBE. MW-6, 0.25 ppb BTEX, 2.8 ppb MTBE. MW-7, 569 ppb BTEX, 6.1 ppb MTBE. MW-8, BTEX ND, 0.71 ppb MTBE. MW-9, 10,688 ppb BTEX, 4,620 ppb MTBE. MW-10, 21,300 ppb BTEX, 63,500 ppb MTBE. EW-1, 8,055 ppb BTEX, 5,250 ppb MTBE. (RJF) 9/28/2006 - Feng - Portfolio meeting with BP and Delta. Plan changed for this site. On 8/2006, Delta had the plan in place for redevelopment and construction of high rise building. There will be multi-story basement, USTs will be pulled and additional soil will be removed. Construction schedule will be confirmed and remedial plan will start from the groundwater quality after tanks removal. (RJF)3/6/3007 - Feng - 3Q2006, 12/21/2006. Groundwater sampled and gauged 9/13/2006. 11 monitoring wells were sampled. DTW 10.68' to 14.36' bg. Flows northwest. LNAPL in MW-9 (0.12'). MW-1, 9,350 ppb BTEX, 21,100 ppb MTBE. MW-2, 2,840 ppb BTEX, 3,330 ppb MTBE. MW-3, 20,990 ppb BTEX, 10,400 ppb MTBE. MW-4, 38,920 ppb BTEX, 33,500 ppb MTBE. MW-5, 35.4 ppb BTEX, 4.6 ppb MTBE. MW-6, 1.42 ppb BTEX, 4.6 ppb MTBE. MW-7, 677 ppb BTEX, 8.1 ppb MTBE. MW-8, ND. MW-9, 16,780 ppb BTEX, 14,200 ppb MTBE. MW-10, 17,760 ppb BTEX, 44,900 ppb MTBE. EW-1, 12,180 ppb BTEX, 8,260 ppb MTBE. Email Delta for status on tank pull, site development and RAP. (RJF)3/6/3007 - Feng - Updates from D. Greffenius (Delta), the USTs, piping, and dispenser removals will begin on Monday, March 12, 2007. Alvin Petroleum is the contractor. 3/6/2007 - Feng - email from D. Taylor (Delta), USTs will be removed and endpoint samples will be taken and Closure report will be submitted. Delta are currently in touch with the site owner who hasn't yet provided the development schedule. (RJF)7/24/2007 - Feng - 4Q2006, 4/30/2007. Groundwater sampled 12/7/2006. All 11 monitoring wells were sampled. DTW 10.42' to 14.17' bg. Flows to northwest. No LNAPL. MW-1, 7,750 ppb BTEX, 9,800 ppb MTBE. MW-2, 2,754 ppb BTEX, 1,340 ppb MTBE. MW-3, 10,370 ppb BTEX, 5,350 ppb MTBE. MW-4, 31,030 ppb BTEX, 14,300 ppb MTBE. MW-5, 47.7 ppb BTEX, 4.4 ppb MTBE. MW-6, 1.94 ppb BTEX, 4 ppb MTBE. MW-7, 650 ppb BTEX, 4.7 ppb MTBE. MW-8, BTEX ND, <1 ppb MTBE. MW-9, 9,510 ppb BTEX, 3,630 ppb MTBE. MW-10, 17,180 ppb BTEX, 15,900 ppb MTBE. EW-1, 9,850 ppb BTEX, 3,640 ppb MTBE. (RJF)7/27/2007 - Feng - 1Q2007, 5/7/2007. Groundwater sampled 3/7/2007. 9/11 monitoring wells were sampled. DTW 11.51' to 14.6' bg. Flows to north-northwest. No LNAPL. MW-1, 6,936 ppb BTEX, 4,930 ppb MTBE. MW-2, 2,820 ppb BTEX, 632 ppb MTBE. MW-3, not accessible. MW-4, 40,800 ppb BTEX, 34,800 ppb MTBE. MW-5, well not located. MW-6, ND. MW-7, 468 ppb BTEX, 3.1 ppb MTBE. MW-8, ND. MW-9, 9,160 ppb BTEX, 2,230 ppb MTBE. MW-10, 24,490 ppb BTEX, 7,960 ppb MTBE. EW-1, 10,430 ppb BTEX, 2,460 ppb MTBE. (RJF)7/31/2007 - Feng - Underground Storage Tank Excavation Assessment Report, 4/26/2007, by Delta. Between 3/12/2007 and 3/15/2007, 4 (4,000-gallon) double-walled steel gasoline USTs and 1 (4,000-gallon) double walled steel abandoned UST from a single tank cavity on the central portion of the site were excavated. The

CON ED - V 3685 (Continued) **1007205266**

abandoned UST was filled with concrete slurry. Upon excavation, the tanks were observed to be in good condition with no visible holes or areas of pitting. Between 3/16/2007 to 3/20/2007, 4 pump island dispensers and the associated product piping were excavated and removed. On 3/12/2007, 1 hydraulic lift was removed. 25 over-excavation soil samples were collected. High contamination detected in soil samples. For USTs excavation, the total BTEX range from ND (SW-17) to 1,796,700 ug/kg in SW-5 (9'), the total VOCs ranged from 205 ug/kg in SW-14 (9') to 2,828,170 ug/kg in SW-5 (9'). For the pump islands and piping excavation, total BTEX concentration ranged from ND in B-13 (12-12.5') to 327,700 ug/kg in B-2 (12-12.5'), the total VOCs concentration ranged from ND in B-3 to 659,890 ug/kg in B2 (12-12.5'). For the hydraulic lift excavation, no SVOCs exceedance. Groundwater encountered at a depth of 13' bg. 1 groundwater sample was taken from MW-4, 40,800 ppb ug/L BTEX, 34,800 ug/L MTBE. On 3/28-29/2007, 795.24 tons of soil was generated during the over excavation activities. The soil was transported an disposed at the Clean Earth of Philadelphia (CEP). The excavations were backfilled with the Certified Clean Fill. 8/1/2007 - Feng - Letter to Kevin Endriss (BP) requiring RAP and the construction details. Due 10/1/2007. (RJF)10/10/2007 - Feng - Portfolio meeting with BP and Delta. Potentially developing the site. Tanks closure done and soil over-excavated. Drill at the side near the subway to inspect for impact on the subway tunnel. The new development may need to excavate down to 30 feet bg. Development schedule is unknown at this point. Delta will submit a work plan for proposing MPE events on 2" wells for short term remediation. (RJF)12/10/2007 - Feng - Call from potential buyer and inquired about the site status. DEC stated the requirement of gw and soil remediation, plus the soil vapor mitigation. Buying is in process. (RJF)1/11/2008 - Feng - Reviewed various documents submitted by HydroTech. 1) Phase I Environmental Site Assessment Report, dated 10/12/2007. Some Recognized Environmental Concerns were identified: the "E" Designation listing of the site for HAZMAT; historical utilization of the site as an auto repair facility and a gasoline station; presence of an open NYSDEC spill at the site; presence of elevated levels of VOCs in the soil and groundwater at the site at concentrations exceeding regulatory standards; inconsistent PBS information. 2) Investigation Work Plan, dated 11/27/2007. Investigation were proposed to be conducted in addressing the "E" Designation. HydroTech proposed GPR Survey to scan for any subsurface anomalies such as unknown tanks; to install 12 soil borings and 2 soil samples will be taken from each soil boring; and 3 groundwater probes will be installed for groundwater sampling. Site plan with proposed soil boring location is provided.3) Site Investigation Report, dated 12/20/2007. The GPR Survey did not identify any significant anomalies. Gasoline contaminated soil is present in the shallow soil in the northern and northwestern portions of the site. The gasoline contamination extends vertically to the deeper depths of the soil and horizontally to the northwestern boundary and western portion of the site. Soil samples collected from HTE-SP-2, 662,600 ppb VOCs at 2'-4', 934,900 ppb VOCs at 10'-12'. Groundwater was encountered at 12 feet bg and flows to northwest. The compounds detected in the groundwater plume are mainly gasoline compounds, range ND to 79,300 ug/L.4) Remedial Action Plan, 12/14/2007. HydroTech proposed to have 1) soil excavation, down to 12'; 2) installation vapor barrier and sub-slab venting system; 3) RAP for groundwater will be submitted to NYSDEC. 5) Floor Plans for

CON ED - V 3685 (Continued) **1007205266**

the new building. The new building will be occupied the whole site. Called Yash Saha (HydroTech). The excavation will cover the whole site and down to 12'-14', no dewatering is planned. DEC required the vapor barrier and sub-slab venting system design, groundwater remediation. HydorTech will submit a RAP including the soil excavation, groundwater remediation, and soil vapor mitigation shortly. (RJF)2/7/2008 - Feng - Reviewed the Revised RAP, 1/31/2008, by HydroTech. HydroTech proposed: 1) soil excavation; 2) installation of vapor barrier and sub-slab venting system; 3) RegenOx and ORC injections for groundwater remediation. Reveiwed also the 3Q2007 quarterly report. During the tank excavation activities in 3/2007, monitoring wells MW-1, MW-5, MW-9 and EW-1 were destroyed. 7/11 wells were sampled. BTEX range 73 ppb (MW-6) to 15,260 ppb (MW-4). MTBE range 18 ppb (MW-6) to 47,200 ppb (MW-4). Emailed HydroTech the comments and questions. (RJF)2/15/2008 - Feng - Stipulation Agreement to Katan Group. Due back 3/7/2008. (RJF)2/27/2008 - Feng - Received signed Stipulation Agreement. Sent for RD's signature. (RJF)3/3/2008 - Feng - Reviewed the Revised RAP, 2/13/2008, by HydroTech. Addressed the comments provided on 2/7/2008. Approval letter to Katan Group and cc to HydroTech. DEC require the vapor barrier to be extended vertically to the surface grade through the foundation walls and more RegenOx injection points to be installed. Revised the vapor barrier design and the injection diagram will be submitted within 10 days. (RJF)3/7/2008 - Feng - Spoke to D. Greffenius (Delta). BP will also oversee the remediation progress occuring onsite. An addendum letter/plan will be submitted for post-excavation sampling, dewatering plan in case dewatering is needed, and monitoring plan after the construction. BP will still continue to comply with the Stipulation between BP and DEC. (RJF)3/13/2008 - Feng - Stipulation Agreement executed 2/28/2008. (RJF)4/17/2008 - Feng - Email to HydroTech regarding the notification of chemox injection to EPA UIC program. HydroTech contacted EPA and it may take 30 days to have EPA review the details of the injections. Letter for offsite soil vapor point to HydroTech. 4/18/2008 - Feng - Call from HydroTech (Yash). HydroTech will inject the ORC while installing the soil vapor points. ORC will be injected at the sidewalk across the 4th Ave and some onsite injection points. (RJF)4/24/2008 - Feng - email from Yash Saha (HydroTech). HydroTech has finished the onsite ORC injection and the soil gas implants offsite. (RJF)5/1/2008 - Feng - Site visit. Met with Carlos Quinonez from HydroTech. The tech team was late. The work will be rescheduled. 5/2/2008 - Feng - Site visit and met with Yash Saha. Started RegenOx injection using GeoProbe. The intended injection points were marked. It will be drilled down to 25 feet and the RegenOx will be injected into the 25 feet to 16 feet. Planned to finish 10 point today. Offsite soil vapor sampling also ongoing. According to Yash, there will be some dewatering activities along with the development. Dewatering water will need to be treated. Met with D. Greffenius (Delta) in DEC office. Received the IRAP. (RJF)5/9/2008 - Feng - cc-d the EPA Underground Injection Control section's letter to Katan group for authorization to inject RegenOx and ORC. (RJF)6/12/2008 - Feng - Called from Yash (HydroTech). All the RegenOx injections are completed at this time. They started the site excavation on 6/4/2008, so far at 8 feet bg, and had some foundation pillars installed. The elevator shaft part has not worked on yet. At this time, no work on site, but may excavate deeper later on. DEC still requires groundwater samples to confirm the effectiveness of the RegenOx, taken gw samples from the previous

CON ED - V 3685 (Continued) **1007205266**

baseline sampling points. 6/16/2008 - Feng - 4Q2008, 3/18/2008, by Delta. The monitoring well network was gauged and sampled on 1/17/2008. 7 wells. DTW 11.01' to 14.88' bg. Flows to northwest. BTEX range ND to 18,500 ppb (MW-10). MTBE range ND to 21,000 ppb (MW-4). 6/18/2008 - Feng - Portfolio meeting with BP and Delta. In 6/2008, soil removal is about 4,600 tons. Delta is submitting the final version of IRAP. The exhaust blowers planned for building's lower parking levels will control vapors. No sub slab venting system might be installed since the basement is so close to water table. Conference call with BP/Delta, Katan/HydroTech will be scheduled. (RJF)7/28/2008 - Conference call with Delta (D. Greffenius and G. Hinshalwood) and HydroTech (Rachel). Delta and HydroTech will be sending the brief summary of the site status. (RJF)9/17/2008 - Vapor complaint from the resident across the street. DEC has contacted and required the developer (Perry Soskin from Katan Group) and the RP (BP) to immediately mitigate the vapor by today. Mr. Soskin from Katan Group and David Greffenius from Delta called back. Delta and EnviroTrac will be onsite and lay the plastic sheeting on the area today. They will there around 4:30pm. Tomorrow they will cover with a few loads of fills and more plastic sheeting on top of the fills if necessary. Called the resident David Simonoff and informed him that the responsible party will be onsite start taking of the odor today and DEC will continue to monitor the situation. (RJF)9/17/2008 - Site visit and met with Delta and EnviroTrac. The north portion of property near the 5th Street is filled with water, half foot to one foot deep. Delta and EnviroTrac lay the plastic sheeting on the waterly area with some product, next to 4th Ave and east portion. A vac truck will be mobilized tomorrow morning and remove the water before the backfills. (RJF)10/16/2008 - Letter to Katan Group and BP requiring the developer/RP to submit a Revised RAP which include monitoring wells installation around the property to access the current and during construction groundwater condition, dewatering plan, post construction remediation plan if necessary, and post construction groundwater monitoring plan. Revised RAP due 11/17/2008. The Department notifies the city agencies, DOB, DEP, and DOH on the site status and its intended development. (RJF)10/29/2008 - 1Q2008, 7/25/2008, by Delta. Vacant. The monitoring well network was gauged and sampled on 3/6/2008. During tank excavation activities in 3/2007, MW-1, MW-5, MW-9, and EW-1 were destroyed. Due to construction onsite during first quarter 2008, all onsite wells are covered with soil and gravel and are suspected to be destroyed. 3 were were gauged (offsite wells). No LNAPL. DTW 14.04' to 14.78' bg. Flows to northwest. 3 were sampled. BTEX range ND to 407 ug/L (MW-7). MTBE range ND to 2.8 ug/L (MW-6). 2Q2008, 9/29/2008, by Delta. Vacant. The monitoring wells were gauged and sampled 6/30/2008. 3 offsite wells were gauged. No LNApL. DTW 13.48' to 14.12' bg. flows to northwest. 3 wells were sampled. BTEX range ND to 486 ug/L (MW-7). MTBE range ND to 1.9 ug/L (MW-6). (RJF)11/10/2008 - Vapor complaint received from resident adjacent to the site. Visited the site, no access because the site was locked. Walked around the site and did not observe odor. No PID reading. Water retained in the open excavation again. (RJF)11/10/2008 - Email to Bill Bogdon approving the 60 days extension for RAP. (RJF)11/12/2008 - Delta and EnviroTrac were onsite to mitigate the vapor. A vac truck was mobilized and vac out the product in the property line area and water. Delta and EnviroTrac will then cover the area with product and rest of the water. They will come back tomorrow to see if water level rise again. Soil backfill may be done

CON ED - V 3685 (Continued) **1007205266**

if necessary. (RJF)12/10/2008 - Email from David Greffenius (Delta)"Please note that Delta and EnviroTrac, on behalf of Atlantic Richfield,will be transporting additional backfill to the 363 4th Avenue, Brooklynsite this Friday, December 12, 2008, in order to fill-in the remainingstanding (ground) water at this site for the purpose of preventinganother vapor complaint by the residents in this neighborhood. Our plan will be identical to our last effort: we will cover thestanding water with plastic (where it is safe to do so), and then coverthe plastic/water with between 4 and 6 loads of recycled concreteaggregate (RCA) backfill."12/17/2008 - Spoke with David Greffenius (Delta). The excavation where been with water is backfilled. The product seems coming back again. Might need to investigate the adjacent parking lot. (RJF)12/18/2008 - Visited the site and met with David Greffenius. The site is backfilled in most of the area with water. Some water is still retained near the back apartment building. No product was seen this time. David will stop by regularly to check if there is any recharge of the product. SanBorn maps may be reviewed for the parking lot next door. (RJF)1/20/2009 - Met with Domenick Tonacchia (Tona Development), Bill Bogdon (Tona Development), Kevin Kleaka (Impact Environmental), and phone conference with David Greffenius (Delta). There will no dewatering. The building will be covered the entire site with cellar, no subcellar. There will be changes for the new building since they are trying to avoid dewatering process. DEC required an investigation work plan for both onsite and offsite by 2/2009. (RJF)3/20/2009 - Reviewed Investigation Work Plan, dated 3/3/2009, by Delta. Delta proposes to install 7 monitoring wells at the sidewalks around the perimeter of the site. Work to be scheduled and RI report to be due within 90 days, 6/19/2009. Work Plan is approved. Letter to BP and cc to Delta. (RJF) 3/23/2009 - Reviewed the Investigation Work Plan, dated 2/2009, by Leggette, Brashears & Graham, Inc (LBG). LBG proposes to install 4 monitoring wells onsite within the perimeter. Comments to LBG and Tona Development via email. see comments in eDoc. (RJF)3/24/2009 - Reviewed LBG's responses to the comments on the IWP, uploaded in eDocs. Additional comments on the responses were sent to LBG and Tona Development, in eDocs. (RJF)4/3/2009 - Reviewed the Updated IWP, via email on 3/25/2009, by LBG. Previous comments are addressed. Work plan to be approved. Letter to Tona Development and LBG. 4/3/2009 - Conference call with BP, Delta, Tona Development and LBG. The offsite wells installation will be started within 2 weeks. The onstie will be within 1 week. Tona Development will advance some test pits to verify the real water table and will notify BP 2 days in advace so BP could send a field technician to the site. Changes to the development plan will be made, the basement slab will be above water table. DEC require the RAP should include the vapor barrier and SSDS. Stipulation agreement will be sent to Tona Development. (RJF)4/6/2009 - Stipulation Agreement to 267 Sixth Street, LLC. eDocs. (RJF)4/28/2009 - Conference call with Tona Development and Delta. The onsite wells are installed and the report will be sent to DEC and Delta. Sewer line is identified beneath the sidewalk. A Con Ed oil line is also identified between the sidewalk and the site and might be extented into the site. Hand clearance will be made during the installation of the offsite wells. The test pits were advanced down to 9-10 feet below current grade, and found groundwater at 5 feet in one of them. Construction excavation will be above/at water table. Tona will be moving the soil around this week to make the ramp for the machines entrance. A plan to suppress the possible odor shall

CON ED - V 3685 (Continued) **1007205266**

be in place before the excavation. And soil shall be tested for disposal and this enable the soil to be disposed immediated when being generated. Delta will review the Tona's recent investigation report to come up the IRAP, remedy to be proposed depend on the current site condition, soil and groundwater residual. Next updates call will be held upon the submission of IRAP. (RJF) 7/7/2009 - Reviewed Subsurface Investigation Report, dated 5/13/2009, by Leggette, Brashears & Graham, Inc. On April 9, 2009, the groundwater monitoring wells were installed onsite. Soil samples were collected continuously through the boring from the excavation grade to approximately 15 feet below the excavation grade. The final boring depth is approximately 20 feet below the historical grade of the site. The wells were surveyed. DTW 4.54' to 10.55'. no product was encountered, but film was observed. Soil samples run for VOCs and SVOCs. VOCs and SVOCs exceedances were detected, unit in ug/kg. MW-21, 10-15 feet, 920 benzene, 770 toluene, 30,000 ethylbenzene, 22,700 xylenes. MW-22, 5-10 feet, 6,200 benzene, 100,000 toluene,, 120,000 ethylbenzene, 400,000 xylene, 1,100 MTBE.MW-25, 10-15 feet, 1,500 benzene, 11,000 toluene, 43,000 ethylbenzene, 183,000 xylene. Groundwater samples were run for VOCs and SVOCs. Exceedances were detected, unit in ug/L. MW-21, 360 benzene, 300 toluene, 1,300 ethylbenzene, 1,480 xylene, 610 MTBE.MW-22, 230 benzene, 3,700 toluene, 2,300 ethylbenzene, 7,900 xylene, 28 MTBE. MW-25, 1,200 benzene, 620 toluene, 3,500 ethylbenzene, 6,200 xylene, 1,100 MTBE. And SVOCs were also detected in these wells. Compared to the historical soil and groundwater concentration levels, data show down trend for most of the wells. The data gained from this investigation will be used in preparing of the IRAP. Email BP and Delta for the status of the IRAP. (RJF)7/14/2009 - Conference call with Tona Development, BP and Delta. Delta is putting together the LBG's report data and the new building plan, the IRAP will be submitted next week. Delta is also going through the MTA permitting process to have the wells installed at the sidewalk along 4th Ave. There are probably 3-4 feet of soil to be removed, no dewatering. Film = sheet in LBG's report. DEC required there are shall be wells being able to monitor the effectiveness of Delta's proposed remedy. BP will gauge and sample the onsite wells after the perimeter wells are in. (RJF)1/4/2010 - Reviewed Work Plan for Offsite Monitoring Wells Abandonment, dated October 12, 2009, by Delta. Delta will abandon the three monitoring wells across 4th Ave, MW-6, MW-7 and MW-8. (RJF)1/12/2010 - Reviewed Subsurface Hydrocarbon Assessment Report Addendum, dated October 29, 2009, by Delta. On June 19, 2009, EnviroTrac, on behalf of Atlantic Richfield and under the direction of Delta, installed one permanent two-inch monitoring well (MW-13) at the northeast sidewalk of 6th Street using Geoprobe 6610 hollow-stem auger drill rig with direct push, macro-core sampling capability. MW-13 was drilled to 18 feet and groundwater was encountered at 12 feet. 2 soil samples were collected. MW-13 (11.5-12'), VOCs ND. MW-13 (19.5-20'), VOCs ND. On September 21, 2009, MW-13 as well as the monitoring wells onsite MW-20, MW-21, MW-22, MW-23, MW-24 and MW-15 were gauged and sampled. DTW 6.31' to 12.63' bg. NO LNAPL. unit in ug/L. MW-13, ND. MW-20, 7.6 benzene, 26 MTBE, 6 isopropylbenzene, 9.4 n-propylbenzene, 61 total VOCs. MW-21, 350 benzene, 290 toluene, 1,250 ethylbenzene, 860 xylene, 2,750 BTEX, 430 MTBE, 34 n-butylbenzene, 18 sec-butylbenzene, 87 isopropylbenzene, 10 p-isopropylbenzene, 520 naphthalene, 240 n-propylbenzene, 590 1,2,4-trimethylbenzene, 140 1,3,5-trimethylbenzene, 4,819 total VOCs.

CON ED - V 3685 (Continued) **1007205266**

MW-22, 140 benzene, 810 toluene, 1,450 ethylbenzene, 420 xylene, 2,820 BTEX, 76 MTBE, 11 n-butylbenzene, 32 isopropylbenzene, 7.1 p-isopropylbenzene, 260 naphthalene, 60 n-propylbenzene, 250 1,2,4-trimethylbenzene, 100 1,3,5-trimethylbenzene, 3,621 total VOCs. MW-23, ND. MW-24, 21 MTBE, 27 total VOCs. MW-25, 1,100 benzene, 440 toluene, 2,790 ethylbenzene, 2,600 xylene, 6,930 BTEX, 390 MTBE, 25 n-butylbenzene, 15J sec-butylbenzene, 170 isopropylbenzene, 14J p-isopropylbenzene, 280 naphthalene, 300 n-propylbenzene, 830 1,2,4-trimethylbenzene, 400 1,3,5-trimethylbenzene, 9,354 total VOCs.Off-site Monitoring Well Abandonment Report, dated December 30, 2009, by Delta. On October 21, 2009, EnviroTrac, on behalf of Atlantic Richfield, abandoned offsite wells MW-6, MW-7 and MW-8 by 1) removing the bolt-down cover and riser cap from each well; 2) tremmie-filling each well screen and riser pipe with Portland cement/bentonite slurry from the bottom of the well to 5 feet bg using a grout pump; and 3) filling the top 5 feet of riser pipe and the flush-mount cover of the each well with Portland cement to the groundwater surface. (RJF)3/10/2010 - Neil Steven (646-542-4312) from Law Enforcement Region 2 called. Odor complaint from the residents. He went to the site yesterday, there was strong odor and dark product. Email to Nick Onufrak (BP), Bill Bogdon (Tona Development) and David Greffenius (Delta)."Bill and Nick,DEC received a odor complaint from the nearby residents for this site. Our ECO went to the site yesterday and he said there was strong odor and dark product was witnessed. You MUST send someone out there TODAY, to take pictures, sample the product, remove the product and mitigate the odor. If nobody is there today, we will send contractor out tomorrow and bill everybody. " Called and spoke with Nick Onufrak. He will call EnviroTrac and see what they can do, and give us an update by the end of today. Call Domenick (Tona Construction), he will send out someone to check out. Forwarded him the email since Bill is no longer with Tona. (RJF)3/10/2010 - email from Gordon Hinshalwood (Delta). "We investigated SS 13397 today in response to your email below. Some soil staining was identified in the rear area of the site, but free-phase NAPL was not identified on the standing water in the excavation, nor were hydrocarbon odors identified.We plan on delivering a frac tank to the property tomorrow afternoon and pumping the standing water out of the excavation (the volume of water is reportedly too large for a vac truck to handle). We will store the water in the tank on-site until we can arrange for it’s proper disposal. We also intend to backfill the excavation to prevent further water accumulation on-site, which will likely happen on Friday, or early on next week."3/11/2010 - closed the spill 09-12838 opened for receiving the odor complain from Cynthia Simonoff and refer to spill 89-01904. Called Ms. Simonoff and told her that BP will be there this afternoon to vac the water out and will do some backfill by Friday. (RJF)3/11/2010 - NYCDEP called and claimed there was odor and product onsite. DEC Tibbe visited the site and met Dave Greffenius (Delta) and EnviroTrac. There was a petroleum odor but it was not significant. There was some floating product and sheen on the water in the excavation, and there was stained soil most of the way around the excavation, at water level. Delta was directed to sample the oil and excavate the stained soil. DEC also required addressing any floating product, if there is any, during the monthly gauging event. DEC emailed to Delta and required the submital of RAP to address the soil and groundwater, regardless of the potential development, because the schedule is unknown. Draft prposal or a

CON ED - V 3685 (Continued) **1007205266**

review of alternatives by 3/2010. (RJF)3/17/2010 - email from Nick Onufrak (BP). They will be onsite to pump out more water and backfill some of the excavation Wednesday and Thursday. Domenick (Tona Development) is aware of the work. DEC responded to the Yvonne Schmitz's inquiry. (RJF)4/7/2010 - received complaint and spill 1000269 was opened. DEC Spill staff visited the site. The responder did not detect any petroleum odors and from his vantage point outside the fence, could not see floating product, but he did see standing water in the excavation. DEC email to BP and Tona Development requiring that the issue of standing water in the excavation must be rectified in order to prevent future impacts to the area residents as well as reduce and/or eliminate future complaints. The only way could be pumping out the water and completely fill the excavation to grade. DEC requires arrangements to complete this task immediately. Email from David Greffenius and attached with LNAPL Forensic Analysis Letter Report. Based on the fingerprinting forensic analysis of the sample collected from the top of the standing water, the floating oil was determined to be a relatively "fresh" diesel/fuel oil product probably released within the last two years. Based on BP's underground storage tank (UST) registration records, no diesel or fuel oil USTs were registered at the subject site from 1990 forward. 4/8/2010 - email from David Greffenius. EnviroTrac will begin water pumping opeartion tomorrow and site backfilling is scheduled for next week. 4/9/2010 - Letter from BP committing to address the odor complaint issue in a timely fashion and the spill remediation. 4/12/2010 - letter to NYC DOB, DOH, DEP notifying the open excavation issue at the site. 4/13/2010 - email from David Greffenius. Additional water pumping and removal, and site backfilling activities are scheduled to begin on Thursday, April 15. They are planning to bring in 1,000-1,500 yards of additional backfill material to the site (1,500-2,500 tons) over a 2-3 days period. checked spill 97-05330 at 278 6th Street. No investigation has been done at this site. PBS record 2-603857 at 383-393 4th Ave 278 6th Street show one 550-gallon kerosene (#1 fuel oil), one 275-gallon #2 fuel oil, one 4,000-gallon diesel, and one 4,000-gallon gasoline were removed in 3/2008. But no tanks closure report in file. 4/14/2010 - DEC Zhune called the owner of 278 6th Street. The property is sold already and he will call the consultant who did the closure to send the report in. 6/8/2010 - DEC responds to the Dailey News inquiry. Documentation of the backfill of the excavation including 3 photos taken after the backfill on 4/19/2010 were received from Delta. As seen from the photos, the backfill is up to the street level, and the monitoring wells are still in place. 6/9/2010 - DEC inspected the site around 9am and took some photos. No petroleum odors noticed. NO sign of contaminated soil was found. 4Q2009, 3/2/2010, by EnviroTrac. Currently a vacant lot. The monitoring well network was gauged and sampled on 12/28/2009. Due to site flooding several wells were inaccessible during the 12/2009 event (MW-21, MW-22, MW-23, MW-24 were under water) and were subsequently gauged and sampled on 1/22/2010. 6 wells were gauged. No LNAPL. DTW 3.76 - 12.82 (below existing grade?). Flows to northwest. historic flows to south. 6 wells were sampled. MW-24 was under water, not sampled. Max benzene 490 ug/L (MW-25). Max BTEX 2,820 ug/L (MW-25). Max MTBE 120 ug/L (MW-25).1Q2010, 5/17/2010, by EnviroTrac. The monitoring well newtork was gauged and monitored on 3/25/2010. 7 wells were gauged. NO LNAPL. DTW 2.19 - 10.23' (below existing grade?). Flows to northwest. 7 wells were sampled. Max benzene 9.1 ug/L (MW-22). Max BTEX 248.6 ug/L

CON ED - V 3685 (Continued) **1007205266**

(MW-21). Max MTBE 10 ug/L (MW-24). 7/20/2010 - Reviewed Remediation Work Plan for Chemical Oxidation Solution Pilot Application, dated July 12, 2010, by Delta. During the week of June 21, 2010, Delta installed 6 soil borings in the portion near the 4th Ave. SB-8 (12-13'), 1,302,600 ug/kg total VOCs. SB-8 (20-21'), 12,568 total VOCs. SB-9 (8-10'), 1,884 total VOCs. SB-9 (19-20'), 525 VOCs. SB-10 (7.5-10'), 828,240 VOCs. SB-10 (15-16'), 217 total VOCs. MW-14 (11-12'), 167,549 total VOCs. MW-14 (17-18'), 15,788 total VOCs. MW-15 (7.5-10'), 318,470 total VOCs. MW-15 (14-15'), 15,908 total VOCs. 3 soil borings turned into MW-14, MW-15 and MW-16. soil sample was not recovered and therefore no sample was collected for MW-16. Delta proposes to inject iron activated sodium persulfate and a pilot will be conducted first. 2 application wells AW-1 and AW-2 will be installed in the northwest portion of the site. The application wells will be installed to 15 feet bg with 10 feet 4-inch diameter screen. 500 gallon of sodium persulfate/EDTA-chelated Fe(II) solution (0.50 kg/gal/0.01 kg/gal EDTA-Fe(II) as Fe) will be added into the two application wells. Surrounding wells MW-15, MW-16 and MW-22 will be monitored. Pre-application sampling will be included BTEX/MTBE, sulfate, DO, pH, ORP, and alkalinity. Sampling will be also conducted the day of the application, following day, and weekly for 2 weeks. Anticipated the pilot to be conducted the final week of 7/2010. ChemOx pilot work plan is approved. Report due 8/2010.10/26/10 The site is temporarily reassigned to Alex Zhitomirsky as per V. Brevdo and M. Tibbe. I went to the site today. There is some standing water and some residential garbage at the site. I could not smell any odor. An e-mail with my findings was sent to V. Brevdo and M. Tibbe. AZ 4/11/2011 - Spill transferred back to JFeng.6/24/2011 - On June 24, 2011, DEC reviewed the work plan proposing full scale ChemOx injection. Then DEC was also notified by the developer that they have financing coming into place and plan again to develop the site. A conference call was held on June 28th with BP, its consultant, and the property developer. The developer is planning to construct a building with a full basement that will cover the entire footprint of the property; with the basement only to a depth at which dewatering will not be needed. As such, BP will need to change plans - the developer agreed to provide us with their construction drawings, and BP agreed to provide a work plan for a focused investigation to determine whether they could over-excavate to remove remaining impacts; we also spoke about the need for continued gw monitoring which would likely need to include wells in the basement.8/1/2011 - Reviewed Soil Investigation Work Plan, dated 7/14/2011, by Antea Group. 8 soil borings were proposed in order to identify remaining soil contamination. Comments: the drilling should be beyond the historical contamination depth until hitting clean soil; sewer information in the sidewalk of 4th Ave; the 1997 misfiled oil burner replacement Block 987 Lot 11, but address 363 4th Ave; and if this site is a e-designated site under NYC DEP. 8/9/2011 - meeting with BP and Antea Group. Discussed the submitted IWP. DEC required the drilling down to the clean depth in order to vertically profile of the soil and identify remaining soil contamination. Revised IWP will be submitted. 9/9/2011 - reviewed additional revision of the IWP submitted via email by Antea Group on 9/5/2011. "reduced" PID reading is defined as immeasurable reading. So soil samples from the water table interface, highest PID reading, reduced PID reading, and 3 feet below reduced PID reading will be taken. 9/9/2011 - approved IWP for installing 8 soil borings to assess the current soil condition.

CON ED - V 3685 (Continued) **1007205266**

Report due 12/2011. 10/27/2011 - 2Q2011, 9/7/2011, by Antea Group. The groundwater samples were collected on June 6, 2011. 10 wells were sampled. NO LNAPL. BTEX concentration increased from the last quarterly sampling results. MW-14, 36,320 ug/L BTEX, <25 ug/L MTBE. MW-15, 8,230 ug/L BTEX, <5.0 ug/L MTBE. MW-21, 1,060 ug/L BTEX, 97 ug/L MTBE. MW-25, 195 ug/L BTEX, 21 ug/L MTBE. 11/22/11 - Raphael Ketani. Arnie Fleming of Fleming-Lee-Shue (212) 675-3225 called me today about the case. He said that FLS is the consultant for the new developer. The site has an "E" designation. He said that BP is moving slowly on remediating the site. However, the site was excavated and oil flowed out from the east wall. Mr. Fleming stated that there is a yard area that belongs to the condominium building next door and that this would be a good place to do the investigation. However, the condominium has not been cooperative about letting BP's crew on the neighboring property. I told Mr. Fleming to send DEC the contact information for the condominium and we will pursue aquiring access for an investigation on their property. He said that he will. 11/22/2011 - As per Ketani, spill 11-10410 was generated for the offsite issue. 11/23/2011 - sent via email to Naftali Group LLC the stipulation agreement along with corrective action plan. As per DEC Ketani, sent letter notifying petroleum contamination at 270 Fifth Street and required investigation. Response is required within 15 days in receipt of the letter. Letter was sent to: 270 Fifth Street Corp.270 Fifth StreetBrooklyn, NY 11215BPC Management84 Livingston StreetBrooklyn, NY 1120111/29/2011 - Reviewed Investigation Summary Report, dated October 28, 2011, by Antea Group. 6 soil borings were installed in the central portion and western portion along 4th Ave of the site. The borings were advanced to 20 to 30 feet bgs where a peat layer was encountered. Very high total VOCs and SVOCs were detected in various location. For total VOCs in soil samples ug/kg, SB-26 (7.5-9) 54,300, (15-16) dark NAPL stain 17,801, (20-21), 30.2. SB-29 (10-11) 155,380, (13.75-14.25) odd staining 236,111, (27-28) 26.19. SB-30 (7.25-8.25) staining 251,429, (22.33-22.66) stain with product 18,287, (25-26.33) 23,781. SB-31 (3.5-4) 108,609, (9-10) odor sheen on acetate 1,017,620, (29-30) 8,217. SB-32 (3.5-4) 2,990, (10-15)17,024, (20-22) 334.7. For SVOCs, SB-26 (15-16) 1,907,400. SB-30 (22.33-22.66) 1,653,800. Antea concluded that soil contamination were identifed in the central area of the site and along western border by 4th Ave. Varied depth 3.5 to greater than 20' and soil staining showed visible evidence of a heavier than gasoline grade of hydrocarbon in some location. Excavation alone may not be possible to remediate. Will propose vapor barrier and SSDS and development of a post construction remediation strategy to address the impacts. 11/30/2011 - letter to BP and requiring a RAWP to be submitted by 1/2012. DEC require the contaminated soil to be excavated, install hydraulic barrier to prevent site recontamination by the seeping oil, and vapor barrier + SSDS for the future building. The letter which was sent to the apartment building was attached as per DEC Paul John's request. 12/9/11 - Raphael Ketani. Today there was a conference call with Arnie Fleming of Fleming Lee Shue, Hassan Hussein, head of the Hazardous Materials Unit, June Feng, project manager, and myself. Mr. Fleming commented about the oil seep that was coming in from the east side of the property. I told him that the DEC wanted BP to excavate down about 16 feet at each location that showed excessive contamination (above CP-51 standards). Mr. Fleming said that BP had made a determination that these locations were too deep to excavate. Wells would be put in the sidewalk. Mr. Fleming

CON ED - V 3685 (Continued) **1007205266**

also stated that he had bad experiences with installing wells through a vapor barrier. Once you open the wells to sample them, then the vapors come out and the VOCs are suddenly high in the building. He added that his client, the latest developer, was willing to install a 150 foot long curtain to prevent the oil from seeping onto the property. They would excavate to 10 feet below grade, the foundation level, and drive sheeting along the east border. He suggested ordering a STIP for his client to hold him as responsible for installing the 150 foot long curtain wall. He said that he believed that chemical oxidation can work. The soil is sandy. He can use pressure pulse technology to treat the contamination. Mr. Fleming went on to describe how this technology works and the benefits. After this, the conference ended.12/15/11 - Raphael Ketani. Today I received a response letter from Mr. Onufrak of Atlantic Richfield Company (ARCO). In the letter, Mr. Onufrak states that he is responding to DEC's 11/30/11 letter requesting a RAWP describing the excavation of the contaminated soil and the construction of a barrier in order to prevent the oil from the neighboring condo building from migrating onto the subject former BP property. Mr. Onufrak writes that ARCO disagrees with taking any responsibility for any off site oil that is migrating onto the property. However, he also wrote that the site owner, 267 Sixth Street LLC, is willing to pay for the barrier. ARCO will submit a RAWP for only excavating the contaminated soil at the site.12/16/11 - Raphael Ketani. I sent a response letter stating that ARCO should submit a RAWP just for the excavation. However, I added that the containment and cleanup of the off site oil should be worked out between 267 Sixth Street LLC, 267 Development LLC and the owners of the neighboring condo building (270 5th Street).responsible party: ARCO (BP #13397)owner of site: 267 Sixth Street LLCdeveloper: 267 Development LLCneighbor: 270 5th Street (condo)12/27/11 - Raphael Ketani. Kevin McGuinness (developer's consultant) (212) 675-3225 called. He said that the developer and BP have reached an agreement regarding the retaining wall for holding back the oil on the east side of the property. BP will submit a work plan for only the west side excavation and the developer will submit a work plan for only the retaining wall construction. This was being done because the developer is under a short time constraint whereby he has to start work by a certain date. I told Mr. McGuinness that the submission of two work plans was fine. Mr. McGuiness responded that the DEC should receive the wall work plan by January 9, 2012. I asked him who was the owner of the site. He said that it was still BP.1/5/12 - Raphael Ketani. I received the 1/4/12 Hydraulic Barrier RAP from Flemng Lee Shue for preventing the seepage of oil onto the site from the property to the east. I found the RAP to be acceptable for installing the steel sheet piling wall. I sent a letter to Mr. McGuinness stating this and an e-mail. I also had received the 1/3/12 Remedial Action Plan - Chemical Oxidation from the Antea Group. The basis of the plan was to use chemical oxidation and soil vapor intrusion to remove the contamination from the soil and the groundwater. Within the plan, there were diagrams showing the installation of piping for accessing the wells remotely after the site is developed and a building is constructed. The idea was that remediation would continue after site development. This I did not believe was a good plan. The reason being that if the treatment methods didn't perform as expected, then there would be no other options for the remediation, except natural attenuation. From the 9/28/-29/11 sample data in the work plan, the locations of concern

CON ED - V 3685 (Continued) **1007205266**

for the soil contamination were SB-26 and SB-29 to SB-32. SB-26 = 7.5'-9' 54,300 ppb total VOCs; 15'-16' 17,801 ppb total VOCs and 1,907,400 ppb total SVOCsSB-29 = 10'-11' 155,380 ppb total VOCs; 13.75'-14.25' 236,111 ppb total VOCsSB-30 = 7.25'-8.25' 251,429 ppb total VOCs; 22.33'-22.56' 18,287 ppb total VOCs and 1,653,800 ppb total SVOCs; 25'-26.33' 23,781 ppb total VOCsSB-31 = 1.5'-4' 108,609 ppb total VOCs; 9'-10' 1,017,620 ppb total VOCs; 29.65'-30' 8,217 ppb total VOCsSB-32 = 10'15' 17,024 ppb total VOCs The locations of concern for the groundwater contamination were MW-14 (3/10/11 NAPL; 9/6/11 34,880 ppb total VOCs) and MW-15 (9/6/11 3,022 ppb total VOCs).I sent a letter approving the 1/3/12 RAP - Chemical Oxidation for conducting the work before the property construction. I disapproved the installation of the remote conduit piping before the building construction. In the letter, I also let the Antea Group know that they have to come up with an alternative method of remediation in the event that the treatment methods fail to achieve a level of remediation that is at or below the standards.1/10/12 - Raphael Ketani. I sent an addendum letter to my 1/9/12 letter regarding the Chemical Oxidation RAP. In this letter, I stated that Atlantic Richfield has to delineate the off site groundwater contamination, as depicted in the last diagram in the 1/3/12 Chemical Oxidation RAP. The diagram shows a hot spot of 16,385 ppb of total BTEX that abuts the fencing on the northwest side (4th Avenue). In the letter, I added that if the chemical treatments don't reduce the soil and groundwater contamination to or below the CP-51 standards, then they should consider excavation. Mr. Fleming (212) 675-3225 called in the morning. He tried to convince me to let the building be constructed first and have the piping for the solution treatment wells installed at the same time before the remediation takes place. I told him that my experience has shown me that this method doesn't usually work. I added that if the treatment solutions don't work, then everyone is stuck with high contamination below the new building. Mr. Fleming said that the developer is under a deadline to start the construction or else he will loose the money. I told Mr. Fleming that the idea of treating the soil and groundwater after the construction was unacceptable.Later in the morning Mr. Fleming called again. He said that the sheet piles could be made to go down more than 10 feet. He also stated that they could excavate the site generally down to 14 feet with no problems, excavate some small hot spots to 16 feet, and, if necessary, then drive the piling deeper and excavate further down. I told him this sounded alright. Mr. Fleming closed the conversation by stating that he will have a conference call with his client and Atlantic Richfield in a few minutes to discuss the plan.1/19/12 - Raphael Ketani. Mr. Fleming (212) 675-3225 called today. We had a 30 minute phone conversation regarding the site. He argued for having DEC give a verbal approval to allow the construction company to put in piles and excavate generally to 10 feet down. He said that, at that point, they would dig out the contaminated soil in places down to 13 feet (this was 3 feet shallower than he had told me before). Then BP would inject lots of treatment solution into the soil in order to break down the contamination. After this, access piping would be installed for possible future injections and groundwater monitoring. Then the building would be built. I told Mr. Fleming that with the building constructed, you can't take confirmatory soil samples in order to see whether the treatment solutions did the job of reducing the contamination. Mr. Fleming stated that we would know whether the contamination has been sufficiently reduced by monitoring

CON ED - V 3685 (Continued) **1007205266**

the groundwater. If the groundwater concentrations are low, then the treatments are being successful. He added that more treatments would be able to take place if needed. I told Mr. Fleming that all of the hot spots should be dug out. That's the best way to deal with this. Mr. Fleming said that the edge of the property is right up against an 8 foot NYC sewer main and this main is between the site and the subway. I told Mr. Fleming that he had never stated this before. He said that he found this out yesterday when the owner sent him the building drawings. I asked him how deep this sewer was. He said that being 8 feet, it's one of Brooklyn's main sewers. So it must be at least 15 below grade. Mr. Fleming added that he had spoken to the NYC OER and had asked them what would satisfy their requirements for remediation of the site. He said that they told him "Whatever DEC wants." I told Mr. Fleming that this was not an answer and that we always want the contamination cleaned up first. Mr. Fleming said that his client was willing to wait several months for the injected solutions to do their work and then build. However, if this is going to drag on for a year or two, then his client will just walk away from the project. I told Mr. Fleming to send the DEC a letter describing what he is proposing with lots of pictures, diagrams and drawings showing the sewer and I will take a look at his proposal. However, I stated, "I will not promise him anything over the phone." He said that this didn't sound good, but he will send me the plan.1/20/12 - Raphael Ketani. Mr. Fleming (212) 675-3225 called me today. He said that he had spoken to his client and had worked out a plan whereby treatment solution injection and confirmatory soil sampling would be possible even with the foundation in place. I asked him how he would accomplish this. He said that 12 inch access ports would be built into the foundation so that drilling can take place in order to inject treatment solutions and take confirmatory samples. Then I asked him how additional treatment solution injections would take place. Mr. Fleming stated that special wells would be installed into the sidewalk that would have very long risers which would curve under the foundation and go into the water table. I told him to send me plans showing the access ports, the 8 foot sewer and the groundwater sampling wells. Mr. Fleming said that he will.Later in the day, Mr. Fleming sent me the plans (4/2/09 foundation plan and 1/29/12 groundwater well sampling plan). 1/23/12 - Raphael Ketani. I reviewed the plans and my notes from my conversations with Mr. Fleming on 1/19/12 and 1/20/12 and before.I sent Mr. Onufrak of ARCO, Mr. Hinshalwood of Antea and Mr. McGuinness of Fleming Lee Shue a letter approving the plan to construct the 12 inch diameter access ports and the groundwater monitoring wells with the very long risers. I stated in the letter that they should try to dig out as much of the contamination as is possible before embarking on the foundation construction. I included copies of the boring and well locations for every boring and well that had elevated VOCs and SVOCs since the project had begun. I also included copies of the DEC 1/9/12 letter warning of possible damage to the subway tunnel walls if the they use sodium persulfate, and that they should include a work schedule for each step of the access port and well construction, and foundation construction. 1/30/12 - Raphael Ketani. Dan Cole of the NYC Office of Environmental Remediation (212) 341-0964 called regarding the site. He said that he wanted to have the owner install a much thicker vapor barrier that would be impervious to product, also. I asked him how thick a barrier. He said 20 MILS. I told him to send a letter to the owners with a "c-c" to me (after the owners agree to this) stating

CON ED - V 3685 (Continued) **1007205266**

that the barrier will be 20 MILS. Mr. Cole said that he will.I received an e-mail from Mr. Cole as a "c-c." The e-mail was sent to Toni Finger of Kramer Levin (presumeably the developer's lawyer). It stated that the OER needed several things in order to close out its review for the site: notarized affidavit from the buyer stating that the previously issued DOB job number will be used for development of the project; information about how the 20 MIL vapor barrier will be installed; a signed and stamped letter from Karl Fischer summarizing the full project description. Upon receipt of the above information, the OER will issue a Notice of No Objection. 2/1/12 - Raphael Ketani. On 1/31/12 and 2/1/12, the Naftali 1/31/12 OER Notice to Proceed, the Witek 1/30/12 Affidavit, the KFA Architects 1/30/12 Affidavit and the 1/1/12 Grace Letter were sent to Mr. Cole. On 1/31/12, Mr. Cole sent a Notice of No Objection to Mr. Finger for DOB Job No. NB-310071294.2/21/12 - Raphael Ketani. Peter Helseth of Fleming-Lee Shue sent an e-mail containing a document describing the use of steel sheet piling in combination with a sealant. This barrier system would be used to prevent oil from seeping onto the site. I responded back by stating that it was the responsibility of the consultant and the developer to make sure that the barrier is appropriate and efficaceous.2/24/12 - Raphael Ketani. Today, I received a letter from Gordon Hinshalwood, PhD. of Antea Group. In the letter Dr. Hinshalwood stated that the 1/3/12 Remedial Action Plan - Chemical Oxidation was being implemented. Excavation will take place generally to 13 feet below grade, and deeper where it is feasible to remove more contaminated soil. The additional soil impacts and the historical groundwater impacts were expected to be addressed by the actions described in the Remedial Action Plan. In addition, redevelopment is scheduled for 2/20/12. Once the basement level excavation is complete, then the ISCO application wells, associated piping and monitoring wells will be installed within 30 days. Also, during this time, the SSDS, vapor barrier and soil sampling access ports will be installed. Redevelopment will be completed in 12 to 24 months. After this time, the soil sampling ports will be sealed and the ability to evaluate the treatments will be very limited.The remedial activities schedule was included in the letter. The first round of solution applications will take place within 14 days of installing the wells. Three additional rounds of solution application are indicated (if this many will be necessary to treat the contamination). Post application soil and groundwater sampling will take place one month after each application. So Dr. Hinshalwood expects the entire remediation process to take no more than 12 months following the initial phase of construction.2/27/12 - Raphael Ketani. I sent an e-mail to Dr. Hinshalwood again warning him about the use of sodium persulfate near a subway structure and to contact the NYCT about its use at the site. I also again asked for the soil descriptions and calculations that were used to determine how much treatment solution would be necessary to remediate the contamination. I contacted the NYCT about the intended use of sodium persulfate by Antea Group, but I could only leave a message.Later, Dr. Hinshalwood called me in response to my e-mail. He said that Antea had contacted the NYCT regarding the proposed treatment solution injections and they are in the process for getting a permit to do the injections. Also, we discussed what type of information the DEC wanted in order to understand whether the solution injections will proceed as planned. Dr. Hinshalwood will send an addendum letter with the information.3/1/12 - Raphael Ketani. Peter Helseth, P.E. of

CON ED - V 3685 (Continued) **1007205266**

Fleming-Lee Shue sent me an e-mail with an attachment showing an alternative product for use as a hydraulic barrier. 3/2/12 - Raphael Ketani. Dr. Hinshalwood sent me an e-mail today. He stated that Clean Earth of Carteret, NJ will be the destination for the contaminated soil that will be excavated. No soil will leave the site until he has an acceptance letter from Clean Earth.3/12/12 - Raphael Ketani. Dr. Hinshalwood sent me the "Addendum to Proposed Schedule for Implementation of Remedial Action Plan" dated 3/12/12 and produced by Antea Group. In the RAP, Dr. Hinshalwood explained that a a permit application to use sodium persulfate was submitted to the NYCT on 2/22/12. Boring logs and Rockware software were used to create cross sections of the site. The soils are predominantly sand and silty sand with peat in the central portion of the site. Soil porosity varies from 25% to 30%. Permeability is from 10-2 to 10-4 darcys, but is highly variable. Cross sectional diagrams were provided which depicted the lateral distribution of the sand, silty sand and peat in the subsurface.He also explained that a pilot test was conducted in the northwest corner of the property in the vicinity of MW-15 and MW-16. The treatment solution was injected into the 4' to 14' interval. It was found that AW-2 would only accept 150 gals. of solution over the course of a day. While AW-1 would accpet up to 280 gals. of solution per day. Dr. Hinshalwood stated that, given the limited reagent volume to be used, it will not affect the subway.The volumes to be used per injection well will likely be 150 to 300 gals. per day. The solution density will be no more than 0.5 kg/gal. The total mass to be injected will be 2500 gals. for this round. This means that each injection well will receive about 75 gals.I responded back to Dr. Hinshalwood by e-mail that the DEC had accepted the RAP without comment, but that no work should proceed until the NYCT sends the permit for using the solution. Also, I stated in the e-mail that the DEC should receive a copy of this permit.3/23/12 - Raphael Ketani. I called up Mr. Fleming (212) 675-3225 today. He said that the removal of the fill material will start April 1. The contaminated fill has been delineated. It will be disposed of. Test piles have been done for the foundation. The foundation plan calls for 14 or 16 soil sampling ports in the foundation floor. The barrier sheeting has been ordered. Fleming-Lee Shue will have someone on site everyday for air monitoring and construction - it is an OER requirement.4/10/12 - Raphael Ketani. Mr. Fleming (212) 675-3225 called today. He said that they had wanted to drive the steel sheet piling between the neighboring condo building and the site. However, they found out that the building had already been damaged from vibrations caused by the previous demolition and excavation work to remove the old gas station. The condo building was built in 1911 and can't take any vibrations. The NYC Dept of Buildings has required that seismometers be placed next to the building in order to measure the vibrations. If there are significant vibrations, then all work will have to stop.Mr. Fleming said that this would make it impossible to install the steel sheeting as originally planned. However, he had an alternative method in mind. As the water table is about 20 feet down, he told me that after they have removed the cover soil down to 10 feet below grade, the construction company can dig a trench that extends 10 feet deeper along the property boundary with the condo property. Once this trench is constructed they will hand install, not drive, steel sheeting such that they will have a wall that is 20 feet high. The base of the steel wall will be below the water table and will be keyed into the future building foundation. The wall will be deep enough to stop the

CON ED - V 3685 (Continued) **1007205266**

migration of the oil from the condo property which is appearing at 10 to 13 feet below grade. I told Mr. Fleming that this would be fine and to send me a new work plan. Mr. Fleming said that they are anxious to start the work and the DEC will receive the plan very soon.4/25/12 - Raphael Ketani. Mr. Fleming (212) 675-3225 called to say that a UST was discovered below the neighboring condo property (spill #1110410 and #1200737). The contractors for Mr. Fleming were installing the required sheeting when they found free product running into the site from the neighbor's soil. They also saw that the neighbor's parking lot was sinking a couple of inches. They looked at the parking lot east of the building and found an old fill pipe. They stuck a rebar down the pipe and came up with 2 feet of oil. The condo was contacted and they hired YU Associates to do a GPR survey. One 550 gal. tank was found. The tank was emptied and cleaned out and the oil stopped seeping onto the site. The tank will be removed.Mr. Fleming asked whether DEC would allow 267 Sixth Street LLC (alternate address for 363 4th Avenue) to not put in the steel sheeting - as it was intended to prevent oil from seeping onto the site. I told him that since the oil is not moving onto the site, there is no need for the sheeting and it can be left out of the development of the site. I asked Mr. Fleming whether the condo was going to dig out the contamination. Mr. Fleming said that they were talking about it, but they weren't moving. I told Mr. Fleming to suggest to Mr. Naftali that he let his contractor do the excavation and back bill the condo. Mr. Fleming said that this was presently being discussed as he already has his equipment and trucks on site. After this, the conversation ended. 5/2/12 - Raphael Ketani. Arnie Fleming of Fleming Lee Shue called. He is the consultant for the developer of the neighboring site to the west (363 4th Avenue; #8901904). He said that he was at the co-op site yesterday and the contractors had emptied and cleaned out the tank. Because of this, the oil seepage onto 363 4th Avenue had stopped. The tank on the co-op property was a 1,000 gals. and was 2 feet away from the border between the two properties. No piping was found associated with the tank. Mr. Fleming said that he was dewatering his client's property and no oil was flowing in. However, he told Mr. Yu of Yu & Associates that he should start digging out the contaminated soil around the tank as he will stop dewatering and then Yu & Associates will have do their own dewatering in order to remove the contaminated soil. Mr. Yu said that he was waiting for the co-op board to meet in order to give him a decision regarding whether he can proceed with the remediation work. Mr. Yu also state that an oil sample was sent off for fingerprinting. So everyone is waiting for the results. Mr. Fleming said that he emphasized to Mr. Yu that he should take advantage of the present dewatering because it will save him some money.Also, I sent an e-mail to Mr. Fleming stating that the steel sheeting didn't need to be installed as no oil was seeping onto the property and because the only purpose for installing the sheeting was to prevent the seepage.Later today, Rodney Rivera from the Regional Direction office of Region 2 came to the DER floor. He said that there had been a dust and petroleum odor complaint by someone from the co-op next door to Channel 11 News. Mr. Rivera was trying to find out what was happening at the site. I spoke to him and told him that this was the first time that I had been told there were dust and odor problems at the site. I also explained that excavation work was supposed to take place as part of the remediation of the site. However, I also told Mr. Rivera that the UST under the co-op property had just been cleaned out and

CON ED - V 3685 (Continued) **1007205266**

had leaked oil into the ground. So this may also be a source of odors. Next, I spoke to one of the supervisors in the Spills Unit and he ordered a person in his unit to go and investigate the complaint.Next, I contacted Mr. Fleming (212) 675-3225. He said that he is aware that there are odors, but there isn't a significant problem with the dust. However, they are usually mild. However, there are instances of strong odors when they dig in the site to put the pile caps for the foundation. These odors usually affect a resident in the first floor of the co-op as his apartment is right next to the digging. Mr. Fleming also stated that this person's apartment is 5 feet from the newly discovered UST which was just cleaned out. So there will be odors when the soil is dug out in this location. A consultant from PAL Environmental is walking around the site with a PID meter and checking the odor levels. The first floor apartment was investigated for odors, but they are mild. I told Mr. Fleming that he will have to come up with a solution to the odor problem in order to alleviate the issue for this resident. Mr. Fleming said that he will send the DEC a plan in writing, but they will first try sealing the person's windows with plastic and caulk so that there are no air leaks. Maybe this will solve the problem. I asked Mr. Fleming what he and his crew are doing about the odors. Mr. Fleming said that the odors only happen with the initial dig into a location and then they quickly dissipate. However, he is using biosolve (a masking agent). Also, Fleming Lee Shue is now starting to dig out the hot spots. I asked Mr. Fleming to keep me informed. He said that he will. The Spill investigator contacted DER from the site and reported back that presently there were no odors.5/7/12 - Raphael Ketani. Vanessa Meer of Yu & Associates (201) 791-0075, 116 called today and left a message. I tried to return her call, but could only leave a responding message.5/8/12 - Raphael Ketani. I spoke to Mr. Fleming (212) 675-3225 today. I told him that there had been another odor complaint and the EPA was now involved. He said that the neighbor who had been complaining was moved into a hotel across the street from his apartment building. I told him that was fine and I asked who had arranged this. He said that it was the contractor. I asked Mr. Fleming to find out the name of the person who was affected by the odors. Mr. Fleming said that he will. Mr. Fleming added that the odors are of gasoline, not fuel oil. So everytime they dig, some odors appear. He said that he has a guy walking around the site with a PID meter and checking that there are no exceedences of the 10 ppm standard. However, if there are, then the work stops to let the odors disipate. An odor suppressing material was put down, but it's not very effective.Mr. Fleming added that the NYC DOB came by and stopped the work. There's a stop work order. He doesn't know why this happened, but they usually don't get involved in odor complaints. On another note, Mr. Fleming said that they are presently dewatering the site and the water table has been depressed 3 feet. So, if the contractors from Yu & Associates want to, now is the time to dig out the soil contamination. I told Mr. Fleming that the co-op may not be ready to remediate the spill.5/9/12 - Raphael Ketani. I spoke to Ryan Piper, EG I of the Region Spills Unit, about the latest odor incident. He said that the odor incident was called into the Spills Hotline by the NYC DEP. The incident was assigned spill number 1200916. Mr. Piper told me that he went to the site, but didn't find any odors. I told him that the citizen who had been complaining about odors in his apartment had been moved to a hotel. I asked him whether he knew the name of the citizen. Mr. Piper said that he didn't.

CON ED - V 3685 (Continued) **1007205266**

However, he said that the spill case had been closed and referred back to this one. Tona Construction and Management, 615 Baltic Street, Brooklyn, 11217 is the construction company. The contact is Michael Izzo, General Superintendent, at (718) 399-3800/cell (718) 825-9309.5/11/12 - Raphael Ketani. Steve Sangesland, Duty Desk Officer for the Region 2 Spills Unit, gave me a note that Matt Law (718) 593-9028 had tried to contact someone at the DEC regarding odors from the former BP station. I spoke to Mr. Law at length about the site, about the nature of the contamination (that is was just gasoline) and about the procedures for monitoring and managing the vapors and odors. He said that he was concerned that something else had contaminated the site, other than gasoline. I asked him whether he was the resident who had been moved to the hotel. Mr. Law said that he was not and that he lives on the other side of the building from the site. He stated that he was glad that the DEC was aware of the situation and that the contractors were managing the odors. I explained that they are working to get rid of the contamination as fast as possible in order to alleviate the odors and that the building that will be built will have a vapor barrier and a passive vapor venting system. So this building will be safe to live in. With that, Mr. Law thanked me for all of the information and the conversation ended. 5/18/12 - Raphael Ketani. I received a copy of a letter today by e-mail from Antea Group. The letter was dated 5/16/12 and was sent by Antea Group in response to comments by the NYCT regarding the use of sodium persulfate to treat the contamination and the extent of the contamination. I reviewed the letter. From its contents, I determined that Antea Group had adequately responded to the NYCT's comments and concerns.5/30/12 - Raphael Ketani. I received an e-mail today from Peter Helseth of Fleming Lee Shue. He stated that most of the foundation elements have been constructed on the site and the area for the foundation walls has been capped with clean stone. There is no more exposed soil, nor excavating taking place. So air monitoring has been stopped.6/7/12 - Raphael Ketani. I received a call from Jay Solomon (212) 661-9400, the attorney for the Shepherd family that had been moved out of apartment 1G at 270 5th Street. He said that when the foundation was laid at the construction site next door, lots of oil vapors entered the apartment and the parents and two kids had to be moved into a hotel temporarily. However, he added that the foundation work has been finished. I told Mr. Solomon to contact the company responsible for the air monitoring and have them do a followup indoor air inspection just to be sure everything is alright. He said that the vapors had come from the construction site. I told him that the vapors would more likely come from the 1,080 gal. UST site because there is lots of contaminated soil there and this location is much closer to apartment 1G. Mr. Solomon didn't comment on this. I added that once the tank is removed, the contamination in the soil is exposed and the oil will vaporize. In any event, I said, it would be good to have a followup indoor air survey done of the apartment. I told him that Fleming Lee Shue was the consultant in charge of setting up the air monitoring and he should contact them. With that, the conversation ended.I tried to contact Mr. Fleming (212) 675-3225 regarding the attorney's request for another indoor air inspection, but I could only leave a message.Mr. Helseth from Fleming Lee Shue called in response to my message. He said that Mr. Fleming was out today, but he will take care of anything that's an issue. I explained that Mr. Solomon had called and wanted a vapor survey performed in his client's apartment. Mr. Helseth said that

CON ED - V 3685 (Continued) **1007205266**

this will be done. I added that a vapor survey should also be done in the hallway outside the apartment, outside the building itself and next to the excavation area for the 1,080 UST. Mr. Helseth said that this will be done.Later, Mr. Fleming called. We discussed the issue of doing a PID survey in the Shepherd's apartment. I told him that the DEC also wanted a survey inside the building's hallway, just outside the apartment, just outside the apartment in order to get the ambient air concentrations, then next to the UST removal site and finally next to the border of the two concerned properties (condo and excavation site). Mr. Fleming said that he will talk to his client about this.Some time later, Mr. Fleming left a phone message that all parties had agreed to do the vapor surveying. The co-op board was being contacted and it was hoped that the surveying will take place tomorrow, 6/8/12. Mr. Fleming stated that he will keep me posted.6/8/12 - Raphael Ketani. Mr. Fleming (212) 675-3225 called me regarding doing the vapor testing inside apartment 1G at the co-op and outside at the UST excavation location. Mr. Fleming told me that the lawyer told him not to enter the property and that Yu & Associates will do the work. I told Mr. Fleming that it didn't matter who was going to do the testing, just that the DEC gets the data.Later, I contacted Mr. Leung (201) 791-0075/cell (201) 310-2501 and explained that I wanted Yu & Associates to do the vapor survey. Mr. Leung said that more than one resident had been complaining about vapors from the BP site a while ago. I asked him whether they still were complaining. He said "No." Mr. Leung added that nothing is happening right now as he was told the DEC wanted to take a look at the soil delineation results first before more excavating takes place. I told him that was not true. I told him that the DEC wants Yu & Associates to move as quickly as possible to excavate the contaminated soil, then submit the end point results once all of the soil is removed, and then go forward with installing groundwater wells. Mr. Leung said that he thought this was what the DEC wanted. So he will mobilize his crew.6/14/12 - Raphael Ketani. Mr. Fleming left me a message today. He said that one of his workers did a PID survey of the neighborhood. The only vapor detections were about 8 ppm just across the property fence with 270 5th Street. The detections were at the location of the open tank grave. Mr. Fleming added that the tank is sitting on the ground and hasn't been removed and the tank grave is uncovered. His worker was not able to do a PID survey of the Shepherd's apartment as he was not allowed access. 6/18/12 - Raphael Ketani. Mr. Fleming (212) 675-3225 called me regarding doing the neighborhood vapor survey. He said that the only detections were at the location of the tank removal next door. However, there is another construction site to the south across the street and they are doing dewatering. There is a 20,000 gal. Baker Tank for storing the recovered water on site before disposal. Mr. Fleming didn't know what the site used to be. He did state that the groundwater level always was a little lower than expected on the southern side of the site. Now he understands why. Lastly, he said that the developer is going to pour the concrete floor very soon. However, BP and Antea Group have not done the first round of treatment solution injections. By way of the timing for letting the treatment solutions do their work, they will miss the opportunity to do a second round of treatment (if necessary) if BP and Antea don't move quickly. Mr. Fleming said that he will keep me informed.I tried to conact Mr. Onufrak (410) 825-8213 regarding having the first round of treatment injections performed. However, I could only leave a

CON ED - V 3685 (Continued) **1007205266**

message.Next, I contacted Dr. Hinshalwood at Antea (914) 495-9950. I told him that the developer was going to install the floor for the new building very soon and that BP and Antea should do the solution injections very soon. Otherwise, they may not have the opportunity to do them. Dr. Hinshalwood said that Antea has been in touch with the developer on a daily basis in order to know when there is a pause in the construction and they can do the injections. He said that the injections will take place in wells that will be installed at two depths throughout the site - as had been agreed upon. I told Dr. Hinshalwood that was correct, but Mr. Fleming had lead me to believe that doing the injections wood not be possible as the floor would be completed. Dr. Hinshalwood said that they would bore through the floor to install the needed wells. He added that he was not the project manager anymore. He said that the new project manager is Tim Fisher (914) 495-9935. He said that he will have Mr. Fisher call me regarding the project and the solution injecting. I told him that would be fine. As an alternate, Dr. Hinshalwood said, I could also talk to Chris Meyer (914) 495-9937, the portfolio manager, about the project. With this, the conversation ended.6/19/12 - Raphael Ketani. Chris Meyer of Antea Group sent me the following e-mail:As a follow-up to the conversation you had yesterday with Gordon Hinshalwood, I thought this update was appropriate. I realize it's been a little while since we discussed this project.In accordance with the RAP that was approved by the NYSDEC on March 15th, last Friday (June 15), we completed the installation of the ISCO application wells and ground water monitoring wells along the western property boundary. Installation of the sub slab depressurization piping and soil vapor barrier was also completed last Friday by the developer. Per the email approval you provided to the developer on May 2, the steel sheeting was not installed by the developer.Yesterday (June 18), the developer poured the concrete slab for the building.Today, we are collecting baseline readings from the newly installed monitoring wells present along the western property boundary, as requested by the Transit Authority (TA). At this time we are in the process of coordinating the first ISCO application. We do not have a definitive schedule of when the first application will occur, but we expect it will be in July.6/25/12 - Raphael Ketani. Mr. Meyer sent me an e-mail stating that the first ISCO is scheduled for thursday, 6/28/12.7/9/12 - Raphael Ketani. Mr. Fleming (212) 675-3225 called to say that the first injections took place about a week ago.8/16/12 - Raphael Ketani. Mr. Fleming sent me an e-mail stating that BP installed the groundwater treatment injection pipes and performed the first injection about two weeks ago. However, they were not keeping him in the loop. The building is progressing and is well above grade.8/22/12 - Raphael Ketani. I responded to Mr. Fleming's last e-mail and stated that there was a meeting with staff from BP yesterday. They had indicated that the building construction is moving forward and that 3 rounds of injections had already taken place. They were concerned that groundwater injection and confirmatory soil sampling access could be lost as the construction was moving so quickly that the access portals will be closed soon. I added that the groundwater samples to be taken after the treatment injections must be at or close to GA standards. If they are not, then more treatment will have to take place. If the foundation portals are closed up before the groundwater is sufficiently remediated, then the DEC will contact the NYC DOB and the NYC OER and tell them to hold off on issuing the Certificate of Occupancy. Mr. Fleming called me.

CON ED - V 3685 (Continued) **1007205266**

He said that the soil confirmation access ports will remain open until next summer. The holes will be closed only just before the owner goes for his Certificate of Occupancy. 10/15/12 - Raphael Ketani. I tried to contact Tim Fisher (914) 495-9935 and Chris Meyer (914) 495-9937 of Antea Group, and Nick Onufrak (410) 825-8213 of BP regarding progress at the site and whether confirmatory soil borings had been taken and whether groundwater samples had been taken. However, I could only leave voice messages. Mr. Meyer called me back. The last injection was completed. All 8 applications have been completed. The sodium persulfate solutions and EDTA chelated iron are in the ground. On October 22, Antea is going out to do groundwater and soil confirmatory sampling.10/18/12 - Raphael Ketani. Mr. Meyer called. He said that due to the crane still being in place for constructing the building, the sampling date has been pushed back to October 24.10/22/12 - Raphael Ketani. Mr. Meyer (914) 495-9937 called. He said that the soil and groundwater confirmatory sampling has been pushed back to November 5, 2012. The sampling will take 5 to 6 days.11/12/12 - Raphael Ketani. Mr. Fisher left me the following e-mail message today: Today we are beginning the process of collecting confirmation soil and grab ground water samples from below the building slab at former BP station 13397 to determine if impacts remain following the completion of ISCO applications. We expect site activities to last through this Thursday.1/9/2013 - Raphael Ketani. A conference call took place today between Nick Onufrak of BP-ARCO(410) 825-8213, Chris Meyer (914) 495-9937 and Gordon Hinshalwood (914) 495-9950 of Antea Group and myself. The subjects of the call were the groundwater and soil sample results and the Certificate of Occupancy for the building. Mr. Onufrak stated that they had received the soil and groundwater results after 8 rounds of solution injections had taken place. The results were not good. There wasn't much improvement. They wanted to know whether this would affect the ability of the building's owner to get the Certificate of Occupancy. I told him that the poor results will. I added that you can't have a building sitting over a pool of oil. The vapors will travel up the footings and into the concrete walls of the basement - bypassing the vapor barrier - and then into the building. Mr. Meyer stated that the building will have a vapor barrier and a passive venting system. I told everyone that another way to reduce the contamination has to be found. I added that I had another case with the same problem and they can't get a permanent C of O as they have oil seeping under the property. Their contamination was known, but the owner built his building anyway. I also said that the DEC would have to contact the NYC OER and they would let the NYC DOB know that someone has built on top of contamination that still exists. I asked whether the groundwater could be extracted. Mr. Meyer said that the wells can't pass a pump down the pipe. I asked whether just pushing a hose down each well would suffice. Mr. Onufrak and Mr. Meyer said that they will have to consider what can be done. They will send the DEC the report with the analytical results.Later, I talked to Dan Cole of the NYC OER and passed the above case notes to him via e-mail. He responded back by e-mail.1/10/13 - Raphael Ketani. I responded to Mr. Cole's 1/9/13 e-mail (see the e-docs). I stated in the e-mail that a meeting needed to be held with all parties in order to make everyone aware of the continuing existence of the oil and contamination below the site. We would also have to discuss what can be done to resolve this problem.1/24/13 - Raphael Ketani. The meeting took place as planned. In attendance were representatives from the owner's

CON ED - V 3685 (Continued) **1007205266**

consulting company, the lawyer for the owner, BP, BP's consultants, BP's lawyer, Dan Cole from the NYC OER and myself. I brought up the issue that despite the numerous rounds of solution injections, the Department was informed that the contamination was still about as concentrated as before. I stated that an alternative means of remediation needed to be found and employed. Mr. Hinshalwood stated that only a 5% solution was used for the rounds of injections. As the site is next to the subway tunnel, this was the strength limit of the solution that the MTA would approve. I told Mr. Hinshalwood that this explained why the contamination hadn't been broken down. I again insisted that a remediation method be found to reduce or remove the soil contamination. I also stated that there was product on the water table. Mr. Onufrak and Mr. Meyer stated that they will start using a vacuum truck to collect the product from one well where they have seen free oil. I told them to submit a work plan and I gave them 30 days from today to do so. Mr. Onufrak said that this was enough time. Mr. Onufrak stated that two wells were destroyed during the building construction. I told him that the re-installation of the wells must be part of the work plan. I asked them when I will receive the soil confirmatory sampling data report. Mr. Meyer said that it was still going through internal review, but the DEC should receive it soon. The meeting ended with an agreement to present an alternative means of remediation. 2/1/13 - Raphael Ketani. Mr. Meyer (914) 495-9937 sent me an e-mail stating that a site visit was made on January 30 to see whether it was possible to position a vacuum truck near some of the wells in order to collect the groundwater. A location was found where the vacuum truck could park. So the first vacuum event will take place the week of February 11. Stingers will be used to collect groundwater from the observation wells.2/7/13 - Raphael Ketani. Mr. Meyer sent me the following e-mail:The first VEFR event is scheduled to take place on Wednesday, February 13th. Six consecutive weekly VEFR events are planned. 2/15/13 - Raphael Ketani. I received the following e-mail from Mr. Meyer: The first VEFR event took place this past Wednesday, February 13th. The next VEFR event is scheduled for Wednesday, February 20th to gain additional information. We will also be submitting a VEFR work plan to you next week. I've also attached the report we've prepared to summarize a number of activities that were implemented as proposed in the Remedial Action Plan - Chemical Oxidation, dated January 3, 2012, the Proposed Schedule for Implementation of Remedial Action Plan addendum, dated February 22, 2012, and the Addendum to Proposed Schedule for Implementation of Remedial Action Plan, dated March 12, 2012. As such, the post-application sampling results we discussed during our meeting in January, are also presented.2/19/13 - Raphael Ketani. I finished my review of the Antea Group 2/13/13 Remedial Action Summary Report.From 4/11/12 to 5/25/12, 7386 tons of contaminated soil were excavated and taken to Clean Earth of Carteret, NJ. Between 4/26/12 and 6/19/12, 75,297 gals. of groundwater accumulated on site and this was taken to Lorco Petroleum Services in Elizabeth, NJ as non-hazardous waste. The SSDS system was installed prior to construction of the foundation. It consisted of 4 inch schedule 40 PVC piping with 0.020 slots benaeath the concrete basement slab. The piping was laid down in a layer of 3/4 inch crushed stone that is 4 feet thick with 3 risers extending through the slab, which will be extended to the roof. A Grace Preprufe 300R and 160R/Bithuthene 4000 vapor barrier was installed.Eight (8) soil borings were performed from 5/24/12 to 6/12/12. These borings were turned into wells OW-1A to OW-4A and

CON ED - V 3685 (Continued) **1007205266**

OW-1B to OW-4B. The borings were started at the excavation floor, which was 10 feet bgs. OW-1A to OW-4A were drilled to 30 feet bgs. OW-1B to OW-4B were drilled to 20 feet bgs. The wells were installed along the western boundary of the property which is along 4th Avenue in order to monitor the sodium persulfate concentrations and the groundwater.During the same time interval, 16 soil borings were performed and were turned into wells for the purpose of injecting the treatment solutions. These wells were AW-1A to AW-8A and AW-1B to AW-8B. The borings started at the excavation floor. AW-1A were finished at 16 to 19 feet bgs and AW-1B to AW-8B were finished at 24 to 28 feet bgs. Each well was connected with a 2 inch diameter PVC hose.AW-1 (A,B) to AW-4 (A,B) and AW-7(A,B) were used to treat the soil and the groundwater under the western portion of the site. AW-3 (A,B), AW-6 (A,B) and AW-8 (A,B) were installed to treat the soil and groundwater under the central portion of the site. AW-5 (A,B) were installed in order to treat the soil and groundwater under the southwestern portion of the site.Soil samples were only taken from the deep B series of borings due to the proximity to the shallow A series of borings. No soil samples were taken from AW-1B or AW-7B. The analytical results showed exceedences at AW-2B to AW-4B, AW-6B, AW-8B, OW-1B to OW-4B.On 2/21/12 (dated as 2/21/13 in the report), groundwater samples were collected from MW-13, MW-15, MW-16, MW-20, MW-22 and MW-24. The VOC results for MW-13 were all non-detect. Those for MW-15 were extremely high. MW-16 had VOC results from just a little above the TOGS standards to below the standards. The results for MW-20 were all a little above the standards. MW-22 had 2 high VOC hits with the rest being low to moderate hits. MW-24 had hits from below to 3 a little above the standards. Pre-injection groundwater samples were taken on 6/19/12 from OW-1A to OW-4A and OW-1B to OW-4B. Each of the samples had exceedences for almost all of the TOGS 1.1.1 standards. All of the samples, except for OW-4B, had very high exceedences for total xylenes and ethylbenzene. OW-1A, OW-2A, OW-1B and OW-2B had very high exceedences for 1,2,4-trimethylbenzene. OW-2A, OW-2B, OW-3A and OW-3B had very high benzene exceedences. OW-1A, OW-2A, OW-2B, OW-3A and OW-3B had very high toluene exceedences. OW-1A, OW-1B, OW-2A and OW-2B had very high naphthalene and 1,3,5-trimethylbenzene exceedences. OW-1A, OW-1B and OW-2A had very high n-propylbenzene exceedences.Eight applications were performed from 6/28/12 to 9/20/12. The sodium persulfate solutions were applied over several rounds at a concentration of 50,000 mg/l for each individual injection. This concentration was required by the NYCT as they were concerned that stronger concentrations would affect the subway tunnel bordering the property under 4th Avenue. About 12,800 gals. of 50,000 mg/l solution was injected with ferrous iron as an activation chemical. Staff at Antea Group calculated that an injected concentration of 130,000 mg/l would degrade to 5,000 mg/l at the property boundary, which would further degrade to 15 mg/l at the tunnel. Post injection, 6 borings were performed from 11/12/12 to 11/14/12 to 26.5 to 38.5 feet bgs. These were SB-33 to SB-38. A seventh boring, SB-39, hit refusal at 17 feet bgs and SB-40 hit a void below ground and could not be completed. The analytical results for the soil samples from the 6 borings all had exceedences. SB-33 had extremely high VOC exceedences and many SVOC exceedences. SB-34 was tested only for VOCs and had high hits. The SB-35 results were a little above standards to non-detect. SB-36 had low to high VOCs and SVOCs exceedences. SB-37 had low VOC hits, but extremely high SVOC exceedences. SB-38 had extremely high VOC hits and low to moderate

CON ED - V 3685 (Continued) **1007205266**

SVOC exceedences.The median soil contamination total concentrations increased after the injections from 12,330 ppb total VOCs to 22,869 ppb. The mean total soil SVOC concentrations decreased from 14,691 ppb to 3914 ppb.Groundwater samples were taken from 11/12/12 to 11/14/12. SB-33 had many very high VOCs, and SVOC exceedences. SB-34 and SB-35 had high to very high VOCs. The water sample from SB-36 had 5 high VOCs and many high SVOC hits. SB-37 had high to very high VOC hits and low to high SVOC hits. SB-38 had many very high VOCs and also SVOC exceedences.Later, groundwater was sampled on 1/8/13 from OW-1A, OW-1B to OW-4A, OW-4B. The groundwater samples from OW-1B, OW-2A, OW-2B and OW-3B had many very high VOC hits and SVOCs which were mostly non-detect to low hits below TOGS with a few low exceedences. The sample from OW-4A had VOC hits from below the standards to 4 very high exceedences. OW-4B had VOC hits from below the standards to several moderate exceedences. I approved the data in the report as it gave a reasonable picture of the degree of soil and groundwater contamination below the site. However, it will remain to be seen how effective the VEFR events are in reducing the groundwater contamination.2/21/13 - Raphael Ketani. I sent Mr. Hinshalwood (914) 495-9950, Mr. Meyer (914) 495-9937 and Mr. Onufrak (410) 825-8213 an e-mail stating that the DEC wanted groundwater to be sampled from the MW, AW and OW series of wells. Mr. Hinshalwood (914) 495-9950 responded back by e-mail stating that the MW series of wells were destroyed by the foundation construction, except for MW-13 which will be used to monitor the groundwater when the construction ends. Also, he stated that the AW series of wells were not accessible and wells OW-1A and OW-1B had been destroyed, but will be reinstalled. So only 9 wells will be available for monitoring. The OW series are all along 4th Avenue. MW-13 is along 6th Street along the southern border of the property.2/25/13 - Raphael Ketani. I received the 2/22/13 Antea Group Vacuum Enhanced Fluid Recovery Work Plan. The purpose of the plan is to extract NAPL and contaminated groundwater. VEFR events will take place weekly. Wells OW-1A to OW-3A will be used for VEFRing. Stinger devices will be used in the wells to collect the total liquids. Vacuuming using a vacuum truck will be undertaken for a single well. During the vacuuming event, the radius of influence (ROI) will be determined. Vacuuming will be conducted for 2 hours at each observation well. At the end of each VEFR event, product and groundwater levels will be gauged. The volume of NAPL and groundwater collected will be measured and recorded. The vacuum will be measured every 30 minutes. Vapor concentrations will be measured every 15 minutes using a PID meter. Before any future solution injection applications are performed, it will be determined whether the ROI extends under the western border of the property. Data from the ROI and the VEFR events will be used to determine whether more extraction wells are needed. 2/26/13 - Raphael Ketani. I found the Vacuum Enhanced Fluid Recovery Work Plan to be acceptable with the comment that the product and groundwater gauging must take place before the VEFR or vacuum events take place. I added that monthly progress update reports must be submitted to the DEC by the third week of the month following the VEFR and vacuum events and gauging. The progress reports must include the NAPL and groundwater elevations, the amount of product recovered and the groundwater flow map. I also added that quarterly groundwater analytical reports must be submitted no later than 30 days following the date of sample collection. The sampling must be for the expanded lists of VOCs and SVOCs.I drafted a letter for the review of Mr. Hussein with the above approval and

CON ED - V 3685 (Continued) **1007205266**

requirements.Mr. Hussein approved the letter and it was sent out.3/1/13 - Raphael Ketani. Mr. Meyer (914) 495-9937 sent me the below e-mail today:Three vacuum enhanced fluid recovery events were conducted at former service station 13397 on February 13th, February 20th, and February 27th, 2013. The objective of these events was to recover any NAPL that may have been present (as was evident from a sampling event in one of the observation wells along Fourth Avenue in January), and to explore the potential for ground water recovery using this technology on the existing wells (OW-1 through 3), which are located under the newly-constructed building with remote access ports for sampling located in the sidewalk as proposed in the approved Vacuum Enhanced Fluid Recovery Work Plan dated February 22, 2013.Ground water samples were collected from Observation Wells OW-1A, OW-1B, OW-2B and OW-3B on February 27th and will be compared to the "baseline" ground water samples collected from the observation wells in January 2013 (before the VEFR events) to see if there is any significant change in VOC concentrations. Monitoring well MW-13 is located beneath some temporary infrastructure that is being used as part of the building construction. As such, it could not be sampled.To date, minimal water (115 gallons) and no measurable NAPL was recovered during the three extraction events, indicating that the practical application of this technology for hydraulic control is limited. Additionally, no significant vacuum influence was observed in surrounding wells during any of the extraction events, and vapor recovery was minimal as well, indicating that insufficient air flow was induced to mobilize significant vapor mass. Given these results, it is unlikely that this remedial approach will recover significant contaminant mass from the subsurface. At this point, no additional extraction events are planned, pending a review of the results of the ground water samples that were collected. Per your approval letter, we will be providing a more formal summary of these results in the third week of March. As I mentioned in my email on 2/21/13, efforts are also underway for Naftali to replace the two sidewalk wells that were destroyed during their construction activities (OW-1 and OW-3A).

----------I responded by e-mail stating that the Atlantic Richfield Company and Antea Group had to find a way of recovering the contaminated groundwater, even if this meant installing larger diameter wells or more wells.3/6/13 - Raphael Ketani. Mr. Meyer sent me the contact information for the person at the MTA who approved the sodium persulfate treatment plan. This person is Rajen Udeshi (646) 252-3673.3/7/13 - Raphael Ketani. I spoke Mr. Udeshi. He said that he didn't do the analysis to determine that a 5% solution was required. He added that he is a Principal Engineer and a structural engineer. However, he is only involved in coordinating the treatment solution application process. Mr. Udeshi told me that Emil Dul (dool), Principal Engineer, MTA Environmental Group, at (646) 252-2405 is the person who calculated what the treatment solution concentration should be.I spoke to Mr. Dul. Mr. Dul said that whenever a treatment project is proposed within 200 feet of an MTA tunnel or such, then the Six Agency rule comes into play. He said that the six agencies include the Fire Department, the NYC DOB and a few others. The rule is administered by the NYC DOB. The engineer or architectural drawings need the approval of the six agencies. He said that some time ago, a meeting took place between the consultants from Antea Group and staff from the MTA to discuss

CON ED - V 3685 (Continued) **1007205266**

the proposed sodium persulfate treatment plan. Mr. Dul added that the MTA was concerned that the treatment solution not leave the site - in other words, be completely used up - so that the subway tunnel would not be affected. Mr. Dul said that once they had all of the information, then they considered the treatment plan, which included drawings showing the locations of the injections points. Staff from the MTA went over the calculations for obtaining the solution mixture that Antea Group wanted to use and what the expected concentration would be at the property boundary. However, Mr. Dul said, he was not sure of all of the details regarding what had transpired. So he wanted to call me back with the rest of his staff to discuss the matter. I told him that would be fine, but that I still wanted to know who in MTA had decided that a 5% solution was the correct concentration. Mr. Dul responded that Antea Group had proposed this in order to make sure the solution would be used up and to prevent its escape from the site. With that, the conversation ended.Later, Mr. Dul called me back and started a conference call with Derrick Braithwaite and Mary Kong, engineers from the MTA. Mr. Dul lead the conversation. He said that the MTA met with Antea Group on 3/27/12. They discussed the proposed treatment plan. On 5/16/12, the MTA sent Antea Group a letter with many questions regarding the injection plan. Antea Group later responded back. Mr. Dul was emphatic that the MTA never asked Antea Group why they were going to use a 5% solution. He added that they never challenged what Antea Group was proposing. The MTA's only concern was that the treatment solutions not contact the subway tunnel. Ms. Kong stated that they wanted sentinel wells installed (which Antea Group did). Antea Group told them that they modeled the injections and had confidence in the model. Mr. Braithwaite said that he went to the site twice to witness the injections. Mr. Dul stated that the MTA simply doesn't want anything getting near the concrete. As long as the groundwater is non-detect for persulfate, then they are happy. He added that the MTA doesn't approve the outside consultant's plans. They only accept them. With that, the conversation ended.3/12/13 - Raphael Ketani. Mr. Meyer sent me an e-mail stating that wells OW-4A and OW-4B will be replaced today.3/29/13 - Raphael Ketani. Mr. Meyer sent me the 3/22/13 Antea Group Progress Update Report. VEFR events took place on 2/13, 2/20 and 2/27. The wells used were OW-1A, OW-2A and OW-3A. OW-4A was not used as it had been destroyed. No NAPL was recovered during any of the events. Vapor concentrations in the wells were typically less than 100 ppm during each of the VEFR events. Groundwater was sampled on 2/27 and 3/7 from OW-1A, OW-1B, OW-2B and OW-3B. BTEX was very high in all of the samples and was up to 9840 ppb. Total VOCs ranged up to 11,321 ppb. The SVOCs were only slightly elevated. On 3/12/13, OW-4A-R and OW-4B-R were installed.

Site Code:	376802
HW Code:	C231059
Control Code:	15
Control Type:	ENG
Date Record Added:	11/20/2009
Date Rec Updated:	10/24/2011
Updated By:	SRHEIGEL
Site Description:	Location: This site was originally part West 61st Street site, which was approximately 62,500 square feet (1.44 acres). The larger site was subdivided into two separate sites: the West 61st Street Tennis Court Area Site (C231059), and the West 61st Street Site (C231043). The Tennis Court Area (the Site) consists of an approximately 100 by 150 foot parcel of tax Block 1152, Lot 43. The Site is bounded by West 61st Street to the north, a public school to the east, an apartment building to the south, and the West 61st Street site (C231043) to the west. Site Features: The site is a paved tennis court with landscaped areas. Current Zoning: The current zoning is residential. Three schools and a NYC Parks Department pool and a community center are present in the surrounding neighborhood. Historical Use: The Phase I Site Assessment identified that Lot 43 operated as a gasoline station and contained underground storage tanks (USTs). Site Geology and Hydrogeology: The topography of the site slopes gently to the west toward the Hudson River, which is situated approximately 1000 feet west of the site. The site geology is characterized by fill material overlying sand and till, weathered rock, and bedrock between 8 and 12 feet bg.
Env Problem:	Nature and Extent of the Contamination: Exceedances of the TAGM 4046 recommended soil cleanup objectives include SVOCs and metals (including lead at a concentration that exceeded the characteristic hazardous waste limit contained in Part 371-3). Exceedances of the groundwater standards included metals. During remediation activities, eight (8) 550-gallon USTs with associated piping were located near the former parking lot attendant guard house in the northeastern corner of Lot 43 and one (1) 1,500-gallon UST was located in the southwestern corner of the parking lot portion of Lot 43. These two areas were remediated through excavation, tank removal, and post-removal soil analysis. A third area containing SVOCs and metals was also excavated and removed. The excavations were backfilled with clean material. A composite cover system was installed consisting of a demarcation layer overlain by (a) 1 foot of clean fill and capped with asphalt or similar material to cover the tennis court area, or (b) 2 feet of clean fill in areas covered with landscaping elements. The composite cover system acts as a permanent engineering control on the site.The terms of the Brownfield Cleanup Agreement have been met. The remediation at the site has been completed. The site is now in Site Management Phase.
Health Problem:	The top two feet of cover at the site consist of clean soil, concrete and/or asphalt. Proper maintenance of this cover material will prevent the public from coming in direct contact with residual soil contamination. Since the area is provided with public water it is unlikely that anyone will be exposed to site contaminants in drinking water.

Health Problem: The top two feet of cover at the site consist of clean soil, concrete and/or asphalt. Proper maintenance of this cover material will prevent the public from coming in direct contact with residual soil contamination. Since the area is provided with public water it is unlikely that anyone will be exposed to site contaminants in drinking water.

Site Code: 376802

Site Description: Location: This site was originally part West 61st Street site, which was approximately 62,500 square feet (1.44 acres). The larger site was subdivided into two separate sites: the ?West 61st Street Tennis Court Area Site? (C231059), and the ?West 61st Street Site? (C231043). The Tennis Court Area (the Site) consists of an approximately 100 by 150 foot parcel of tax Block 1152, Lot 43. The Site is bounded by West 61st Street to the north, a public school to the east, an apartment building to the south, and the West 61st Street site (C231043) to the west.
Site Features: The site is a paved tennis court with landscaped area s.
Current Zoning: The current zoning is residential. Three schools and a NYC Parks Department pool and a community center are present in the surrounding neighborhood.
Historical Use: The Phase I Site Assessment identified that Lot 43 o perated as a gasoline station and contained underground storage tanks (USTs).
Site Geology and Hydrogeology: The topography of the site slopes gen tly to the west toward the Hudson River, which is situated approximately 1000 feet west of the site. The site geology is characterized by fill material overlying sand and till, weathered rock, and bedrock between 8 and 12 feet bg.

Env Problem: Nature and Extent of the Contamination:
Exceedances of the TAGM 4046 recommended soil cleanup objectives incl ude SVOCs and metals (including lead at a concentration that exceeded the characteristic hazardous waste limit contained in Part 371-3). Exceedances of the groundwater standards included metals. During remediation activities, eight (8) 550-gallon USTs with associated piping were located near the former parking lot attendant guard house in the northeastern corner of Lot 43 and one (1) 1,500-gallon UST was located in the southwestern corner of the parking lot portion of Lot 43. These two areas were remediated through excavation, tank removal, and post-removal soil analysis. A third area containing SVOCs and metals was also excavated and removed. The excavations were backfilled with clean material. A composite cover system was

WEST 61ST STREET TENNIS COURT AREA SITE (Continued) **S110137780**

installed consisting of a demarcation layer overlain by (a) 1 foot of clean fill and capped with asphalt or similar material to cover the tennis court area, or (b) 2 feet of clean fill in areas covered with landscaping elements. The composite cover system acts as a permanent engineering control on the site.
The terms of the Brownfield Cleanup Agreement have been met. The rem ediation at the site has been completed. The site is now in Site Management Phase.

Health Problem: The top two feet of cover at the site consist of clean soil, concrete and/or asphalt. Proper maintenance of this cover material will prevent the public from coming in direct contact with residual soil contamination. Since the area is provided with public water it is unlikely that anyone will be exposed to site contaminants in drinking water.

DEC Memo:	02/03/06: This spill transferred from J.Kolleeny to S.Kraszewski. - SK9/22/06: Spill transferred from Kraszewski to Kann.1/25/07 - 1/25/07 - J.Kann - monitoring report submitted on 11/14. Some product remains in two wells. Will prepare a generic letter comenting on report format. A work plan is due end of January 2007.7/31/07 - Work Plan was approved on 4/13/07. Field work was performed and a investigative report is due by August 15.12/27/07: J.Kann - Report submitted on 11/8/07. Of the 14 wells on site, two contain free product. These two wells are located in teh former tank area. One well contained approximately 4 inches of product. An accurate reading for the second well could not be obtained because the product was too viscous. A fingerprint analysis indicates teh product in the wells is weathered number 6 fuel oil. Consultant recommends sampling of all wells to determine if dissolved phase contamination exists, and to continue running remedial system on site(consultant claims it has contained the plume). 07/16/08: J.kann - email received from NYCHA including a WP for Amsterdam Houses.04/20/10: J.Kann - Preferred is planning to mobilize to conduct field work (soil borings, well installation) on Monday - April 26, 2010 at the NYCHA-Amsterdam Houses (Contract No. 9017305) in accordance with the July-2008 work plan prepared by Gannett Fleming.08/2/10: J.kann - Site Investigation Report submitted on 7/30/10.9/21/10: J.Kann - Quarterly Report Rcvd 9/1/10.3/17/11: J.Kann - Added comments for 7/16/08 and 04/20/10. Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MOBIL OIL CORP SS #QDL (Continued) **1000253419**

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

DEC Memo:	Prior to Sept, 2004 data translation this spill Lead_DEC Field was "HARRINGTON"This spill site has been transferred from DEC Sigona to RemedialBureau B, on August 4, 2003.This spill site has been consolidated under Spill No. 8806783.Reassigned from O'Dowd on March 1, 2000 DEC's comments regarding a proposed Work Plan for On-Site and Off-Site Investigation by Roux Associates, dated April 30, 2003. Based on the results of our site visit on March 7, 2003, and evaluation of the proposal by Roux Associates, the DEC accepts ExxonMobil's Work Plan and Schedule to evaluate the on-site and off-site contamination at this location. Exxon-Mobil must now complete the implementation of the Work Plan according to the proposed schedule. The results of this investigation must be compiled into a Subsurface Investigation Report prepared in accordance with Section No. 3, paragraph 3.14 of the Division of Environmental Remediation's Draft DER-10 Technical Guidance for Site Investigation and Remediation, dated December 2002. A complete Remedial Investigation Report must be submitted for DEC review and approval according to the proposed implementation scheduled.

DEC Memo:	This spill site has been consolidated under spill no. 88-06783.PBS records indicate that 12 x 550 gallon and 1 x 4,000 gallon USTs closed or removed from this site.3/7/2003: DEC's comments regarding a proposed Work Plan for On-Site and Off-Site Investigation by Roux Associates, dated April 30, 2003. Based on the results of our site visit on March 7, 2003, and evaluation of the proposal by Roux

MOBIL OIL CORP SS #QDL (Continued) **1000253419**

Associates, the DEC accepts ExxonMobil's Work Plan and Schedule to evaluate the on-site and off-site contamination at this location. Exxon-Mobil must now complete the implementation of the Work Plan according to the proposed schedule. The results of this investigation must be compiled into a Subsurface Investigation Report prepared in accordance with Section No. 3, paragraph 3.14 of the Division of Environmental Remediation's Draft DER-10 Technical Guidance for Site Investigation and Remediation, dated December 2002. A complete Remedial Investigation Report must be submitted for DEC review and approval according to the proposed implementation scheduled. (Sigona)8/4/2003: Site transferred from Sigona to Harrington (central office) for management. (Rommel)3/8/2004: Sent letter to Exxon Mobil approving the FS work plan. (Harrington)8/24/2004: Sent letter to Exxon Mobil approving the FS report and the SVE/AS pilot test report. Requested the submission of a CAP. (Harrington)10/8/2004: Approved CAP. Items included were the initiation of monthly EFR events at monitoring wells exhibiting free product, the submission of an RI work plan to finish delineation of subsurface contamination, submission of a RAP, and completion of quarterly groundwater sampling at all site-related monitoring wells. (Harrington)1/19/2005: Consent order is executed by the Regional Director. (Harrington)5/31/2005: Sent letters to Exxon Mobil approving the supplemental RI work plan and the RAP. RAP calls for installation of SVE/AS system and passive bailers to collect free product. (Harrington)9/12/2005: Sent letter to Exxon Mobil approving SVE/AS plan. Fieldwork for system installation is underway. (Harrington)11/1/2005: Station has been closed as per divestment effort. UST excavation is underway. (Harrington)12/1/2005: Sent letter to Exxon Mobil approving the supplemental RI report. SVE/AS system will be up and running by the spring of 2006. (Harrington)1/31/2006: SVE/AS system has been installed on-site. System is awaiting hook-up to electrical grid by Con-Ed. (Harrington)2/13/2006: Sent e-mail to Exxon Mobil approving the tank excavation assessment report. (Harrington)8/29/2006: Sent e-mail to Exxon Mobil approving the SVE/AS System Start-Up Report. AS system will remain inactive until levels of LPH have been substantially reduced. (Harrington)1/15/2007: Project management assumed by Bureau B. (Harrington)7/24/2007: Project re-assigned to Harrington. (Harrington)8/3/2007: PM visited site with Kleinfelder personnel (Mooney, Meyerhoefer). RAP was approved in Spring of 2007. Sale of property to Moinihan Group set for this Fall. Kleinfelder set to propose dismantling of SVE/AS system due to property transfer and subsequent excavation for new building foundation. (Harrington)8/21/2007: PM approved the shut-down of the SVE/AS system on-site. Construction activities are beginning at the site, which include excavation of the site property and demolition of buildings adjacent to the system compound. (Harrington)3/13/2008: PM conducts site visit with Fleming Lee Shue (FLS) personnel (environmental consultant to the developer - Moinihan Group). Site is to become a 56-story residential unit with basement parking and 1st floor commercial usage. Site takes up the entire block between West 42nd and West 43rd Streets from 11th Avenue west to the existing condo property and the Chinese embassy. Site demolition is complete. Excavation and de-watering activities are on-going. Excavation depth varies throughout the site, but ranges from 8-20' below grade. Contractors are using h-piles with timber stringers and tiebacks for sidewall bracing. Excavation in the area of the former station is @ ~8' bgs. FLS has proposed a modification to the RAP changing the

MOBIL OIL CORP SS #QDL (Continued) **1000253419**

approved excavation depth from 40’ bgs to 20’ bgs. (Harrington)3/14/2008: PM sends an e-mail to Fleming Lee Shue with comments on the proposed RAP modification. The Department is requiring further details regarding the confirmatory sampling program for both the excavation bottom and sidewalls, installation of new monitoring wells for post-remedial groundwater monitoring (as the old ones were demolished during excavation activities), copies of the de-watering plan and NYCDEP discharge permit, a construction schedule, and monthly progress reports with photos. (Harrington)5/28/2008: PM conducts meeting with Fleming Lee Shue personnel (Matt Carroll). All Department comments regarding the revised RAP as noted above have been addressed to the satisfaction of the PM. PM approves the RAP. (Harrington)12/4/08 - Haggerty: assumed management from Dave Harrington1/16/09 - Haggerty: sent email approval for endpoint sampling results after excavation to the depth of the future building. Some minor semi-volatiles and metals but not enough to warrant further excavation. This is 1 parcel of a large Brownfield project. The remedy for this pacrel consists of de-watering to depress the water table enough to excavate any contaminated soils.April 2010 - Project is on hold while the next phase of work is re-bidApril 2011: spoke with consultant, they will be submitting a work plan to install soil borings on the sidewalk. Soil samples will be considered "excavation sidewall samples" since the previous excavation had sheeting install at the property boundary. MWs will also be installedMay 2011 - approved work plan for off-site MW installation, excavation sidewall samples via geoprobe sampling and collecting soil and gw samples in the area with a reported sheen at the bottom of the excavationJune 2011 - collected bottom samples and sidewall samples (via Geoprobe). Off-site MW’s will be installed in JulyJuly 2011 - Off-site wells installed 7/20 - 7/21November 2011 - Report overdueDecember 2011 - Spoke with Consultant, Fleming Lee Shue. RP has agreed to pay for the remainder of the off-site work February 2012 - PM will contact the Fleming Lee Shue. They need to complete the off-site investigation before closure can be consideredApril 2012 - no response from FLSJune 2012 - spoke with Michael Pisem from the Moinian Group who is developing the property. I gave him 60 days to install the off-site wells and provide the Dept. with the report or I would refer the Spill to OGC. Fleming, Lee, Shue called and said they were authorized by Pisem to complete the investigationDecember 2012 - still waiting on the report

Remarks: TANKS BEING REMOVED WHEN CONTAMINATED SOIL WAS DISCOVERED, SOIL BEING STOCKPILED & WILL BE REMOVED.

BROWNFIELDS:

Program:	BCP
Site Code:	359250
Site Description:	The site is 0.346 acres, identified as tax Block 1090, Lot 23 and located in New York County (Manhattan). The site includes 605 West 42nd Street and 615 West 42nd Street and lies on the north side of West 42nd Street between 11th and 12th Avenues. The site included in the application consists of a three-story garage which is presently abandoned. It is now owned by the volunteer 605 West 42nd Owner LLC who acquired it from Verizon. Prior uses of the site were a coal and coke yard, a can manufacturer and a metal manufacturer. The Sanitary Automatic Candy Corporation and the New York Telephone Company have also occupied the current buildings.The surrounding parcels are currently used for a combination of commercial and residential purposes, such as United Parcel Service (UPS), the Riverbank West Apartment Tower, Mobil filling station (now closed), street-level

WEST 42ND STREET REDEVELOPMENT PROJECT (Continued) **S108984483**

parking lot and a New York City mounted patrol unit building.Contaminants which are known or suspected to affect soil, groundwater and/or soil gas are petroleum, petroleum related VOCs, SVOCs and metals. This site poses a significant threat to the public health as determined by NYSDOH.The Remedial Action Work Plan (RAWP) with Stipulations was approved by the Department on November 5, 2007. Remedial Construction started on December 10, 2007. Construction was halted in September 2008 due to contractual issues. Remedial Construction recommenced in October 2009 and was completed in the summer of 2010.Certificate of Completion issued December 17, 2010.

Env Problem: Previous investigations have revealed the following contamination:Elevated levels of volatile organic compounds (VOCs) including numerous exceedances of soil cleanup objectives (SCOs) in the vicinity of three closed in place USTs and the former gasoline dispenser; Elevated levels of semi-volatile organic compounds (SVOCs) including naphthalene were detected in samples in the vicinity of the closed in place USTs;Elevated levels of other SVOCs in shallow soil were attributed to the presence of historic fill;The types and concentrations of VOCs in the groundwater are indicative of petroleum contamination in the area of the USTs. There were exceedances of groundwater standards in samples from wells in the vicinity of the former gasoline dispenser and closed in place USTs; Soil gas analytical results revealed elevated concentrations of VOCs at all 14 sampling locations. Total VOC concentrations exceeded NYSDOH's background levels by up to 4 orders of magnitude. A Track 1 unrestricted use remedy was implemented on the site beginning in December 2007 and ending in June 2010. The remedial construction conformed with the requirements of a Part 375 track 1 cleanup and consisted of:1. Excavation and removal of soil/fill exceeding Track 1 SCOs; 2. Removal and treatment of contaminated groundwater by way of construction dewatering;3. Appropriate off-site disposal of all material from the site (solid and liquid) in accordance with all Federal, State and Local Rules and Regulations;4. Collection and analysis of end-point samples to ascertain achievement of Track 1 SCOs5. Implementation of a Soil Vapor Intrusion Monitoring Plan to establish a baseline for soil vapor along the southern offsite boundary of the Site to ensure there is no potential for soil vapor intrusion into new development, and post-remedial monitoring of groundwater and soil vapor along the southern (downgradient) Site boundary to evaluate the effectiveness of the remedy as it pertains to these media; 6.Import of materials to be used for backfill in compliance with: (1) chemical limits and other specifications and (2) all Federal, State and local rules and regulations for handling and transport of material; 7.Placement of a concrete cap and waterproofing system over the entire site to prevent recontamination of the site as part of the foundation elements for the proposed structure. 8.All responsibilities associated with the Remedial Action, including permitting requirements and pretreatment requirements, will be addressed in accordance with all applicable Federal, State and local rules and regulations.The draft Final Engineering Report was submitted in June 2010 and was finalized in December 2010. A Certificate of Completion was issued December 17, 2010.

Health Problem: Since contaminated soil at the site has been excavated down to bedrock and cleaned up to NYSDEC Part 375 Unrestricted use soil cleanup objectives, no institutional or engineering controls are necessary or will be implemented.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 02/01/2013

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

NJ SHWS: Known Contaminated Sites in New Jersey

The Known Contaminated Sites in New Jersey includes sites under the purview of the Site Remediation Program which have contamination present at levels greater than the applicable cleanup criteria for soil and/or groundwater standards. The sites appearing in Known Contaminated Sites in New Jersey are classified as either active, where the site is assigned to a specific remedial program area, or pending, where the site is awaiting assignment to a specific remedial program area. Sites where no further action (NFA) designation has been given are not included in this report unless there are other areas of identified contamination which have not been remediated. This report includes sites being remediated under all of the various regulatory programs administered by the Site Remediation Program such as: Federal Superfund Program, Federal Resource Conservation and Recovery Act (RCRA), New Jersey's Industrial Site Recovery Act (ISRA), New Jersey's Underground Storage of Hazardous Substances Act, New Jersey's Spill Compensation and Control Act, New Jersey's Solid Waste Management Act, New Jersey's Water Pollution Control Act.

State and tribal voluntary cleanup sites

NY VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

State and tribal Brownfields sites

NY ERP: Environmental Restoration Program Listing
In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a $200 million Environmental Restoration or Brownfields Fund as part of the $1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 03/04/2013

Local Land Records

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 02/06/2013

NJ LIENS: Environmental LIENS

A listing of properties with environmental liens. The listing includes sites from the Site Remediation & Waste Management Program Sites where the Department has placed either a 1st Priority or Regular Spill Fund Lien against. 1st Priority Type Lien - a lien placed against the property where the discharged occurred providing that the owners of the property have some responsibility towards the discharge. First Priority Lien is superior to other types of liens. Non-Priority (Regular) Type Lien - a lien placed against the Responsible Party & their revenues and all real and personal property, other than the real property comprising the location of the discharge.

NY HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

Date of Government Version: 01/01/2002

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

NY HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

NY SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

NY E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

EPA WATCH LIST: EPA WATCH LIST
EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)
The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 05/20/2013

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data
Source: Rextag Strategies Corp.
Telephone: (281) 769-2247
U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.
Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.
Private Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics' primary database on private school locations in the United States.
Daycare Centers: Day Care Providers
Source: Department of Health
Telephone: 212-676-2444

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands
Source: Department of Environmental Conservation
Telephone: 518-402-8961

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

Most Recent Revision:	1995

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

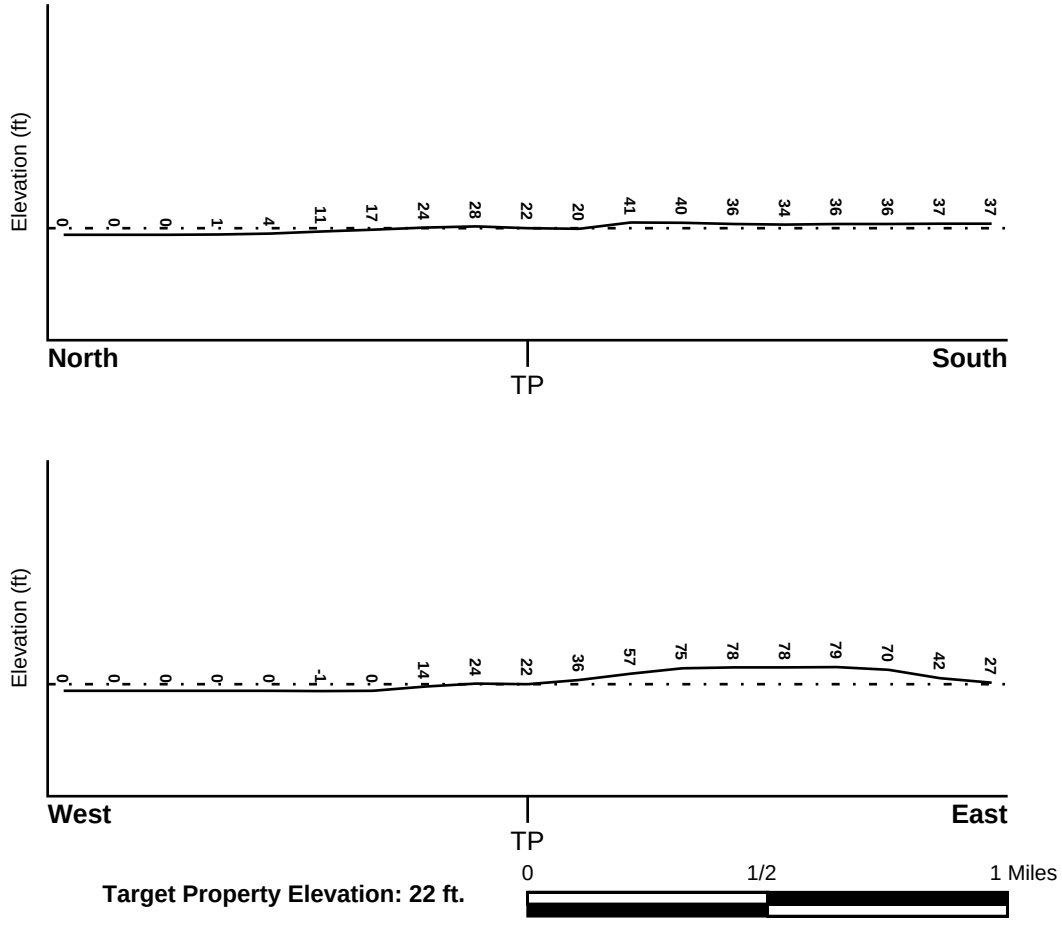
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WNW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Target Property Elevation: 22 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Target Property County	FEMA Flood Electronic Data
NEW YORK, NY	YES - refer to the Overview Map and Detail Map

Flood Plain Panel at Target Property:	3604970031B - FEMA Q3 Flood data
Additional Panels in search area:	3604970030B - FEMA Q3 Flood data 3604970038B - FEMA Q3 Flood data 3604970039B - FEMA Q3 Flood data 34017C - FEMA DFIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
CENTRAL PARK	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1 - 2 Miles SSW
Site Name:	MANHATTAN GENERAL MAIL FACILITY
Site EPA ID Number:	NY6180000352
Groundwater Flow Direction:	NOT AVAILABLE.
Inferred Depth to Water:	not available. Saturated layers impacted by salt water intrusion are present in the overburden. It is generally inferred that the depth to the uppermost 'aquifer' is greater than 70 feet at the surface of the bedrock/sediment interface.
Hydraulic Connection:	Detailed hydraulic connection information is not available. Glacial till and outwash deposit sediments overlie the Manhattan Schist, the uppermost bedrock unit at the site. The surface elevation of bedrock decreases to the southwest of the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT **GEOLOGIC AGE IDENTIFICATION**

Era:	Paleozoic	Category:	Stratified Sequence
System:	Ordovicias		
Series:	Lower Ordovician and Cambrian carbonate rocks		
Code:	OC *(decoded above as Era, System & Series)*		

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)
Source: United States Geologic Survey
A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands
Source: Department of Environmental Conservation
Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

River Drive Center 1 619 River Drive
Elmwood Park, NJ 17407

Dear Ms. Forsburg:

In response to your recent request, we have reviewed the New York Natural Heritage Program database with respect to the site at 523-531 West 52nd Street, Manhattan (Langan Project No. 100396701).

Enclosed is a report of rare or state-listed animals and plants, and significant natural communities, which our databases indicate occur, or may occur, on your site or in the immediate vicinity of your site.

For most sites, comprehensive field surveys have not been conducted; the enclosed report only includes records from our databases. We cannot provide a definitive statement as to the presence or absence of all rare or state-listed species or significant natural communities. This information should not be substituted for on-site surveys that may be required for environmental impact assessment.

Our databases are continually growing as records are added and updated. If this proposed project is still under development one year from now, we recommend that you contact us again so that we may update this response with the most current information.

The presence of the plants and animals identified in the enclosed report may result in this project requiring additional review or permit conditions. For further guidance, and for information regarding other permits that may be required under state law for regulated areas or activities (e.g., regulated wetlands), please contact the appropriate NYS DEC Regional Office, Division of Environmental Permits, as listed at www.dec.ny.gov/about/39381.html.

Sincerely,

Nicholas Conrad
Information Resource Coordinator
New York Natural Heritage Program

635

The following state-listed animals have been documented at your project site, or in its vicinity.

The following list includes animals that are listed by NYS as Endangered, Threatened, or Special Concern; and/or that are federally listed or are candidates for federal listing. The list may also include significant natural communities that can serve as habitat for Endangered or Threatened animals, and/or other rare animals and rare plants found at these habitats.

For information about potential impacts of your project on these populations, how to avoid, minimize, or mitigate any impacts, and any permit considerations, contact the Wildlife Manager or the Fisheries Manager at the NYSDEC Regional Office for the region where the project is located. A listing of Regional Offices is at http://www.dec.ny.gov/about/558.html.

The following species and habitats have been documented at or near the project site, generally within 0.5 mile. Potential onsite and offsite impacts from the project may need to be addressed.

COMMON NAME	*SCIENTIFIC NAME*	*NY STATE LISTING*	*FEDERAL LISTING*	
Fish				
Shortnose Sturgeon	*Acipenser brevirostrum*	Endangered	Endangered	1091

This report only includes records from the NY Natural Heritage databases. For most sites, comprehensive field surveys have not been conducted, and we cannot provide a definitive statement as to the presence or absence of all rare or state-listed species. This information should not be substituted for on-site surveys that may be required for environmental impact assessment.

If any rare plants or animals are documented during site visits, we request that information on the observations be provided to the New York Natural Heritage Program so that we may update our database.

Information about many of the listed animals in New York, including habitat, biology, identification, conservation, and management, are available online in Natural Heritage's Conservation Guides at www.guides.nynhp.org, and from NYSDEC at http://www.dec.ny.gov/animals/7494.html.

Information about many of the rare plants and animals, and natural community types, in New York are available online in Natural Heritage's Conservation Guides at www.guides.nynhp.org, and from NatureServe Explorer at http://www.natureserve.org/explorer.

Re: Freedom of Information Law Request (FOIL) # 100813

Dear Sir or Madam:

I am writing in response to your FOIL request (see attached). This response specifically addresses only those aspects of your request related to the discharge of wastewater or other materials to a New York City public sewer. As this letter only pertains to records in the custody of the Division of Pollution Control and Monitoring, if your request was also directed to other divisions within the Bureau of Wastewater Treatment or to other bureaus within the Department of Environmental Protection, then you will receive a separate response from those divisions or bureaus.

Concerning your request, the **Division of Pollution Control and Monitoring**:

[ ] cannot identify the requested location because _____.

[X] after search, has not identified any records responsive to your request.

[ ] has identified records responsive to your request. Please telephone me at (718) 595-4756 to arrange for an appointment to review the information.

Re: Request for review of information
523-531 West 52nd Street
Manhattan, New York, 10019
Langan Project No.: 100396701

Dear Ms. Lewis:

Langan Engineering, Environmental, Surveying and Landscape Architecture, D.P.C. (Langan) is currently conducting a Phase I Environmental Assessment of the above-referenced property. As part of the assessment, we are requesting a general records search for the above-referenced property. Please consider this a formal Freedom of Information Law (FOIL) request for records regarding buildings, construction, chemical spills, underground storage tanks (USTs), monitoring wells, ground water sampling, asbestos abatement, radon, hazardous materials, and any other documents that your department may have regarding the above-referenced property.

This site which is identified as 523-531 West 52nd Street and is known by the NYC Department of Finance as Block 1801 Lot 7501 is bound to northeast by West 53rd Street, to the northwest by vacant property, to the southwest by West 52nd Street, and to the southeast by a 25-floor mixed use commercial and residential building. The site was most recently used for light industrial purposes as a printing company known as United Envelope Company, Inc. According to information provided for the building, there is an active above ground storage tank within the building that is used to store fuel oil. The Petroleum Bulk Storage number for this tank is ID# 2-337129. According to the title search, the site is currently owned by Archstone Enterprise LP and Avalonbay Communities, Inc.

If possible, please fax a response to (201) 794-6913 and send a hard-copy response to my attention at the address listed below. Please contact me at (201) 398-4899 x4276 if there are any questions regarding this request. Thank you in advance for your assistance.

Sincerely,
Langan Engineering, Environmental, Surveying and Landscape Architecture, D.P.C.

Re: 523-531 W 52nd St in Manhattan
PBS 2-337129

Dear Ms. Forsburg:

NYSDEC/Region 2 has reviewed your request for the above referenced records under New York State's Freedom of Information Law (FOIL). Please note that most of our records are filed by number under the names of individuals or corporations. We have no way of locating or retrieving records if they are filed under names or addresses other than those you have provided.

If no records have been located, this does not necessarily mean, and should not be interpreted to mean that there have never been any violations, complaints, claims, investigations or inquiries involving those names or addresses. We cannot make any representations as to whether there are or have been any such violations, complaints, claims, investigations or inquiries.

☒ Attached please find 1 pdf file (s)] of free copy of the records located for the names and/or addresses you provided. .

Therefore, your FOIL request has been satisfied and closed.

Please email your future FOILs to Region 2 directly to our email address: r2foil@gw.dec.state.ny.us

Please send me an email confirming the receipt of the attachment(s).

Thank you for your request. If you have any questions, please call my secretary Gloria Silva at 718-482-4507, or email it to me at r2foil@gw.dec.state.ny.us .

Sincerely yours,

Fawzy I. Abdelsadek, Ph.D., P.E.
Regional Enforcement Coordinator

Re: 523-531 W 52nd St in Manhattan
PBS 2-337129

Dear Ms. Forsburg:

We are in receipt of your Foil request for the above referenced site. The identification Number(s) assigned is: R2-13-1890.

If for any reason you need to contact us again please use these numbers. When the programs are done gathering the files/information, this office will contact you.

Please email your future FOILs to Region 2 directly to the following email address:
r2foil@gw.dec.state.ny.us

Please expect our response within 20 business days from the date of this letter.

If you have any questions @ your FOIL, please call Gloria Silva/ or Cynthia Whiting/FOIL Secretary at 718-484507, or email me providing the above FOIL # at: r2foil@gw.dec.state.ny.us

Sincerely yours,

Fawzy I. Abdelsadek, Ph.D., P.E.
Regional Enforcement Coordinator

Please be advised that in your future submission of FOILs to Region 2, you should include the Spill(s), or PBS(s) number(s) to expedite your request. This will give you more information @ all records that we may have related to your FOIL(s). So that you will submit FOILs, for those that the additional information/records are needed.

NYSDEC public websites that are listed below:

Please be advised that relevant information responsive to your request may be found at the following Department of Environmental Conservation/Remediation's websites:
The Spills Database link is as follows:
http://www.dec.ny.gov/cfmx/extapps/derexternal/index.cfm?pageid=1

HWR/Environmental Remediation Website:
http://www.dec.ny.gov/cfmx/extapps/derexternal/index.cfm?pageid=3

The PBS Database link is as follows:
http://www.dec.ny.gov/cfmx/extapps/derexternal/index.cfm?pageid=4

Also, you can search for Permits issued by NYSDEC by using the Link:
http://www.dec.ny.gov/cfmx/extapps/envapps/

If you need assistance on how to search the above websites, please contact me.

Please email your future FOILs to Region 2 directly to the following email address:
r2foil@gw.dec.state.ny.us

If after your search, additional information/records are needed, please include the spill #(s), or PBS #(s), Permit #(s) and exact street address of the site(s) you are requesting information for, and email your request(s) to Region 2. Please note that Region 2 policy is to submit a FOIL request for a maximum of two (2) sites/FOIL. If you didn't provide the results (i.e. spills/PBS #s) of your websites search within 10 days, your FOIL will be closed

You may resubmit your FOIL again providing the above requested information.

Thank you for your FOIL request. If you have any questions, please call Gloria Silva/FOIL Secretary at (718) 482-4507, or email me providing the above FOIL #
at: r2foil@gw.dec.state.ny.us.

Sincerely yours,

Form—244-1927 Certificate of Occupancy. 8A-2087-27-I.

BUREAU OF BUILDINGS

BOROUGH OF MANHATTAN, CITY OF NEW YORK

HVC **CERTIFICATE OF OCCUPANCY No. 15561 192 9**

Supersedes Certificate of Occupancy No.

To the owner or owners of the building: New York Sept. 3, 1929

THIS CERTIFIES that the building located on Block 1081, Lot 16-19

known as 525-31 West 52nd Street
100' front

under a permit, Application No. 505 N.B. of 1928, conforms to the approved plans and specifications accompanying said permit and any approved amendments thereto, and to the requirements of the building code and all other laws and ordinances and to the rules and regulations of the board of standards and appeals, applicable to a building of its class and kind, except that in the case of a building heretofore existing and for which no previous certificate of occupancy has been issued and which has not been altered or converted since March 14, 1916, to a use that changed its classification as defined in the building code, this certificate confirms and continues the existing uses to which the building has been put; and

CERTIFIES FURTHER that the building is of fireproof construction within the meaning of the building code and may be used and occupied as a business building as hereinafter qualified, in a n unrestricted district under the building zone resolution, subject to all the privileges, requirements, limitations, and conditions prescribed by law or as hereinafter specified.

STORY	LIVE LOADS Lbs. per Sq. Ft.	PERSONS ACCOMMODATED			USE
		MALE	FEMALE	TOTAL	
Cellar				15	Automobile repair shop
1st Story	300			15	Garage, more than 5 autos and driveway
2nd "	200			65	Offices
3rd "	200			10	Automobile repair shop
4th "	200			15	Factory
5th "	200			15	
6th "	200			15	
7th "	200			15	

This certificate is issued to Russell G. Cory, architect
30 Church Street, City.
, for the owner or owners.

The superimposed, uniformly distributed loads, or their equivalent concentrated loads in any story shall not exceed the live loads specified above; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

Unless specifically stated above, the building or any part thereof, if certified as a public building, shall not be used as a building in which persons are harbored to receive medical, charitable or other care or treatment, such as a hospital, asylum, etc., or in which persons are held or detained under legal restraint, such as a police station, jail, etc.; nor shall it be used as a motion picture theatre as defined in section 30, chapter 3, Code of Ordinances; nor as a theatre or opera house or other building intended to be used for theatrical or operatic purposes, or for public entertainment of any kind, for the accommodation of more than 300 persons.

Unless specifically stated above, the building or any part thereof, if certified as a residence building, shall not be used as a tenement house as defined in the tenement house law; nor shall it be used as any form of residence building having more than 15 sleeping rooms; nor shall it be used as a lodging house within the meaning of Sec. 1305 of the Greater New York Charter.

Unless specifically stated above, the building or any part thereof, if certified as a business building, shall not be used as a garage, motor vehicle repair shop or oil selling station as defined in section 1, chapter 10, Code of Ordinances; nor shall it be used for the generation or compression of acetylene; nor as a factory building as defined in the labor law; nor as a grain elevator; nor as a coal pocket.

Except as otherwise noted above, the building, or any part thereof, if located elsewhere than in an unrestricted district, shall not be used for any of the purposes enumerated in paragraph (a) of section 4 of the building zone resolution; nor for any trade, industry or use that is noxious or offensive by reason of the emission of odor, dust, smoke, gas or noise; nor for any kind of manufacturing not already prohibited, except that, if located in a business district, not more than twenty-five per cent. of the total floor space may be so used, or space equal to the area of the lot in any case.

Except as otherwise noted above, the building, if certified as a garage, may not be used for more than five cars on any portion of a street between two intersecting streets, in which portion there exists an exit from or an entrance to a public school, or in which portion there exists any hospital maintained as a charitable institution; and in no case within a distance of 200 feet from the nearest exit from or entrance to a public school; nor within two hundred feet of any hospital maintained as a charitable institution.

If the building has, at any time previous to the issuance of this certificate, been the subject of an appeal to the board of appeals or of a petition to the board of standards and appeals resulting in modification or variation of law or any lawful requirement, the construction and arrangement of the building as specified in the resolution granting such modification or variation, must be maintained, and all conditions imposed by either board must be observed.

No change or re-arrangement in the structural parts of the building, or affecting the lighting or ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located, until an approval of the same has been obtained from the superintendent of buildings.

This certificate supersedes each and every previously issued certificate of occupancy for this building or any part thereof, and each and every such previously issued certificate shall be null and void; and this certificate in turn becomes null and void upon the issuance of any new lawful certificate.

This certificate does not in any way relieve the owner or owners, or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits or licenses as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

This certificate does not authorize the use or operation of any elevator in the building without the special certificate required by section 563 of the building code.

If the building is or is required to be equipped with standpipes or other fire extinguishing or gas shut off appliances, this certificate is not complete until such standpipes or other appliances have been inspected by the fire department (or by the Tenement House Department, in the case of a gas shut off in a tenement house) and approved in writing, either in a separate certificate or by endorsement upon this certificate. (Space for such endorsement is provided on page 4 of this certificate.)

If this certificate is marked "Temporary," it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to a tenement house unless also approved by the tenement house commissioner; and it must be replaced by a full certificate as soon as the entire building is completed according to law and ready for occupancy.

The word "class" as used in this certificate refers to the classification of buildings in the building code (section 70).

This certificate is issued in accordance with the provisions of section 411-a of the Greater New York Charter and of section 5 of chapter 5 (Building Code) of the Code of Ordinances of the City of New York.

Examined, 19

Superintendent of Buildings, Borough of Manhattan.

Additional copies of this certificate will be issued, upon written request, to persons having a proprietary interest in the building.

Form—244-1935 Certificate of Occupancy. 8A-2087-35-Bu-80

HOUSING AND

DEPARTMENT OF BUILDINGS

BOROUGH OF MANHATTAN, CITY OF NEW YORK

HVC CERTIFICATE OF OCCUPANCY No. 23264 193 8

Supersedes Certificate of Occupancy No.

To the owner or owners of the building: New York January 7, 1938.

THIS CERTIFIES that the building located on Block 1082, Lot 16, 45 to 49 incl.

known as 520-8 West 53rd Street-525-31 West 52nd Street

under a permit, Application No. 100' and 125' front 20 Alt of 19 37, conforms to the approved plans and specifications accompanying said permit and any approved amendments thereto, and to the requirements of the building code and all other laws and ordinances and to the rules and regulations of the board of standards and appeals, applicable to a building of its class and kind, except that in the case of a building heretofore existing and for which no previous certificate of occupancy has been issued and which has not been altered or converted since March 14, 1916, to a use that changed its classification as defined in the building code, this certificate confirms and continues the existing uses to which the building has been put; and

CERTIFIES FURTHER that the building is of fireproof construction within the meaning of the building code and may be used and occupied as a business building as hereinafter qualified, in an unrestricted district under the building zone resolution, subject to all the privileges, requirements, limitations and conditions prescribed by law or as hereinafter specified.

CANCELLED DEC 30 1967 Temp.

This certificate is issued to Russell G. Cory, Architects, 30 Church Street, City. , for the owner or owners.

The superimposed, uniformly distributed loads, or their equivalent concentrated loads in any story shall not exceed the live loads specified above; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

Unless specifically stated above, the building or any part thereof, if certified as a public building, shall not be used as a building in which persons are harbored to receive medical, charitable or other care or treatment, such as a hospital, asylum, etc., or in which persons are held or detained under legal restraint, such as a police station, jail, etc.; nor shall it be used as a motion picture theatre as defined in section 30, chapter 3, Code of Ordinances; nor as a theatre or opera house or other building intended to be used for theatrical or operatic purposes, or for public entertainment of any kind, for the accommodation of more than 300 persons.

Unless specifically stated above, the building or any part thereof, if certified as a residence building, shall not be used as a tenement house as defined in the tenement house law; nor shall it be used as any form of residence building having more than 15 sleeping rooms; nor shall it be used as a lodging house within the meaning of Sec. 1305 of the Greater New York Charter.

Unless specifically stated above, the building or any part thereof, if certified as a business building, shall not be used as a garage, motor vehicle repair shop or oil selling station as defined in section 1, chapter 10, Code of Ordinances; nor shall it be used for the generation or compression of acetylene; nor as a factory building as defined in the labor law; nor as a grain elevator; nor as a coal pocket.

Except as otherwise noted above, the building, or any part thereof, if located elsewhere than in an unrestricted district, shall not be used for any of the purposes enumerated in paragraph (a) of section 4 of the building zone resolution; nor for any trade, industry or use that is noxious or offensive by reason of the emission of odor, dust, smoke, gas or noise; nor for any kind of manufacturing not already prohibited, except that, if located in a business district, not more than twenty-five per cent. of the total floor space may be so used, or space equal to the area of the lot in any case.

Except as otherwise noted above, the building, if certified as a garage, may not be used for more than five cars on any portion of a street between two intersecting streets, in which portion there exists an exit from or an entrance to a public school, or in which portion there exists any hospital maintained as a charitable institution; and in no case within a distance of 200 feet from the the nearest exit from or entrance to a public school; nor within two hundred feet of any hospital maintained as a charitable institution.

If the building has, at any time previous to the issuance of this certificate, been the subject of an appeal to the board of appeals or of a petition to the board of standards and appeals resulting in modification or variation of law or any lawful requirement, the construction and arrangement of the building as specified in the resolution granting such modification or variation, must be maintained, and all conditions imposed by either board must be observed.

No change or re-arrangement in the structural parts of the building, or affecting the lighting or ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located, until an approval of the same has been obtained from the commissioner of buildings.

This certificate supersedes each and every previously issued certificate of occupancy for this building or any part thereof, and each and every such previously issued certificate shall be null and void; and this certificate in turn becomes null and void upon the issuance of any new lawful certificate.

This certificate does not in any way relieve the owner or owners, or any other person or persons in possession or control of the building, or any part thereof, from obtaining such other permits or licenses as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

This certificate does not authorize the use or operation of any elevator in the building without the special certificate required by section 563 of the building code.

If the building is or is required to be equipped with standpipes or other fire extinguishing or gas shut off appliances, this certificate is not complete until such standpipes or other appliances have been inspected by the fire department (or by the Tenement House Department in the case of a gas shut off in a tenement house) and approved in writing, either in a separate certificate or by endorsement upon this certificate. (Space for such endorsement is provided on page 4 of this certificate.)

If this certificate is marked "Temporary," it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to a tenement house unless also approved by the tenement house commissioner; and it must be replaced by a full certificate as soon as the entire building is completed according to law and ready for occupancy.

The word "class" as used in this certificate refers to the classification of buildings in the building code (section 70).

This certificate is issued in accordance with the provisions of section 411-a of the Greater New York Charter and of section 5 of chapter 5 (Building Code) of the Code of Ordinances of the City of New York.

Examined,

A

Albion L. Van Kleeck

Deputy Commissioner of Buildings, Borough of Manhattan

Department of Housing and Buildings

Additional copies of this certificate will be issued, upon written request, to persons having a proprietary interest in the building.

Borough Superintendent.

NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Housing and Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

Borough Superintendent

NO CHANGES OF USE OR OCCUPANCY NOT CONSISTENT WITH THIS CERTIFICATE SHALL BE MADE UNLESS FIRST APPROVED BY THE BOROUGH SUPERINTENDENT

Unless an approval for the same has been obtained from the Borough Superintendent, no change or rearrangement in the structural parts of the building, or affecting the light and ventilation of any part thereof, or in the exit facilities, shall be made; no enlargement, whether by extending on any side or by increasing in height shall be made; nor shall the building be moved from one location or position to another; nor shall there be any reduction or diminution of the area of the lot or plot on which the building is located.

The building or any part thereof shall not be used for any purpose other than that for which it is certified.

The superimposed, uniformly distributed loads, or concentrated loads producing the same stresses in the construction in any story shall not exceed the live loads specified on reverse side; the number of persons of either sex in any story shall not exceed that specified when sex is indicated, nor shall the aggregate number of persons in any story exceed the specified total; and the use to which any story may be put shall be restricted to that fixed by this certificate except as specifically stated.

This certificate does not in any way relieve the owner or owners or any other person or persons in possession or control of the building, or any part thereof from obtaining such other permits, licenses or approvals as may be prescribed by law for the uses or purposes for which the building is designed or intended; nor from obtaining the special certificates required for the use and operation of elevators; nor from the installation of fire alarm systems where required by law; nor from complying with any lawful order for additional fire extinguishing appliances under the discretionary powers of the fire commissioner; nor from complying with any lawful order issued with the object of maintaining the building in a safe or lawful condition; nor from complying with any authorized direction to remove encroachments into a public highway or other public place, whether attached to or part of the building or not.

If this certificate is marked "Temporary", it is applicable only to those parts of the building indicated on its face, and certifies to the legal use and occupancy of only such parts of the building; it is subject to all the provisions and conditions applying to a final or permanent certificate; it is not applicable to any building under the jurisdiction of the Housing Division unless it is also approved and endorsed by them, and it must be replaced by a full certificate at the date of expiration.

If this certificate is for an existing building, erected prior to March 14, 1916, it has been duly inspected and it has been found to have been occupied or arranged to be occupied prior to March 14, 1916, as noted on the reverse side, and that on information and belief, since that date there has been no alteration or conversion to a use that changed its classification as defined in the Building Code, or that would necessitate compliance with some special requirement or with the State Labor Law or any other law or ordinance; that there are no notices of violations or orders pending in the Department of Housing and Buildings at this time; that Section 646F of the New York City Charter has been complied with as certified by a report of the Fire Commissioner to the Borough Superintendent, and that, so long as the building is not altered, except by permission of the Borough Superintendent, the existing use and occupancy may be continued.

"§ 646 F. No certificate of occupancy shall be issued for any building, structure, enclosure, place or premises wherein containers for combustibles, chemicals, explosives, inflammables and other dangerous substances, articles, compounds or mixtures are stored, or wherein automatic or other fire alarm systems or fire extinguishing equipment are required by law to be or are installed, until the fire commissioner has tested and inspected and has certified his approval in writing of the installation of such containers, systems or equipment to the Borough Superintendent of the borough in which the installation has been made. Such approval shall be recorded on the certificate of occupancy."

Additional copies of this certificate will be furnished to persons having an interest in the building or premises, upon payment of a fee of fifty cents per copy.

Re: Request for review of information
523-531 West 52nd Street
Manhattan, New York, 10019
Langan Project No.: 100396701

Dear Mr. Laws:

Langan Engineering, Environmental, Surveying and Landscape Architecture, D.P.C. (Langan) is currently conducting a Phase I Environmental Assessment of the above-referenced property. As part of the assessment, we are requesting a general records search for the above-referenced property. Please consider this a formal Freedom of Information Law (FOIL) request for records regarding buildings, construction, chemical spills, underground storage tanks (USTs), monitoring wells, ground water sampling, asbestos abatement, radon, hazardous materials, and any other documents that your department may have regarding the above-referenced property.

This site which is identified as 523-531 West 52nd Street and is known by the NYC Department of Finance as Block 1801 Lot 7501 is bound to northeast by West 53rd Street, to the northwest by vacant property, to the southwest by West 52nd Street, and to the southeast by a 25-floor mixed use commercial and residential building. The site was most recently used for light industrial purposes as a printing company known as United Envelope Company, Inc. According to information provided for the building, there is an active above ground storage tank within the building that is used to store fuel oil. The Petroleum Bulk Storage number for this tank is ID# 2-337129. According to the title search, the site is currently owned by Archstone Enterprise LP and Avalonbay Communities, Inc.

If possible, please fax a response to (201) 794-6913 and send a hard-copy response to my attention at the address listed below. Please contact me at (201) 398-4899 x4276 if there are any questions regarding this request. Thank you in advance for your assistance.

Sincerely,
Langan Engineering, Environmental, Surveying and Landscape Architecture, D.P.C.

The site was most recently used for light industrial purposes as a printing company known as United Envelope Company, Inc. According to information provided for the building, there is an active above ground storage tank within the building that is used to store fuel oil. The Petroleum Bulk Storage number for this tank is ID# 2-337129. According to the title search, the site is currently owned by Archstone Enterprise LP and Avalonbay Communities, Inc.

If possible, please fax a response to (201) 794-6913 and send a hard-copy response to my attention at the address listed below. Please contact me at (201) 398-4899 x4276 if there are any questions regarding this request. Thank you in advance for your assistance.

Sincerely,
Langan Engineering, Environmental, Surveying and Landscape Architecture, D.P.C.

Manhattan, New York, 10019
Langan Project No.: 100396701

Dear Ms. Lewis:

Langan Engineering, Environmental, Surveying and Landscape Architecture, D.P.C. (Langan) is currently conducting a Phase I Environmental Assessment of the above-referenced property. As part of the assessment, we are requesting a general records search for the above-referenced property. Please consider this a formal Freedom of Information Law (FOIL) request for records regarding buildings, construction, chemical spills, underground storage tanks (USTs), monitoring wells, ground water sampling, asbestos abatement, radon, hazardous materials, and any other documents that your department may have regarding the above-referenced property.

This site which is identified as 523-531 West 52nd Street and is known by the NYC Department of Finance as Block 1801 Lot 7501 is bound to northeast by West 53rd Street, to the northwest by vacant property, to the southwest by West 52nd Street, and to the southeast by a 25-floor mixed use commercial and residential building. The site was most recently used for light industrial purposes as a printing company known as United Envelope Company, Inc. According to information provided for the building, there is an active above ground storage tank within the building that is used to store fuel oil. The Petroleum Bulk Storage number for this tank is ID# 2-337129. According to the title search, the site is currently owned by Archstone Enterprise LP and Avalonbay Communities, Inc.

If possible, please fax a response to (201) 794-6913 and send a hard-copy response to my attention at the address listed below. Please contact me at (201) 398-4899 x4276 if there are any questions regarding this request. Thank you in advance for your assistance.

Sincerely,
Langan Engineering, Environmental, Surveying and Landscape Architecture, D.P.C.

8-hour Hazardous Waste Operations Site Supervisor Training
Red Cross CPR & First Aid Training

YEARS WITH LANGAN: 5

SUMMARY QUALIFICATIONS

In his 11 years experience as a consulting Geologist, Mr. McMahon has worked on projects for commercial, residential, and public facilities in four states including Pennsylvania, New York, New Jersey, and Connecticut, under various EPA, USACOE, PADEP, NJDEP, and NYSDEC programs, as well as, varying client protocols.

These projects have included the completion of Phase I environmental site assessments and the design and oversight of Phase II investigations of soil, sediments, groundwater, surface water, soil gas, and air. These projects have required coordination of records acquisition and environmental sampling, construction/demolition activities, wetland permitting issues, and report submittals with site development plans. Mr. McMahon also has significant field experience including implementation and management of all phases of environmental projects involving soil, sediment, groundwater, surface water, and soil vapor contamination including Phase I inspections, Phase II site investigations, Remedial Investigations, and Remedial Actions.

Many of these projects have included his oversight of remedial actions to clean up or mitigate hazardous waste sites in rural, urban, and industrial settings. These remedial action designs have included in-situ soil remedial injections, contaminated soil removal/disposal management plans, and soil vapor intrusion mitigation systems including advanced vapor barriers and sub-slab depressurization systems.

RELEVANT EXPERIENCE

NYSDEC (Region 7) Site Remedial Investigation
Project Geologist at a former industrial facility in Hillcrest, New York. Responsibilities included installation and sampling of soil gas implants, indoor, and sub-slab air sampling according to NYSDEC and DOH standards. Coordinated and directed junior field staff for the field investigation, directed remedial investigation contractor coordination, and completed preliminary reports.

Former Manufactured Gas Plant Site Remedial Investigation
Project Geologist at a Former MGP site in Geneva, New York. Responsibilities included excavation of test pits, installation of bedrock and overburden monitoring wells, bedrock core logging, borehole geophysical surveys and hydraulic conductivity surveying. Sampling responsibilities included groundwater, soil, surface soil and water, sediment and indoor air. Also responsible for subcontractor coordination.

NYSDEC (Region 2) Superfund Site Remedial Investigation
Project Field Geologist at a former dry-cleaning supplies warehouse in Jamaica, Queens, New York. Responsibilities included supervising subcontractors, collecting soil, groundwater, and soil gas samples for laboratory analysis, coordinating hazardous waste disposal, and vendors, and monitoring air quality to conform with URS health and safety standards. The site was located on a busy commercial parking lot, which required daily coordination with client.

NYSDEC (Region 5) Superfund Site Remedial Investigation
Project Field Geologist at a former HAZMAT fire training area in Whitehall, New York. Responsibilities included supervising subcontractors, collecting environmental samples, conducting slug tests to estimate the hydraulic conductivity of various soil facies. The data collected was used in GIS to predict the rate of contaminant migration, which helped close the site. Coordination of field staff, vendors, and business owners at a neighboring site were essential to the successful completion of this project.

Former Manufactured Gas Plant Site Investigation/Confidential Client
Field Geologist for a bedrock investigation at a former MGP facility in Mechanicville, New York. Responsible for supervision of subcontractors, and collection of environmental samples.

Remedial Investigation of Industrial Facility/Confidential Client
Field Geologist responsible for soil gas survey at a former industrial facility in Batavia, New York. Responsibilities included supervision of junior field staff, set-up and operation of field monitoring equipment, and installation and collection of Gore-sorbers.

OGS Geotechnical Survey for Construction
Field Geologist responsible for conducting a geotechnical investigation at an active medium security prison in Rome, New York. Responsible for supervising subcontractor, coordinating with OGS and collecting geotechnical samples for a construction site.

Report Tabulation/Various Clients
Compile and organize historical soil, groundwater elevations, and groundwater analytical data using Microsoft excel, access, word, adobe acrobat and other software programs. Information is utilized for the construction of maps and cross-sections to evaluate the nature, extent and fate of soil and groundwater contamination. Also Bentley Microstation for the generation of engineering maps.

STEVEN CIAMBRUSCHINI, P.G., L.E.P.
Principal / Vice President

Environmental Site Assessments/Investigations
Demolition/Asbestos Abatement Management
Brownfield Remediation
UST Management

EDUCATION

Montclair State University, New Jersey: M.S. Geology
Montclair State University, New Jersey: M.A. Environmental Science
Cook College, Rutgers University, New Jersey: B.S. Environmental Science

PROFESSIONAL REGISTRATIONS

Underground Storage Tank Certification, New Jersey
AHERA Asbestos Inspector
Professional Geologist - DE, KY
Licensed Environmental Professional - CT

YEARS WITH LANGAN **23**

SUMMARY QUALIFICATIONS

Mr. Ciambruschini has over 29 years experience in hydrogeologic and environmental investigations including management of environmental and geotechnical investigations relating to petroleum and chlorinated solvent spill sites, underground storage tank sites, manufactured gas plant sites, landfills, wastewater treatment facilities and industrial/commercial sites. His experience includes managing environmental compliance audits, remedial investigation, pre-acquisition due diligence and permitting assessment, feasibility studies and design, construction and operation of complex innovative remediation systems to treat, contain and recover contaminated soil and groundwater. These projects are managed under various NJDEP, PADEP, NYDEC, NYCDEP and CTDEP programs. Mr. Ciambruschini provides consultation to a diverse group of clients including private developers, utilities, retail and industrial facilities and is expert in assessing remediation options and funding options under various state and federal grant, loan and tax reimbursement programs including Brownfield programs.

RELEVANT EXPERIENCE

Former Petroleum Refinery - Nassau County, New York (Brownfield) – Senior Project Manager for remediation of a former oil storage and distribution facility on a 15-acre site to allow for retail redevelopment. Remedial investigation including conventional soil and groundwater drilling and sampling programs to assess the extent of shallow petroleum and deep chlorinated volatile organic contamination, aquifer testing and assessment of tidal influence on groundwater flow and nutrient concentrations in groundwater, geophysical assessment of stratigraphic zones and contaminant pathways and pre-design assessment of physical and chemical soil properties. Remedial design and pilot testing for oil recovery from an upper aquifer zone included biosparging in conjunction with separate phase groundwater recovery and remediation for an underlying sand unit included chemical oxidation in conjunction with biosparging/biotreatment as a polishing stage. Design of a multi-layered sub-slab soil venting and monitoring system was also conducted to allow for future site reuse.

Unilever USA - New Jersey (State Hazardous Waste Sites, RCRA, ISRA) – Conducted and designed remedial investigations that included soil and groundwater sampling, geophysical surveys, CPT, aquifer testing and ecological risk assessment (sediment sampling and bioassay) to assess impacts to glacial lacustrine sediments and fractured bedrock (along the Ramapo Fault) in former UST, lagoon and manufacturing areas of former pharmaceutical and textile plants. Designed cost effective biosparging and nutrient recirculation systems to address the presence of petroleum and chlorinated solvent impact to soil, groundwater, surface water and onsite wetlands and coordinated wetland permitting to allow for excavation and mitigation of impacted wetland areas. Innovative technologies including thermal treatment and biosparging have been utilized or proposed to address deep, compact soils while conventional techniques including deep excavation using sheeting and dewatering have been conducted to address more accessible impacted areas. Data management tools including EQUIS, GIS and GINT are utilized to manage data generated from on going sampling of over 40 monitoring wells and operation and monitoring of various remediation systems.

Pan Graphics – Bergen County, New Jersey (ISRA) – Senior project manager for investigation and remediation of a former chromium plating facility. Detailed investigation of chromium impacts to soil, groundwater and onsite structures and completion of remediation using insitu injection of calcium polysulfate to address onsite contamination. Offsite investigation conducted to assess impacts to subsurface utilities and adjoining residential buildings. Offsite receptor survey and risk assessment completed and remedial alternatives currently being evaluated.

New Jersey Turnpike – Various Sites - Senior project manager for General Environmental Services contract for the New Jersey Turnpike and Garden State Parkway. Key completed projects included sampling and risk assessment survey of air quality at toll booths along facility roadways; training, permitting and coordination associated with the NJ Stormwater Quality Regulations for Roadway and Maintenance facilities; Remedial Investigation and development of Remedial Alternatives for a former landfill and tar manufacturing site located along the Turnpike; development of a environmental permitting guide for use by all NJ Turnpike employees to determine permitting requirements and schedules for roadway projects, numerous underground storage tank closures at office and maintenance facilities; and natural resource permitting including threatened and endangered species surveys, wetlands surveys and permitting and Pinelands permitting at multiple facilities.

Watermark North Bergen, New Jersey (Voluntary Cleanup) - Completed remedial investigation, development of soil management and Health and Safety Plans and associated monitoring and submittals documenting implementation of engineering and institutional controls at a residential development completed on impacted fill material. Coordination with Langan's geotechnical and civil engineering disciplines was required in order to maximize soil reuse options, properly manage impacted groundwater during construction (design of waterproof subsurface building areas) and document site wide cap within a Remedial Action Report. Biennial Certification is currently being conducted to document maintenance of the site wide engineering control.

Flintkote Site, East Rutherford, New Jersey (Voluntary Cleanup) - Investigation and Remediation of a former asphalt roofing manufacturing facility. Investigation included subsurface investigation within and outside of existing building to delineate the extent of tar impacted soil and groundwater, geophysical investigation to assess the presence of USTs, delineation of contamination associated with large ASTs and subsurface holding tanks and associated piping. Asbestos and lead-base paint surveys of the existing building was also completed. Remediation

including removal of No. 6 fuel oil USTs, soils impact by PCBs, metals and dioxin, and containment of NAPL associated with discharges of No. 6 oil and roofing tar.

Liberty Science Center, New Jersey (EO 215) – Completed Environmental Assessment Survey (EAS) and Preliminary Assessment and Site and Remedial Investigation of a former landfill and railyard facility in conjunction with initial construction and subsequent expansion of the LSC facility. Completion of soil management plan and oversight of soil management and health and safety monitoring associated with onsite reuse and capping of impacted soil during construction. Designed and provided installation oversight of a subslab methane venting system for the building expansion and submitted Remedial Action Reports and subsequent certifications of engineering controls during various phases of construction.

Con Edison Appendix B Spill Sites - This program includes investigation and remediation of spills of dielectric and fuel oil feeder lines throughout NYC. Detailed assessment using geophysical surveys, mapping, and drilling techniques to assess the location of utility corridors below heavily trafficked roadways and contaminant migration pathways is conducted and coordinated with various city agencies including MTA, DOL, and NYCDOB. Langan has designed, installed, maintained and operated oil recovery systems and coordinated cleanup of dielectric fluid spills into subsurface structures including subways within and below the most heavily traveled roadways in Manhattan. Under Langan's guidance, fifteen sites have been assessed, remediated and cases closed by NYSDEC. Numerous product recovery systems are currently being operated and continue to recover hundreds of gallons of oil impacted groundwater via cost efficient skimming and recovery methods.

Blue Back Square - West Hartford, CT (UST, Transfer Act, Brownfield) - Project manager responsible for environmental engineering for the urban redevelopment of downtown West Hartford at a former automobile repair garage. BBS is a million square foot mixed-use development consisting of residential, office, retail, municipal parking garages, public buildings and public spaces. In order to allow for site redevelopment, Langan was tasked with delineated the extent of impacted soil and groundwater in the area of underground storage tanks, hydraulic lifts, former repair and painting areas and floor drains and designing an implementing a soil management plan during construction to allow for reuse of geotechnically suitable soils below proposed building areas. In addition to coordination of health and safety and soil reuse requirements during site work, Langan provided required documentation of remediation (soil excavation, disposal and reuse) as the Licensed Environmental Professional for the project and designed and is currently implementing a groundwater monitoring program in conjunction with permitting for building sump designs for discharge in impacted groundwater and use of sub-slab venting systems to address volatilization of contaminants from groundwater into buildings to allow for continued use of the site.

Former MGP Site – Brooklyn, New York (VCP Site) – Project director responsible Site activities including installation of test borings and monitoring wells, excavation of petroleum impacted soils, pilot testing of vapor extraction and thermal remediation technologies were conducted to address contamination at a former Brooklyn Union Gas site. Langan is currently assessing remediation options, vapor collection/treatment, and long-term ground water monitoring requirements in former gas-holder areas to allow for construction of retail buildings.

Stop & Shop – Emerson, New Jersey - Project director responsible for Preliminary Assessment, Site and Remedial Investigation and Remedial Action of a former dry cleaning, metals plating and maintenance facility. Investigation included soil and groundwater assessment and geophysical surveys and remediation included removal of underground storage tanks, subsurface holding tanks and conveyance piping and demolition and decontamination of former building structures. Groundwater monitoring is currently being conducted in accordance with a CEA to assess both onsite and offsite TCE concentrations.

Brooklyn Law School – Brooklyn, New York (DEC Spill Response Site) – Conducted pre-construction Site/Remedial Investigation activities to assess the extent and impact of petroleum spills from past dumping and underground storage tank discharges. Investigation activities included completion of test pits, test borings and monitoring wells, and review of previous, existing, and proposed site topographic conditions to assess extent of contaminated fill materials, native soil and soil disposal/reuse options.

Greenwich Street Site – Manhattan, New York (DEC, DEP Spill Response Site) – Conducted Preliminary Assessment and Site/Remedial Investigation activities to assess the type and extent of petroleum and chlorinated solvent contamination resulting from past spills from former USTs, fuel oil feeder lines and dry wells at historical garage, industrial and residential facilities. Site Investigation and Remedial Investigation Workplans and Reports and a Health and Safety Plan for proposed site construction were prepared by Langan for submittal to NYSDEC – Division of Environmental Remediation, NYCDEP and the NYC Bureau of Standards and Appeals. A Remediation Plan including hot spot excavation, soil reuse and site capping was approved to these agencies based on a risk-based remedial alternatives analysis.

Proposed Supermarket Sites – North White Plains and White Plains, New York (WCHD Lead Sites) – Conducted site investigations consisting of soil and groundwater sampling at former dry cleaners, auto dealership and repair shop sites to assess impacts of discharges of petroleum contamination from underground storage tanks and hydraulic lifts and feeder lines and of chlorinated solvents from dry cleaning and degreasing operations. Remedial activities included UST removals, and soil excavation and offsite disposal. No further action recommendations were approved by the Westchester County Health Department regarding petroleum releases. Ongoing ground water monitoring is currently being conducted as part of a Voluntary Cleanup Agreement with NYSDEC.

Dayton Plaza – Queens, New York (Inactive Hazardous Waste Site) – Completed Site and Remedial Investigation activities including a completion of test borings and monitoring wells, air sampling to assess contaminant volatilization issues, geoprobe sampling and a tidal elevation survey to assess the extent of chlorinated solvent contamination resulting from past discharges from a dry cleaners. Designed, installed and operated an air sparing/soil vapor extraction system to address elevated levels of tetrachloroethene and vinyl chloride in ground water. The site is currently listed as a Classification 2 Inactive Hazardous Waste Site. As operation of the SVE/AS system has resulted in decreasing contaminant concentrations in soil and ground water, a petition for reclassification has been filed.

Former Macy's Facility – Bloomfield, New Jersey (Voluntary Cleanup – Asbestos/Demolition) Managed/coordinated Remedial investigation and Remedial Action activities to address areas of concern including underground storage tanks and past discharges of chlorinated solvents. Prepared demolition/asbestos specifications for a 500,000 ft^2 building and managed air monitoring and demolition/construction activities relating to the former building and proposed retail building.

Stop & Shop/Edwards Food Stores – Retail/Supermarket Development – Various projects in New Jersey, New York, Pennsylvania and Connecticut requiring completion of Phase I and Phase II Assessments prior to proposed site redevelopment. Coordination and oversight of Remedial Investigation and Remedial Action activities including underground storage tank removals, asbestos abatement, and lead-based paint abatement. Preparation/submittal and review of cleanup plans and bid specifications for completion of investigation/abatement activities and for review by local/ state/federal agencies under voluntary cleanup, Brownfields, Underground Storage Tank, Property Transfer Act, and Environmental Quality Act regulations.

Rubin Organization/Retail Facility, Warrington, Pennsylvania – (Pre-construction Surveys) – Conducted Phase I and Phase II investigations addressing issues including underground storage tanks, asbestos abatement and building demolition. Prepared Hydraulic Investigation regarding surface water drainage issues and impact to groundwater concerns regarding karstic terrain.

Westwood Linen Company, Westwood, New Jersey (Voluntary Cleanup – Demolition/ Redevelopment) Completion of Phase I Assessment, Remedial Investigation and Remedial Action activities at a 70 year old laundry/dry cleaner facility. Remedial investigation activities included aquifer testing and delineation of chlorinated solvents in groundwater, delineation of pesticide contaminated soil and an assessment of impacts to onsite and offsite ecological receptors (wetlands). Remedial Action included excavation, offsite disposal and site restoration of a large area of pesticide contaminated soil. Coordination with site developer and lenders regarding asbestos abatement, tank removals and well abandonment for proposed site redevelopment.

Halby Chemical Sites, Delaware (CERCLA) - Field operations leader responsible for implementation of sampling operations and sampling QC. Preparation of Preliminary Assessment Report and review of Ecological Risk Assessment issues.

Scientific Chemical Processing, Carlstadt, New Jersey (CERCLA) - Onsite contractor coordination for site remediation associated with HDPE liner installation.

Norton-Chemplast, Wayne, New Jersey (ISRA, BUST, NJPDES) - Field investigation and preparation of remedial investigation reports for ISRA investigation of Teflon manufacturing facility. Soil remediation, UST removal, groundwater plume delineation of chlorinated solvents, and aquifer testing completed. Designed and implemented a seismic refraction survey to assess subsurface conditions relative to transport of chlorinated solvents in unconsolidated and bedrock aquifers.

NJ Transit, Lakewood Bus Garage (BUST) - Test borings and monitoring wells completed as part of a subsurface investigation of former underground storage tanks and past discharges from hydraulic lifts. Preparation of RI/RAW for soil and groundwater remediation which included an assessment of innovative technologies to address under-building contaminants. Provided information in RI/RAW for incorporation of petroleum contaminants detected onsite into a site wide Classification Exemption Area.

Norton-Chemplast, Wayne, New Jersey (ISRA) – Preliminary Site Assessment, field investigation and report preparation for a soil and groundwater ISRA investigation of the Nylon 6 casting facility. Design and Implementation of seismic refraction survey to assess bedrock topography and impact on migration of chlorinated solvents.

Wallace & Tiernan - Pennwalt, Belleville, New Jersey (ISRA and BUST) - Field investigation and report preparation for an ISRA investigation of a 70 year old chlorinator manufacturing facility. Areas of environmental concern include fourteen underground storage tanks, drum storage areas, and plating room blow-down. Tank removals and abandonment, asbestos surveys, soil and groundwater remediation completed under ISRA and UST regulations. Groundwater monitoring and assessment of remediation options is ongoing.

S.B. Thomas Depot, Metuchen, New Jersey (BUST) – Completion of a Remedial Investigation to assess the impact of petroleum product discharge from three underground storage tanks to soil and groundwater. Submitted a Remedial Action Work Plan which included a Natural Remediation Compliance Program and a Request for Classification Exemption Area.

County of Sussex, New Jersey (BUST, MOA) - Completion of Phase I Assessment, oversight and coordination of underground storage tank removals, soil investigation of chemical fire pits and debris piles, and waste classification and disposal activities. Investigations conducted under Memorandum of Agreement and NJDEP Landfill Disruption Permit.

Phase I Environmental Assessments - Approximately 100 projects throughout New Jersey, New York, Pennsylvania, Connecticut and Washington.

Branson Ultrasonics, Shelton, Connecticut - Evaluation and determination of local geologic and hydrogeologic conditions to assess pathways of groundwater contamination. Field investigations included installation of bedrock monitoring wells and collection of oriented core samples.

Pierson's Creek, Newark, New Jersey - Development and implementation of a sediment sampling plan designed to assess contaminant concentrations in Pierson's Creek, health and safety protocol and remediation options for sediment treatment/disposal.

ADDITIONAL TRAINING AND SHORT COURSES

Hazardous Waste Site Training, OSHA 29 CFR 1910.120(e) certification
Permitting Hazardous Waste Disposal Facilities: USEPA
Operation and Maintenance of Wastewater Treatment Facilities: Rutgers University
Groundwater Pollution and Hydrology: Rutgers University
Underground Storage Tank Remediation Technology and Regulation Seminars: USEPA/NJDEP
Diagnostic Inspection Workshop for Wastewater Treatment Facilities: USEPA
Remediation of NAPL Contaminated Sites: Stevens Institute of Technology
NJDEP Technical Regulations Seminar
Natural Attenuation of Chlorinated Solvents – LEP Required Course
Statistics for Environmental Professionals – LEP Required Course

Re: Phase I Environmental Site Assessment
530-548 West 53rd Street, 525 West 52nd Street, and 543 West 52nd Street
New York, NY
AKRF Project Number 11057

Dear Ms. Mitrisin

AKRF, Inc. is pleased to submit this Phase I Environmental Site Assessment Report for the properties located at 530-548 West 53rd Street, 525 West 52nd Street, and 543 West 52nd Street, New York, NY (Tax Block 1081, Lot 7501 and a portion of Lot 1). This report includes the findings of a reconnaissance of the Site and an evaluation of readily available historical information and selected environmental databases and electronic records. AKRF, Inc. met the requirements of American Society for Testing and Materials (ASTM) as established by ASTM Standard E1527-05 unless noted otherwise in Section 7.0: "Limitations and Data Gaps".

We appreciate the opportunity to provide you with our services. If you should have any questions or comments regarding the enclosed report, please do not hesitate to contact us.

Sincerely,
AKRF, Inc.

Marcus Simons
Senior Vice President

Neoma Chefalo
Environmental Scientist

EXECUTIVE SUMMARY

AKRF, Inc. (AKRF) was retained by the Clinton Housing Development Company (CHDC) to perform a Phase I Environmental Site Assessment of the Site located at 530-548 West 53rd Street, 543 West 52nd Street, and 525 West 52nd Street New York, NY (the Site). The Site is also identified as Tax Block 1081, Lot 7501 and a portion of Lot 1. At the time of the reconnaissance, the on-Site portions of Lot 1 contained: a four-story commercial building with a ground floor auto body repair shop with an adjacent gravel-lined parking lot (548 West 53rd Street), an asphalt-paved parking lot with a wooden storage shed (542-544 West 53rd Street), a one-story auto body repair garage (540 West 53rd Street), an undeveloped lot used for the staging of construction equipment (530-538 West 53rd Street), and a small vacant lot (543 West 52nd Street). Lot 7501 contained a seven-story commercial/office building formerly used for printing operations (525 West 52nd Street).The Site was located in a mixed-use area - residential, commercial, institutional, and industrial uses including some automotive uses.

This Phase I Environmental Site Assessment was performed in conformance with ASTM Standard E1527-05, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Practice*. Any exceptions to, or deletions from, this practice are described in Section 7.0. The term "Recognized Environmental Condition" means the presence or likely presence of hazardous substances or petroleum at the Site, including the ground, groundwater, or surface water at or under the Site.

This assessment revealed evidence of Recognized Environmental Conditions (RECs). A summary of the findings is as follows:

On-Site RECs

- A review of Sanborn maps and Building Department files indicated historical on-site uses included: multiple auto repair shops, a metal works, a bottling works, a chemical works, a plastics manufacturer, a sheet metal works, a printing facility with a gasoline tank, and a lumber yard. The Site currently includes two auto body repair shops with painting operations, a storage shed, and a commercial/office building formerly used for printing operations and manufacturing. Historical/current uses may have affected the Site subsurface. Potential buried structures from former on-site buildings, possibly containing petroleum underground storage tank (USTs), and/or historic fill of unknown origin, could be present beneath the Site.
- The 525 West 52nd Street address was listed in the regulatory databases as a generator of hazardous wastes for the production of waste streams including ignitable wastes, corrosive wastes and silver associated with former printing operations. This address was also listed on the New York State Department of Environmental Conservation (NYSDEC) Spills database with two closed regulatory status spills (though one appeared to actually relate to an off-Site address) including a release of approximately 25 gallons of transformer oil within a subterranean transformer vault in 2000 that was subsequently cleaned and closed. Historic activities at this facility may have affected the Site subsurface.
- A limited subsurface investigation conducted at 525 West 52nd Street in 2010 identified magnetic anomalies beneath the southern portion of the basement (indicating the potential presence of USTs). Soil and groundwater sampling identified elevated concentrations of semi-volatile organic compounds (SVOCs) and slightly elevated concentrations of metals (zinc and mercury) in soil; and some elevated concentrations of SVOCs in groundwater samples collected from the boiler room and from the southeastern portion of the basement in an area of observed surface staining.
- Apparent drainage structures of an unknown configuration were noted throughout 525 West 52nd Street building. The results of a limited subsurface investigation conducted in 2006 indicated that

these were connected to the municipal sewer system, with the possible exception of two sump pits, three floor drains, and one trench drain located in the basement, that were clogged at the time of the investigation (preventing a determination of their connections), and therefore may allow discharge to the subsurface.

- Portions of the Site (530-538 West 53rd Street and 543 West 52nd Street) were covered with soil likely associated with excavation activities at the adjacent ongoing construction site that may comprise uncontrolled urban fill materials. While no signs of contamination were noted, the quality of this soil is unknown, as former uses of the construction site included industrial/automotive operations including metal works and auto repair shops.

On-Site Issues that are not considered RECs

- During the reconnaissance, a vaulted 7,000-gallon No. 2 fuel oil aboveground storage tank (AST) was observed within the basement of 525 West 52nd Street. This tank is registered under the New York State Department of Environmental Conservation (NYSDEC) Petroleum Bulk Storage (PBS) with ID# 2-337129. Minor staining was observed on the tank exterior and on the vault room floor, but no evidence of a significant release was noted. Two approximately 500-gallon No. 2 fuel oil ASTs were observed within the basement of 538 West 53rd Street that were used to fuel the building's boiler. No significant stains or odors were noted in connection with these tanks.
- A closed status spill was listed for 546 West 53rd Street (corresponding to the northern portion of the Site) relating to a Consolidated Edison generator plant noted as being located on the East River that appears to be associated with an off-site location with an erroneous address listing, and therefore is not considered a REC.
- Suspect asbestos-containing materials (ACMs) were observed during the reconnaissance, including resilient and ceramic floor and wall tile and associated mastic, pipe insulation, duct insulation, electrical panel partitions, electrical insulation, ceiling tile, wallboard, plaster, joint compound and roofing materials in good to poor condition. A 2010 limited asbestos survey conducted at 525 West 52nd Street identified roofing and flashing materials and air cell pipe insulation (and associated mudded joints) as assumed ACM.
- Based on the age of the structures, painted surfaces may contain lead paint. Painted surfaces observed on the exterior and interior portions of the structures ranged from good to poor condition.
- Based on the age of the buildings, electrical equipment (including vaulted transformers) and lighting fixtures on-site may include PCB-containing elements. One hydraulic freight elevator was located in the 525 West 52nd Street building that may include PCB-containing components. No obvious leaks or odors were observed in connection with this equipment or the lighting fixtures. A closed status spill was cited for a transformer vault adjacent to the 525 West 52nd Street building in January of 2000 that was contained and cleaned and subsequently closed (no information pertaining to PCB content was noted in the spill record).

Off-Site RECs

- Sanborn maps and the regulatory database search identified several former automotive facilities elsewhere on the same block including: a garage with a gasoline tank, a welding shop and an auto repair shop (1926-1930 Sanborn map); additional automotive facilities including a filling station on the northeastern portion of the block (1951-1988 Sanborn maps) that was listed in the Brownfield Cleanup Program and on the PBS, RCRA and NY Spills database with documented groundwater contamination including a contaminant plume emanating off site; a taxi repair facility on the southwestern portion of the block (1951 Sanborn map) that was also listed on the NY Spills and PBS

databases; and several repair shops and metal works facilities that were shown adjacent to the Site on the 1926-1988 Sanborn maps. Migration of contamination associated with such uses may have affected the Site subsurface.

- Sanborn maps and the regulatory database search identified industrial and automotive uses on the surrounding blocks between 1907 and 2006 including: auto repair shops, garages with gasoline tanks and a railroad company facility (later developed with an auto storage facility and a garage) on the north-adjacent block; and a twine and hammock manufacturer (later converted to a piano factory), manufacturing uses, auto repair shops and garages with gasoline tanks on the south-adjacent block. Such uses may have affected the Site subsurface.

RECOMMENDATIONS:

- Soil and/or groundwater may have been affected by on- and/or off-site former and current uses. To determine whether on-site subsurface conditions have been affected, a subsurface (Phase II) investigation should be conducted, including laboratory analysis of soil, soil vapor, and groundwater samples. To the extent that redevelopment requires discretionary city approvals (i.e., is subject to CEQR and/or ULURP process), the scope of the investigation is typically subject to pre-approval by the NYC Department of Environmental Protection (NYCDEP). Depending of the findings of the investigation, subsurface disturbance associated with new construction may need to be performed in accordance with an NYCDEP-approved Remedial Action Plan and Construction Health and Safety Plan (RAP/CHASP).
- Future development including soil disturbance could encounter contaminated soil. If evidence of contaminated soil (e.g., stains or odors) is encountered, these materials (and all other materials requiring off-site disposal) should be disposed of in accordance with applicable federal, state and local regulations. Known and any unforeseen USTs should be properly assessed, closed and removed in accordance with state, and local regulations prior to any renovation, demolition or excavation activities with the potential to disturb them. Any on-site drywells or other drainage structures, if encountered, should be assessed and closed in accordance with applicable regulations. Soil intended for off-site disposal should be tested in accordance with the requirements of the receiving facility. Transportation of material leaving the site for off-site disposal should be in accordance with federal, state and local requirements covering licensing of haulers and trucks, placarding, truck routes, manifesting, etc.
- Prior to any renovation or demolition activities with the potential to disturb suspect ACMs, an asbestos survey must be conducted to determine whether these materials are ACMs. If these materials prove to contain asbestos, they must be properly removed and disposed of prior to renovation/demolition in accordance with applicable regulatory requirements.
- Unless there is labeling or test data that indicates that florescent lights, other electrical equipment, and hydraulic fluid are not mercury- and/or PCB-containing, if disposal is required, it should be performed in accordance with applicable federal, state and local regulations and guidelines.
- Any renovation activities with the potential to disturb lead-based paint must be performed in accordance with the applicable Occupational Safety and Health Administration regulation (OSHA 29 CFR 1926.62—*Lead Exposure in Construction*).
- Any containers of cleaning fluids, paints, chemicals, etc. should be properly disposed of in accordance with all federal, state and local regulations.
- If dewatering is necessary during site construction, the discharge must meet NYCDEP discharge regulations.

1.0 INTRODUCTION

AKRF, Inc. (AKRF) was retained by the Clinton Housing Development Company (CHDC) to perform a Phase I Environmental Site Assessment of the Site located at 530-548 West 53rd Street, 543 West 52nd Street, and 525 West 52nd Street New York, NY (the Site). The Site is also identified as Tax Block 1081, Lot 7501 and a portion of Lot 1. At the time of the reconnaissance, the Site contained a four-story commercial building with a ground floor auto body repair shop with an adjacent gravel-lined parking lot (548 West 53rd Street), an asphalt-paved parking lot with a wooden storage shed (542-544 West 53rd Street), a one-story auto body repair garage (540 West 53rd Street), an undeveloped area used for the staging of construction equipment (530-538 West 53rd Street), and a small vacant lot (543 West 52nd Street) on Lot 1; and a seven-story commercial/office building formerly used for printing operations (525 West 52nd Street) on Lot 7501. The Site was located in a residential, commercial, institutional, and industrial area with some automotive uses.

The scope of services for this assessment was in conformance with ASTM Standard E1527-05 (*Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Practice*), with any exceptions to, or deletions from, this practice described in Section 7.0: "Limitations and Data Gaps." AKRF's scope addressed the ASTM scope by conducting the following:

- Observations of the Site (reconnaissance) were made to identify potential sources or indications of hazardous substances, including: aboveground storage tanks (ASTs); underground storage tanks (USTs); tank vents and fill ports; transformers and other items that could contain polychlorinated biphenyls (PCBs), drums or areas where hazardous materials were used, stored, or disposed; stained surfaces and soils; stressed vegetation, leaks, odors. In addition, where possible, neighboring properties were viewed, but only from public rights-of-way, to identify similar concerns.
- Readily available geological and groundwater (hydrogeological) information were evaluated to assist in determining the potential for contaminant migration within, from and onto the Site.
- Historical fire insurance maps and historical city directories for the Site and adjacent properties were reviewed to evaluate historic land uses.
- The following federal regulatory databases were reviewed to determine the regulatory status of the Site and properties within the ASTM-specified radii: National Priority List (NPL); Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS); Emergency Response Notification System (ERNS); Toxic Chemical Release Inventory System (TRIS); the Permit Compliance System of Toxic Wastewater Discharges (WWD); the Air Discharge Facilities Index (ADF) the USEPA Civil Enforcement Docket. The federal listing of facilities which are subject to corrective action under the Resource Conservation and Recovery Act (CORRACTS) is discussed with the State databases of RCRA listings.
- The following state regulatory databases were reviewed to determine the regulatory status of the Site and properties within the ASTM-specified radii, hazardous material spills (SPILLS); Resource Conservation and Recovery Act Notifiers (RCRA); Chemical Bulk Storage (CBS); Solid Waste Facilities (SWF); Petroleum Bulk Storage (PBS); State Inactive Hazardous Waste Disposal Sites (SHWS); Major Oil Storage Facilities (MOSF); Historic Utility Sites; Environmental Restoration Program (ERP); Voluntary Cleanup Program (VCP); and Brownfield Cleanup Program (BCP).
- A review of pertinent NYC Fire Department (obtained as part of the database search) and online Department of Buildings records for the Site was conducted.

In addition to the ASTM Scope items, AKRF's scope (unless noted in Section 7.0) included:

- A state database of radon concentrations was used to determine whether indoor radon levels in the area (data are by county) generally comply with United States Environmental Protection Agency (USEPA) guidelines.

2.0 SITE DESCRIPTION

On May 8 and May 31, 2012, Ms. Neoma Chefalo of AKRF conducted reconnaissance of the Site accompanied by Ms. Alissa Mitrisin, a representative of the Clinton Housing Development Company. Mr. Gerry Ritterman, of Ritterman Capital, Inc. provided access to the 525 West 52nd Street building. At the time of the inspections, the weather was clear and between approximately 75-85 ºF, the visibility good, and the premises adequately illuminated. The Site was inspected for the presence of stained surfaces and soils, stressed vegetation, storage tanks, drums, leaking pipes, transformers, suspect asbestos-containing materials, suspect lead-containing paint, and any other evidence of hazardous material usage and storage on-site. Photographs from the reconnaissance are included in Appendix A.

2.1 General Site Conditions

The Site is identified as Tax Block 1081, Lot 7501 and a portion of Lot 1. The Site contained a four-story commercial building with a ground floor auto body repair shop with an adjacent gravel-lined parking lot (548 West 53rd Street), an asphalt-paved parking lot with a wooden storage shed (542-544 West 53rd Street), a one-story auto body repair garage (540 West 53rd Street), an undeveloped area used for the temporary staging of construction equipment (530-538 West 53rd Street), a small vacant lot (543 West 52nd Street) and a seven-story commercial/office building formerly used for printing operations (525 West 52nd Street).

Block 1081, Lot 1

548 West 53rd Street

548 West 53rd Street was occupied by a four-story commercial building with a ground floor auto body repair shop and an adjacent gravel-covered parking area. Interior finishes included painted brick, gypsum board and concrete walls and concrete, and wood floors and drop-ceiling tiles. A small partial basement was present under the northern portion of the building that contained a boiler room with two approximately 500-gallon fuel oil ASTs used to fuel the boiler. The tanks' vent pipe was located in the West 53rd Street sidewalk immediately outside of the building. A sump pit was noted adjacent to the boiler with a small amount of standing water; no sheen or odors were noted. No significant stains or odors were observed in connection with the ASTs or boiler system. The remainder of the basement contained utility meters and miscellaneous water piping. The ground floor was occupied by Dave's Collision Repairs, an auto body repair shop. At the time of the reconnaissance, automotive spray painting operations were in progress. Small containers (5 gallons or less) of automotive fluids, cleaners and paints were stored on shelving and on the floor throughout the first floor. No significant cracks in the concrete floor or staining were noted. The second floor was locked and inaccessible. The third and fourth floors comprised vacant commercial spaces. No staining or evidence of a material release was noted in the inspected areas within the building. A small gravel-covered parking area was located east-adjacent to the building. Some minor apparent oil staining was noted on the gravel surface, however no evidence of a significant material release was observed. Small piles of household trash and apparent construction debris (i.e., bricks, concrete and stone) were present on the southern portion of the parking lot.

542-544 West 53rd Street

542-544 West 53rd Street contained an asphalt-paved parking lot with a wooden storage shed. The storage shed contained four metal corrugated rollup doors. Access was unavailable to the storage shed at the time of the site reconnaissance. According to Ms. Mitrisin, the shed is used for the storage of construction materials. The asphalt-paved parking area adjacent to the shed contained several parked vehicles. The pavement was in good condition, with no significant cracks, stains or leaks noted.

540 West 53rd Street

540 West 53rd Street was occupied by a one-story auto body repair garage with no basement. Interior finishes included painted concrete block walls and a concrete floor. The building was heated by ceiling-mounted natural gas-fired area heaters. The interior contained several parked vehicles, work areas with apparent spray painting tools and equipment and a spray painting booth. Numerous small containers (5 gallons or less) of paints, lacquers and paint thinners were stored in the spray booth on shelving and the concrete floor. Additional containers of paints and paint thinners were located in a small plywood loft area on the southern portion of the building. No significant stains or leaks were noted. Several oxygen gas cylinders used in spray painting operations were stored on the concrete floor. A small rectangular metal floor plate covering apparent electrical wiring was observed immediately north of the entrance of the building.

530-538 West 53rd Street

530-538 West 53rd Street comprised an undeveloped area used for the temporary staging of construction equipment and vehicles for an ongoing construction site immediately south of the property. The ground surface was covered with soil (apparently from the excavation activities at the adjacent construction site). A small temporary office trailer was located on the northwestern corner of this area. No evidence of a material release was noted in this area. Ms. Mitrisin indicated that a three-story structure was located in the western portion of this area (538 West 53rd Street) but was demolished within the last year.

543 West 52nd Street

543 West 52nd Street consisted of a small vacant lot that was covered with soil: likely from the excavation of the adjacent construction site. While no signs of contamination were noted, the quality of this soil is unknown, as former uses of the construction site included industrial/automotive operations including metal works and auto repair shops.

Block 1081, Lot 7501

525 West 52nd Street

525 West 52nd Street contained a seven-story commercial/office building with a basement and a loading dock area on the eastern side. The northern portion was four stories, the southern portion seven stories and the eastern portion three stories. The building had brick, concrete and stone walls with a superstructure of structural steel. Exterior walls featured brick siding. The flat roof was covered with a smooth-surfaced built-up and rolled roofing system. Interior finishes included: concrete floors, painted and unpainted brick, concrete and gypsum board; and open ceilings exposing overhead ductwork. The structure contained one traction passenger elevator, two traction freight elevators, and one hydraulic freight elevator. The eastern portion of the building is heated with natural gas and the remainder of the building is heated by a No. 2 fuel oil-fired boiler system. Several office areas are cooled with electric packaged air-conditioning units and/or window-mounted air conditioning units.

The basement of the building contained electrical equipment within a switchgear room, utility meters, two fuel-oil fired boilers with an associated 7,000-gallon No. 2 fuel oil AST in a concrete block vault, and a natural gas-fired boiler. The tank vent pipe was noted immediately south of the building. Minor staining was noted on the tank exterior and on the concrete floor within the tank vault. No evidence of a significant material release was noted within (or outside of) the vault. Spray painted areas were present on the concrete floor of the basement, indicative of a former geophysical investigation. Several cut metal pipes of an unknown purpose were observed extending through the basement floor on the southern portion of the building. Apparent sump pits and floor drains were noted within the boiler room, switchgear room and on the central and northwestern portions of the basement. No staining or odors were noted in connection with the drains or sumps. The configuration of these drainage structures was investigated in a 2006 subsurface study discussed further in Section 6.0.

The first floor contained a lobby/reception area, office space, a loading dock on the southern portion; and a vehicle storage area with a dispatch office for a town car service on the northern portion. The remaining floors contained vacant manufacturing space and accessory offices that were used for printing/lithographic operations until 2009, according to Mr. Ritterman. Small containers (5 gallons or less) of cleaners and paints were stored in maintenance closets within the building, with no associated leaks or spills noted. No evidence of current bulk chemical generation or storage was noted in the building. An apparent transformer vault was noted south-adjacent to the building within the West 52nd Street sidewalk.

2.2 Topography and Hydrogeology

The surface topography at the Site was relatively level. Based on the U.S. Geological Survey, Central Park, NY Quadrangle (1979) map, the Site is at an elevation of approximately 23 feet above the National Geodetic Vertical Datum of 1929 (an approximation of mean sea level). The approximate depth to bedrock is 10 to 20 feet below grade surface. Groundwater is expected at an approximate depth of 15 feet below grade (but may be perched above shallow bedrock), and likely flows in a westerly direction toward the Hudson River, which is approximately 800 feet away. However, actual groundwater flow at the site is likely influenced by the north-south underground Amtrak railroad tracks abutting the Site to the east and may also be affected by other factors including past filling, underground utilities and other subsurface openings or obstructions such as cellars, bedrock geology, and other factors beyond the scope of this study. Groundwater in Manhattan is not used as a source of potable water.

2.3 Storage Tanks

2.3.1 Underground Storage Tanks (USTs)

Historical Sanborn fire insurance maps identified a buried gasoline tank at 525 West 52nd Street on maps from 1951 to 1988. A 2010 Geophysical Investigation (discussed further in Section 6.0) indicated magnetic anomalies indicative of USTs on the southern portion of the basement. During the site reconnaissance, cut metal piping was observed on the southern portion of the basement floor that may be associated with historic USTs. Potential buried USTs may be located beneath this building and other portions of the Site (e.g., within former automotive repair areas and beneath former structures).

Off-site USTs are discussed in Section 4.2.2.

2.3.2 Aboveground Storage Tanks (ASTs)

During the site inspection, a vaulted 7,000-gallon No. 2 fuel oil AST was observed within the basement of the 525 West 52nd Street building (on the eastern portion of the Site) and is registered under NYSDEC PBS ID# 2-337129 with an installation date of 1960. Minor staining was observed on the tank exterior and on the vault room floor; no evidence of a significant material release was noted in connection with the AST. The fill port and vent pipe for the AST were located immediately south of the building, within the West 52nd Street sidewalk. Two approximately 500-gallon No. 2 fuel oil ASTs were noted within the basement of 538 West 53rd Street (on the northwestern portion of the Site) that were used to fuel the building's boiler. The fill port and vent pipe for the tanks were located in the West 53rd Street sidewalk immediately outside of the building. No significant stains or odors were noted in connection with the tanks.

Off-site ASTs are discussed in Section 4.2.2.

2.4 Polychlorinated Biphenyls (PCBs)

Prior to 1979, polychlorinated biphenyls (PCBs) were widely used for their fire-retarding properties in the cooling oil of electrical equipment such as transformers, capacitors, switches and voltage regulators. Based on the age of the buildings, electrical equipment and lighting fixtures on-site may include PCB-containing elements. One hydraulic freight elevator was located in the 525 West 52nd Street building that may include PCB-containing components. No obvious leaks or odors were observed in connection with this equipment or the lighting fixtures.

2.5 Lead-Based Paint

The use of lead-based paint in commercial structures was severely restricted by the Consumer Products Safety Commission in 1977. Lead-based paint is potentially hazardous when in a deteriorating condition (i.e., chipped, broken, crumbling, or pulverized). Lead is potentially harmful to humans, particularly children, if ingested, inhaled or otherwise absorbed.

Based on the age of the structures, painted surfaces may contain lead paint. Painted surfaces observed on the exterior and interior portions of the structures ranged from good to poor condition.

2.6 Utilities

Consolidated Edison provided electricity and natural gas to this area of Manhattan. The Site was connected to the municipal water and sewer systems though portions of the drainage system may not be (see June 2006 study in Section 6.0).

2.7 Waste Management and Chemical Handling

Private carters remove solid waste from the Site structures. The on-site automotive repair shops (538 and 540 West 53rd Street) stored small containers (5 gallons or less) of automotive fluids, paints, lacquers and paint thinners on shelving and on concrete floors. No evidence of a significant material release was observed. The 525 West 52nd Street building was listed as a RCRA generator for the production of ignitable wastes, corrosive wastes and silver associated with former printing operations.

2.8 Asbestos-Containing Materials (ACM)

Asbestos, a known human carcinogen, is a generic name assigned to a group of naturally occurring minerals exhibiting high tensile strength and possessing excellent fire resistance and

insulating properties. These minerals include chrysotile, amosite, crocidolite, actinolite, tremolite and anthophyllite. Asbestos is commonly found as a component of building materials including: Thermal System Insulation (TSI), spray-applied fireproofing, spray- or trowel-applied surfacing materials, vinyl asbestos floor tiles and sheeting, plaster, sheetrock, ceiling tiles, fire door fill, roofing materials, thermal gaskets, mastics, and a range of other products.

Building materials containing greater than one percent asbestos are considered to be Asbestos-Containing Materials (ACMs). ACMs are classified as friable or non-friable. Friable ACMs are those which can be crumbled, pulverized, or reduced to powder when dry by hand or other mechanical pressure. Friable ACMs, such as thermal system insulation and spray-applied fireproofing, are generally associated with a higher risk of releasing potentially hazardous fibers than non-friable ACMs, such as vinyl floor tiles and built-up roofing materials.

Suspect ACMs were observed in the on-site structures during the site visit, including resilient and ceramic floor and wall tile and associated mastic, pipe insulation, duct insulation, electrical panel partitions, electrical insulation, ceiling tile, wallboard, plaster, joint compound and roofing materials in good to poor condition. ACM may also be present in other locations within the buildings. Documentation pertaining to a 2010 limited asbestos survey conducted at 525 West 52nd Street included a limited inspection of the buildings to identify suspect ACM; and collection of limited samples of suspect ACM for analysis of suspect ACM at a New York State Department of Health-approved laboratory. Roofing and flashing materials and air cell pipe insulation (and associated mudded joints) were identified as assumed ACM, other sampled materials including gypsum board, vinyl floor tile and mastic; brick and concrete mortar; base board molding and mastics; ceiling tiles; fire proofing; plaster and soft concrete were found to be non ACM-containing from the sampled areas.

3.0 ADJACENT LAND USE

West 53rd Street abutted the Site to the north, followed by residential/commercial buildings undergoing construction, and a garage for the AT&T building located on the eastern portion of the block. Mixed use residential/commercial structures abutted the Site to the east. An ongoing construction site and a residential building with a theatre abutted the Site to the south, followed by West 52nd Street, beyond which were residential and commercial structures. Mixed use residential/commercial buildings abutted the Site to the west.

4.0 SITE HISTORY AND RECORDS REVIEW

4.1 Prior Ownership and Usage

4.1.1 Historical Maps

Historical insurance maps were reviewed for indications of industrial usage or other evidence suggesting the use or disposal of hazardous materials on or adjacent to the subject property. Specifically, Sanborn Fire Insurance Maps from 1892, 1907, 1911, 1926, 1930, 1951, 1976, 1979, 1988 and 2006 were reviewed.

1892

The Site was occupied by tenements (some partially constructed) and a vacant lot on the northern portion, and a stable and tenements on the southern portion.

The southern abutting structures consisted of three five-story tenements, a stable, a two-story dwelling and a wagon factory, followed by West 52nd Street. The remainder of the subject block was occupied primarily by tenements. A school was noted on the western portion of the subject block. The Site was surrounded primarily by tenements and stables with some commercial and industrial uses to the north across West 53rd Street and to the south, across West 52nd Street including the Central Park, North and East River Railroad Company facility with several buildings (including repair shops) on the eastern portion of the north-adjacent block. A twine and hammock manufacturing building (with a dye house) was located on the central portion of the south-adjacent block. A coal and wood yard was noted on the southeastern portion of the south-adjacent block.

1907-1911

A bottling works and chemical works facility was located at 538 West 53rd Street, on the northern portion of the Site. A stable for a truckman was noted on the southern portion of the Site at 543 West 53rd Street. Several of the tenements on the Site contained storefronts.

The remainder of the block contained several additional stables, storehouses, an unspecified commercial building and a school. The surrounding area was increasingly commercial and industrial with several commercial and manufacturing facilities shown on the south-adjacent block including a piano factory, tire works, a wagon painter, a laundry, a toy manufacturer, a "rubberine" factory and several unspecified factories. The repair shops on the north-adjacent block had expanded and a flooring, cabinet and upholstery shop was noted on the south-central portion.

1926-1930

The former chemical and bottle works plant at 538 West 53rd Street was occupied by a theatrical scenery manufacturer. The former stable on the southern portion of the Site was redeveloped with a community center.

The surrounding properties were increasingly commercial and industrial, with several facilities shown on the on the eastern portion of the remainder of the block including a welding shop and a garage with a buried 550-gallon gasoline underground storage tank. An auto repair facility was shown on the south-adjacent property at 539 West 52nd Street. The Railroad Company on the northern block was labeled Third Avenue Railway System with an oil room noted in a building on the eastern portion, and a substation noted on the northwestern portion. The former repair shops on the north-adjacent block were occupied by an opera house. The remainder of the northern block was increasingly industrial with several auto repair shops, metal works shops and a woodworking and a laundry facility noted on the central and western portions. The former rubberine manufacturer on the western portion of the south-adjacent block was occupied by a two-story garage with a buried 550-gallon gasoline tank. An ornamental plastering shop was noted on the southwestern portion of the southern block. The surrounding area contained additional commercial, manufacturing and auto-related properties and included a piano manufacturing company, machine shop, lumber storage yards and a steam laundry facility on the southern block.

1951

The eastern portion of the Site at 530-536 West 53rd Street was vacant aside from a small office on the northwestern portion. A plastics manufacturer was located at 538 West 53rd

Street. An auto repair shop occupied 540 West 53rd Street. An army exchange warehouse occupied 544 West 53rd Street. Artist studios with storage were located at 548 West 53rd Street. The southern portion of the subject Site contained a commissary at 543 West 52nd Street. Due to the poor quality of the map, the building at 520-528 West 53rd Street and 525-531 West 52nd Street could not be clearly identified.

The south-adjacent property contained metal works shops at 535-539 West 52nd Street and a paint spraying shop at 533 West 52nd Street. The remainder of the block was primarily commercial and industrial in nature with additional commercial buildings, factories and auto repair shops including a taxi garage and repair shop on the southwestern portion. The north-south New York Central Railroad improvement right-of-way was shown below the eastern portion of the block (including beneath the northeastern portion of the Site). A filling station with six gasoline tanks and grease pits was noted on the northeastern portion of the remainder of the block. The north-adjacent block across West 53rd Street became increasingly industrial in nature with several factories, metalworking shops, garages, and auto repair facilities with gasoline tanks noted. The former railroad company on the north-adjacent block was occupied by the Madison Storage Warehouse Company (automobile storage). A U.S. Post Office garage was located on the central portion of the north-adjacent block. A Chinese laundry and automotive garage were noted on the east-adjacent block. An auto repair shop was located on the southwestern portion of the south-adjacent block, in place of the former plaster shop. A metal works and auto repair shop was noted on the northwest portion of the south-adjacent block.

1976-1979

Several changes were noted on the Site from the 1951 map. The plastics manufacturer at 538 West 53rd Street was occupied by a warehouse. The former army exchange warehouse at 544 West 53rd Street comprised an auto repair shop. The former auto repair shop at 546 West 53rd Street comprised a vacant lot. The commissary at 541-543 West 52nd Street contained metal works shops. The art studio (548 West 53rd Street) on the 1951 map was occupied by an unspecified flat. A printing facility with a gasoline tank was noted on the eastern portion of the Site (525 West 52nd Street). The southern portion of the building comprised seven stories and was built in 1929; the northern portion was built in 1937. No further significant changes were noted on the Site.

The former metal works shop at 537 West 52nd Street, south-adjacent to the Site, was occupied by an auto repair shop. The remainder of the block remained primarily industrial and commercial in use, as noted on the 1951 map. The former Madison auto storage warehouse facility on the north-adjacent block was occupied by the N.Y. Telephone Co. building and a garage. Several of the lots on the central portion of the north-adjacent block were vacant. The majority of the lots on the central portion of the south-adjacent block were vacant. Several parking lots and a public school were noted on the east-adjacent block. No further significant changes were noted in the surrounding area.

1988

The former warehouse at 538 West 53rd Street noted on the 1976 map was occupied by an auto repair shop. The former printing facility on the eastern portion of the Site at 525 West 52nd Street was relabeled as United Envelope Company, Inc., with the current three-

story loading dock shown on the east side of the building. No further significant changes were noted on the Site.

The former south-adjacent auto repair shop and metal works shops at 535-537 West 52nd Street were razed and comprised a parking lot. The remainder of the block remained primarily commercial and industrial in use. The central portion of the north-adjacent block comprised a parking lot. The Clinton Manor Apartment complex occupied the central portion of the south-adjacent block. No other significant changes were noted in the surrounding area.

2006

The former sheet metal works building at 543 West 52nd Street comprised a vacant lot. The former auto repair shop at 542-544 West 53rd Street contained a parking lot and a shed. The former United Envelope Company, Inc. at 525 West 52nd Street was listed as condominiums. No further significant changes were noted on the Site.

The south-adjacent block was occupied by multistory residential buildings, several unspecified factories, a railroad right-of-way, an auto repair shop, community gardens and commercial/residential buildings.

To summarize, the Sanborn Maps indicated that the Site was occupied by tenements and stables since at least 1892. Historic site uses included several auto repair shops, metal works facilities and other miscellaneous factory buildings including: a bottling works and chemical works facility was located at 538 West 53rd Street (as noted on the 1907 Sanborn map) that was subsequently occupied by a theatrical scenery manufacturer and a plastics manufacturer between circa 1926 and 1951; an auto repair shop at 540 West 53rd Street (as shown on the1951 Sanborn map); an auto repair shop at 544 West 53rd Street (as noted on the 1976-1988 Sanborn maps); and a sheet metal works at 543 West 52nd Street (as noted on the 1976-1988 Sanborn maps). The eastern portion of the Site was occupied by a printing facility on the 1976-1979 map that was subsequently occupied by the United Envelope Company, Inc. (as shown on the 1988 map) and unspecified condominiums (2007 as shown on the map).

Historic uses on the remainder of the block included a garage with a gasoline tank, a welding shop and an auto repair shop (1926-1930 Sanborn map); with additional automotive facilities including a filling station on the northeastern portion of the block (1951-1988 Sanborn maps) a taxi repair facility on the southwestern portion of the block (1951 Sanborn map) and several repair shops and metal works facilities shown between 1951 and 1988. The north-adjacent block contained numerous auto repair shops, garages with gasoline tanks and a railroad company facility with several buildings (including repair shops) as noted on the 1892 through 1951 Sanborn maps that were later developed with an auto storage facility and a Long Distance Center for N.Y. Telephone Company with an associated garage. Industrial uses were shown on the south-adjacent block between 1892 and 2006 including a twine and hammock manufacturer (later converted to a piano factory), unspecified factories, auto repair shops and garages with gasoline tanks (most of these facilities were subsequently redeveloped with residential or commercial structures between 1988 and 2006). Such historic uses may have affected the Site subsurface.

4.1.2 Historical Aerial Photographs

Since historical fire insurance maps were available for the Site (and surrounding area) and these maps included information relating to land use, aerial photographs would, most likely, not provide additional useful information relevant to the potential for recognized environmental conditions or other environmental concerns. As such, aerial photographs were not reviewed.

4.1.3 Site Tax Files and Zoning Records

Based on electronic records provided by the New York City Department of Buildings on-line Buildings Information System, the portion of the Site on Block 1081, Lot 1 is zoned R8-A (Residential) with a commercial overlay C2-5. The eastern portion of the Site at 525 West 52nd Street (Block 1081, Lot 7501) is zoned M1-5 (Manufacturing). The building occupancy class for Block 1081, Lot 1 was listed as D9 (Elevator Apartment) and Block 1081, Lot 7501 was listed as R0 (Condominiums).

4.1.4 Land Title Records

Electronic property transaction records for the Site Block and Lots were reviewed from the New York City Department of Finance Office of the City Register Automated City Register Information System (ACRIS). A review of ACRIS electronic records indicated that no deed information was available for the Site.

4.2 Regulatory Review

EDR, Inc. of Milford, Connecticut, provided information regarding the regulatory status of the Site and the surrounding area. This information included records from databases maintained by the United States Environmental Protection Agency (USEPA) and New York State Department of Environmental Conservation (NYSDEC). AKRF reviewed these records to identify the use, generation, storage, treatment and/or disposal of hazardous material and chemicals, or releases of such materials which may impact the project site. All applicable regulatory databases meet ASTM guidelines requesting utilization of information within 90 days' receipt from the appropriate agency. Copies of the pertinent sections of the EDR, Inc. report are included in Appendix C.

4.2.1 Federal Review

The federal databases searched included the National Priority List (NPL); Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS); Emergency Response Notification System (ERNS); Toxic Chemical Release Inventory System (TRIS); the Permit Compliance System of Toxic Wastewater Discharges (WWD); the USEPA Civil Enforcement Docket; and the Air Discharge Facilities (ADF). The federal listing of facilities which are subject to corrective action under the Resource Conservation and Recovery Act (CORRACTS) is discussed with the State databases of RCRA listings.

National Priority List (NPL)

The NPL is the USEPA's database of some of the most serious uncontrolled or abandoned hazardous waste sites identified for probable remedial action under the Superfund Program. NPL sites can pose a significant risk of stigmatizing surrounding properties and thus impacting Site values.

No NPL sites were identified within one-mile of the Site.

Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS)

CERCLIS is a compilation of sites which the USEPA has investigated, or plans to investigate, pursuant to the Superfund Act of 1980 (CERCLA). As such, some of these sites may ultimately present concerns and others may not (but could still pose a perceived threat, thus affecting Site values).

No CERCLIS sites were identified within a ½-mile of the Site.

Emergency Response Notification System (ERNS)

This federal database, compiled by the Emergency Response Notification System, records and stores information on certain reported releases of petroleum and other potentially hazardous substances.

The Site was not listed as an ERNS site.

Toxic Chemical Release Inventory System (TRIS)

The TRIS contains information reported by a variety of industries on their annual estimated releases of certain chemicals. No TRIS sites were identified within ⅛-mile of the Site.

Permit Compliance System of Toxic Wastewater Discharge (WWD)

This database includes certain sites which discharge wastewater containing potentially hazardous chemicals.

No WWD facilities were reported within ⅛-mile of the Site.

United States Environmental Protection Agency Civil Enforcement Docket

This database tracks civil judiciary cases filed on behalf of the USEPA by the Department of Justice.

No facilities were listed in the USEPA's Civil Enforcement Docket within ⅛-mile of the Site.

Air Discharge Facilities (ADF) Index

This federal database includes information on certain air emission sources.

Two Air Discharge Facilities were identified within a ⅛-mile radius of the Site.

- The 53rd Street Service Station, located at 783 10th Avenue, approximately 480 feet east-southeast of the site, was listed for having potential emissions of less than 100 tons of volatile organic compounds per year. This facility was listed as in compliance with the SIP Source program.
- The Mobil Service Station, located at 718 11th Avenue, approximately 510 feet southwest of the site, was listed for having potential emissions of less than 100 tons of volatile organic compounds per year. This facility was listed as in compliance with the SIP Source program.

Air releases from these facilities are not anticipated to have affected the subject property; however, historical petroleum releases from the 53rd Street Station may have affected subsurface conditions beneath the Site.

4.2.2 State Review

The state records reviewed included listings of hazardous material spills; Resource Conservation and Recovery Act (RCRA) Notifiers; Chemical Bulk Storage (CBS); Solid Waste Facilities (SWF); Petroleum Bulk Storage (PBS); State Inactive Hazardous Waste Disposal Sites (SHWS); State Hazardous Substance Waste Disposal Sites (SHSWDS); Major Oil Storage Facilities (MOSF); Brownfield Sites; Historic Utility Sites.; Environmental Restoration Program (ERP) sites; Voluntary Cleanup Program (VCP) sites and Brownfield Cleanup Program (BCP) sites.

New York SPILLS Database

This database includes releases reported to the NYSDEC, including tank test failures (for USTs only) and tank failures.

Eight hundred seventy-four spills were reported within a ½-mile radius of the Site, including forty-two active status spills and eight hundred thirty-two closed status spills. The following spills were listed at the Site.

- A closed status spill (Spill #9911542) was listed at 525-537 West 52nd Street in January of 2000, when approximately 25 gallons of transformer oil was reported to have been released within a transformer vault. According to the NYSDEC remarks, the associated sewer may have been affected by the release. The spill was contained and cleaned and subsequently closed.
- A closed status spill (Spill #9602849) was listed for 546 West 53rd Street relating to a Consolidated Edison generator plant noted as being located on the East River. The release involved a reported quantity of 10 gallons of transformer oil. This spill listing does not appear to directly correspond with the Site buildings, and appears to be associated with an off-site location with an erroneous address listing, and therefore is not considered a REC.

Other spill sites closest and most likely to affect the Site are summarized below:

- A closed status spill (Spill # 1110657) was listed in December 2011 at 541 West 52nd Street, the south-adjacent property, when a 1,000 gallon UST and contaminated soil were discovered during site excavation. The tank was removed, and excavation continued as originally planned. The database information indicated that endpoint samples taken following the completion of excavation found no evidence of contamination, and the spill achieved closure in February 2012.
- A closed status spill (Spill # 0305881) occurred at a former taxi depot located at 553-561 west 52nd Street, approximately 140 feet west of the Site in September of 2003 relating to several on-site underground storage tanks containing gasoline and waste oil. Remedial activities were conducted which included the removal of soil and fill throughout the site and the excavation of the upper bedrock layer underlying the site. Post-remediation soil sampling was initiated and the spill number was subsequently closed within the same month of issuance.

- A closed status spill (Spill # 9909771) was listed for 549 West 52nd Street, approximately 100 feet west-southwest of the Site, in November of 1999 when a caller reported a spill from a faulty tank for the address. The tank was reportedly pumped out and the release was contained and cleaned, however the NYSDEC requested further information regarding the incident from the property owner/manager, and the case remained active until June 2010, when a site visit concluded that no odor, sheen, or oil was observed in the tank room or basement sump and the spill was closed.
- One active spill and four closed spills were reported for the Exxon Mobil Service Station at 783 Tenth Avenue, formerly located on the eastern portion of the subject block, approximately 450 feet east-southeast of the Site, between 1993 and 2005. The active spill listing (Spill # 9308101) referred to a release in 1993, when petroleum [determined to be gasoline containing methyl tertiary butyl ether (MTBE), a gasoline additive], was found seeping through a cellar wall adjacent to the gasoline station. This listing was used to consolidate other spills and remediation details reported at the site. Three closed-status spills occurred at the site between 1990 and 1998 and were associated with fueling operations and tank test failures that occurred at the former on-site gasoline station. According to the database information, this site entered into the Brownfield Cleanup Program (BCP) and a DEC-approved Remedial Action Workplan (RAWP) was initiated which included the excavation of soil to bedrock across the entire site and the implementation of a groundwater monitoring regime and a groundwater pump-and-treat system and a soil vapor extraction system. According to the latest NYSDEC remarks associated with the case, investigation and remediation of an off-site contamination plume was being investigated and remediated in order to achieve spill closure.

Based on the number of spills reported in the area, including these sites and others not listed above, local groundwater quality may have been affected, which may have migrated to the Site. Details from all spills are included in Appendix C.

Resource Conservation and Recovery Act (RCRA) Notifiers Listings

This database lists sites that have filed notification forms regarding hazardous waste activity, including: treatment, storage and disposal facilities (TSDs); small-quantity generator (SQG) and large-quantity generators (LQG); and transporters regulated under RCRA. The discussion below includes any CORRACTS listings of facilities which are subject to corrective action under RCRA.

One TSD facility was identified within a ½-mile radius of the subject area. Kellermann Paint Co. Inc., located at 605 West 45th Street, approximately 1,940 feet southwest of the site, was listed as a Treater, Storer, and Disposer of 2,200 gallons of waste industrial paint solvents in 1982. Given its distance from the Site, it is not anticipated to represent a significant environmental concern. The Site was listed as an RCRA Generator/ Transporter:

- Astrid Offset Corporation, located at 525 West 52nd Street (the Site) was listed as a Small Quantity Generator of 55 gallons of corrosive solid waste in 1998, 10 gallons of silver in 1999, and 315 pounds of silver in 2001. Tana Seybert, at the same address, was listed as a Large Quantity Generator of 439 pounds of ignitable solid waste in 2001, 5 gallons of corrosive solid waste in 2005, and 2,420 gallons of

ignitable solid waste in the first half of 2006, and had four RCRA Small Quantity Generator Requirement violations and returned to compliance in 2004.

Thirty-three RCRA Generators/Transporters were reported within a ⅛-mile radius of the Site. Details of nearby facilities are as follows:

- West 52nd Affordable Developers, LLC, located at 533-541 West 52nd feet, south-adjacent to the Site was listed as a Large Quantity Generator, however no hazardous waste activity was available in the database.
- Consolidated Edison Vault 3484, located at West 52nd Street, approximately 153 feet south-southeast of the Site, was listed as having generated 718 kilograms of PCB-containing petroleum oil or liquid in 2000.
- New York Telephone, 770 11th Avenue, approximately 230 feet north-northeast of the Site, was listed as having generated hazardous waste streams including 12 gallons of ignitable solid waste in 1998, 110 pounds of benzene in 2001, and 2,180 pounds of ignitable solid waste in 2004.
- American Telephone and Telegraph Corporation, located at 811 10th Avenue, approximately 450 feet east of the Site, was listed as a generator of spent non-halogenated solvents, lead, solid waste that exhibits the characteristic of corrosivity, 1,1,1-trichloroethane, diclorodifluoromethane, mercury, and solid waste that exhibits the characteristic of ignitability between 1997 and 2005. The facility had three RCRA violations, including an all requirements (oversight), an annual reporting requirements, and a general requirements violations, which achieved compliance in 2001. Bell Atlantic was listed as a hazardous waste generator at this address, however no hazardous waste activity was reported in the database. Consolidated Edison, manhole No. 6326, was listed at the same location as a generator of 677 kilograms of other PCB wastes including soil, solids, sludges, clothing, etc. in 2006. Lucent Technologies was listed at the same address, and generated 25 pounds of dichlorofluoromethane in 1999.
- Mobil Oil Corp. Service Station, located at 783 10th Avenue, approximately 470 feet east-southeast of the Site, was listed as having generated 6,300 pounds of ignitable waste in 2001 and 110 gallons of solid ignitable waste in 1998.

Based on facility status and/or quantity/type of wastes generated, these RCRA facilities may have affected the Site subsurface. Details of all of the RCRA hazardous waste generators located within a ⅛-mile radius of the study site are included in Appendix C.

Chemical Bulk Storage (CBS) Database

The CBS lists facilities that store regulated non-petroleum substances in aboveground tanks with capacities greater than 185 gallons and/or in underground tanks of any size.

No CBS facilities are listed within a ⅛-mile radius of the Site.

Solid Waste Facilities (SWF)

This database includes a listing of landfills, incinerators, transfer stations, recycling centers, and other sites which manage solid waste.

Two Solid Waste Facilities were identified within a ½-mile radius of the Site. A Consolidated Edison facility, located at the corner of Twelfth Avenue and West 45th

Street, approximately 2,200 feet southwest of the Site, was listed as a processing facility for uncontaminated commercial and demolition debris. The remaining facility, a NYC Department of Sanitation transfer station, was located over 2,400 feet north-northwest of the Site. Based on distance from the Site, and inferred downgradient or crossgradient groundwater flow directions, these facilities are not expected to have affected the Site.

Petroleum Bulk Storage (PBS) Database

This database lists facilities that registered having either aboveground or underground petroleum tanks with total storage exceeding 1,100 gallons. Facilities with more than 400,000 gallons appear on the Major Oil Storage Facilities (MOSF) database instead.

One hundred twenty-one PBS sites (23 UST sites and 98 AST sites) were identified within a ⅛-mile radius of the Site. The Site was listed as a PBS facility. Details of the closest facilities, including the on-site listings, are listed in Table 1.

Table 1
Area Petroleum Bulk Storage Facility Data

Location	Capacity (gallons)	Product Stored	Status	Approximate Distance/Direction from Study Site
Apple Industrial Condo 525 West 52nd Street	7,000 AST	No. 2 Fuel Oil	In Service	Site
549 West 52nd Street	5,000 AST	Gasoline*	In Service	95 feet/ west-northwest
555 West 52nd Street	550 UST x10 275 UST 30 UST	Gasoline Waste Oil Lube Oil	Closed – Removed	145 feet/ west
552 West 53rd Street	1,500 AST 275 AST	No. 4 Fuel Oil No. 4 Fuel Oil	Closed – Removed	170 feet/ northwest
554 West 53rd Street	3,500 AST	No. 4 Fuel Oil	Closed – Removed	170 feet/ northwest
552 West 52nd Street	3,000	No. 4 Fuel Oil	Not Listed	200 feet/ southwest
Mercedes Benz Manhattan, Inc. 770 11th Avenue	4,000 UST x2 4,000 UST 280 AST 4,000 UST x2 4,000 AST 280 AST	Unleaded Gasoline Diesel Unleaded Gasoline Unleaded Gasoline Diesel Used Oil	Closed – Removed Closed – Removed Closed – Removed In Service In Service In Service	290 feet/ north-northeast
Clinton Manor 535 West 51st Street	20,000 UST	No. 2 Fuel Oil	In Service	290 feet south
Mobil Service Station 783 Tenth Avenue	4,000 UST 4,000 UST 550 UST x5 550 UST x2	Diesel Gasoline Gasoline Empty	Closed – Removed	450 feet / east-northeast

Notes: AST - aboveground storage tank
UST - underground storage tank
* Although registered as a gasoline AST, this tank currently contains fuel oil, according to CHDC personnel

The 549 West 52nd Street site, 555 West 52nd Street site, Mercedes Benz Manhattan site, Mobil Service Station and Clinton Manor sites are concurrently listed on the NY Spills database (refer to the corresponding section for further information). Details of the additional PBS facilities located within a ⅛-mile of the Site are included in Appendix C.

State Inactive Hazardous Waste Disposal Site (SHWS) Registry

This program (also known as State Superfund) lists information regarding a variety of sites likely requiring cleanup.

No State Inactive Hazardous Waste Disposal Sites were reported within a one-mile radius of the Site.

State Hazardous Substance Waste Disposal Site (SHSWDS) Study

This database tracks certain sites that were not listed on SHWS, but may still require investigation and/or cleanup.

No SHSWDS were identified within a one-mile radius of the Site.

Major Oil Storage Facilities (MOSF) Database

These facilities have petroleum storage of 400,000 gallons or more.

No Major Oil Storage Facilities were listed within ⅛-mile of the Site.

Historic Utility Sites

This is an inventory of selected power generating facilities, manufactured gas plants and storage facilities, utility maintenance yards and other gas and electric utility sites identified in various historical documents, maps and annual reports from 1898 to 1950.

No Historic Utility Sites were listed within ⅛-mile of the Site.

Environmental Restoration Program

These sites (which are generally municipally-owned) are receiving New York State funding for site investigation and/or remediation. Some sites in this program have known contamination, whereas others have not had sufficient investigation to determine whether contamination is present.

No ERP sites were listed within ½-mile of the Site.

Voluntary Cleanup Program

The Voluntary Cleanup Program is a NYSDEC program for investigation and/or remediation of (generally) privately-owned sites. Some sites have known contamination, whereas others have not had sufficient investigation to determine whether contamination is present.

Two VCP sites were identified within a ½-mile radius of the Site. Based on the information provided, including distance from the Site and the anticipated groundwater flow direction, these facilities are not expected to have affected subsurface conditions at the Site.

Brownfield Cleanup Program

This NYSDEC program is the successor to the Voluntary Cleanup Program. Again, some sites have known contamination, whereas others have not had sufficient investigation to determine whether contamination is present.

Seven BCP facilities were identified within a ½-mile radius of the Site. Of these, the following facilities are considered RECs:

- Clinton Green Development Project, located on Tenth Avenue between West 51st and West 53rd Streets, approximately 430 feet southeast of the Site, consisted of land along the Amtrak railroad tracks passing through the eastern portions of two blocks (including the subject block), and was noted to have included an Exxon Mobil gasoline station at the corner of West 53rd Street and Tenth Avenue until 1992. Soil and groundwater contamination with lead, petroleum hydrocarbons, and methyl tertiary butyl ether (a highly water-soluble gasoline additive) were discovered at this location. According to the listing, all contaminated soil on-site was removed in 2006 during the construction of new buildings. Off-site contamination, however, including a groundwater plume, remained and additional cleanup was required.
- The Off-Site Clinton Green Development Project consisted of the area along the intersection of West 53rd Street and 10th Avenue, beyond the scope of the Clinton Development Project. The contaminated groundwater plume consisted of petroleum-related volatile organic compounds. The database listing stated that the Remedial Investigation and Design were completed in 2009. More recent information was not available.

The Clinton Green Brownfield site and Off-Site Clinton Green Brownfield site may have affected local groundwater quality, and given their close proximity to the Site, potentially impacted subsurface conditions beneath the Site. Based on the information provided, including distance from the site and the anticipated groundwater flow direction, the remaining Brownfield sites are not anticipated to have impacted the Site.

Radon Levels

Radon is a colorless, odorless gas most commonly produced by the radioactive decay of certain rocks. According to New York State Department of Health data available online, the average level of radon found in basements in Manhattan in 2009 was 2.11 picocuries/liter, below the USEPA recommended action level of 4.0 picocuries/liter.

4.2.3 Local Review

Available online records from the New York City Buildings Department were viewed for the Site. NYC Fire Department records were obtained by EDR, Inc. as part of their database search. Since the records typically address a multitude of issues, the review focused on items likely to relate to the potential presence of hazardous materials, e.g., petroleum tank installation applications and permits, or records indicating prior uses. Copies of pertinent information are included in Appendix D (Buildings Department Records).

Fire Department

The database search provided by EDR, Inc. did not cite any Fire Department records for the Site.

Buildings Department

Information provided by the New York City Buildings Department (NYCDOB) on-line Buildings Information System included Certificates of Occupancy for the Site structures.

Block 1081, Lot 1

- No Certificates of Occupancy (C of O) were provided in the electronic NYCDOB files.

Block 1081, Lot 7501

- A 1929 C of O noted a seven-story structure containing an automobile repair shop in the basement; an automotive garage and driveway on the first floor; offices on the second floor; an automobile repair shop on the third floor; and a factory on the fourth through seventh floors.
- A 1951 C of O noted a one-story loading platform at 519-523 West 52nd Street.
- A 1952 C of O noted a noted a seven-story structure containing a boiler room and storage in the basement; a newspaper press room and storage on the first floor; offices on the second floor; a newspaper composing room on the third floor; and a factory on the fourth through seventh floors. A fuel oil tank installation was approved by FDNY in 1951.
- A 1966 C of O noted a noted a seven-story structure containing a boiler room, offices, printing, bindery and storage in the basement; a newspaper press room and storage on the first floor with a storage mezzanine; offices and a cafeteria on the second floor; a newspaper composing room on the third floor; and a factory on the fourth through seventh floors.
- A 1998 C of O noted manufacturing use in the basement; a lumber yard and manufacturing use on the first floor; and manufacturing/offices on the mezzanine through seventh floors.
- A 2010 Temporary C of O noted unspecified manufacturing in the basement and mezzanine; commercial vehicle storage on the first floor; and manufacturing/offices on the second through seventh floors

The information obtained from NYCDOB files indicated that the structure located on the eastern portion of the Site (525 West 52nd Street) was historically used for industrial and automotive purposes including automotive repairs and factory use in 1929; newspaper printing and assembling between 1952 and 1998 (with a lumber yard noted in 1998); and vehicle storage and manufacturing use in 2010. A fuel oil tank installation was approved by FDNY in 1951. Such uses may have affected the Site subsurface. Copies of these documents are included in Appendix D.

4.2.4 Additional Record Sources

To enhance the search, ASTM requires that additional local records be checked when, in judgment of the environmental professional, such records are: 1) reasonably ascertainable; 2) useful, accurate and complete in light of the objective of the records review; and 3) are obtained in initial ESAs. These records include:

- Local Brownfields Lists

- Local Lists of Landfill/solid waste disposal sites
- Local Lists of Hazardous Waste/Contaminated Sites
- Local Land Records (for activity use limitations)
- Records of emergency release reports
- Records of contaminated public wells

Sources for these records may include:

- Department of Heath/Environmental Division
- Building Permit/Inspection Department
- Local/Regional Pollution Control Agency
- Local/Regional Water Quality Agency
- Local Electric Utility (for PCB records)

In AKRF's judgment, no additional local records (beyond those described in the immediately preceding section) are pertinent for the Site.

5.0 USER-PROVIDED INFORMATION

In preparing this Phase I ESA, AKRF requested that the client provide any pertinent information regarding the Site, specifically:

- The reason for performing the Phase I ESA;
- Whether they were aware of any pertinent current or historic activities at or near the Site, including but not limited to: hazardous substances or petroleum, waste management practices, filling or disposal drains, septic/sewer systems, and potable and non-potable wells;
- Owner and occupant information and whether they were aware of any previous Phase I ESAs or other potentially pertinent reports, plans or information;
- Whether any *environmental liens* or *activity and land use limitations* are in place or filed or recorded against the Site or whether there was pending, threatened, ongoing or past violations, litigation or enforcement action relevant to hazardous substances or petroleum products;
- Whether they had any specialized knowledge or experience related to the Site or nearby properties (e.g., specialized knowledge of the chemicals used by this type of business);
- Whether the (anticipated) purchase price reflects that the Site is or could be contaminated; and
- Whether they were aware of commonly known or reasonably ascertainable information about environmental conditions of the Site including current/past uses of the Site and adjacent properties.

Ms. Alissa Mitrisin, a representative of the Clinton Housing Development Company, provided site access to the Site (Block 1081, lot 1) and answered pertinent questions. Mr. Gerry Ritterman, of Ritterman Capital, Inc. provided access to the 525 West 52nd Street building (Block 1081, Lot 7501). The Phase I ESA was conducted to provide preliminary environmental information as part of due diligence prior to redevelopment. To the extent that pertinent additional information was provided, it has been summarized elsewhere in this report.

6.0 PREVIOUS STUDIES

6.1 On Site Investigations

Phase I Environmental Site Assessment – Commercial Site, 525 West 52nd Street, New York, NY 10019, Environmental Management Solutions of New York, Inc. May 2004

Environmental Management Solutions of New York, Inc. (EMSNY) conducted a Phase I Environmental Site Assessment (ESA) of the 525 West 52nd Street building (eastern portion of the Site/Lot 7501) of the Site in 2004. Recognized Environmental Conditions were identified including on-site petroleum bulk storage: EMSNY noted that a vaulted 7,500 gallon aboveground storage tank (AST) was located in the basement of the Site building. Other on-site environmental concerns included: potential contamination from on-site printing activities; a 55 gallon drum labeled as hazardous waste and other unlabeled containers noted on the second floor of the building; containers of photo chemicals, inks, and alcohol; and areas of ink staining associated with the printing process throughout the facility. EMSNY also noted oil staining in the area surrounding the boiler. Suspect ACMs and LBP were identified at the Site.

Phase II Subsurface Investigation, 525 West 52nd Street, General Consolidated Industries (GCI), June 2006

General Consolidated Industries (GCI) performed a limited subsurface investigation at 525 West 52nd Street that included a series of dye tests to determine the discharge configuration of several on-site floor drains, slop sinks, printer drainage points, sump pits, trench drains and bathroom fixtures, and a magnetometer survey in selected areas to search for potential USTs. The results of the dye tracer tests indicated that the drains and fixture were connected to the municipal sewer system, with the exception of two sump pits, three floor drains, and one trench drain located in the basement, that were clogged at the time of the investigation and therefore could not be investigated. The magnetometer survey was conducted in the basement, loading dock and the north-adjacent sidewalk along West 52nd Street. No evidence of USTs was identified during the magnetometer survey. GCI recommended that the clogged drainage structures be cleared of debris and cleaned and re-tested to determine their drainage configuration.

Limited Due Diligence Investigation, 525 West 52nd Street, Fleming Lee Shue (FLS), December 2010

Fleming Lee Shue (FLS) performed a limited Due Diligence investigation at 525 West 52nd Street that included a site reconnaissance and review of historic land use maps and a subsequent subsurface investigation. The results of the site reconnaissance and historic map review indicated environmental concerns including: the potential presence of on-site buried petroleum tanks; floor drains of an unknown configuration within the building basement; an active fuel oil AST located within a the basement boiler room (and associated piping of an unknown configuration); and a localized area of oil staining on the southeastern portion of the basement. FLS conducted a limited subsurface investigation in 2010 that included a geophysical survey and advancement of soil borings. The results of the geophysical survey indicated anomalies consistent with USTs in the southern portion of the basement. The limited subsurface investigation included the installation of nine soil borings with collection of soil and groundwater samples for laboratory analysis. The borings were advanced to apparent bedrock, encountered at depths ranging between 1 and 4 feet below the basement slab. Apparent perched groundwater was encountered at less than one foot below the basement slab in nearly all of the borings. Soil analytical results were compared to the New York State Department of Environmental Conservation Technical and Administrative Guidance Memorandum (TAGM) 4060 Recommended Soil Cleanup Objectives (RSCOs), the criteria used at that time. Laboratory analytical results indicated no elevated concentrations of volatile organic compounds (VOCs) but some elevated concentrations of semi volatile organic compounds (SVOCs) that were attributed to urban fill materials. Slightly elevated concentrations of metals (zinc and mercury) were

detected from samples collected within the vicinity of two floor drains. Groundwater analytical results were compared to the NYSDEC TOGS 1.1.1 Class GA Ambient Water Quality Standards and Guidance Values (Class GA Standards). No VOCs were detected in groundwater samples at concentrations above the Class GA Standards. Several SVOCs, including phenol, benzo(a)anthracene, benzo(b)fluoranthene, benzo(k)fluoranthene, chrysene, indeno(1,2,3-cd)pyrene, and naphthalene were detected in the perched groundwater sample from the boiler room. FLS concluded that elevated SVOCs were likely petroleum related based on the presence of naphthalene at 95 parts per billion (ppb), above the Class GA standard of 10 parts per billion (ppb), with the exception of a perched groundwater sample taken from a boring advanced on the southeastern portion of the basement. FLS indicated that these SVOCs (benzo(a)anthracene, benzo(b)fluoranthene, chrysene, and indeno(1,2,3-cd)pyrene) were not petroleum related but were likely due to suspended sediment entrained in the groundwater sample.

7.0 LIMITATIONS AND DATA GAPS

This assessment met the requirements of the American Society for Testing and Materials (ASTM) as established by ASTM Standard E1527-05 at the time it was performed, with the following limitations and data gaps:

- Portions of the building located at 548 West 53rd Street were inaccessible at the time of the Site visit. Additionally, access was unavailable to the interior of the storage shed located at 542-544 West 53rd Street.
- Interviews and user provided information were limited to those discussed in Section 5.0. To the extent that interviews were not conducted with the list of interviewees cited in the ASTM Standard (past and present owners, operators, and occupants of the Site and local government officials), AKRF does not believe that this represents a significant data gap likely to result in additional or significantly changed recognized environmental conditions or conclusions.
- The project site area history was not conducted in five-year intervals. However, sufficient information about the history of the site and surrounding area could be obtained from the available historical Sanborn maps, and New York City Buildings Department records, and this data gap is not likely to alter the conclusions of this report.
- In the judgment of AKRF, none of these limitations or data gaps are not likely to have affected the ability to identify Recognized Environmental Conditions (RECs).

8.0 CONCLUSIONS AND RECOMMENDATIONS

This Phase I Environmental Site Assessment was performed in conformance with ASTM Standard E1527-05, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Practice*. Any exceptions to, or deletions from, this practice are described in Section 7.0. The term "Recognized Environmental Condition" means the presence or likely presence of hazardous substances or petroleum at the Site, including the ground, groundwater, or surface water at or under the Site.

This assessment revealed evidence of Recognized Environmental Conditions (RECs). A summary of the findings is as follows:

On-Site RECs

- A review of Sanborn maps and Building Department files indicated historical on-site uses included: multiple auto repair shops, a metal works, a bottling works, a chemical works, a plastics manufacturer, a sheet metal works, a printing facility with a gasoline tank, and a lumber yard. The Site currently includes two auto body repair shops with painting operations, a storage shed, and a commercial/office building formerly used for printing operations and manufacturing. Historical/current uses may have affected the Site subsurface. Potential buried structures from former on-site buildings, possibly containing petroleum underground storage tank (USTs), and/or historic fill of unknown origin, could be present beneath the Site.
- The 525 West 52nd Street address was listed in the regulatory databases as a generator of hazardous wastes for the production of waste streams including ignitable wastes, corrosive wastes and silver associated with former printing operations. This address was also listed on the New York State Department of Environmental Conservation (NYSDEC) Spills database with two closed regulatory status spills (though one appeared to actually relate to an off-Site address) including a release of approximately 25 gallons of transformer oil within a subterranean transformer vault in 2000 that was subsequently cleaned and closed. Historic activities at this facility may have affected the Site subsurface.
- A limited subsurface investigation conducted at 525 West 52nd Street in 2010 identified magnetic anomalies beneath the southern portion of the basement (indicating the potential presence of USTs). Soil and groundwater sampling identified elevated concentrations of semi-volatile organic compounds (SVOCs) and slightly elevated concentrations of metals (zinc and mercury) in soil; and some elevated concentrations of SVOCs in groundwater samples collected from the boiler room and from the southeastern portion of the basement in an area of observed surface staining.
- Apparent drainage structures of an unknown configuration were noted throughout 525 West 52nd Street building. The results of a limited subsurface investigation conducted in 2006 indicated that these were connected to the municipal sewer system, with the possible exception of two sump pits, three floor drains, and one trench drain located in the basement, that were clogged at the time of the investigation (preventing a determination of their connections), and therefore may allow discharge to the subsurface.
- Portions of the Site (530-538 West 53rd Street and 543 West 52nd Street) were covered with soil likely associated with excavation activities at the adjacent ongoing construction site that may comprise uncontrolled urban fill materials. While no signs of contamination were noted, the quality of this soil is unknown, as former uses of the construction site included industrial/automotive operations including metal works and auto repair shops.

On-Site Issues that are not considered RECs

- During the reconnaissance, a vaulted 7,000-gallon No. 2 fuel oil aboveground storage tank (AST) was observed within the basement of 525 West 52nd Street. This tank is registered under the New York State Department of Environmental Conservation (NYSDEC) Petroleum Bulk Storage (PBS) with ID# 2-337129. Minor staining was observed on the tank exterior and on the vault room floor, but no evidence of a significant release was noted. Two approximately 500-gallon No. 2 fuel oil ASTs were observed within the basement of 538 West 53rd Street that were used to fuel the building's boiler. No significant stains or odors were noted in connection with these tanks.
- A closed status spill was listed for 546 West 53rd Street (corresponding to the northern portion of the Site) relating to a Consolidated Edison generator plant noted as being located on the East River that appears to be associated with an off-site location with an erroneous address listing, and therefore is not considered a REC.
- Suspect asbestos-containing materials (ACMs) were observed during the reconnaissance, including resilient and ceramic floor and wall tile and associated mastic, pipe insulation, duct insulation, electrical panel partitions, electrical insulation, ceiling tile, wallboard, plaster, joint compound and roofing materials in good to poor condition. A 2010 limited asbestos survey conducted at 525 West 52nd Street identified roofing and flashing materials and air cell pipe insulation (and associated mudded joints) as assumed ACM.
- Based on the age of the structures, painted surfaces may contain lead paint. Painted surfaces observed on the exterior and interior portions of the structures ranged from good to poor condition.
- Based on the age of the buildings, electrical equipment (including vaulted transformers) and lighting fixtures on-site may include PCB-containing elements. One hydraulic freight elevator was located in the 525 West 52nd Street building that may include PCB-containing components. No obvious leaks or odors were observed in connection with this equipment or the lighting fixtures. A closed status spill was cited for a transformer vault adjacent to the 525 West 52nd Street building in January of 2000 that was contained and cleaned and subsequently closed (no information pertaining to PCB content was noted in the spill record).

Off-Site RECs

- Sanborn maps and the regulatory database search identified several former automotive facilities elsewhere on the same block including: a garage with a gasoline tank, a welding shop and an auto repair shop (1926-1930 Sanborn map); additional automotive facilities including a filling station on the northeastern portion of the block (1951-1988 Sanborn maps) that was listed in the Brownfield Cleanup Program and on the PBS, RCRA and NY Spills database with documented groundwater contamination including a contaminant plume emanating off site; a taxi repair facility on the southwestern portion of the block (1951 Sanborn map) that was also listed on the NY Spills and PBS databases; and several repair shops and metal works facilities that were shown adjacent to the Site on the 1926-1988 Sanborn maps. Migration of contamination associated with such uses may have affected the Site subsurface.
- Sanborn maps and the regulatory database search identified industrial and automotive uses on the surrounding blocks between 1907 and 2006 including: auto repair shops, garages with gasoline tanks and a railroad company facility (later developed with an auto storage facility and a garage) on the north-adjacent block; and a twine and hammock manufacturer (later converted to a piano factory), manufacturing uses, auto repair shops and garages with gasoline tanks on the south-adjacent block. Such uses may have affected the Site subsurface.

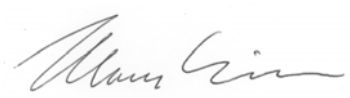
RECOMMENDATIONS:

- Soil and/or groundwater may have been affected by on- and/or off-site former and current uses. To determine whether on-site subsurface conditions have been affected, a subsurface (Phase II) investigation should be conducted, including laboratory analysis of soil, soil vapor, and groundwater samples. To the extent that redevelopment requires discretionary city approvals (i.e., is subject to CEQR and/or ULURP process), the scope of the investigation is typically subject to pre-approval by the NYC Department of Environmental Protection (NYCDEP). Depending of the findings of the investigation, subsurface disturbance associated with new construction may need to be performed in accordance with an NYCDEP-approved Remedial Action Plan and Construction Health and Safety Plan (RAP/CHASP).
- Future development including soil disturbance could encounter contaminated soil. If evidence of contaminated soil (e.g., stains or odors) is encountered, these materials (and all other materials requiring off-site disposal) should be disposed of in accordance with applicable federal, state and local regulations. Known and any unforeseen USTs should be properly assessed, closed and removed in accordance with state, and local regulations prior to any renovation, demolition or excavation activities with the potential to disturb them. Any on-site drywells or other drainage structures, if encountered, should be assessed and closed in accordance with applicable regulations. Soil intended for off-site disposal should be tested in accordance with the requirements of the receiving facility. Transportation of material leaving the site for off-site disposal should be in accordance with federal, state and local requirements covering licensing of haulers and trucks, placarding, truck routes, manifesting, etc.
- Prior to any renovation or demolition activities with the potential to disturb suspect ACMs, an asbestos survey must be conducted to determine whether these materials are ACMs. If these materials prove to contain asbestos, they must be properly removed and disposed of prior to renovation/demolition in accordance with applicable regulatory requirements.
- Unless there is labeling or test data that indicates that florescent lights, other electrical equipment, and hydraulic fluid are not mercury- and/or PCB-containing, if disposal is required, it should be performed in accordance with applicable federal, state and local regulations and guidelines.
- Any renovation activities with the potential to disturb lead-based paint must be performed in accordance with the applicable Occupational Safety and Health Administration regulation (OSHA 29 CFR 1926.62—*Lead Exposure in Construction*).
- Any containers of cleaning fluids, paints, chemicals, etc. should be properly disposed of in accordance with all federal, state and local regulations.
- If dewatering is necessary during site construction, the discharge must meet NYCDEP discharge regulations.

9.0 SIGNATURE PAGE

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in §312.10 of 40 CFR 312

I have the specific qualifications based on education, training, and experience to assess a Site of the nature, history, and setting of the Site for which the assessment was performed. I have performed all the appropriate inquiries in conformance with standards and practices set forth in 40 CFR Part 312.



Marcus Simons
Senior Vice President

Neoma Chefalo
Environmental Scientist

10.0 QUALIFICATIONS

The purpose of this assessment was to convey a professional opinion about the potential presence or absence of contamination, or possible sources of contamination on the Site, and to identify existing and/or potential environmental problems associated with the Site including *Recognized Environmental Conditions* as defined in ASTM Standard E1527-05, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Practice*.

The assessment was performed in accordance with customary principles and practices in the environmental consulting industry, and in accordance with the above-referenced ASTM Standard, except as noted otherwise in Section 7.0. It should only be used as a guide in determining the possible presence or absence of hazardous materials on the Site at the time of the reconnaissance, as it is based upon the review of readily available records relating to both the Site and the surrounding area, as well as a visual reconnaissance of current conditions.

This Phase I Assessment is not, and should not be construed as, a guarantee, warranty, or certification of the presence or absence of hazardous substances, which can be made only with testing, and contains no formal plans or recommendations to rectify or remediate the presence of any hazardous substances which may be subject to regulatory approval. This report is not a regulatory compliance audit.

This report is based on services performed by AKRF, Inc. professional staff and observation of the Site and its surroundings. We represent that observations made in this assessment are accurate to the best of our knowledge, and that no findings or observations concerning the potential presence of hazardous substances have been withheld or amended. The research and reconnaissance have been carried to a level that meets accepted industry and professional standards. Nevertheless, AKRF and the undersigned shall have no liability or obligation to any party other than Clinton Housing Development Company and AKRF's obligations and liabilities to the above, is limited to fraudulent statements made, or grossly negligent or willful acts or omissions.

APPENDIX C
REGULATORY RECORDS REVIEW

TOXICS TARGETING

Phase I
Environmental Database Report

530-548 West 53rd Street
New York, NY 10019

May 14, 2012

Privileged and Confidential.

LIMITED WARRANTY AND DISCLAIMER OF LIABILITY

Who is Covered

This limited warranty is extended by Toxics Targeting, Inc. only to the original purchaser of the accompanying Environmental Report ("Report"). It may not be assigned to any other person.

What is Warranted

Toxics Targeting, Inc. warrants that it uses reasonable care to accurately transcribe the information contained in this Report from the sources from which it is obtained. This limited warranty is in lieu of all other express warranties which might otherwise arise with respect to the Report. No one is authorized to change or add to this limited warranty.

What We Will Do

If during the warranty period there is shown to be a material error in the transcription of the information contained in this Report from the sources from which it was obtained, Toxics Targeting, Inc. shall refund to the original purchaser the full purchase price paid for the Report. The remedy stated above is the exclusive remedy extended to the Purchaser by Toxics Targeting, Inc. for any failure of the Report to conform with this Warranty, or otherwise for breach of this Warranty or any other warranty, whether expressed or implied.

What We Won't Cover

Toxics Targeting, Inc. has not and can not verify the accuracy, correctness or completion of the information contained in this Report. Information is obtained from government agencies, site owners, and other sources, and errors are common in such information. Because Toxics Targeting, Inc. can not control the accuracy of the information contained in this Report, or the uses which may be made of the information, TOXICS TARGETING, INC. DISCLAIMS LIABILITY TO ANYONE FOR ANY EVENTS ARISING OUT OF THE USE OF THE INFORMATION. TOXICS TARGETING, INC. SHALL NOT BE LIABLE FOR ANY DAMAGE CAUSED BY THIS REPORT, WHETHER DIRECT OR INDIRECT, AND WHETHER OR NOT TOXICS TARGETING, INC. HAS BEEN ADVISED OF OR HAS KNOWLEDGE OF THE POSSIBILITY OF SUCH DAMAGES. TOXICS TARGETING, INC. EXPRESSLY DISCLAIMS ANY AND ALL IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE. Some jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, so the above exclusion or limitation may not apply to you.

Period of Warranty

The period of warranty coverage is ninety days from the date of purchase of this Report. There shall be no warranty after the period of coverage. ANY AND ALL IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR PARTICULAR USE SHALL HAVE NO GREATER DURATION THAN THE PERIOD OF WARRANTY STATED HERE, AND SHALL TERMINATE AUTOMATICALLY UPON THE EXPIRATION OF SUCH PERIOD. Some jurisdictions do not allow limitations on how long an implied warranty lasts, so the above exclusion or limitation may not apply to you.

PLEASE REFER TO PAGES ONE AND FIVE FOR A DESCRIPTION OF SOME OF THE LIMITATIONS OF THIS ENVIRONMENTAL REPORT.

Section Two: Toxic Site Profiles

Section Three: Appendices

- *USEPA ERNS Check*
- *Unmappable Sites*
- *Hazardous Waste Codes*
- *Information Source Guide*

© Toxics Targeting, Inc. 2012

Introduction

Toxics Targeting has combined environmental database searches, extensive regulatory analysis and sophisticated mapping techniques to produce your *Environmental Report.* It checks for the presence of 25 categories of government-reported toxic sites and provides detailed, up-to-date information on each identified site. The findings of your report are presented in an easy-to-understand format that:

1. ***Maps*** the approximate locations of selected government-reported toxic sites identified on or near a specified target address.

2. ***Estimates*** the distance and direction between the target address and each identified toxic site.

3. ***Reports*** air and water permit non-compliance and other regulatory violations.

4. ***Profiles*** some aspects of the usage, manufacture, storage, handling, transport or disposal of toxic chemicals at individual sites.

5. ***Summarizes*** some potential health effect information and drinking water standards for selected chemicals reported at individual sites.

The Three Sections Of Your Report

The first section highlights your report's findings by summarizing identified sites according to: **a)** distance intervals, **b)** direction, **c)** proximity to the target address and **d)** individual site categories. In addition, the locations of all identified toxic sites are illustrated on individual maps for each radius search distance used in your report. A close-up map illustrates the locations of all identified toxic sites, at the shortest radius search distance used in your report. Finally, a map of tax parcels and a table of selected information about those parcels are included.

The second section of your report contains *Toxic Site Profiles* that provide detailed information on each identified toxic site. The information in each *Toxic Site Profile* varies according to its source. Some toxic site categories have extensive information and some have limited information. All the information is updated on a regular basis.

The third section of the report contains appendices that identify: **1)** on-site spills reported to the national Emergency Response Notification System (ERNS), **2)** various toxic sites that cannot be mapped due to incomplete or erroneous addresses or other mapping problems, **3)** codes that characterize hazardous wastes reported at various facilities, **4)** methods used to map toxic sites identified in your report and **5)** information sources used in your report.

How to Use Your Report

- Check Table One to see the number of identified sites by distance intervals.

- Check Table Two to see identified sites sorted by direction.

- Check Table Three to see identified sites ranked by proximity to the target address.

- Check Table Four to see identified sites sorted by site categories.

- Use Table Five to get info for the subject parcel and every parcel found on the Tax Parcel Map
- Refer to the various maps to see the locations of identified toxic sites. Refer to the *Toxic Site Profile* and *Appendix* sections for additional information.

Toxic Site Databases Analyzed In Your Report

Search Radius

One-Mile 
1) ***National Priority List for Federal Superfund Cleanup****:* a listing of sites known to pose environmental or health hazards that are being investigated or cleaned up under the Federal Superfund program.

Half-Mile 
2) ***Delisted National Priority List Sites****:* a listing of NPL sites that have been removed from the National Priority List.

One-Mile 
3) ***New York Inactive Hazardous Waste Disposal Site Registry****:* a state listing of sites that can pose environmental or public health hazards requiring investigation or clean up.

One-Mile 
4) ***New York Inactive Hazardous Waste Disposal Site Registry Qualifying****:* a state listing of sites that qualify for possible inclusion to the NYDEC Inactive Haz. Waste Disposal Site Registry.

One-Mile

5) ***RCRA Corrective Action Activity (CORRACTS):*** waste facilities with RCRA corrective action activity reported by the USEPA.

Half-Mile 
6) ***CERCLIS*** (Comprehensive Environmental Response, Compensation and Liability Information System): a federal listing of Non-NFRAP sites that can pose environmental or public health hazards requiring investigation or clean up.

Half-Mile 
7) ***CERCLIS NFRAP:*** a federal listing of CERCLIS sites that have no further remedial action planned.

Half-Mile

8) ***New York State Brownfield Cleanup Sites****:* a listing of sites that are abandoned, idled or under-used industrial and commercial sites where expansion or redevelopment is complicated by real or perceived environmental contamination.

Half-Mile 
9) ***New York Solid Waste Facilities Registry****:* active and inactive landfills, incinerators, transfer stations or other solid waste management facilities.

Half-Mile 
10) ***New York City 1934 Solid Waste Sites****:* a listing of solid waste disposal sites operated by New York City municipal authorities circa 1934.

Half-Mile

11) ***New York and Federal Hazardous Waste Treatment, Storage or Disposal Facilities****:* sites reported by the NYS manifest system and the USEPA's Resource Conservation and Recovery Act Information System (RCRIS). Also includes the following database:

- ***RCRA violations:*** waste facilities with violations reported by the USEPA pursuant to the Resource Conservation and Recovery Act.

Half-Mile

12) ***Toxic Spills: active and inactive or closed*** spills reported to state environmental authorities, including *remediated* and *unremediated* leaking underground storage tanks. This database includes the following categories:

- Tank Failures
- Tank Test Failures
- Unknown Spill Cause or Other Spill Causes
- Miscellaneous Spill Causes

Eighth-Mile

13) ***New York State Major Oil Storage Facilities****:* sites with more than a 400,000 gallon capacity for storing petroleum products.

Eighth-Mile

14) ***New York State Petroleum Bulk Storage Facilities****:* sites with more than an 1,100 gallon capacity for storing petroleum products.

Eighth-Mile

15) ***New York City Fire Dept Tank Data****:* tank data from 1997.

Eighth-Mile

16) ***New York and Federal Hazardous Waste Generators and Transporters****:* sites reported by the NYS manifest system and the USEPA's Resource Conservation and Recovery Act Information System (RCRA). Also includes the following database:

- ***RCRA violations:*** waste facilities with violations reported by the USEPA pursuant to the Resource Conservation and Recovery Act.

Eighth-Mile

17) ***New York Chemical Bulk Storage Facilities****:* sites storing hazardous substances listed in 6 NYCRR Part 597 in aboveground tanks with capacities of 185 gallons or more and/or underground tanks of any size

Eighth-Mile

18) ***Historic New York City Utility Sites (1890's to 1940's)****:* power generating stations, manufactured gas plants, gas storage facilities, maintenance yards and other gas and electric utility sites.

Half-Mile 
19) ***New York Hazardous Substance Disposal Site Draft Study****:* a state listing of sites contaminated with toxic substances that can pose environmental or public health hazards. These sites were not eligible for state clean up funding programs.

Eighth-Mile

20) ***Federal Toxic Release Inventory Facilities****:* discharges of selected toxic chemicals to air, land, water or treatment facilities.

Eighth-Mile

21) ***Federal Air Discharges****:* air pollution point sources monitored by U.S. EPA and/or state and local air regulatory agencies.

Eighth-Mile

22) ***Federal Permit Compliance System Toxic Wastewater Discharges:*** permitted toxic wastewater discharges.

Eighth-Mile

23) ***Federal Civil and Administrative Enforcement Docket****:* judiciary cases filed on behalf of the U. S. Environmental Protection Agency by the Department of Justice.

On-site only (250 ft)

24) ***New York City Environmental Quality Review (CEQR) – E Designation Sites****:* parcels assigned a special environmental ("E") designation under the CEQR process. E designation requires specific protocols that must be followed.

Property only

25) ***ERNS: Federal Emergency Response Notification System Spills****:* a listing of federally reported spills.

Limitations Of The Information In Your Report

The information presented in your *Environmental Report* has been obtained from various local, state and federal government agencies. Please be aware that: **1)** additional information on individual sites may be available, **2)** newly discovered sites are continually reported and **3)** all map locations are approximate. As a result, this report is intended to be the FIRST STEP in the process of identifying and evaluating possible environmental threats to specific properties and can only serve as a guide for conducting on-site visits or additional, more detailed toxic hazard research.

Toxics Targeting tries to ensure that the information in your report is presented accurately and with minimal alteration. Systematic changes are made to correct obvious address errors in order to allow sites to be mapped. Any address changes that are made are noted in the map information section at the top of each corresponding *Toxic Site Profile*. Some information that has been withheld by government authorities remains included in Toxic Site Profiles and is identified as archival information. Since the information presented in your report is not edited, please be aware that it can contain reporting errors or typographical mistakes made by the site owners/operators or government agencies that produced the information. Also please be aware of some other limitations of the information in your report:

- The digital map used by *Toxics Targeting* is the same one used by the U. S. Census or local authorities in New York City. While the map is generally accurate, no map is perfect. In addition, *Toxics Targeting's* mapping methods estimate where toxic site addresses are located if the address is not specifically designated. FOR THESE REASONS, ALL MAP LOCATIONS OF ADDRESSES AND REPORTED TOXIC SITES SHOULD BE CONSIDERED APPROXIMATE AND SHOULD BE VERIFIED BY ON-SITE VISITS;

- UNDISCOVERED, UNREPORTED OR UNMAPPABLE TOXIC SITES MIGHT NOT BE IDENTIFIED BY THIS REPORT'S CHECK OF 25 TOXIC SITE CATEGORIES. TOXIC SITES REPORTED IN OTHER GOVERNMENT DATABASES MIGHT ALSO EXIST. FOR THESE REASONS, YOUR REPORT MIGHT NOT IDENTIFY ALL THE TOXIC SITES THAT EXIST IN THE AREA IT SEARCHES;

- The appendix of your report contains a listing of sites that could not be mapped due to incomplete or erroneous address information or other mapping problems. This listing includes unmappable toxic sites in the zip codes searched for the report as well as toxic sites without zip codes reported in the same county. IF YOU WOULD LIKE INFORMATION ON ANY OF THE LISTED SITES, PLEASE CONTACT *TOXICS TARGETING AND REFER TO THE SITE ID NUMBER.*

- New York State Department of Environmental Conservation Remediation Site Borders are approximate and may not align with tax parcel boundaries mapped by local authorities or the digital map used by the US Census Bureau. As a result, Remediation Site Borders may overlap parcels that do not involve site remediation activities. Selected parcels also can involve multiple Remediation Site Borders. Refer to individual site profiles for more information. Sites without profiles include potential new sites or sites that have not yet been publicly listed by DEC.

- Some toxic sites identified in your report may be classified as **known hazards**. Most of the toxic sites identified in your report involve **potential hazards** related to the on-site use, manufacture, handling, storage, transport or disposal of toxic chemicals. Some of the toxic sites identified in your report may be the addresses of parties responsible for toxic sites located elsewhere. YOU SHOULD ONLY CONCLUDE THAT TOXIC HAZARDS ACTUALLY EXIST AT A SPECIFIC SITE WHEN GOVERNMENT AUTHORITIES MAKE THAT DETERMINATION OR WHEN THAT CONCLUSION IS FULLY DOCUMENTED BY THE FINDINGS OF AN APPROPRIATE SITE INVESTIGATION UNDERTAKEN BY LICENSED PROFESSIONALS;

- Compass directions and distances are approximate. Compass directions are calculated from the subject property address to the mapped location of each identified toxic site. The compass direction does not necessarily refer to the closest property boundary of an identified toxic site. The compass direction also can vary substantially for toxic sites that are located very close to the subject property address.

- The information presented in your report is a summary of the information that *Toxics Targeting* obtains from government agencies on reported toxic sites. YOU MAY BE ABLE TO OBTAIN ADDITIONAL INFORMATION ABOUT REPORTED SITES WITH THE FREEDOM OF INFORMATION REQUEST FORM LETTERS THAT ARE PROVIDED ON THE INSIDE OF THE BACK COVER.

Section Two: Toxic Site Profiles

The heading of each *Toxic Site Profile* refers to the site's map location and details:

- The facility name, address, city, state, and zip code.
- Any changes that were made to a site's address in order to map its location.
- The site mapping method that was used (see ***How Sites are Located***, at the end of this section for more information).

Toxic Site Profiles summarize information provided by site owners or operators and government agencies regarding various toxic chemical activities reported at each site, such as:

- Whether chemicals were stored, produced, transported, discharged or disposed of.
- The name of chemicals and their Chemical Abstract Series (CAS) numbers.
- The amount of chemicals and the units (gallons/pounds) the chemical was measured in.
- Whether the site or storage tanks at the site are currently active or inactive.
- Special codes used by government agencies to regulate hazardous waste activities at some sites, or a complete description of the codes follows the profiles section.

For selected individual chemicals reported at various toxic sites, some potential health effect summary information appears below the site profile. Each potential health effect summary identifies chemicals by name and by Chemical Abstract Series (CAS) Number. An "x" under each potential health effect heading indicates positive toxicity testing results reported by the National Institute of Occupational Safety and Health's Registry of Toxic Effects of Chemical Substances (RTECS). Some chemicals (mostly appearing in profiles of Hazardous Waste facilities), are reported as mixtures, and RTECS health effect information is only available for individual chemicals. In addition, RTECS only provides information on approximately 100,000 common chemicals. Consequently, the absence of potential health effect summary information for a particular chemical identified in a Toxic Site Profile does not necessarily mean that the chemical does not pose potential health effects.

The Maximum Contaminant Level (MCL) in drinking water allowed for selected chemicals is also noted. In most cases, the only applicable MCL has been set by the New York State Department of Health (NYSDOH). Where NYSDOH has not set an MCL, the federal standard, if one exists, is listed and is marked by an asterisk.

Presented below are column headings that describe the health effect definitions used in RTECS and applicable New York State and federal drinking water standards. Reference sources for information presented in this section are also provided.

ACUTE TOX: **Acute Toxicity**: Short-term exposure to this chemical can cause lethal and non-lethal toxicity effects not included in the following four categories.

TUMOR TOX: **Tumorigenic Toxicity**: The chemical can cause an increase in the incidence of tumors.

MUTAG TOX: **Mutagenic Toxicity**: The chemical can cause genetic alterations that are passed from one generation to the next.

REPRO TOX: **Reproductive Toxicity**: May signify one of the following effects: maternal effects, paternal effects, effects on fertility, effects on the embryo or fetus, specific developmental abnormalities, tumorigenic effects, or effects on the newborn (only positive reproductive effects data for mammalian species are referenced).

IRRIT TOX: **Primary Irritant**: The chemical can cause eye or skin irritation.

MCL: **Drinking Water Standard - Maximum Contaminant Level** (MCL) listed under Drinking Water Supplies, 10 NYCRR Part 5, Subparts 1.51(f),(g), and (h) for NYDOH MCL's and under the Safe Drinking Water Act, 40 CFR 141, Subparts B and G, (* indicates value for total trihalomethanes) for federal MCL's.

Reference Source for Toxicity Information: Registry of Toxic Effects of Chemical Substances (RTECS), NIOSH (on-line database); For further information, contact: NIOSH, 4676 Columbia Parkway, Cincinnati, OH, 45226, 800/35-NIOSH.

Reference Source for Drinking Water Standards: New York State Department of Health, Bureau of Toxic Substances Assessment, 2 University Place, Room 240, Albany, NY 12203, 518/458-6373.

U.S. Environmental Protection Agency, Office of Drinking Water, 401 M St SW, Mailstop WH-556, Washington, DC, 20460, 202/260-5700.

Inactive Hazardous Waste Disposal Site Classifications:

1 -- Causing or presenting an imminent danger of causing irreversible or irreparable damage to the public health or the environment -- immediate action required;
2 -- Significant threat to the public health or environment -- action required;
3 -- Does not Present a significant threat to the environment or public health -- action may be deferred;
4 -- Site properly closed --requires continued management;
5 -- Site properly closed, no evidence of present or potential adverse impact -- no further action required;
2a -- This temporary classification has been assigned to sites where there is inadequate data to assign them to the five classifications specified by law;
A -- Work underway and not yet complete;
P -- Potential Site;
$D_{1, 2, 3}$ -- Delisted Site (1: hazardous waste not found; 2: remediated; 3: consolidated site or site incorrectly listed);
C -- Remediation Complete (formerly D2).

NO NATIONAL PRIORITIES LIST (NPL) SITES IDENTIFIED WITHIN 1 MILE SEARCH RADIUS

NO INACTIVE HAZ WASTE DISPOSAL REGISTRY OR REGISTRY-QUALIFYING SITES IDENTIFIED WITHIN 1 MILE SEARCH RADIUS

NO RCRA CORRECTIVE ACTION SITES IDENTIFIED WITHIN 1 MILE SEARCH RADIUS

NO CERCLIS SUPERFUND SITES IDENTIFIED WITHIN 1/2 MILE SEARCH RADIUS

BROWNFIELDS SITES IDENTIFIED WITHIN 1/2 MILE SEARCH RADIUS

PLEASE NOTE: * Compass directions can vary substantially for sites located very close to the subject property address.

ADDRESS: 100 CHURCH STREET
ROOM 6-140
NEW YORK, NY 10007

NAME: DERMOT CLINTON GREEN, LLC Owner Type: Innocent NonOwner-Petroleum
STEPHEN BENJAMIN
ADDRESS: 320 WEST 57TH ST. 5TH FLOOR
NEW YORK, NY 10019

SITE DESCRIPTION:
The site consists of several parcels located on West 53rd Street between 10th Avenue and the Amtrak easement, on West 52nd Street adjacent to the east side of the Amtrak easement, and along the Amtrak easement between West 51st and 53rd Streets in the City of New York, Borough of Manhattan. Railroad tracks pass through the site. A former ExxonMobil gas station was present on this portion of the Site from approximately 1950 - 1992. By February 2006, all original buildings on-site were torn down and all on-site contaminated soil was excavated and removed off-site. The property is currently owned by Dermot Clinton Green LLC.

The Site now consists of two residential towers, a mixed-use low-rise building, public park, and subsurface parking garage (all currently under construction).

A Certificate of Completion was issued on
October 20, 2006.

CONFIRMED HAZARDOUS WASTE DISPOSED:
None reported

ASSESSMENT OF ENVIRONMENTAL PROBLEMS:
Past environmental investigations revealed that this BCP site had on-site and off-site petroleum impacted soil and groundwater as a result of petroleum spills from the former Exxon/Mobil Service Station at the corner of 53rd Street and 10th Avenue. Dissolved phase groundwater contamination (BTEX, lead and MTBE) has impacted the shallow groundwater table exceeding standards. An adjacent off-site building has experienced liquid petroleum in the basement. On-site and off-site remedial work occurred in early 2000. Although all on-site contamination has been removed through the BCP program in 2006, an off-site groundwater plume still exists and additional cleanup work is required to remediate the off-site contamination. The City of New York has accepted the responsibility for the off-site contamination and a final Site Investigation Work Plan was approved by NYSDEC on February 9, 2009. Field work will begin in the spring of 2009.

ASSESSMENT OF HEALTH PROBLEMS:
All on-site contamination has been remediated through remedial actions completed in 2005-2006. Remedial actions included demolition of all site buildings, removal of all soil to the top of bedrock, and associated dewatering of the site. No contamination is known to exist beneath the top of bedrock. Therefore, all on-site exposures have been mitigated.

A shallow off-site petroleum-contaminated groundwater plume was documented in 1993 (NYSDEC Spill No. 93-08101). Migration of the plume has been limited due to the geology of the area. NYSDEC is currently pursuing the responsible party (Clinton Green OU#2) to investigate and remediate any off-site contamination.

100 Church Street, Room 6-140
New York, NY 10007

Owner Type: PRP - Petroleum

SITE DESCRIPTION:

Location: The Off-site Clinton Green Development Project Site, defined by a shallow off-site petroleum-contaminated groundwater plume, involves the intersection of West 53rd Street and 10th Avenue in Manhattan, New York City.

Site Features: This location is an urban area of commercial/light industrial and residential use including multi-story buildings, sidewalks and open city streets. A paved elementary school playground is located on the southeast corner of this intersection and the Hudson River is approximately two blocks west of the Site.

Zoning/Historical Use: The Site is in an Environmental Zone which is part of the Clinton Green Urban Renewal Area. This is an off-site remedial project associated with the now-completed Clinton Green Development Brownfield Cleanup Project.

Site Geology and Hydrogeology: The depth to groundwater ranges between 12 to 20 feet below the surface. The soil, below the urban fill, is fine to coarse-grained sand. Bedrock is encountered between 11 feet and 15 feet below the surface.

CONFIRMED HAZARDOUS WASTE DISPOSED:

None reported

ASSESSMENT OF ENVIRONMENTAL PROBLEMS:

Nature and Extent of Contamination: The on-site source area (Clinton Green Development BCP Site) was cleaned up by Dermot Clinton Green in 2006, and this project includes the remediation of the off-site petroleum-contaminated plume.

Contaminants: Based upon investigations conducted to date, the primary contaminants are petroleum-related volatile organic compounds (VOCs) in a shallow off-site groundwater plume.

Concentrations: Concentrations of benzene in the groundwater ranged from non-detect to 330 parts per billion (ppb), exceeding the groundwater standard of 1 ppb. Ten other VOCs also exceeded the groundwater standard. Naphthalene (290 ppb) was the only semi-volatile organic compound detected and it exceeded the groundwater standard of 5 ppb. This very localized plume has migrated off-site approximately 100 feet down-gradient.

Significant Threat: The BCP site presented a significant environmental threat due to the off-site release of contaminants from source areas.

ASSESSMENT OF HEALTH PROBLEMS:

Direct contact with contaminated groundwater is not expected since contamination is located at depth and below pavement. Ingestion of contaminated groundwater is not expected since the area is served with public water. An evaluation of the potential for vapor intrusion to occur is part of the approved Remedial Action Workplan currently underway.

NAME: CONSOLIDATED EDISON CO. OF NY, INC. Owner Type: Innocent Owner NonRegistry-HazSubs
BARRY COHEN
ADDRESS: CON EDISON, BUILDING 138
31-01 20TH AVENUE
ASTORIA, NY 11105

SITE DESCRIPTION:
The Astor substation site was formerly called the Riverside Substation site. Con Edison, the project applicant, changed the project name to Astor Substation site in response to discussion with various community members in October 2005.
The Astor substation site (~ 0.6 acres in size) is located along the eastern side of 11th Avenue between west 49th and West 50th Street in the Clinton section of the borough of Manhattan, city of New York, at latitude 40 degree 45’ 57.2" and longitude 73 degree 59’ 40.9", and designated as tax parcels Block 1078, Lots 1 and 5 on the Tax Map of the City of New York, New York County. The street address for the parcel is 700 11th Avenue (which also known as 549-551 and 553-557 West 49th Street), New York, NY 10019. During 1930 to 1940, the site had been used for gasoline filling station and automobile service garage. Prior to its acquisition by Con Edison on April 12, 2005, the site was owned and operated by Martin Motors Sales, Inc. (MMS) as a retail automobile sales and service facility. The area around the site is fully developed as commercial, residential and institutional uses to the east, north and south; with another Con Edison electrical substation located west of the site across 11th Avenue. The building on the site had been demolished in connection with Con Edison’s redevelopment of the Site into an electrical substation that is needed to meet the increasing demand for power in midtown Manhattan. The site is currently being redevelop and the electrical substation construction is anticipated to be completed sometime in 2008.

Investigations completed at the site include a Limited Phase II Environmental Site Assessment (January, 2005) and Remedial Investigation Report (November 2005).

The volunteer has submitted and the Department has approved a Remedial Action Work Plan(RAWP) which involves excavation of soil at the entire site and the northern portion of 11th avenue sidewalk area along the western site property line down to top of bedrock surface. Contaminated media will be removal and properly disposed off-site.

Implementation of the approved RAWP started on 4/25/06. Remedial construction was completed on February 2007. Remedial Action Report(RAR) date March 2007 and RAR addendums dated April 2007 and November 2007 respectively, collectively equivalent to a Final Engineering Report. FER was approved on 12/21/2007 and a Certificate of Completion was issued on 12/21/2007.

CONFIRMED HAZARDOUS WASTE DISPOSED:

TYPE	QUANTITY
TETRACHLOROETHYLENE (PCE)	UNKNOWN
TOLUENE	UNKNOWN
XYLENE (MIXED)	UNKNOWN

ETHYLBENZENE	UNKNOWN
BENZENE	UNKNOWN
TRICHLOROETHENE (TCE)	UNKNOWN

ASSESSMENT OF ENVIRONMENTAL PROBLEMS:

Site investigations conducted prior and after implementation of the BCP agreement revealed that the presence of underground storage Tanks (USTs) that were associated with the former gas station or automobile repair facility; petroleum contamination in the northwest corner of the site (both on-site and off-site) in soil and groundwater, including petroleum product on the groundwater surface(up to 5 feet of separate-phase product has been detected in an off-site well in the vicinity of the former gasoline filling station located in the north west portion of the site); soil and groundwater near the location of a former oil/water separator in the garage area which is located south east of the site had been impacted by the former site uses (automobile service garage); Soil Gas sampling indicates the presence of VOCs, including both gasoline related compounds and chlorinated solvents (PCE, and TCE) that are consistent with findings in soil, groundwater, and pass site use, The remedial investigation report also identify a NYSDEC spill site (spill # 8904939 petroleum origin) is located at the southeast corner of west 51st street and 11th avenue about one block north of Astor substation site, these off-site properties may be contributing to the soil vapor detections; Low level of PAHs and Metals were detected from on site soil; Sediment samples from the floor drain in the service garage indicated the presence of PCE, TCE and gasoline related compounds with concentration above the TAGM4046 recommended soil clean up objective.

The applicant had implemented the approved Interim Remedial Measures (IRM) to recover petroleum product identify in the on and off site wells since September of 2005. The thickness of the petroleum product in groundwater monitoring wells show significant drop as the result of the IRM activities.

The quality exposure assessment indicated the lack of exposure pathways at the site because of the current ground surface is covered with impervious surface. DEC has determined, in consultation with NYSDOH, that the conditions at this site do not pose a significant threat to human health or the environment.

The RAWP dated December 2005 was approved March 31, 2006 has been implemented. The FER has been approved and the COC issued in December 2007.

ASSESSMENT OF HEALTH PROBLEMS:

Public water is provided to the area, thereby preventing exposures to groundwater. The site is currently covered with buildings and pavement, preventing direct contact exposures.

SITE DESCRIPTION:

Location:
The Mid Block #57 Project site is located in Manhattan at 615-649 West 57th Street, between 11th and 12th Avenues. The site consists of Tax Block 1105, Lots 14, 19, 43, and part of Lot 5, in the Borough of Manhattan. The surrounding neighborhood is mixed residential and commercial.

Site features:
This site is approximately 1.36 acres in size. Former on-site buildings have been demolished and the site is currently vacant.

Current zoning/uses:
Remedial action began in March 2010 and as such is currently vacant. Remedial action is currently on hold until autumn of 2011 due to some changes in building design and associated permit requirements. East of the Site and bordering 11th Avenue is The Helena, an active rental residential tower with market and affordable housing, and Manhattan Mini Storage. The Helena is located at 601 West 57th Street (southeast corner of block) and Manhattan Mini Storage is located at 847-853 Eleventh Avenue (northeast corner of block). West of the Site at 830 12th Avenue is a vacant lot, which formerly contained an Airborne Express parcel warehouse and Artkraft Strauss Building (formerly manufactured signs and billboards). Potential contamination on this property to the west is being investigated as an off-site project (see C231062A).

Historical use:
The Site formerly contained an Airborne Express parcel warehouse and vehicular maintenance building (631-649 West 57th Street), a Potamkin Toyota auto service repair facility (623-629 West 57th Street), the Copacabana Night Club (615-621 West 57th Street),

and Dynasty Auto Body Facility (616-618 West 58th Street). The site was originally proposed to be redeveloped as a school, but now is planned for residential use with ground level retail and a sub-grade parking level.

Site geology and hydrogeology:
The topography of the site slopes gently to the west toward the Hudson River, which is situated approximately 250 feet west of the site. The site geology is characterized by fill material overlying sand and till, weathered rock, and bedrock.

A Brownfield Cleanup Agreement (BCA) was executed in December 2008, and on February 17, 2009 an amendment to the BCA was signed by new volunteers. The Remedial Action Work Plan (RAWP) was approved in March 2010. The Volunteer intends to complete a Track 1 cleanup for Unrestricted Use.

CONFIRMED HAZARDOUS WASTE DISPOSED:

TYPE	QUANTITY
BENZENE	UNKNOWN
XYLENE (MIXED)	UNKNOWN
Chrysene	UNKNOWN
NAPHTHALENE	UNKNOWN
MERCURY	UNKNOWN
ETHYLBENZENE	UNKNOWN
CHROMIUM	UNKNOWN
LEAD	UNKNOWN
ZINC	UNKNOWN
TETRACHLOROETHYLENE (PCE)	UNKNOWN
1,2,4-TRIMETHYLBENZENE	UNKNOWN

ASSESSMENT OF ENVIRONMENTAL PROBLEMS:
Nature and extent of contamination:
The Remedial Investigation (RI) found contamination in soil, groundwater, and soil vapor. Contaminants of concern at the Site are petroleum-related compounds. Contamination in each of these media is discussed below.

Soil:
Twenty three (23) soil samples were analyzed. Analytical results revealed volatile organic compounds (VOCs) in soil exceeding Part 375 Unrestricted Soil Cleanup Objectives (UUSCOs). This includes ethylbenzene, detected at 275 parts per million (ppm) in comparison to the UUSCO of 1 ppm; 1,2,4-trimethylbenzene at 317 ppm compared to the UUSCO of 3.6 ppm; and total xylenes at 1,380 ppm compared to the UUSCO of 0.26 ppm. Semi-volatile organic compounds (SVOCs) were also identified in soil in multiple samples at concentrations above the UUSCOs. This includes chrysene which was detected at 5.5 ppm compared to the UUSCO of 1 ppm and naphthalene at 38 ppm compared to the UUSCO of 12 ppm. Metals identified in soil samples at concentration above the UUSCOs include mercury at 46 ppm compared to the UUSCO of 0.18 ppm; chromium at 65.8 ppm compared to the UUSCO of 30 ppm; lead at 4,420 ppm compared to the UUSCO of 63 ppm; and zinc at 1,250 ppm compared to the UUSCO of 109 ppm.

Groundwater:
Eleven (11) groundwater samples were analyzed. The analytical data revealed VOCs at concentrations exceeding NYS Technical and Operational Guidance Series (TOGS) Ambient Water Quality Standards. Benzene was detected at 1,500 parts per billion (ppb) compared to the TOGS standard of 1 ppb; 1,2,4-trimethylebenzene at 2,400 ppb (TOGS standard is 5 ppb); and total xylenes at 4,900

ppb (TOGS standard is 5 ppb). A few SVOCs were detected at concentrations exceeding TOGS standards include naphthalene as high as 190 ppb (TOGS standard is 10 ppb); benzo(a)pyrene as high as 8.3 ppb (TOGS standard is non-detect); and chrysene as high as 10 ppb (TOGS standard is 0.002 ppb). Metals detected in groundwater at concentrations exceeding TOGS standards include: lead as high as 900 ppb in unfiltered samples compared to the TOGS standard of 25 ppb; mercury as high as 11.9 ppb (unfiltered) (TOGS standard is 0.7 ppb); chromium as high as 139 ppb (unfiltered) (TOGS standard is 50 ppb); and arsenic as high as 38 ppb (unfiltered) (TOGS standard is 25 ppb). None of these metals were detected in filtered groundwater samples. Manganese and sodium were the only metals detected in both unfiltered and filtered samples at concentrations above TOGS standards.

Soil vapor:
Twelve (12) soil vapor samples were analyzed. Analytical data revealed the presence of VOCs in these soil vapor samples, including benzene at a maximum concentration of 831 micrograms per cubic meter (ug/m3), 1,2,4-trimethylbenzene at 37,600 ug/m3, tetrachloroethane (PCE) at 240 ug/m3, and total xylenes at 21,400 ug/m3.

Special resources impacted/threatened:
There were no significant ecological resources identified at the site during the investigation.

Significant threat:
Based on the results of the Remedial Investigation, NYSDEC and NYSDOH have determined that the Site represents a significant threat to human health and the environment. This decision is based on the nature of the existing contaminants identified at the Site; the potential for off-site migration of contaminants in the groundwater; and the potential for human exposure to site-related contaminants via soil vapors.

ASSESSMENT OF HEALTH PROBLEMS:
The site is vacant, therefore, contact with contaminated soil is unlikely. Drinking water with site-related contaminants is not expected as the area is served by public water. Since on-site soil vapor contains elevated levels of volatile organic compounds, inhalation of site-related contaminants via soil vapor intrusion in future on-site buildings may be possible. Vapor intrusion into off-site structures is a potential exposure pathway that needs to be investigated.

SITE DESCRIPTION:
This project was initiated to address off-site impacts from the Mid-Block #57 Brownfield Cleanup Program (BCP) project C231062. There is also a stipulation agreement for the Site, under Spill 9810172.

Location:
This Site is located at 615-649 West 57th Street and 830 12th Avenue in the Borough of Manhattan, Block 1105, Lot 1 and part of Lot 5. It is immediately west of BCP Site C231062. To the west is 12th Avenue and the Hudson River; north is 58th Street and the 59th Street Con Edison steam generating facility; and to the south is 57th Street and several businesses, including parking facilities, auto dealership service stations, and offices of NYC Sanitation Department. The surrounding neighborhood is mixed residential and commercial.

Site features:
The Site is a rectangular lot of 1.17 acres. Former on-site buildings have been demolished and the Site is currently vacant.

Current zoning/uses:
The site is currently vacant, following demolition of the on-site buildings. Construction on this site is planned to be performed in conjunction with work on the BCP site to the east. Proposed development is for residential and commercial use.

Historical use:
Prior to 1951, the western portion of the site formerly contained the Brockway Motor Truck Company and Stutz (or State) Service Station. By 1951 a private garage and repair shop occupied the 2-story building. By 1976 the building was used by the Artkraft Strauss Sign Company for the manufacturing of signs and billboards for Times Square. The first floor of the building was used at this time for parts storage, metalworking and woodworking equipment, painting, and storage of vehicles. After Artkraft Strauss left the building was subsequently served as studio space for artists. This building was demolished in early 2011.

The eastern portion of the site formerly contained the Colt Stewart Co. Chrysler Service Station followed by United Parcel Service, Inc. who occupied the building by 1940. Underground Storage Tank (UST) leaks were reported to the Fire Department during that time. The building was subsequently used by New York Telephone, who installed 2 USTs, and later by Airborne Express as a parcel warehouse. The building was demolished in 2001 and subsequently used as a parking lot.

Site geology and hydrogeology:
The Site topography slopes west toward the Hudson River with an elevation ranging from 13 feet above Manhattan Bureau Datum on the eastern portion of the Site to 7 feet above Manhattan Bureau Datum on 12th Avenue. In general, regional topography slopes gently to the west. The nearest surface water body is the Hudson River located approximately 250 feet west of the Site. The Site geology is characterized by fill material of varying thickness overlying sand and till, decomposed rock, weathered rock, and bedrock.

CONFIRMED HAZARDOUS WASTE DISPOSED:
None reported

ASSESSMENT OF ENVIRONMENTAL PROBLEMS:
Nature and extent of contamination:

Soil:

Petroleum-related contaminants at levels exceeding unrestricted use soil cleanup objectives (UUSCOs) exist in discrete locations on the site. These areas were largely addressed via Interim Remedial Measures (including UST removal and excavation of surrounding impacted soil). Following the IRM work, end-point samples in the northern excavation show remaining contamination that requires further remedial action, including benzene at 0.21 ppm (UUSCO is 0.06 ppm); ethylbenzene at 8.5 ppm (UUSCO is 1 ppm); total xylenes at 8.1 ppm (UUSCO is 0.26 ppm); 1,2,4-trimethylbenzene at 33 ppm (UUSCO is 3.6 ppm); and 1,3,5-trimethylbenzene at 16 ppm (UUSCO is 8.4 ppm). In addition to this area, two other discrete areas on the site will be excavated to remove soil with elevated concentrations of benzene under the approved Remedial Action Work Plan (RAWP). Semi-volatile organic compounds (SVOCs) have also been found site-wide, at concentrations that indicate this is part of site background conditions. One area of elevated SVOCs (LB-17) requires remediation under the RAWP. SVOCs detected here include: benzo(a)anthracene at 12 ppm; benzo(a)pyrene at 10; benzo(b)fluoranthene at 12 ppm; and chrysene at 10 ppm (UUSCO for these contaminants is 1 ppm).

Tetrachloroethylene (PCE) previously detected in one boring at 1.76 ppm was removed during the IRM work; chlorinated VOCs were not detected in any other borings.

Groundwater:
In on-site groundwater, VOCs detected in previous investigations have been largely reduced. In 2007 tetrachlorethene was detected in one groundwater sample and vinyl chloride in a separate groundwater sample; these have not been detected in any groundwater samples since. The only contaminants detected in on-site groundwater at concentrations exceeding the NYS Technical and Operational Guidance Series (TOGS) Ambient Water Quality Standards, during the recent Remedial Investigation, include: 1,2,4-trimethylbenzene at 8.1 ppb and isopropylbenzene at 42 ppb. Off-site monitioring wells have detected (in historical sampling) benzene at 20.3 ppb (compared to the TOGS standard of 1 ppb); Ethylbenzene at 61 ppb (compared to the TOGS standard of 5 ppb); and total xylenes at 39.5 ppb (compared to the TOGS standard of 5 ppb). Groundwater contamination appears to be coming from the adjacent BCP site C231062 (Mid-Block 57 Site).

Soil vapor:
Historical soil vapor sampling (2007) and RI soil vapor sampling initially identified high concentrations of chlorinated VOCs in soil vapor in a few discrete locations including tetrachloroethylene (PCE) as high as 46,500 ug/m3 and trichloroethene (TCE) as high as 1400 ug/m3. Following the IRM work, these concentrations were greatly reduced but are still present (post-IRM soil vapor samples identified PCE at a maximum of 125 micrograms per cubic meter (ug/m3) and TCE at a maximum of 67.2). Petroleum-related contaminants are also present in soil vapor, including benzene at 130 ug/m3 and ethylbenzene as high as 82 ug/m3. The approved RAWP includes installation of a sub-slab depressurization system.

ASSESSMENT OF HEALTH PROBLEMS:

SITE DESCRIPTION:
This site is located between 58th and 59th streets, east of 11th Avenue. It is currently occupied by a warehouse and parking garage. The site is contemplated for development by John Jay College. A site characterization was conducted in 2004 No significant MGP contamination was encountered and a no further action letter was issued in July 2005. A release and covenant not to sue was issued by DEE. No ECs/ICs required.

CONFIRMED HAZARDOUS WASTE DISPOSED:
None reported

ASSESSMENT OF ENVIRONMENTAL PROBLEMS:
The 2004 site characterization did not reveal any significant MGP impacts.

ASSESSMENT OF HEALTH PROBLEMS:
Public water is provided to the area, thereby preventing exposures to groundwater. Public exposures are not expected since the investigation of the site found little evidence of waste material.

SITE DESCRIPTION:

The Site is situated on an approximately 1.09-acre area bounded by West 61st Street to the north, West 60th Street to the south, the Track 4 area, a school, and a residential building to the east, and residential buildings, a school, and a commercial automobile parking garage to the west. The Site is located in the County of New York, New York and is identified as Block 1152 and former Lots 5, 8, 10, 11, 12, 13, part of 43, 52, 53, and 55 (current Lot 8 and part of Lot 13) on the New York City Tax Map.
The street address of this Site is 229-251 West 60th Street and 218-240 West 61st Street, New York, NY 10023.

The results of the remedial investigation, conducted at the Site during 2005, indicated several areas of concern within the Site, associated with past on-site uses. Former Site uses included a gasoline station, an automobile repair shop, an iron works, and automobile parking areas. Several aboveground storage tanks (ASTs) and the likelihood of several USTs were noted during the Phase I ESA. A commercial-industrial facility located east of former Lot 13, which produced buttons and fabric, was noted in the report. Records indicated that the facility utilized two petroleum storage tanks during its operation from 1926 to 2003.

Three schools and a NYC Parks Department pool and a community center are present in the surrounding neighborhood. The proposed development on the Site includes the construction of a mixed-use residential and office complex with a parking garage. The proposed project will contain a total of 384,000 gross square feet of residential space (buildings would be a 27 story tower with two lower and mid-rise components of 9 and 14 stories), totaling approximately 505 units; 31,000 gross square feet of medical office space; court yard area with tennis court and an underground garage for 282 parking spaces.

The remedial program was conducted in accordance with the March 2006 Remedial Work Plan and included excavation, removal of all soil within the Site boundary to the bedrock (8-22 feet deep) and transportation and disposal at off-site approved facilities. A total of twenty-six (26) tanks, including ASTs and USTs, were encountered during demolition, excavation, and remediation activities on the Site. All twenty-six tanks encountered on-site were removed for off-site disposal/recycling. Contaminated groundwater was removed for off-site disposal. A waterproofing layer has been installed beneath the new construction.

The Remedial construction was completed in November 2007. A Final Engineering Report was approved on December 21, 2007 for a Track 1 cleanup for unrestricted Site usage. Redevelopment of the Site is on-going.

A Certification of Completion was issued on December 21, 2007.

CONFIRMED HAZARDOUS WASTE DISPOSED:

TYPE	QUANTITY
BENZ(A)ANTHRACENE	UNKNOWN
XYLENE (MIXED)	UNKNOWN
BENZENE	UNKNOWN
NAPHTHALENE	UNKNOWN
HEPTACHLOR EPOXIDE	UNKNOWN
Chrysene	UNKNOWN

ASSESSMENT OF ENVIRONMENTAL PROBLEMS:

June 2003 Phase I Environmental Assessment Report identified environmental conditions for the site and indicated evidence of up to 16 storage tanks (UST/ASTs) were present. These tanks were used for storing gasoline, fuel oils, lubricants, waste oils and other materials. These operations have resulted in environmental contamination.

Remedial Investigation commenced in late summer of 2005 and was completed by January 2006. The Remedial Investigation Report

(RIR) indicated the presence of seven on-site areas of concern. These areas include (1) three locations where underground storage tanks were discovered, (2) one location of elevated lead in the soil (Lot 43), (3) one location where acetone-contaminated soil (Lot 5) was detected, (4) one location of a suspected vaulted tank in a former basement, and (5) one location of petroleum-contaminated soil and groundwater. Groundwater contained benzene, two pesticides and several metals above groundwater standards.

The primary contaminants and impacted media at the site include an area of petroleum-contaminated soil; historical fill containing atypical concentrations of contaminants (e.g. metals and SVOCs); and limited VOCs, pesticides and metals in groundwater. An Interim Remedial Measure (IRM) work plan was prepared in February 2006 to investigate and remove some of the areas of concerns identified in RI report.

Exceedances of standards, criteria and guidance primarily include total VOCs (max: 8,900 ug/ kg), total SVOCs (max: 243,260 ug/ kg) and some metals (including lead (max: 2980 mg/kg), chromium (max: 278 mg/Kg), mercury (max: 2.5 mg/kg) and arsenic (max: 16.8 mg/ kg)) for soil and VOC's in groundwater (benzene at 20 ppb; toluene at 5.8 ppb, ethylbenzene at 8.3 ppb and xylene at 33 ppb) and one SVOC (naphthalene at 13 ppb), low levels of metals and low levels of two pesticides (4,4"-DDD and heptachlor epoxide).

A Remedial Action Work Plan (RAWP) was prepared in April 2005 to address all contamination from this property including underground tanks and associated contaminated soils, petroleum-contaminated soils, historic fill and C & D debris.

Remediation proceeded for Track 1 Cleanup standards for unrestricted usage. A total of 36,617 tons of petroleum-contaminated soil, 77 tons of characteristic hazardous waste (lead) soil, 43,961 tons of soil containing low-level contaminants, and 1,892 tons of soil containing rock and/or concrete pieces greater than 8 inches were excavated and disposed of off-site. Twenty-six (26) tanks, including ASTs and USTs, were encountered during demolition, excavation, and remediation activities on the Site. All 26 tanks were removed for off-site disposal/ recycling. Approximately 533,490 gallons of groundwater were pumped through the filter system and approximately 888,897 gallons were transported via tanker trucks for off-site disposal. All on-site sources of groundwater contamination were removed during remedial activities. The sub-grade slabs and foundation walls are waterproofed with a barrier and seal system, which also functions as a vapor barrier.

All remediation is completed and a Final Engineering Report was approved on December 21, 2007.

The site does not present a significant threat to the environment.

ASSESSMENT OF HEALTH PROBLEMS:

Volatile and semi-volatile compounds are present in soils at this site. Exposure to groundwater is not likely since the area is served by public water. The site is paved and is currently used as a parking lot, therefore current exposure to contaminated soils is unlikely. Soils will be removed and excavated to bedrock thereby removing all site-related contamiantion. Soil vapor intrusion into the proposed building will be unlikely since all contamination is being removed as part of the remedy. A soil vapor survey was conducted at the perimeter of the site to evaluate the potential for off-site receptors to be effected. Low levels of volatile organic compounds were detected, but the concentrations do not pose a health concern.

LAURANCE T. GINSBERG
ADDRESS: C/O ALGIN MANAGEMENT CO. LLC
64-35 YELLOWSTONE BLVD.
FOREST HILLS, NY 11375

SITE DESCRIPTION:
Location: This site was originally part West 61st Street site, which was approximately 62,500 square feet (1.44 acres). The larger site was subdivided into two separate sites: the "West 61st Street Tennis Court Area Site" (C231059), and the "West 61st Street Site" (C231043). The Tennis Court Area (the Site) consists of an approximately 100 by 150 foot parcel of tax Block 1152, Lot 43. The Site is bounded by West 61st Street to the north, a public school to the east, an apartment building to the south, and the West 61st Street site (C231043) to the west.

Site Features: The site is a paved tennis court with landscaped areas.

Current Zoning: The current zoning is residential. Three schools and a NYC Parks Department pool and a community center are present in the surrounding neighborhood.

Historical Use: The Phase I Site Assessment identified that Lot 43 operated as a gasoline station and contained underground storage tanks (USTs).

Site Geology and Hydrogeology: The topography of the site slopes gently to the west toward the Hudson River, which is situated approximately 1000 feet west of the site. The site geology is characterized by fill material overlying sand and till, weathered rock, and bedrock between 8 and 12 feet bg.

CONFIRMED HAZARDOUS WASTE DISPOSED:

TYPE	QUANTITY
ARSENIC	UNKNOWN
ETHYLBENZENE	UNKNOWN
HEPTACHLOR EPOXIDE	UNKNOWN
BENZENE	UNKNOWN
NAPHTHALENE	UNKNOWN
LEAD	UNKNOWN
XYLENE (MIXED)	UNKNOWN
MERCURY	UNKNOWN
TOLUENE	UNKNOWN
CHROMIUM	UNKNOWN

ASSESSMENT OF ENVIRONMENTAL PROBLEMS:

Nature and Extent of the Contamination:

Exceedances of the TAGM 4046 recommended soil cleanup objectives include SVOCs and metals (including lead at a concentration that exceeded the characteristic hazardous waste limit contained in Part 371-3). Exceedances of the groundwater standards included metals. During remediation activities, eight (8) 550-gallon USTs with associated piping were located near the former parking lot attendant guard house in the northeastern corner of Lot 43 and one (1) 1,500-gallon UST was located in the southwestern corner of the parking lot portion of Lot 43. These two areas were remediated through excavation, tank removal, and post-removal soil analysis. A third area containing SVOCs and metals was also excavated and removed. The excavations were backfilled with clean material. A composite cover system was installed consisting of a demarcation layer overlain by (a) 1 foot of clean fill and capped with asphalt or similar material to cover the tennis court area, or (b) 2 feet of clean fill in areas covered with landscaping elements. The composite cover system acts as a permanent engineering control on the site.

The terms of the Brownfield Cleanup Agreement have been met. The remediation at the site has been completed. The site is now in Site Management Phase.

ASSESSMENT OF HEALTH PROBLEMS:

The top two feet of cover at the site consist of clean soil, concrete and/or asphalt. Proper maintenance of this cover material will prevent the public from coming in direct contact with residual soil contamination. Since the area is provided with public water it is unlikely that anyone will be exposed to site contaminants in drinking water.

SITE DESCRIPTION:
The West 45th Street site is located on the west side of mid-town Manhattan. The main site features include a large package sorting facility on operable unit (OU) 1 and a parking lot on OU-2. OU-2 is on a separate block from OU-1. The surrounding parcels are a highy urbanized combination of commercial, industrial, and residential uses.

DNAPL and other wastes associated with the MGP operations have been found on OU-1 and OU-2.

The remedial investigation for OU-1 is complete and the Department is awaiting an Alternatives Analysis.

The investigation phase on OU-2 is completed and the remedy planning phase is currently on-hold, awaiting devleopment plans from the property owner.

CONFIRMED HAZARDOUS WASTE DISPOSED:

TYPE	QUANTITY
COAL TAR	UNKNOWN

ASSESSMENT OF ENVIRONMENTAL PROBLEMS:
Historically, the chemicals of concern at a manufactured gas plant (MGP) are benzene, toluene, ethylbenzene, xylene (BTEX) and polycyclic aromatic hydrocarbons (PAHs). BTEX and PAHs have been found in the soil and groundwater at the site in exceedance of standards, criteria, and guidance. This site presents a possible significant threat to the environment because of the possibility of contaminants of concern being released from source areas into the groundwater.

The primary contaminants of concern on the OU-2 portion are BTEX and PAHs. Investigations indicate a plume of contaminated groundwater under the site and subsurface soil contamination due to the release of dense nonaqueous phase liquid (DNAPL) under the site. Exceedances of standards, criteria, and guidance include BTEX and PAHs in groundwater and soils under the site. The Hudson River is roughly 50 yards from the site on the west and may be impacted. The site presents a signicant threat due to the ongoing releases of contaminants from source areas into groundwater.

ASSESSMENT OF HEALTH PROBLEMS:

Manufactured Gas Plant waste has been identified in surface, subsurface and groundwater at the site. Currently, a paved parking lot associated with the USS Intrepid museum occupies the site. There is a potential for exposure to low level site-related contamination in surface soils through direct contact in areas that are not paved or covered by buildings. Exposure to site-related contaminants in groundwater is not likely since homes and businesses near the site are connected to public water. The results of sub-slab vapor and indoor air samples collected from on-site buildings do not indicate a public health concern. NYSDOH and NYSDEC are conducting further investigations to determine the potential for soil vapor intrusion into structures on and near the site.

HAZARDOUS MATERIAL SPILLS INTRODUCTION

The Hazardous Material Spills in this section are divided into eight spill cause groupings. These include:

Active Spills Section: Spills with incomplete paperwork that may or may not be cleaned up (See Date Cleanup Ceased)

1) Tank Failures
2) Tank Test Failures
3) Unknown Spill Cause or Other Spill Cause Hazardous Spills
4) Miscellanous Spill Causes: Equipment Failure, Human Error, Tank Overfill, Deliberate Spill, Traffic Accidents, Housekeeping, Abandoned Drum, and Vandalism.

Closed Status Spills Section: Spills with completed paperwork that may or may not be cleaned up (See Date Cleanup Ceased)

5) Tank Failures
6) Tank Test Failures
7) Unknown Spill Cause or Other Spill Cause Hazardous Spills
8) Miscellanous Spill Causes: Equipment Failure, Human Error, Tank Overfill, Deliberate Spill, Traffic Accidents, Housekeeping, Abandoned Drum, and Vandalism.

All spills within each spill cause category are presented in order of proximity to the subject site address.

Please note that spills reported within 0.25 mile (or one-eighth mile in New York City) are mapped and profiled.

Between 0.25 mile (or one-eighth mile in New York City) and 0.5 mile, only the following spills are mapped and profiled:

* Tank Failures;

* Tank Test Failures;

* Unknown Spill Cause or Other Spill Cause;

* Spills greater than 100 units of quantity; and

* Spills reported in the NYSDEC Fall 1998 MTBE Survey.

A table at the end of each section presents a listing of reported Miscellanous Spills with less than 100 units located between 0.25 mile (or one-eighth mile in Manhattan) and 0.5 mile. These spills are neither mapped nor profiled.

NO ACTIVE TANK FAILURES IDENTIFIED WITHIN 1/2 MILE SEARCH RADIUS

ACTIVE TANK TEST FAILURES IDENTIFIED WITHIN 1/2 MILE SEARCH RADIUS

Please Note: * - Compass directions can vary substantially for sites located very close to the subject property address.

Caller Remarks:

1247 THE CALLER ADVISED DISPATCH THE SPILL AMOUNT IS UNKNOWN AT THIS TIME. THE TANK TEST REFLECTED A FAILURE IN THE SYSTEM. THE CLEAN UP IS PENDING UPON TANK REMOVAL. THE TANK IS ABOVE GROUND.

DEC Investigator Remarks:

"Modified" TTF letter e-mailed to HPD property manager -

Derek Parsons.
Director, Environmental Compliance
NYC HPD - Office of Development
100 Gold St, Rm 9V-5, NY, NY 10038
(p) 212-863-7172; (f) 212-863-7988,
(C) 917-559-4337
parsonsd@hpd.nyc.gov

e-mail message sent:
Attn: Derrick Parsons,
HPD Property Manager

The following spill cases refer to two Tank Test Failures that both occurred on April 11, 2011.

Spill #1100355 - 500 West 52nd St, Manhattan

Spill #1100365 - 400 Grand St, Manhattan

Below is the standard text sent out to all property owners/managers after a tank test failure:

On April 11, 2011 the New York State Department of Environmental Conservation (the Department) received notification of a tank system integrity failure at the above mentioned facility. You have been identified as either the owner of this tank or the owner's representative. Because the tank system was found not to be tight, a petroleum release may have occurred at this property, which is a violation of the New York State Environmental Conservation and Navigation Laws. Therefore, the Department requires that you take immediate action to prevent and stop any additional release of petroleum, determine the cause of the failure, and investigate/remediate any soil and/or groundwater contamination, if a petroleum release has occurred. The following steps are required by the Department:

1. Determine if the "wet" portion of the tank system failed. If so or if it is inconclusive as to which part of the system failed, then the tank's contents must be emptied immediately to ensure that no further release occurs.

2. Determine the cause of the tank system integrity failure. This process may include, but is not limited to, excavation of a part of the tank system, isolation of the tank from the piping and separate retesting, or tank and/or piping repair/replacement with subsequent system retesting.

3. Remove any contaminated soil found during the excavation of the tank or piping to the extent feasible and properly disposed of it under applicable regulations for petroleum contaminated soil.

4. Submit a letter or report to this office no later than one month from the date of this letter. The report must be prepared by a qualified professional. The report must reference the spill case number and the site address. The report must specify the cause of the tank system failure and the actions taken to stop, minimize, or remove the petroleum release and must also include conclusions and recommendations for further action. Specific mention must be made if any contamination was found, and how it was dealt with.

****

Mr. Parsons - As per our telephone conversation, it sounds as though your office is proceeding with the required isolation and retesting necessary to determine the location of the leaking problem. In terms of the NYSDEC, we are most concerned with the identification of any actual spill or soil contamination which may have resulted from a leak.
Please get back in touch with our office as soon as this additional investigation is completed with any results you may be able to provide.

Thank you,
Steven Sangesland
Environmental Engineer
NYSDEC - Region 2 Spills Unit
****
****

5/12/2011 Sangesland spoke to Derrick Parsons at HPD. He had the environmental consultant in his office. He said the issue with 500 W 52nd St site was a dry leak from an old weld on the top of the tank. They tried to repair it, but it didn't work. (AST wrapped) Tank is being taken out of service and removed. Sangesland asked for a color photo of the tank area AFTER the tank was removed. If there is oil staining, a boring will be required.

TANK FAILED PETRO TITE TEST, IN PROCESS OF EXCAVATING TANK TOP, WILL ISOLATE & RETEST,RETESTED ON 1/5/91 & .

DEC Investigator Remarks:

This spill has been consolidated under Spill No. 89-04939. See also Spill Nos. 90-09654, 94-00944, 95-05594, 00-07323, 04-03447, 04-05537, 04-13534, 04-13552, and 05-01922.

8/10/2003: Project transferred from Sigona to Harrington (central office) for management. (Sigona)

10/12/2004: Consent order and Corrective Action Plan were executed by the Regional Director. (Harrington)

3/29/2005: Building at 714 11th Avenue was evacuated by FDNY due to elevated levels of gasoline vapor in basement (~11% LEL). Vapor intrusion caused by air rotary drilling at Mobil site as part of station regrade activities. (Harrington)

3/31/2005: Site visit conducted. Met with representatives of Exxon Mobil, Salomone Brothers, Trammell Crow, and the Bull McCabe restaurant. Contacted Chief John Belnavus (FDNY Batallion 9) to discuss the stop work order issued. He lifted the order after our conversation, as Exxon Mobil had presented a satisfactory plan to avoid any further vapor issues in the adjacent building. (Harrington)

6/2/08- DEC Piper. SPill staff recieved notifaction that approx 5 gallons of gasoline was discovered in soil in an excavation adjacent to site. Spill 0802247. This spill has bee nclosed and referred to this spill.

4/4/2005: Approved RAP amendment during on-site meeting. (Harrington)

4/7/2005: Approved RAP amendment #2 during on-site meeting. (Harrington)

4/19/2005: Approved RAP amendment #3 during on-site meeting. (Harrington)

5/2/2005: Approved CAMP amendment during on-site meeting. (Harrington)

5/6/2005: Security guard was murdered on-site. NYPD believes the motive was robbery. (Harrington)

9/19/2005: Upgrade activities are complete, and station is now operational. Sent letter to Exxon Mobil approving the monitoring well replacement work plan, as all on-site wells were destroyed during the station upgrade. SVE and GWPT systems are on-line. (Harrington)

10/31/2005: Received station upgrade activity report. Sent Exxon Mobil a letter closing spill nos. 04-13534 and 05-01922. (Harrington)

6/8/2006: Approved Well Replacement Report documenting installation of two new recovery wells and an additional SVE well. (Harrington)

6/13/2006: Approved request to shutdown the groundwater recovery system in an e-mail to Exxon Mobil. Stipulated that the upgrade work to the electrical panel shall be completed so that the system can be re-started with minimal delay should the need arise. (Harrington)

8/17/2006: Sent an e-mail to Exxon Mobil approving the hydraulic lift removal report. (Harrington)

8/29/2006: Sent an e-mail to Exxon Mobil approving the sensitive receptor survey report. (Harrington)

2/6/2007: Project transferred from Harrington to Smith (central office) for management. (Smith)

4/19/2007: Approved the installation of two additional remedial wells to expand the Soil Vapor Extraction system. Performed site visit on April 18, 2007. (Smith)

6/22/2007: Two additional wells installed to expand SVE system. (Smith)

7/24/2007: Project transferred from Smith to Harrington (central office) for management. (Harrington)

8/3/2007: PM visited the site with Kleinfelder Personnel (Mooney, Meyerhoefer). O & M of SVE system is on-going. Kleinfelder will soon be proposing the abandonment of several off-site monitoring wells. (Harrington)

2/18/2008: PM sent e-mail to Exxon Mobil regarding the SVE system expansion. Based on increased BTEX concentrations in groundwater (wells RW-2 and VP-MW-9), a revised groundwater remedial strategy shall be proposed by Exxon Mobil. (Harrington)

12/4/08 - Haggerty: Assumed management from Dave Harrington

3/2/09 - Haggerty: Approved Reporting Reduction Request. Sampling will remain quarterly, SVE/AS system maintanence will remain on 2 week schedule, reporting will now be bi-annually. System has been operating since 2001 and functioning well. 7500ibs of mass recovered at this point

6/11/09 - Haggerty: Approved Hydraulic Lift Removal Report. Some SVOC detection above soil guidance but not high enough to warrant further excavation. Hydraulic fliud analyzed for the presence of PCB's, no detections. No spill # was called in

May 2010 - PM approved Subsurface Investigation and Biological Enhancement/ Chemical Oxidation Work Plan. New Spill (0909441) called in because of EM Phase II work

June 2010 - 70,000ppb dissolved BTEX in groundwater encountered along the western boundary of the site. PM required additional delineation including bedrock monitoring well

August 2010 - approved SI workplan. Includes delineation of the upppermost aquifer and bedrock aguifer. Bedrock wells will be cored to inspect for fracturing and evidence of flowing groundwater such as oxidation (rust) of metals within the rock. Bedrock wells will isolate the bedrock aquifer - screened portion of PVC in bedrock with bentonite seal above and below bedrock interface

November 2010 - EM has handed the project over to Liberty Petroleum Realty LLC. See 11/18/10 letter from Liberty. (sd)

February 2011 - Supplemental SIR under reivew

March 2011 - Reviewed SIR. Required additional delineation west of the site along West 51st Street also to provide report on the effectiveness of ISCO injections

May 2011 - approved work plan for additional off-site delineation

August 2011 - the 2 additional wells couldn't be installed. They couldn't reach the Arcadis minimum pre-clear depth of 6.5ft plus utilities are very tight in that area. Arcadis will have to design an alternate way of providing the data

November 2011 - approved shutting down the system immediately to allow for the site to reach static conditions before the VTE events

-Proceed with the VTE Pilot test as soon as possible (within 30 days).

-The RAP is due is 75 days from today's date (10/26/11).

December 2011 - VTE Pilot test could not be performed in December due to the DOT Holiday embargo. Moved to January 2012

February 2012 - Based on the proposed geochemical sampling/ IRM results, the Remedial Action Work Plan is due by April 30, 2012

Caller Remarks:

site work found contaminated soil.

DEC Investigator Remarks:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "VOUGHT"

7/1/02 TJD
Received work plan from Emteque (John Raguso). Expedited review at consultant's request. Unable to approve plan as report missing key information and site not complete deliniated. Consultant directed to provide a modified plan which includes installation of wells and contains missing report data. Missing data includes: boring logs, MTBE analysis, plume boundaries, scaled map which includes all tanks and relevant site features, groundwater flow direction etc..

7/1/03 TJD
Stu Bassel (LMS 845 735 8300) contacted DeMeo to inform DEC that LMS had taken over project. A work plan will be submitted to remove tanks, excavate accessible soils, use bio-remediation to treat groundwater contamination and soil vapor extraction to remediate the soil contamination. LMS was also directed to provide any recent sampling data & all relevant information regarding the proposed bio-remediation application. In addition LMS was informed hydraulic control would be required if bio remediation is approved for the site.

8/29/03 TJD
Reassigned to Vought

9/18/03: Martin Motors submits Supplemental Conceptual Remedial Plan prepared by LMS. In cover letter, Martin Motors reports that approximatley 5 feet of product was found in well MW-2 on or around July 28. Manual bailing program initiated - approx. 20

gallons product recovered through 8/21/03. Product thickness in well dropped to approx 2 feet as of 8/21. (JHO, 1/13/05)

1/6/05-Vought-Vought spoke David Rubin (Con Ed 718-204-4219) who is looking to install a substation at this site. Con Ed looking to resolve open spill issue and have BCP pre-application meeting. Con Ed will notify current owner of meeting.

1/10/05
Spill reassigned to O'Connell. Con Ed will be attending pre-app meting with DEC on 1/21/05. Con Ed apparently conducted preliminary off-site investigation, but no report was submitted to the Department. Will request copy at pre-app meeting. (JHO)

5/10/07: On-site cleanup was completed by Con Edison under a Brownfield Cleanup Agreement (site no. C231047, Astor Substation). There is still off-site gasoline contamiantion that remains beneath the sidewalk and street on 11th Avenue. This spill number is being transferred to the Petroleum Remediation group for follow up with the responsible party. (JHO)

8/28/08: Reassigned from Vadim Brevdo to Kartik Chanda. (Chanda)

9/3/08: Chanda updated this spill site and discussed with Mark Tibbe and Bryan (NYSDEC) regarding the off-site contamination originated from this site. It is concluded that a Stipulation Agreement (STIP) with a Corrective Action Plan (CAP) will be sent to RP (previous owner of this site).

9/8/08: Chanda sent a STIP and CAP to RP (Anthony Chianese, vice president of Martin Motors) via certified mail. (see eDocs)

9/19/08: The letter was undeliverable. Chanda made a phone call to David B. Rubin, Con Edison to get the previous property owner's name and address. Mr. David B. Rubin (Con Edison) sent the following contact information:

The RP name is:
Martin Schlanger
Martin Motor Sales, Inc.
677 11th Avenue
New York, NY 10019

The RP's Attorney is:
Mr. Joseph P. Baratta
Baratta & Goldstein
597 Fifth Avenue
New York, NY 10017
Ph. (212) 750-9700

9/22/08: Chanda discuss with Mark Tibbe(NYSDEC)and resent a STIP and CAP to RP (Martin Schlanger, Martin Motors) via certified mail and a copy to RP's Attorney via regular mail.

10/09/08: The letter comes back to DEC. Chanda discussed with Mark Tibbe and John Urda regarding this site. John Urda search NYS Department of State database and find out the following information:

* Chairman or Chief Executive Officer:

Janet Schlanger
1281 Gulf of Mexico DR/#802
Long Boat Key, Florida, 34228

* Principal Executive Office

Martin Motors Sales Inc.
677 11th Avenue
New York, New York 10019

10/14/08: Chanda performed a site visit at 700 11th Avenue (Astor Substation) and across the street at 677 11th Avenue (Martin's Manhattan). The Martin Motor Business is still at 677 11th Avenue. Chanda has taken several photographs regarding the current location of Martin Motors.

10/16/08: Chanda discussed with Mark Tibbe and John Urda (NYSDEC) and sent another letter to Ms. Janet Schlanger (Florida)via certified mail and Martin Motors via DEC's Conservation Officer.

10/24/08: Chanda received a phone call from Andrew E. Skroback. he is the environmental attorny for this site. He request time extension to submit the signed STIP. Chanda received an extension request via the fillowing email:

" Dear Mr. Chanda:

It was a pleasure speaking with you today. As discussed, I write on behalf of Martin Motor Sales, Inc. to request an extension of our deadline to respond to your letter of September 22, 2008, such that our response to your letter would now be due on or before Monday November 24, 2008. Please confirm this extension by return email.

Once we have time to review the past technical reports, I propose that we arrange a meeting between NYDEC, myself and ERM to discuss the scope of what should be done at the site and the scope of the proposed corrective action plan, as well as other potential sources of area contamination. I look forward to working with you on this matter.

Best regards,

Andrew E. Skroback (Drew)
Stroock & Stroock & Lavan LLP
180 Maiden Lane
New York, NY 10038
(212) 806-6446
askroback@stroock.com "

10/28/08: Chanda discussed with Mark Tibbe (NYSDEC) and approved one month extension to submit the signed STIP. The signed STIP must be submitted to DEC by November 24, 2008.

12/08/08: Transferred from Chanda to Tibbe. STIP effective 12/05/08.

9/20/09 - Austin - closed and referred spill # 0609005 to this one, a report from Con Ed of finding gasoline contaminated soils in the immediate vicinity of this site. See report and eDocs - end

11/12/10 - spill re-assigned from Tibbe to Joe O'Connell

11/28/11 - Obligado - Spill re-assigned from O'Connell to Obligado

DEC Investigator Remarks:

Tracking of site remediation has been consolidated under spill no. 90-09804. See also spill nos. 91-05201, 91-08084, 91-08497, 95-01523, and 04-03370.

7/28/1997: A stipulation agreement was executed between Mobil Oil Corporation and the Department. (Harrington)

8/4/2003: This spill site has been transferred from Sigona to Harrington (central office) for management. (Sigona)

7/8/2005: Sent a letter to Exxon Mobil approving the interim RAP. The interim RAP calls for the evaluation of high-vacuum dual-phase extraction. Also sent them the necessary NYCDOT road-opening permit letter for test well installation along the east side of 11th Avenue. (Harrington)

2/2/2006: Sent an e-mail to Exxon Mobil approving the supplemental SI report. The high vacuum dual-phase extraction (HVDPE) feasibility study has been initiated. The FS report is due in the Spring of '06. (Harrington)

4/5/2006: Sent an e-mail to Exxon Mobil approving the final RAP. The RAP calls for the installation of a HVDPE system, which is scheduled to be in place by late summer. (Harrington)

6/5/2006: Approved modification to the IRMs being conducted on-site (EFR events reduced from monthly to quarterly @ wells MO-2, MO-3, MW-12, and MW-14; EFRs can be eliminated @ MW-12 if an absorbent sock is installed to recover free product). Approval sent to Exxon Mobil via e-mail. (Harrington)

2/14/2007: Transferred from Harrington to Milack. (Milack)

5/24/2007: Remedial system is in place but still has not received necessary electrical inspection and discharge permits. (Milack)

12/07: System began operating and Kleinfelder will be submitting a startup report.

May 2010 - The supplemental CAP, received January 29, 2007, outlines the operation of a High Vacuum Dual Phase Extraction (HVDPE) system, as well as continued quarterly enhanced fluid recovery (EFR) events, until the system begins operation. The supplemental CAP was approved April 12, 2007. A Site Status Update report was received on August 20, 2007. The remedial system began operating

the week of November 26, 2007. A Site Status Update Report (SSUR) was received February 29, 2008. A HVDPE Remediation System Start-up Report was received on March 27, 2008 and a SSUR was received on May 22, 2008. A site visit was made on July 9, 2008, and the weekly OM&M is continuing. The HVDPE system continues to operate successfully with levels in the groundwater dropping from 20 ppm levels in several wells to ppb/low ppm levels in two
years. Based on this trend, the consultant is hopeful that the system can be shut down in 2010. The latest SSUR was issued March 25, 2010. The latest groundwater sampling was conducted in January 2010 and showed consistent results with previous rounds. Weekly OM&M of the HVDPE system continues.

The HVDPE system was non-operational for much of May and early June 2010 due to access issues caused by a sidewalk replacement project. Operation was resumed 6/13/2010 and continues to date. (11/22/10)

Nov. 2011 - A 9 month temporary shutdown of the on-site High Vacuum Dual Phase Extraction System (HVDPE) combined with initiating monthly Enhanced Fluid Recovery (EFR) events was approved in June 2011 and is ongoing.

Dec. 2011 - DEC was informed that Groundwater and Environmental Services (GES) will be the new remedial consultant for this spill as of 1/1/12. Karen Bourque (866)839-5195 ext. 3833 is the contact person at GES.

Caller Remarks: NO REMARKS GIVEN FOR THIS SPILL

DEC Investigator Remarks:

10-09-09 The spill report was previously assigned to Imdadul Islam. The spill was reassigned to Alex Zhitomirsky on 10/09/09 since AZ handles the other spill at the site. AZ contacted Jane Staten URS. The spill was caused by 10,000 gal tank which failed the tightness test. The tank number is either #15 or #29. The tank probably contained heating oil. Two 10,000 gal tanks were removed in 2003 by Edward Levinson Company.

I requested that URS identifies the tank location and include the tank area in their investigative plan to be submitted to DEC. AZ

7-20-2010 Received a letter from URS dated July, 2010. The letter states that during the site visit URS observed that the building is still under construction. It's not feasible to install any wells. Therefore, remedial work is on hold. AZ

2-16-2012 Contacted K. Shenahan (URS). DEC approved excavation in May 1999. Excavation was performed. URS requested closure in June 2009. In October 2009 DEC rejected the request since no confirmation sampling has not been done. WP was submitted in March 2010. DEC requested to move wells where the product was previously detected. There is a new giant building at the site, so the wells are limited to the sidewalk. June 22, 2010, URS visited the site to adjust the well locations. Scaffolding was on the sidewalk and the sidewalk was not accessible. In October 2011 URS checked the status of the sidewalk and the scaffolding is gone. URS will submit a figure with the modified well locations within next two weeks. Product plume location will be indicated on the maps. AZ

2-21-2012 Proposed well locations submitted to DEC and edoc'ed. AZ

2-22-2012 K. Shenahan forwarded an updated version of proposed well locations. AZ

3-1-2012 Reviewed and discussed a modified version of the the proposed well locations. It was decided that locations proposed in 3/10 will be actual well locations. Also, an additional well will be installed opposite WB-1 near the former fill port, if feasible. An email was received from K. Shenhan:
"Alex,
Thanks you for discussing the proposed field investigation URS has proposed for this site. Based on our discussions this afternoon, URS will proceed with the original well locations indicated on the attached Figure as 3/10 and not the revised locations identified as 2/12. In addition, URS will include a fifth well in the sidewalk of 56th Street on the eastern end of the site near the label "oil fill". AZ

003		Unknown	0.00	UNKNOWN

Caller Remarks:

30K TANK FAILED AES BROCKMAN #2 WITH A LEAK RATE OF -.87GPH, SOME OIL COMING THROUGH BASEMENT WALL, WILL PUMP OUT & INSPECT TANK. REQUEST THE INSTALLATION OF AT LEAST (4) GROUNDWATER MONITORING WELL

DEC Investigator Remarks:

02/03/06: This spill transferred from J.Kolleeny to S.Kraszewski. - SK

9/22/06: Spill transferred from Kraszewski to Kann.

1/25/07 - 1/25/07 - J.Kann - monitoring report submitted on 11/14. Some product remains in two wells. Will prepare a generic letter comenting on report format. A work plan is due end of January 2007.

7/31/07 - Work Plan was approved on 4/13/07. Field work was performed and a investigative report is due by August 15.

12/27/07: J.Kann - Report submitted on 11/8/07. Of the 14 wells on site, two contain free product. These two wells are located in teh former tank area. One well contained approximately 4 inches of product. An accurate reading for the second well could not be obtained because the product was too viscous. A fingerprint analysis indicates teh product in the wells is weathered number 6 fuel oil. Consultant recommends sampling of all wells to determine if dissolved phase contamination exists, and to

continue running remedial system on site(consultant claims it has contained the plume).

07/16/08: J.kann - email received from NYCHA including a WP for Amsterdam Houses.

04/20/10: J.Kann - Preferred is planning to mobilize to conduct field work (soil borings, well installation) on Monday - April 26, 2010 at the NYCHA-Amsterdam Houses (Contract No. 9017305) in accordance with the July-2008 work plan prepared by Gannett Fleming.

08/2/10: J.kann - Site Investigation Report submitted on 7/30/10.

9/21/10: J.Kann - Quarterly Report Rcvd 9/1/10.

3/17/11: J.Kann - Added comments for 7/16/08 and 04/20/10. Quarterly Report Rcvd 1/6/11.

DEC Investigator Remarks:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "ZHITOMIRSKY"

10/10/95: This is additional information about material spilled from the translation of the old spill file: GASOLINE - WATER.
Refer also to 98-03781 (783 Tenth Ave).

TRANSFERED FROM TIBBE TO ZHITOMIRSKY ON 4/14/2003.

PROJECT NOW BEING HANDLED UNDER NYC DDC CONSENT ORDER.

04/27/04: This site is related to a former Mobil station and it is transferred to NYCDDC. - Alexander Zhitomirsky.
This spill is related to adjacent AT&T building spill at lot # 811 on 10th Ave. according to AZ. -II (02/18/05)
06/10/2005 Koon Tang received a letter dated June 8, 2005, from DDC stating that DDC/LiRo performed site investigation and proposed a remedial plan to NYSDEC in November 2001. The proposal was to perfrom ORC and monthly Vac-Truck recovery. The plan was approved by NYSDEC in 2002. DDC performed monthly Vac Truck product recovery through Noember of 2003. The site is currently under the jurisdiction of HPD, who is working closely witht heir developer (The Dermot Company/Archstone Smith Operation Trust) to continue the future excavation/construction/environmental cleanup of the site. NYCDDC is not continuing with the environmental cleanup of this site. The letter does not contain HPD contact information. I have discussed this site with Koon Tang and called Fatemah Ashkan (NYCDDC) and left a message for her requesting information regarding new contact's phone number, address and their plans for the site further remediation. AZ

06/24/2005 I left a message for Carol Steinberg (HPD) 212-863-8362 regarding further site remediation. AZ
6/27/2005 Conversation with Carol Steinberg (Attorney for HPD). HPD is selling the site. The new owner will remediate the site not HPD. Ms. Steinberg will get back to me with the additional info regarding the developer. AZ

7/14/2005 Carol Steiberg (HPD) conveyed info regarding the new owner: Dermot Clinton LLC c/o 320 West 57th Street, NY, NY 10019. She will get back to me with a phone number and name.AZ

11/14/2005 Conversation with Carol Steinberg (HPD). She promised to get back to me with a phone number for the new RP. AZ
11/14/2005 Carol Steinberg left a phone number for Dermot Clinton - 212-262-1220. AZ

11/14/2005 Conversation with Drew Spitler (Dermot Clinton Green -r/e firm)212-262-1220 new owner of the site. His attorney is Linda Shaw (585)-546-8430). He asked me to call his attorney. I called L. Shaw. Conversation with Ms. Shaw. The site entered BCP program. Dale Desnoyers signed the agreement on 2/10/2005. DEC PM is John Durnin. Remdial Action Plan was submitted and approved. Remediation started around September 2005. Excavation has been completed. Post excavation samples were taken in the last few weeks. Consultants are Langan Engineering and Environmental Services. PM is Tarek Khouri 212-479-5450. AZ

11/21/2005 Conversation with John Durnin (DEC Albany 518-402-9774). They have not excavated on the former Mobile Station yet. They will excavate the site to the bedrock within six months and take end point samples. They are going to build two 24-story residential towers on this site. Dermot Clinton is not responsible as per BCP agreement for the off site clean up. AZ

4/4/2006 John Durnin (DEC Albany (518-402-9774). All the remedial work has been done on site. Contaminated soil was excavated to the bedrock. Approved backfill must be brought to the site. Remedial report will be submiteed in a month. As for off site investigation the case will be brought up to the enforcement division in Albany. AZ

6/13/2006 Left a message for John Durnin - DEC Albany (518-402-9774). AZ

6/16/2006 A memorandum is being drafted to the Division of Environmental Enforcement (DEE) requesting them to contact the Responsible Party (City of New York) regarding the documented off- site plume from this Former ExxonMobil Service Station. The BCP Program requires that NYSDEC pursue the Responsible Party to address and remediate the off-site contamination. AZ

9/14/2006 An e-mail was sent from John Durnin (DEC Albany) to Maureen Schuk. The e-mail contained summary/update for this site. According to the e-mail, all the soil on the entire site was excavated to bedrock and disposed off-site in 2006. John Durnin stated that the off-site plume was not remediated by Dermot Clinton Green since they are not responsible for off-site contamination in the BCP program. As per the BCP Program, the NYSDEC is required to contact the responsible party (NYCHPD) to remediate the off-site contamination or do it through the State Superfund Program. New York City Housing, Preservation and Development is still the responsible party for open Spill No. 9308101 which now consists only of off-site petroleum contamination. John Durnin, as the NYSDEC Project Manager for this BCP Project, will send a memorandum referring this BCP site to the NYSDEC Project Attorney. The Attorney then contacts NYCHPD to get them to complete the off-site clean-up. John Durnin is drafting the memorandum right now. AZ

12/19/2006 John Durnin (DEC Albany). This BCP site is done. A certificate of completion has been issued. The Health Department has been notified. John Durnin is preparing a memo for DEE (Dept. of Environmental Enforcement - Debbra Christian) requesting enforcement actions against the City of New York (HPD). The City of New York is responsible for the offsite clean up. AZ

1/10/2007 An Enforcement Action Memorandum by John Durnin was sent to Deb Christian (Superfund and Brownfield Restoration Section DEE) regarding site on 1-4-2007. The memorandum was forwarded to DER program Attorney, Rosalie Rusinko. Rosalie has inquired about the HPD contact. I forwarded to John Durnin HPD contact information. All nine off-site wells have been filled with concrete. AZ

11/5/2007 The City accepted the responsibility for the off-site investigation. They hired URS to follow-up with the off-site investigation. They will be soon setting up a teleconference with John Durnin and URS. Harvey Roberts is in charge of this project. J. Durnin observed that sidewalk in front of the ATT building was completely excavated to the bedrock and they were poring concrete in the excavation. They will send me a copy of the report when it is completed. AZ

12-11-2008 A STIP Agreement and CAP for the off-site investigation was signed on 12/11/2008 via John Durnin (Central Office).

3-1-2010 Contacted John Durnin. The investigation has been done and they submitted the Investigation Report in July 2009. The field investigation has been approved. Consultants submitted Remedial Action Plan in August 2009 and it was approved by DEC in September 2009. Consultants proposed to install ORC socks in several wells. Two wells out of seven had BTEX. In mid October they installed ORC socks. The socks will stay for 6 months. Quarterly reports will be produced. I asked John D. to forward e-copies to me. He will do it or upload them to e-docs. AZ

1-31-2012 At the meeting with URS and DDC on Jan. 31, 2012, URS stated that latest groundwater data shows two wells with total VOC of 49 ppb and 165 ppb. URS recommended removing the ORC socks to determine if concentrations remain low enough to petition for closure of the spill number. AZ

Caller Remarks:

monitoring well sampling: gsc notified david harrington from DEC

DEC Investigator Remarks:

5/20/2004: DEC (Sangesland) spoke with Dan Canavan of Geologic Services. Regular sampling of several offsite wells associated with an Exxon Mobil station located at West 51st St & 11th Ave. (#17-JWN @ 718 11th Avenue).

He says the off site well (MW-9S) had a "hit". They will send a sample out for fingerprinting. Based on that result, they may try to have this spill number disassociated from the ExxonMobil station.

Near to this "hot" well are open spill cases at a Chrysler Plymouth dealer (0304103). Another case is associated with 601 W 50th St.

1/26/2005: Mobil documentation indicates that the product is not gasoline, but rather diesel fuel or fuel oil. This spill will be referred to the adjacent property (Chrysler-Jeep @ 711 11th Avenue; spill #03-04103). (Harrington)

07/26/10-Hiralkumar Patel. while investigating spill at 711 11th Ave (spill # 0751290), found this old spill associated with it.

this spill was reported due to product found in well MW-9S located on west sidewalk of 11th Ave, close to 711 11th ave. this well was installed by ExxonMobil as part of their ongoing remediation work (spill #: 8904939).

3:13 PM:- sent email to DEC Harrington inquiring about any available reports for this spill.
4:14 PM:- received call from DEC Harrington. he referred to DEC Haggerty who is working on spill case 8904939 repoted at ExxonMobil property (718 11th Ave) which is across the street from well MW-9S. spoke with DEC Haggerty. he mentioned that there was about 2 ft of product found in well MW-9S in 2004, and lateron it was found to be either diesel or #2 fuel oil. as ExxonMobil site has gasoline tanks and no diesel tanks on property, they closed the spill #: 0401882 and referred to closest open spill # 304103.000

as per PBS #: 2-157899 for ExxonMobil site, they had two #2 oil tanks in past: one 550 gal UST removed in Dec. 1944 and one 1,000 gal UST removed in Dec. 1989.

reviewed map for ExxonMobil case and found that well MW-9S is located in front of building at 709 11th Ave which is Kenneth Cole Productions, Inc., a shoe making company. also, there was no product found in wells MW-4 and MW-5, which are located upgradient from well MW-9S.

properties owned by Kenneth Cole Productions: 601 W 50th Street and 615 W 50th Street

++*+

++*+

ASTs. found fill port/vent pipes along northern foundation wall of the building along W 51st Street. found old fuel oil fill port near curb side along W 51st Street, in area nearby fill/vent lines for motor/waste oil tanks. Mr. Johnson mentioned that they are using natural gas for heating and doesn't know if there was any heating oil tank in past.

John Johnson
Building Manager
GM Potamkin
706 11th Avenue
New York, NY 10019
PH. (212) 708-3180 (O)
(917) 682-9950 (C)
Fax (212) 603-2996
email: jjohnson@potamkincadillac.com

3:17 PM:- received email from DEC Haggerty with copy of report from ExxonMobil dated Jan. 06, 2005. abstract:
- this report was made after findings of free product in well MW-9S (which is off-site from ExxonMobil)
- on 05/20/04, about 0.07 ft of product found in well MW-9S
- during the gauging event, no noticeable evidence of vandalism was observed on the well or road box
- groundwater was found at 11 ft bg and screen in well MW-9S is from 5 to 20 ft bg
- ExxonMobil refused responsibility of product in well based on following:
1. fingerprint analysis of product from well indicated that the product has a boiling range from 401 to 1331 degree F (possibly mixture of diesel and lubricating oil), while gasoline sold at ExxonMobil station typically has boiling range from 80 to 435 degree F
2. highly weathered gasoline would not have an initial boiling point greater than approx. 300 degree F
3. results showed that product did not contain any additive elements or wear metals usually present in used or new motor oils
4. ExxonMobil never stored diesel on the property
5. product was not found in upgradient wells MW-4, MW-5 or MW-10

3:53 PM:- spoke with DEC Haggerty. informed him that fuel oil tanks at buildings 709 and 711 located more than 300 ft downgradient from the well MW-9S. also, PBS record shows old #2 oil tank at ExxonMobil site. as per fingerprint analysis, product in well MW-9S was probably mixture of diesel (similar to #2 oil) and lubricating oil (ExxonMobil has repair shop). also observed an abandoned fuel oil fill port at Potamkin along W 51st Street. ExxonMobil report indicated presence of bedrock and water main between the ExxonMobil site and well MW-9S. these underground structures and bedrock might have created channel which braught oil from ExxonMobil/Potamkin to well MW-9S. asked Haggerty to send me copy of well logs for wells installed by ExxonMobil and excavation work report (to confirm no product found in excavation and depth of excavation/bedrock).

as per PBS # 2-342297 for Potamkin, site has/had following tanks:

- two 275 gal lube oil ASTs, in-service installed in Nov. 2001
- three 275 gal waste oil ASTs, in-service installed in Nov. 2001
- two 1,000 gal USTs, installed in Dec. 1962 and removed in Nov. 2001, no information about product stored in these tanks in past

4:14 PM:- spoke with Mr. Johnson at Potamkin. he confirmed that they have 1,000 gal waste oil tank. asked him to correct information on PBS record. Mr. Johnson asked to contact Mr. Sunga, controller for Potamkin property.

4:23 PM:- spoke with Mr. Sunga. he doesn‘t know if Phase I or Phase II investigation done before they baught property. he asked to send any letter to Mr. Spallina.

Marco Sunga
Controller
Ph. (212) 708-3107/(212) 433-1722
email: mcsunga@yahoo.com

706 Manhattan LLC.
706 11th Avenue
New York, NY 10019
Attn.: George Spallina **Vice President**
Ph. (212) 708-3102
email: geo798@aol.com

4:35 PM:- sent email to Mr. Johnson with copy of PBS correction form. email copied to Mr. Sunga. asked them to submit correction form by end of 08/16/10.

4:46 PM:- received email from DEC Haggerty. he mentioned that DEC Harrington was on-site during excavation work and did not encounter diesel or lubricating oil contamination. Haggerty also sent copy of email describing work done during installation of wells MW-4, MW-5, RW-1D, RW-2D and RW-3D. wells MW-4, MW-5 and RW-3D were installed on east sidewalk of 11th AVe (along ExxonMobil and Potamkin) and wells RW-1D and RW-2D were installed inside gas station property line. bedrock was found at 3 ft depth in sidewalk wells, at 5 ft in RW-1D and at 6 ft 7 in in RW-2D. groundwater was found at 11 ft 2 inches bg in all wells. all wells have screen within bedrock only.

4:59 PM:- sent email to Mr. Tracy with copy of PBS correction form. informed him about PBS violations and asked to submit PBS correction form alongwith tank tightness test result by the end of 08/20/10. informed him that if the department doesn‘t receive the required documents by the end of 08/20/10, a notice of violation may be issued.

07/28/10-Hiralkumar Patel.

2:07 PM:- received email from Mr. Tracy. he is working on scheduling the tank test with ACe Atlas.

08/03/10-Hiralkumar Patel.
10:00 AM:- visited site with DEC Mohammed Hasan to check any product in well MW-9S. found oil in well MW-9S, but could not measure product thickess as it was only one inch well. product looks similar to lubricating/hydraulic oil.
1:06 PM:- spoke with Mr. Tracy at Kenneth Cole regarding any shoe manufacturing at the site. Mr. Tracy mentioned that they only do designing at the site and there is no machinery at the site which needs lube/hydraulic oil. Mr. Tracy asked to send any letter to his legal counsel, Jennifer Steindler.

2:08 PM:- sent email to DEC Haggerty requesting copy of soil excavation report and well construction logs for all on- and off-site wells related to ExxonMobil property.

discussed with DEC Austin. due to findings of petroleum product in well MW-9S, during the site visit, case re-opened.

this spill was orginially reported at 709 11th Avenue as well MW-9S was located in front of it. but as no information about source of product in well MW-9S, changed spill location from '709 11th Ave' to 'in front of 709 11th Ave'.

also Austin asked to initiate state funded work (PIN # 05289) based on following:
- product found in only one well MW-9S
- product was never found in upgradient wells located in front of ExxonMobil and Potamkin properties
- no history of underground tanks at Chrysler property
- no history of machinery operation in past 10 years at Kenneth Cole site

Austin asked to pump out product from well MW-9S and lock it. based on observation after 2-3 weeks following pump-out, the department may require additional work.

08/04/10-Hiralkumar Patel. reviewed old spills (9211268 and 9306238, no other spills reported) at Potamkin property (706 11th Ave).
+-
in Dec. 1992, spill #: 9211268 was reported as a 1,000 gal waste oil UST failed a tightness test. the waste oil UST was removed lateron.
in Aug. 1993, spill #: 9306238 was reported as found contamination near oil/water separator.

as per Phase I, in 1899, the subject property and adjacent properties were used for housing. by 1930, a Mobil gas station was operating adjacent to the site. the subject site was still characterized as residential/commercial. by 1951, the subject site was identified as the Diamond T. Motor Cab Company. the year of construction was listed as 1948.

as per the previous reports (stored on e-docs under spill #: 9306238), the 1,000 gal waste oil UST was located beneath the first floor of the building along the south side of the property (along W 50th street). the Department does not have copy of waste oil tank closure report. but as per report dated Feb. 2000, which summarize work done on site under both spill reports, the waste oil UST was determined to be intact with no evidence of pitting or leakage. also, five hydraulic lifts and two oil/water separators removed from the site. one oil/water separator was located on first floor in area of previous waste oil UST and another oil/water separator was located in basement along northern foundation wall. a 1,000 gal heating oil AST and a boiler room was located near oil/water separator in basement. during removal of hydraulic lifts, found only SVOC contamination which was probably related to backfill material. during removal of oil/water separator in basement, found product on water. product sample was collected for fingerprint analysis. result of fingerprint analysis indicated that the sample contained petroleum hydrocarbons in the distillation range of motor oil and kerosene. it was noted in the analysis that waste oil and hydrulic fluid could not be distinguished from motor oil by the method used. subsequently, a monitoring well in former boiler room and a sump well in oil/water separator excavation were installed. no product found in any well after initial findings. both wells were monitored and sampled for eight quarters. no dissolved contmaination found in groundwater sample from sump well, but dissolved BTEX contamiantion found in well MW-1 which was installed in former boiler room. adjacent to the former boiler room is ExxonMobil property where spill reported in 1989 (spill #: 8904939). the Department closed the spill numbers on 706 11th Ave based on eight quarterly monitoring reports and notified ExxonMobil to delineate their spill area.
+-

11:57 AM:- received email from DEC Haggerty including repsonse from ExxonMobil. this response includes well construction logs for

on-site and off-site wells. abstract:
- screen portion of monitoring wells MW-10, MW-11, MW/VP-8 and MW/VP-9 bridge the observed overburden bedrock interface
- screened portion of recovery wells RW-1, RW-2, RW-3, RW-6 and RW-7, as well as the screened portion of monitoring wells MW-4, MW-5, MW-8, MW-9D and MW-9S are located below the observed bedrock overburden interface <----------

well log information (all distance in ft):

well---------total------casing--------screen---------bedrock----------static water
depth length interval depth (approx.) level (approx.)
MW-4---------14‘-8"------4‘-8"--------10‘-0"----------4‘-6"----------11‘
MW-5---------15‘-10"-----5‘-10"-------10‘-0"----------5‘-0"----------11‘
MW-7---------25‘-0"------9‘-6"--------15‘-0"---------13‘-0"----------11‘
MW-8---------16‘-6"------3‘-6"--------13‘-0"----------2‘-0"----------12‘
MW-9S--------20‘-0"------5‘-0"--------15‘-0"----------3‘-6"----------12‘
MW-9D--------40‘-0"-----29‘-0"--------10‘-0"----------3‘-0"----------12‘
MW-10--------21‘-0"-----10‘-0"--------11‘-0"---------16‘-0"----------10‘
MW-11--------23‘-0"------8‘-0"--------15‘-0"---------12‘-0"----------11‘
RW-1(Deep)---20‘-0"------6‘-0"--------14‘-0"----------6‘-0"----------NA
RW-2(Deep)---20‘-0"------6‘-0"--------14‘-0"----------6‘-0"----------NA
RW-3(Deep)----5‘-6"------2‘-0"---------3‘-6"----------5‘-0"----------NA

after reviewing the well logs, found that screen in well MW-9D starts at 29 ft and groundwater in that well found around 11-12 ft depth. as screen in well MW-9D is well below water table, that could be reason for not having any product in well MW-9D, but 2 ft of product in well MW-9S which is only about 2 ft away from MW-9D.

2:30 PM:- spoke with Mr. Sunga, controller at Potamkin. informed him that based on old spill reports and site specific groundwater flow direction (defined by ExxonMobil), the oil found in well MW-9S may be originated on Potamkin property. asked him if they wants to do any invesstigation or the Department proceed with investigation. Mr. Sunga asked to talk to Mr. Spallina, vice president in this matter.
2:35 PM:- left message for Mr. Spallina.

08/06/10-Hiralkumar Patel.
9:32 AM:- received call from Mr. Spallina. explained him about findings of free product in well and history of old spills on Potamkin property. Mr. Spallina requested meeting with his boss John Bruno at the site. Mr. Spallina will talk to Mr. Bruno and try to schedule meeting at 9:30 AM on 08/09/10.

reviewed log for well MW-8/MW-9S/MW-9D which shows well was installed by core barrel method and not air rotary. discussed with DEC Vought who mentioned that by core barrel method, contractor can see cracks in rock and any oxidation (which indicates water flow in the crack) in it.

08/09/10-Hiralkumar Patel.
9:45 AM:- visited site. met Mr. Spallina at Potamkin. explained him about findings of free product in well MW-9S and source possibility on his property. he will discuss in internal meeting to decide if they wants to do their investigation. inspected basement at Potamkin site. site has 1,000 gal aboveground tanks in basement. found well inside the tank room (which was previous

boiler room). asked Mr. Spallina to close this monitoring well to avoid any spilled product (if happen) going into ground. Mr. Spallina mentioned that as part of their current contract to remove some out-of-service 275 gal ASTs, they have also planned to close this well.

during meeting, Mr. Spallina mentioned that the Cybert Tire and Car Care, located at 726 11th Ave, is using lifts for long time. this property is located north of W 51st Street.

spoke with John Everett at Cybert Tire store. John mentioned that the tire shop is in service since 1916. up until 1995, site was used for tire change and alignment work only. in 1995, they installed five aboveground electrical lifts for repair shop. they have one 275 gal motor oil and one 275 gal waste oil ASTs.

Cybert Tire and Car Care
726 11th AVe
New York, NY 10019
owner: John Oliver Everett
Ph. (212) 265-1177
Fax (212) 765-4031
email: brewsterguy1@aol.com

also inspected basement wall along 11th Ave at Kenneth Cole property. found red stains and some wet material on foundation wall in area close to well MW-9S on sidewalk. asked Mr. Tracy to seal the wall. suggest him to do sampling to find out type of product.

during database search, found spills reported at 700 11th AVe (spill #s: 0608770, 0607790, 0605854, 0604159, 0601353, 0103148), which is ConEd substation property. this property was honda showroom and repair shop in past. spill #: 0103148 is still open and under remediation. DEC Tibbe is the project manager. as per old reports, found about 5 ft of gasoline product in well MW-2 installed on east sidewalk of 11th ave, about 80 ft south of southeast corner of the intersection of 11th Ave and W 50th Street.

discussed with DEC Austin. he asked to pump out well without further delay.

4:08 PM:- sent Contractor Authorization Form to Brian at F&N. asked him to call to discuss the site.

Brian Linehan **cleanup contractor**
Fenley & Nicol Environmental
PH. (631) 586-4900 (O)
(516) 768-1765 (C)
email: blinehan@fenleynicol.com

08/13/10-Hiralkumar Patel.
2:47 PM:- received email from DEC Haggerty with response from Kleinfelder. Glenn Spataro from Kleinfelder (631-218-0762 ext. 274, cell: 516-903-3550, email: gspataro@kleinfelder.com) sent email to Haggerty informing that they had gauged well MW-9S. product was found at 11.19 ft and water was found at 11.51 ft below top of casing.
3:23 PM:- left message for Brian.

08/16/10-Hiralkumar Patel.

9:30 AM:- received call from Brian McCabe from F&N. he will handle this pin job in F&N and will be at the site at 11 AM on 08/19/10.

Brian McCabe
Fenley & Nicol Environmental
PH. (631) 586-4900 (O)
(516) 658-9671 (C)
email: bmccabe@fenleynicol.com

08/19/10-Hiralkumar Patel.
11:30 AM:- visited site. met Brian McCabe from F&N. gauged wells MW-8, MW-9D and MW-9S. found groundwater around 11 ft bg. product found in well MW-9S. well was pumped for about 15 minutes. mostly water was pumped out. well recharged immediately. no product found in well MW-9S after pump out. Brian collected product sample for fingerprint analysis.

08/24/10-Hiralkumar Patel. sent contractor work authorization form to TestAmerica for sample analysis. asked them to submit sample and standard chromatograms.

Erin Arasate
TestAmerica
Ph. (203) 944-1318
Fax (203) 929-8142
email: erin.arasate@testamericainc.com

08/25/10-Hiralkumar Patel.
10:08 AM:- received email from Dave from Jade Environmental. Dave is working on PBS issue to Potamkin site.

Dave Pelletier
Jade Environmental
PH. (914) 882-6074
email: JadeEnv@alum.rpi.edu

09/08/10-Hiralkumar Patel.
9:22 AM:- received a fingerprint analysis result from TestAmerica. lab compared sample chromatogram with standard chromatogram for #2 oil, #4 oil, #6 oil, kerosene, gasoline, motor oil and coal tar, but doesn‘t match with any standard chromatogram. no comparison done with lube oil or hydraulic oil. also report missing standard chromatogram for #2 oil.

09/10/10-Hiralkumar Patel.
3:38 PM:- left message for Erin at TestAmerica. asked her to submit missing chromatogram for #2 oil. also asked her to call back to discuss further comparison of sample chromatogram with other petroleum compounds.
3:53 PM:- sent email to Erin asking to submit chromatorgram for #2 oil and to call to discuss extending comparison to other petroleum compounds.

09/14/10-Hiralkumar Patel.
2:45 PM:- visited site. found product in well MW-9S. could not measure product thickness as sensor was covered with oil. went to

Potamkin and met Mr. Spallina. he spoke with property owner who refused to do any investigation on their property. Mr. Spallina asked to send letter with any requirements.

09/15/10-Hiralkumar Patel. discussed with DEC Austin and DEC Vought. based on available information, Austin asked to compare fingerprint results to some other petroleum compounds for possible match. as product found in well, he asked not to send contractor again for well gauging and pump out. he also aksed to send letter to Potamkin suggesting to start investigation.

09/16/10-Hiralkumar Patel.
2:24 PM:- left message fro Erin.
2:45 PM:- spoke with (and also sent email to) Brian McCabe and asked him not to respond to the site again as requested earlier in the work authorization form (item # 5). asked Brian to submit a brief report for work done till date.

09/17/10-Hiralkumar Patel. received email from Erin (at 5:56 PM on 09/16/10). she will send standard chromatogram for #2 oil which is missing in previously submitted report. she mentioned that the only standards that were are capable of comparing samples to by 8015B- Finger print analysis at the lab are #2 fuel oil, #4 fuel oil, #6 fuel oil, Kerosene, Gasoline, Motor oil and Coal Tar and they do not have the ability to compare to other petroleum based constituents at this facility. she can check with other lab in their network for further comparison.

09/21/10-Hiralkumar Patel.
11:01 AM:- left message for Erin.

09/22/10-Hiralkumar Patel. after reviewed and approved by DEC Austin and DEC Urda, sent letter to Mr. Spallina requesting to start delineation of groundwater contamination found in well MW-9S (based on groundwater flow direction). informed Mr. Spallina that if Potamkin doesn't initiate investigation by end of 10/22/10, then DEC will activate state funded contractor to perform the necessary investigation. letter emailed to Mr. Spallina.
10:25 AM:- spoke with Erin. asked her to send chromatogram for #2 oil. she has already sent inquiry in their network to find out if any lab has capability to compare existing sample chromatogram with standard for hydrulic oil/lube oil. Erin will call back by end of 09/24/10.

09/23/10-Hiralkumar Patel.
9:05 AM:- received email from Erin. she found one of their lab which has standard chromatograms for hydrulic and lube oil. she will send those with missing #2 oil chromatogram.
10:18 AM:- sent email to Erin and asked her to have those chromatograms compared to sample chromatogram by one of her chemist and to submit results with all standard chromatograms.
2:27 PM:- received email from Erin with copy of standard chromatogram for #2 oil.

09/24/10-Hiralkumar Patel.
4:16 PM:- received email from Charles from Kenneth Cole including copy of updated PBS (showing underground tank and #2 oil) and copy of tank tightness test result (which shows tank system tight).

09/28/10-Hiralkumar Patel.
11:39 AM:- sent email to Brian with copy of tank test result for tank at Kenneth Cole. asked him to review test result and update PBS record (as record shows tank test due date at 12/27/1987.
11:48 AM:- sent email to Erin inquiring about status on product fingerprint analysis result comparison to other petroleum

compounds.

09/29/10-Hiralkumar Patel.
11:51 AM:- received email from Brian with report on work done on 08/19/10.

10/05/10-Hiralkumar Patel. received email from Erin (at 6:19 PM on 10/04/10) including standard chromatograms for hydraulic oil and lube oil. she mentioned that sample chromatogram doesn't match with standard chromatograms for lube/hydrulic oil. she also mentioned that the sample was analyzed on different instrument than comparison standards for hydrulic/lube oil, so it is somewhat difficult to make a determination.

after discussing with DEC Austin case transferred to DEC Vadim due to product on groundwater and an unknown source (possible PIN job).

10/19/10-Hiralkumar Patel. approved two invoices (# 103593 and 103820) from Fenley & Nicol.

see spill #: 0751290 for more details.

10/7/10 re-assigned from Brevdo to Joe O'Connell (JOC)

APPENDIX B SITE NO. 19. TRANSFERRED FROM ENGELHARDT TO O'CONNELL.

12/28/07: spill submitted for closure by Con Ed. Request rejected, with comment: "Final entry in e2mis report (under "Comment" section, dated 6/20/07) states "The entry from 5/15/06 was incorrectly put into this report. Repairs on the cooling plant have not yet been completed. The spill was cleaned up and approved engineerinig controls are in place. Spill to remain open pending repairs." Once repairs to the sump pump have been completed and no additional seepage is confirmed, this spill may be re-submitted for closure." (JHO)

~~~~~~~~~~~~~~~~~~~
Con Ed e2mis #124163:

4/12/99 Unknown liquid coming from crack in ceiling of fire pump room. Unable to detect source at this time. 2 oz on concrete floor contained. Placed pads at this time. No drips reported after five min. of observation.

6/15/99 It appears that the leak is from circulating plant #1, directly above. Substance is dielectric fluid (non-PCB).

2/16/00 Right now leak has stopped. It was coming from the cooling plant and seems to be OK.

8/8/00 Leak still active. Contained with pads and marriage rolls.

1/4/02 Leak is intermittent. Source is Cooling Plant #2. Sump alarm is defective and leak is caused by the sump overflowing. Maximo work order created to repair sump alarm. Containment is being maintained.

See eDocs for 2007 Substation Inspection Findings and for response from Con Edison relative to this spill.

DEC Investigator Remarks:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "O'CONNELL"
APPENDIX B SITE NO. 19

1/31/08: Met at site with Con Ed (Pillig) regarding feeder leak (DEC no. 0710712). While excavating for feeder leak they encountered oil at bottom of excavation that appears to be old, black df from previous leaks. There is a "recovery sytem" installed on the inside basement wall of the substation to collect oil from this old leak. A collection rail directs the oil to a sump, where it is skimmed off into drums. Water then goes through station's oil/water separator before discharge. According to Con Ed (Chris Cotronei) they recover approximatley 100 +/- gallons annually using this system. Note - according to spill file, this recovery system was never reviewed or approved by NYSDEC. (JHO)

2/1/08: During Appendix B quarterly meeting with Con Ed (Matt Madsen and Barry Cohen), requested evaluation of installation of recovery wells to assist with product recovery. Also, existing system should be evaluated and a report submitted to the

Department outlining the recovery efforts to date and the proposal going forward. (JHO)

See eDocs for 2007 Substation Inspection Findings and for response from Con Edison relative to this spill. Breen.

Caller Remarks:

LEAK IN STORAGE TANK , PHASE TWO

DEC Investigator Remarks:

Sangesland left a voice message with Mark Godick AKRF, asking for additional information on the spill. - DEC Ketani was assigned the case.

10/29/07 - Raphael Ketani. I spoke with Mark Godick of AKRF (914) 922-2356. He said a phase I and a phase II were already done.

He said that his company is putting together the phase II right now for his client, Avalon Bay Communities, Inc. They are a long term leesee and are presently negotiating the lease. They have the intent to build residential and commercial space. The property will be rezoned and so the DEP will get involved and issue a restrictive declaration. Right now, there is a LEXUS Dealership on site.

Soil borings were done next to an abandoned AST. Elevated vapor levels were found in the soil. Contaminated soil was sampled and the lab results indicated elevated levels of VOCs and SVOCs. Mr. Godick wants to do a groundwater investigation before doing soil removal. He said that the plan is to do a deep foundation and dig out all of the soil down to 15 feet, anyway. However, his client wants to remove the soil when they are ready to construct the foundation. I asked Mr. Godick when this would be. He said in two years. I told him DEC will not wait anywhere near that long for the spill to be investigated and remediated. He said that the basement is tight to work in and you can't get the large equipment down there to scoop out the soil efficiently. He said that it would be much easier to remove the soil with the building down and gone. I told Mr. Godick that I understood the matter, but that the investigation and remediation has to take place.

We then agreed to a deadline of 30 days to have AKRF submit the groundwater investigation work plan and another deadline of January 7, 2008 for the groundwater investigation to take place.

10/30/07 - Raphael Ketani. I sent out a CSL to the current owners of the property, Four Plus Corporation, with "c-c's" to Avalon Bay and AKRF.

I checked the PBS database. I didn't find a registration for the site.

11/15/07 - Raphael Ketani. I received a letter dated 11/12/07 from Mr. Godick of AKRF stating that the Phase II report will be submitted 11/20/07, the groundwater investigation work plan will be submitted 11/29/07, and that the groundwater investigation will start 1/7/08.

11/21/07 - Raphael Ketani. Today I received the 11/20/07 dated Phase II report from AKRF. Seven (7) soil borings were performed at the site. These were B-11 to B-13 and B-16 to B-19. Of all the borings, B-11 and B-12 were the only ones done in the basement. Boring B-11 had 233 to 236 ppm of total volatiles via the PID meter at 4' to 7.5' below the basement. Boring B-19 had 8.9 ppm of total volatiles via the PID meter at 19' to 20' below grade. For the soil analyticals, there was one exceedence of VOCs (9400 ppb total xylenes) for B-11 from the 4' to 6' sample. For the SVOCs, there was one exceedence from a soil sample from 1' to 3' from B-12. For soil samples from 1' to 4' down for borings B-13, and B-16 to B-18, there were several low level SVOC exceedences of the same analytes. These analytes were benzo series analytes and their associated combustion products. Other borings had low levels of benzo series SVOCs.

The only issues are that the following tanks are not registered:

motor oil AST
abandoned brick encased AST

I sent a letter to Mr. Godick approving the Subsurface (Phase II) Investigation report dated 11/20/07. However, there is no PBS registration for the site. So I also wrote that the tanks have to be registered and enclosed a registration form.

12/3/07 - Raphael Ketani. Today I received the 11/30/07 Groundwater Investigation Work Plan. I reviewed the plan and found it to

be acceptable. My only question was the placement of the proposed monitoring wells in the vicinity of borings #11, #12, #18, and #19, and not in the vicinity of borings #13, #16, and #17.

12/4/07 - Raphael Ketani. I spoke to Mr. Godick (914) 922-2356 regarding the Work Plan. He said that the positions of the proposed wells was in regard to the location of the known contamination. Borings #11 and #19 were the ones with contamination.

1/9/08 - Raphael Ketani. I tried to reach Mr. Godick regarding the start of the groundwater investigation, but could only leave a voice mail.

Mr. Godick called me back. He said that they have already installed 4 groundwater wells and are scheduled to install the fifth one today. After this, they will develop the wells. He said that DEC should get a report sometime in February.

Mr. Godick called back. He said that they had a hard time installing the first well. They hit refusal many times. With the second well, they kept hitting refusal and finally had to give up. Part of the problem is that they have utilities nearby and can't get close to them. However, he said they will keep on going with their 6" O.D. augers.

2/4/08 - Raphael Ketani. I spoke to Mr. Godick today. He said that they did a round of groundwater sampling. A well to the west had benzene at 12 ppb, toluene at 14 ppb, and naphthalene at 100 ppb, with other low hits. He said he will submit the raw data for the wells in an e-mail, along with some language that he would like to put in a cover letter or letter report to DEC.

I asked him about the tank registrations. He said that he spoke to the PBS person here in Region 2 and he told him that only the waste oil tanks needed to be registered. So, he is working on getting them registered.

2/7/08 - Raphael Ketani. Mr. Godick (914) 922-2356 e-mailed me the soil and groundwater analytical results for borings B-101 to B-104 and wells MW-1 to MW-4. While there were low soil and groundwater hits in a number of instances, the only hit of concern was the 1100 ppb of naphthalene in the groundwater at MW-2, which is near suspected underground lifts.

Previously, from the 11/20/07 Phase II report, there were only two hits of concern. These were from a soil sample that was taken at 4' to 6' down at boring B-11. They were 9400 ppb of total xylenes, and 18000 ppb of naphthalene. B-11 is next to a supposedly abandoned AST.

I tried to contact Mr. Godick to discuss the contamination, but could only leave a message.

2/11/08 - Raphael Ketani. I spoke to Mr. Godick about contaminated groundwater at MW-2 and the contaminated soil at B-11. We discussed what the options for remediation were, soil treatment as opposed to digging it out. He mentioned that construction wouldn't start for at least 2 years. I told him that work of some kind has to start much sooner. He mentioned that the site is an active dealership with a narrow stairway leading down to the basement where the tank is. He said he didn't know how they could remove the tank or get equipment down there to do soil removal. We discussed soil solution injections. He said that was a possiblity. Mr. Godick added that he will broach the subject with his client.

2/14/08 - Raphael Ketani. Mr. Godick (914) 922-2356 called. He said that his client is "on board" with the idea of soil treatment for the contamination at B-11. However, Mr. Godick said he needed another week to get the report to DEC. This would be 3/5/08. I told him that will be fine.

4/9/08 - Raphael Ketani. I spoke to Mr. Godick and asked him where the investigation report was. He said he was surprised that I didn't get it, but he will make sure I receive it very soon.

4/11/08 - Raphael Ketani. I received the March 2008 Groundwater Investigation Report from AKRF on 4/10/08. I reviewed the report. In the Recommendations section, it is stated that they will remove the abandoned AST, and remediate the soil and groundwater with treatment solutions. I had no comments regarding the report, except that they compared the analytical results to Part 375 standards. Spills still uses TAGM 4046.

4/30/08 - Raphael Ketani. I spoke to Mr. Godick today (cell (917) 991-4030). He said that the tank pull has been delayed and is now scheduled to start on 5/6/08. I told him that was fine.

5/15/08 - Raphael Ketani. I received the following e-mail today from Mr. Godick:

Finally, after much delay, the contractor has received the permit from New York City Department of Transportation necessary to remove the tank. The work will start on this upcoming Monday (5/19) and is anticipated to take 2 to 3 days. The post-removal soil borings will be completed on the following Tuesday, 5/27. I will reach out to you if there are any unforeseen conditions encountered during these activities.

7/22/08 - Raphael Ketani. Today I received the 7/18/08 tank removal and soil sampling report from AKRF.

7/23/08 - Raphael Ketani. I began my review of the tank removal and soil sampling report. The site is block and lot 1104 and 31. The fuel oil AST next to 11th Avenue was investigated. It was half full with #2 oil. The oil was vacuumed out. A 1/4" hole was found at the east end of the tank. They installed borings B-110 to B-114 in the vicinity of the former tank location. Samples from borings B-111 (west end of tank location) and B-113 had many high hits of VOCs up to 160,000 ppb of naphthalene and 130,000 ppb of 1,2,4-trimethylbenzene. Boring B-111 was higher than B-113, which is to the south. B-111 and B-113 had high hits of SVOCs up to 55,000 ppb of naphthalene. The other borings were largely non-detect.

There was no mention of registering the waste oil AST. I checked the PBS and the tank is still not registered. They also didn't mention what they are going to do with the contaminated groundwater at MW-2. They will have 9 treatment solution injection sites in and around the former tank location, but this may not be enough. They should better define the limit of the heavy contamination by doing borings and then add injection points.

I sent Mr. Godick a report review response letter stating that they need to define the limit of the heavy contamination, propose how they are going to deal with the contaminated groundwater at MW-2, and submit the PBS registration form for the waste oil AST.

7/30/08 - Raphael Ketani. Mr. Godick called me today in response to the 7/23/08 letter I had sent requesting that they do more borings to better define the extent of the contamination. Mr. Godick spoke to his client about the request from the DEC and his client retorted that it was unfair to request so much additional work when the whole site will be dug up in a couple of years.

I told Mr. Godick that a well to the south had very high hits of VOCs and it was next to another property. I told him that meant that the contamination probably extended under the neighboring property. I added that the DEC was concerned. Mr. Godick stated that he would like to take another approach to this problem. I suggested seeing whether the product and contaminated groundwater

can be collected through pumping. He said that he would like to try installing collection wells and see how much they collect. Mr. Godick added that if the first well collects a lot of oil and contaminated water, then he will install more collection wells and remediate the site this way. However, he said, if collection is not practical, then they will do the soil treatment as formerly proposed. I told him that sounded like a reasonable plan. Mr. Godick said that he will send a letter to DEC memorializing the new plan.

8/20/08 - Raphael Ketani. I spoke to Mr. Godick (914) 922-2356. He said that they are in the process of ordering the ORC and RegenOX from Regensis. He said that he plans to install the collection well first and see whether they can recover oil. They will inject the treatment solutions to treat both groundwater and soil. He said that the PBS registration is being worked on. Hopefully, he said, they will begin work in the next week or two.

Mr. Godick e-mailed me the 8/8/08 letter regarding the plan to install a recovery well,treat the contaminated soil and groundwater with ORC and RegenOx, and monitor the environmental conditions.

9/15/08 - Raphael Ketani. I spoke to Mr. Godick. He said that they have figured out a way to put in the recovery well using a vac. truck. He also said that they ordered the soil treatment chemicals from Regenesis. They expect to do the field work in about 2 weeks. They will keep me posted.

10/27/08 - Raphael Ketani. I spoke to Mr. Godick regarding progress at the site. He said that he is waiting for EPA UIC approval for doing the solution treatment injection. He said there is a TAGM for solution injection. As soon as he gets the approval, he will let me know.

11/21/08 - Raphael Ketani. I spoke to Mr. Godick regarding the start of the treatment injections. He said that the EPA still hasn't given approval to do the work on this site and another site. He said that he will call the EPA and try to find out when they will give the approval.

12/2/08 - Raphael Ketani. I tried to contact Mr. Godick (914) 922-2356, but could only leave a message.

12/22/08 - Raphael Ketani. I spoke to Mr. Godick. He said that the TAGM requires a 30 day notice prior to doing the injection. However, more than 30 days have passed and he still hasn't heard anything from the EPA giving him the "go ahead" (a permit) to do the work. So he feels "enough is enough." He's going to do the injections during the first week in January 2009. He will keep the DEC posted.

1/16/09 - Raphael Ketani. Today I received the following e-mail message from Mr. Godick:

Things are finally set to start next week. We will be starting with the Regenox/ORC injection work on the morning of Wed, 1/21. We are still coordinating with the driller for the recovery well, but the installation would be completed either concurrently or shortly thereafter. Have a good weekend.

Regards,
Marc

Marc S. Godick, LEP
Sr. Vice President

AKRF, Inc.

1/26/09 - Raphael Ketani. I received the following e-mail on 1/24/09:

Hi Raphael. I am working with Marc Godick on this project and am writing to update you on the progress. We successfully completed the Regenox/ORC injection today. We are still finalizing with the driller, but we expect the NAPL recovery well will be installed next week.

I will keep you posted on the findings of the drilling and subsequent well gauging soon after the well is installed. Please feel free to contact me or Marc with any questions or concerns.

Kathleen Brunner
Technical Director

AKRF, Inc.

2/13/09 - Raphael Ketani. I tried to reach Mr. Godick (914) 922-2356 regarding progress at the site, but could only leave a message.

Mr. Godick called and left a message. He said that the ORC and treatment chemical injections had been completed two weeks ago. The recovery well was installed, but no free product was seen.

3/2/09 - Raphael Ketani. I received the following e-mail from Kate Brunner of AKRF:

Hi Raphael. I am working with Marc Godick of AKRF on toward the remediation and closure of a petroleum spill (Spill #0708204) reported at 835 11th Avenue (at West 57th Street) in New York, New York. In accordance with AKRF correspondence dated August 8, 2008, we installed a monitoring well for potential NAPL recovery and injected ORC and Regenox in the vicinity of the former aboveground storage tank in January 2008. We have been inspecting the well on a weekly basis for the past 4 weeks and have not identified any LNAPL. We will continue to monitor this well on a monthly basis for the next two months, at which time we'll perform the confirmatory soil and groundwater sampling outlined in our August 2008 correspondence. We anticipate this sampling will be performed by early May 2009. Upon receipt of the laboratory data, a Remedial Action Report will be prepared and submitted to NYSDEC. If you have any questions or concerns in the meantime, please feel free to contact me.

Thanks,
Kate

4/23/09 - Raphael Ketani. I spoke to Ms. Brunner (212) 696-0670 regarding the site. She said that confirmatory soil samples and groundwater samples will be taken on 4/29/09. She said that only 4 soil borings will be performed as access is tight in the basement.

4/24/09 - Raphael Ketani. I received the following e-mail today from Ms. Bruner:

After we spoke on the phone yesterday I looked at the site data more closely. We are going to still perform sampling on April 29th, but we are going to start with the groundwater sampling portion only, since groundwater remediation was the target for the

Regenox/ORC injection. We'll evaluate the next steps based on the groundwater sample results and I'll keep you posted.

6/19/09 - Raphael Ketani. I tried to reach Ms. Brunner, but she was out on vacation. So I left a voice mail message. She will be back on 6/22/09.

6/24/09 - Raphael Ketani. Ms. Brunner called me back. She said that they received the groundwater analytical results for the confirmatory water samples, but the presence of naphthalene skewed the other SVOC results. She asked whether they still had to send the results. I told her to send the results with a cover letter explaining what the problem is. She said that the next round of samples will be taken about in July. I told her to send DEC these results when they get them.

7/13/09 - Raphael Ketani. Ms. Brunner told me that the next round of groundwater sampling is scheduled for next week.

9/11/09 - Raphael Ketani. I tried to contact Ms. Brunner (212) 696-0670, but could only leave a message regarding the latest analytical results from the July sampling and progress at the site.

9/14/09 - Raphael Ketani. Ms. Brunner called me back. She said that the developer who was paying for the remediation is no longer involved. Off of the top of her head, she said that the developer told her to stop all work back in July or August. So, even though the treatment injections took place back January 2009, no groundwater samples have been taken. Ms. Brunner said that AKRF will meet with another developer very soon regarding the remediation.

9/17/09 - Raphael Ketani. Ms. Brunner left me a voice mail stating that AKRF met with the owner of the property. They are trying to work with the owner to continue the remediation project. She added that she needs one week to work out the details with the owner and to get them to agree to take over the project. She will call me in about a week to let me know what had transpired.

9/29/09 - Raphael Ketani. Today I received the groundwater sampling report dated 9/28/09 from AKRF. The report stated that the treatment solution was injected during January 2009 from 8 to 10 feet below the basement grade at 9 locations. Post injection sampling was conducted on 4/29/09. With the exception of a 530 ppb naphthalene hit from MW-2 and a below TAGM toluene hit from MW-1, all of the VOC results were non-detect. The SVOC results were almost entirely non-detect, with the exception of a naphthalene hit of 340 ppb from MW-2, followed by a number of low benzo series and combustion product hits. MW-1 had a few very low SVOC hits. It was not clear why MW-5 wasn't sampled. I tried to contact Mr. Godick (914) 922-2356 regarding why MW-5 wasn't sampled, but could only leave a message.

10/1/09 - Raphael Ketani. Mr. Godick returned my call after work hours.

10/2/09 - Raphael Ketani. I tried to return Mr. Godick's call, but could only leave a message.

10/9/09 - Raphael Ketani. Ms. Brunner called me back. She said that MW-5 wasn't sampled because it doesn't screen the entire water table and would probably not result in representative groundwater samples. She added that it is a narrow well and can not be used for groundwater/product extraction.

11/5/09 - Raphael Ketani. I tried to contact Ms. Brunner (212) 696-0670, but I could only leave a voice mail.

11/6/09 - Raphael Ketani. I received the following e-mail from Ms. Brunner:

Regarding the site on 11th Ave at 57th St in Manhattan (NYSDEC Spill #0708204), we are scheduled to collect the groundwater sample next week. We'll get lab data about 2 weeks later and will prepare a short letter report for submittal to DEC. The report preparation will be slowed a little because of the thanksgiving holiday, but I expect to have that data report to you by mid-December.

12/23/09 - Raphael Ketani. I tried to contact Ms. Brunner, but could only leave a message requesting the data report.

1/8/10 - Raphael Ketani. I contacted Ms. Brunner. She said that they had "invoicing issues" with the client, but now everything is straightened out. She said that they have the data from the latest sampling round and the results are significantly improved. She said that Mr. Godick has to review the data, but he's out of town. So the data wont be reviewed for two weeks. DEC should receive a report sometime in February.

4/1/10 - Raphael Ketani. I spoke to Ms. Brunner (212) 696-0670 regarding progress at the site. She said that she has made repeated calls to the client, Avalon Bay, but she has not been able to get a response. She said that she will try again now that the DEC is calling again. I told her that I will send an e-mail to her requesting that Avalon Bay continue with the remediation or else face legal action if no progress has been made by April 30.

I looked up the correct name and address of Avalon Bay (leassee). It is:
Avalon 57, LLC, c/o Avalon Bay Communities, Inc., 275 7th Avenue, 25th Floor, NY, 10001.

The actual owner is: EE 57th Street South Holdings, LLC, c/o JP MorganChase Bank, N.A., 345 Park Avenue, 4th Floor, NY, 10154. The main property address is 827 11th Avenue. The alternate addresses are: 829 and 835 11th Avenue. The block and lot are 1104 and 31.

4/23/10 - Raphael Ketani. Today I received the Closure Report from AKRF. The report contained the groundwater analytical results from the 11/12/09 round. I began my reivew.

4/26/10 - Raphael Ketani. I finished my review of the Closure Report. The groundwater VOC results were all non-detect. The SVOC results were almost entirely non-detect with one 160 ppb hit for naphthalene. I was not concerned about the groundwater contamination as it appeared to have been addressed. However, I could not find any documentation in the case file showing that the concentrations of the VOCs and SVOCs in the vicinities of B-111 and B-113 had decreased.

I contacted Ms. Brunner (212) 696-0670 and told her that the DEC had no proof that the contamination in the vicinities of B-111 and B-113 had been addressed to TAGM levels. She said that the soil was below the building with no pathways for the contamination to be affected. She added that the soil will be removed when the construction excavation takes place. I told her that, as far as the DEC knows, the contamination is still present in the soil where the tank used to be. I told her that all contamination needs to be addressed. I added that I understood that AKRF had the treatment solutions pumped through the soil, but we have no proof that the contaminant levels were reduced. She said that the solutions were pumped through the vadose zone. I told her that I trusted was she is saying, but, still, it needed to be confirmed that the soil contamination had been reduced. I suggested doing one soil boring each at the locations of B-111 and B-113. She said that she will talk to the client about this. I told her to do so as I can't close the case at this time. I sent an e-mail to this affect to Ms. Brunner.

5/24/10 - Raphael Ketani. I tried to contact Ms. Brunner (212) 696-0670 regarding whether the client was willing to do the confirmatory borings at B-111 and B-113, but could only leave a message.

5/26/10 - Raphael Ketani. I tried to contact Ms. Brunner (212) 696-0670 regarding whether the client was willing to do the confirmatory borings at B-111 and B-113, but could only leave a message.

5/27/10 - Raphael Ketani. Ms. Brunner called me back. She said that the client (the renter of the space) is willing to do the confirmatory soil borings. Ms. Brunner and I agreed to confirmatory soil borings at B-111, B-113, and at two other step-out locations. I told her that if the results are not at or below TAGM, then the contamination will need to be addressed. She said that they can't dig it out. I told her that more solution treatment may be the answer. She said that if the confirmatory sample results are still high, then that means the treatment solutions aren't doing the job. I asked her when the work will start. She said that they have to get a driller lined up. So they hope to start the work within a month. She said that she will keep me informed.

6/17/10 - Raphael Ketani. Ms. Brunner sent me an e-mail that they have hired a contractor to perform the 4 requested soil borings in the vicinities of B-111 and B-113. The work will take place on June 25.

7/14/10 - Raphael Ketani. I sent Ms. Brunner an e-mail as I haven't received any information regarding progress at the site.

Ms. Brunner sent me the following e-mail:

Yes, the soil borings were performed. We just got the lab results back and are still tabulating the data. We'll next prepare a report after we receive the final lab package and can compile all the findings (I expect it will take at least several weeks with our internal management and client reviews).

9/23/10 - Raphael Ketani. I tried to contact Ms. Brunner (212) 696-0670, but I could only leave a message.

9/30/10 - Raphael Ketani. I received the 9/28/10 soil sampling report from AKRF. I reviewed the report. The last round of RegenOx treatment and RegenOx ORC Advanced treatment reduced the SVOC concentrations around B-111 and B-113 to the point where almost all of the analytes were below the TAGM limits. However, the soil sample from confirmatory boring B-115 had 4 VOC analytes which exceeded the TAGM limits by two to ten times, and the soil sample from confirmatory boring B-116 had 6 VOCs which exceeded the TAGM limits by two to five times. The samples from B-117 and B-118 were entirely non-detect. I sent an e-mail to Mr. Godick and Ms. Brunner that further soil treatment was necessary at B-115 and B-116, and that this should be followed by further confirmatory soil sampling and downgradient well sampling.

12/2/10 - Raphael Ketani. As I hadn't heard anything from AKRF regarding the further treatment of the areas around B-115 and B-116, I tried to call Ms. Brunner. However, I could only leave a message. I then sent her an e-mail requesting an update regarding the site activity.

12/9/10 - Raphael Ketani. I tried to reach Ms. Brunner, but I was only able to leave a voice mail.

12/10/10 - Raphael Ketani. Ms. Brunner sent me an e-mail that she has reached out to her client, but she hasn't received a response yet.

1/7/11 - Raphael Ketani. Ms. Brunner sent me an e-mail stating that her client, EE 57th Street South Holdings, LLC, wanted to have a face to face meeting with the DEC in our office. The purpose of the meeting would be to discuss what the DEC wants in the

way of further remediation. The client also wants to know the rationale behind any further work.

1/10/11 - Raphael Ketani. I e-mailed Ms. Brunner that the only work that the DEC wants is additional soil treatment in the vicinity of B-115 and B-116. I added that this is the only work that is required and that the goal is to reduce the residual soil contamination to at or below TAGM concentration limits. I added that the client was very close to finishing this project and that maybe larger doses of treatment solution would do the job. I wrote that there is nothing else to discuss and so a meeting will not take place.

1/14/11 - Raphael Ketani. Ms. Brunner (212) 696-0670/(646) 388-9525 called me and insisted on a meeting. She said that it would help move the project along if the owner could talk face to face and come to an understanding regarding what the DEC wanted and why. I told her that sometime next week would be alright. She said that she will get back to me.

1/18/11 - Raphael Ketani. Ms. Brunner sent me an e-mail suggesting having a meeting on January 21 at 11:30AM. I wrote back that this date and time were fine.

1/21/11 - Raphael Ketani. The meeting with Mr. Godick and Ms. Brunner took place as scheduled. Towards the end of the meeting Randall Austin, Chief of the Spills Unit, attended the meeting. Mr. Godick was the primary presenter for his client. Ms. Brunner took notes and made a few comments. The premis presented by Mr. Godick was that AKRF had tried to eliminate the soil contamination, but that they had only a 50% positive result (only two locations showed complete contamination removal due to the ORC and RegenOx treatment). I told Mr. Godick and Ms. Brunner that the soil samples from borings B-115 and B-116 had very high exceedences after the first (only) round of treatment. I told them that through my experience with the use of these treatment solutions, I have never seen a situation where only one round of treatment was necessary to eliminate all oil contamination. I told them that at least one more round of treatment was necessary. Mr. Godick stated that his client didn't want to spend another $20,000 for another round of treatment and get only a slight reduction in the analyte concentrations at B-115 and B-116. I told him that the DEC was very concerned about the concentrations that still remained. Mr. Godick said that the site was still an active Lexus dealership and service shop. He added that there were vapors from the vehicles in the showroom and in the shop. I asked Mr. Godick what the ceiling height was in the basement. Ms. Brunner said that it was 8 feet. I then asked whether there was small equipment available that could help to dig out the contamination, rather than treat it. Mr. Godick said that there was a wall nearby and that the area was tight. I responded that the DEC wants another round of soil treatment to take place, but that I will discuss this issue with Mr. Austin. Not long after this, Mr. Austin walked into the meeting room. Mr. Godick presented the groundwater and soil data to Mr. Austin. After some review, Mr. Austin stated that he will have a meeting with other staff to discuss the site and the analytical results. After this, he will come to a decision and notify AKRF. With this, the meeting adjourned.

Subsequent to the meeting with representatives from AKRF, a meeting was held between Randall Austin, Jeff Vought (Spill responder), and myself to discuss the soil and groundwater analytical results. It was noticed that, according to the 4/23/10 report, the treatment solution injection depth was at 8 to 10 feet below the basement floor. The report stated that this was the level of the water table or below it. It was also noted from the 9/28/10 report that the soil boring from B-113 was taken at 9 to 10 feet below the floor, while the confirmatory soil sample for B-117 was taken at 4 to 6 feet below the floor. An initial soil sample was taken at 6 to 7 feet down at B-111. The confirmatory sample from soil boring B-115 was taken 5 feet away at a depth of 3 to 5 feet. Injection point RB-5 was depicted as being midway between B-111 and B-115.

I contacted Mr. Godick and asked him why, if AKRF was trying to treat the soil contamination, they had injected the treatment solutions into the water table. I also asked him why the sample from boring B-117 was taken at a much shallower depth than the

one from B-113. I commented that it was not surprising that the sample from B-117 would look so clean as to be almost entirely non-detect. Mr. Godick said that he will talk to Ms. Brunner about these questions and get back to me.

1/26/11 - Raphael Ketani. I spoke to Ms. Brunner (212) 696-0670/(646) 388-9525 regarding the discrepancy in the original boring sampling and the confirmatory sampling. She said that in both cases they sampled the interval that had the highest contamination. She claimed that this interval changed between the date of the original sampling and the date of the confirmatory sampling. According to Ms. Brunner, when the treatment solutions were injected, AKRF injected just above the water table (the dirtiest zone) and then at levels in the bore hole that were higher up. This way, they achieved greater coverage and greater treatment of the contamination. I told Ms. Brunner that I understood what she was saying and the conversation ended.

6/2/11 - Raphael Ketani. I spoke to Ms. Brunner. I asked her why she hadn't contacted the DEC in many months regarding progress at the site. She said that AKRF was let go a week after we had last talked. She said that AKRF had worked for the tenant, the LEXUS dealership, and the developer, Avalon Bay, not the owner of the property. She added that she didn't know who the new consulting company was and who the owner was. I told her that I will find out who the owner is and send them a letter that the DEC wanted a report on the cleanup of the site.

6/3/11 - Raphael Ketani. Ms. Brunner called and stated that the new consultants were ERM. Paul Levine at ERM (609) 895-0050 was the new contact.

I looked up the owner information in ACRIS. The site is block and lot 1104 and 31. The latest deed is dated 1/31/08. The owner is listed as EE57th Street South Holdings, LLC, c/o JP Morgan Chase Bank N.A., 345 Park Avenue, 4th Floor, NY, 10154.

I tried to contact Mr. Levine, but I could only leave a phone message.

6/6/11 - Raphael Ketani. I spoke to Mr. Levine (609) 895-0050. He said that the site is managed by the Appleby Trust. Avalon Bay had a lease. They took responsibility for development of the property. However, they have given notice that they will terminate their lease. The end of the lease is the end of July. Mr. Levine didn't know how this will all work out. He will go back to the Appelby Trust and tell them they need to send a work plan to the DEC, but he was not sure whether ERM will be the consultant on the project. He asked me not to send the letter just yet requesting a work plan as it may not get to the right person since things are in flux. Mr. Levine stated that he will get back to me in a couple of days to let me know who the responsible party is. I told him I will wait.

6/8/11 - Raphael Ketani. Mr. Levine called and said that he did not have any answer yet regarding who is the responsible party. He said that Appelby Trust is trying to get all of the owners, the developer and the consultant together for a meeting. However, this may not happen till next week. Mr. Levine said that he will keep me posted regarding what will take place.

6/23/11 - Raphael Ketani. I spoke to Mr. Levine (609) 895-0050. He wanted to have a meeting with DEC staff (Randall Austin and myself) and the owners and the developers. The meeting would be to discuss what the DEC wanted in the way of further remediation and why. I told Mr. Levine that I didn't see the need for a big meeting as the only requirements right now were that additional soil treatment and confirmatory sampling take place in the vicinity of B-115 and B-116. He said that the owners and the developer didn't want to spend $30,000 on another round of treatment. I told Mr. Levine that I will talk to Randall Austin, Chief of the Spills Unit, and see whether he will agree to a meeting. Mr. Levine suggested July 21. I told him that this date was fine for me.

6/28/11 - Raphael Ketani. I spoke to Mr. Austin regarding having a meeting with the owners of the property and their consultant.

I told Mr. Austin that the owners wanted the meeting because they didn't want to do another round of soil treatment. He responded by saying that the DEC will not have the meeting.

I sent Mr. Levine (Paul.Levine@erm.com) an e-mail declining the request for a meeting.

7/11/11 - Raphael Ketani. Mr. Levine sent me the below e-mail:

This is to let you know that ERM has been engaged by the Ownership to evaluate remedial alternatives at the above referenced site. Our objective is to consider treatment alternatives including the previously used ORC/Regenox as well as other alternatives that my be more advantageous including persulfate, thermal oxidation, bioventing and excavation. After review and recommending a preferred alternative to the Ownership, we will prepare a letter report to the NYSDEC noting preferred action and schedule. Consequently, we are rescinding our request for a meeting with you this month, but would like to reschedule that meeting once our alternatives analysis is complete. This will take several weeks.

9/13/11 - Raphael Ketani. I tried to contact Mr. Levine (609) 895-0050 regarding what ERM and the owners had decided to do to address the remaining soil contamination. However, I could only leave a voice message. I also sent an e-mail to him. In the e-mail I stated that the owners were still in violation of Section 173 and Section 176 of Article 12 of the Navigation Law.

9/14/11 - Raphael Ketani. Mr. Levine called me back. He said that ERM had sent a draft memo to the owners desribing 5 soil treatment methods. Also, an engineer from ERM went to the site to see the work conditions. The engineer reported back that the ceiling height was about 2 and a half feet. Mr. Levine commented that these were very difficult conditions to work with. I told him the DEC agreed, but that the work must continue. Mr. Levine added that there were 5 parties involved with the site. So even if the memo has nothing much to think about, it will still take time for them to respond to ERM and agree on a work plan. Mr. Levine asked what the DEC wanted. I told him that the only areas that needed treatment were that of B-115 and B-116 (confirmatory boring locations). He said that he thought the DEC wanted more than that treated. I told him that we didn't. I told him that the issue was VOC analyte exceedences of the soil standards. The confirmatory boring samples had exceedences that were up to 10 times the limit for individual VOCs. I added that the first round of treatment had resulted in a good reduction in the concentrations of all of the analytes. However, at least one more round was needed just at these two locations, nowhere else. Mr. Levine asked, "That's all the DEC wants?" I told him it was. Then, he said that this new information put a different light on the project and that he will get back to me. I told him that would be fine.

10/19/11 - Raphael Ketani. I spoke to Mr. Levine (609) 895-0050 (Paul). He said that today he received approval from the fourth trustee for the treatment plan. He will send the work plan to the DEC sometime in the next two weeks.

11/16/11 - Raphael Ketani. Mr. Levine sent me the 11/16/11 ERM Preliminary Work Plan by e-mail. It dealt with performing a treatability study before conducting more treatment solution injections. The purpose of the study would be to determine what would be the best method for treating the remaining contamination in the vicinity of B-115 and B-116. I reviewed the work plan, but had no comments or objections. I responded to Mr. Levine by e-mail that ERM should proceed as soon as possible.

WHILE INSTALLING MONITORING WELLS, CONTAMINATED SOIL & G/W WERE DISCOVERED. WILL EXCAVATE CONTAMINATED SOIL- CONTINUE INVESTIGATION FOR SOURCE.

DEC Investigator Remarks:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "ZHITOMIRSKY"
10/10/95: This is additional information about material spilled from the translation of the old spill file: CONTAM. SOIL & G/W.

TRANSFERRED FROM Y.KRIMGOLD.
10/05/05 The facility was demolished and will undergo reconstruction. Sanitation will excavate for the basement and underground parking to about 20 feet depth. New spill was called in by Con Ed. They discovered soil heaily contaminated with gasoline in front of the facility. I notified S. Frank (LiRo). See also spill #0508045 AZ

1/17/2006 Excavation is pending. New consultants should submit their plan and timetable. AZ

4/11/2006 I contacted Jane Staten (URS). The site was last time sampled in 2002. Groundwater contamination was found but not

delineated. Free phase and dissolved phase up to 16, 000 ppb . Excavation is still pending. AZ

9/26/2006 I contacted Jane Staten (URS). They demolished the existing facility, removed the tanks. Closure reports were never submitted by demolition contractors (EPM -environmental consultants), although heavy contamination was encountered. Jane Staten requested tank closure report from EPM. AZ

1/24/2007 At the meeting with DDC/URS on January 10, 2007, the site was discussed. The facility construction is near completion. The tanks were removed. No end point samples were taken. No tank closure reports were issued. Bovis is the construction CM. URS will arrange a site visit with DOS. AZ

9/25/2007 Received e-mail from Jane Staten (URS). There is no information about the area which was excavated for the construction purposes. The construction is still ongoing. I called Jane Staten. She notified me that no post-excavation samples were reported. The area is currently unaccessible. I requested that URS/DDC notify DEC when the construction ends. Excavation and end point sampling should be coordinated with NYC DOS. When the area is accessible URS should submit a sampling Plan based on the previous investigation. AZ

3-17-2009 Inquired about the site status (J.Staten -URS)via e-mail. AZ

10-09-09 Discussed the site with Jane Staten. Excavation was performed at the site by Bovis for solely construction purposes. No post-excavation samples were taken. Excavation was not coordinated with DDC. Environmental work/observations/sampling was not performed during the excavation. I informed Jane Staten that an investigation of soil and groundwater should be performed at the site. The investigation plan based on the results of the previous investigation and monitoring should be submitted to DEC. The area of the former free product plume and soil/groundwater contamination should be investigated. Request for closure was rejected. AZ

3-22-2010 An e-mail was sent to J. Staten (URS):"I am reviewing Field Investigation Work Plan for the above site. Unfortunately, the submitted Work Plan doesn't contain results of the previous investigations. Please submit soil and groundwater plume maps and tables which show results of the previous investigation(s). After review of these materials, DEC will finish reviewing the proposed work plan." AZ

3-23-2010 An e-mail sent to J. Staten: :"Thanks Jane.Your e-mail does help in terms of well placements. However, results of the previous investigations should be included in the work plans for future investigations. Please, resubmit the work plan for this site and include hard copies of the plume maps and tables.Contacted J. Staten."

Contacted J. Staten. She informed me that according to Cal Gerson, the CM for the new construction, the interior of the building is off limits because a "pressure slab currently exists under the entire footprint of the former facility that is reflected on the LiRo drawing. A pressure slab does not exist outboard of the footprint of the former facility (that is to say - a pressure slab does not exist under the sidewalks and under a 10FT. +/- strip between the sidewalk and the new facility)." Specifically, "the area of the former UST's has currently become a Basement level, with 24" reinforced concrete pressure slab and a Bontonite Waterproofing membrane (both of which are several feet below the water table)" which should not be penetrated. AZ

5-10-2010 Reviewed Revised Field Investigation Work Plan. Contacted Kevin Shanahan (URS). Requested submittal of groundwater and soil plume maps with the locations of proposed wells.AZ

5-27-2010 Contacted Don McCall (URS). Upon DEC request, he sent DEC a plan with proposed well locations (4 wells). I asked Don if it's feasible to move wells closer to the former free phase plume area and to the wells MW-2 and MW-13 where most of the dissolved phase contamination was previously encountered. AZ

2-21-2012 Received the following email from K. Shenahan:"Alex,
URS issued a report for this site on March 25, 2010, which discussed how the former facility was demolished and a new DOS facility was constructed. The report is attached.
Also attached you will find a pdf of a memo from the construction manager indicating that the site was excavated to bedrock and that the material was transported off-site for disposal (see photograph illustrating 20 foot deep excavation).
The March 2010 report contained a plan to install and sample four groundwater monitoring wells located along the sidewalk to provided sufficient data for DEC to evaluate closure of the open spill numbers. Access to the sidewalk had been blocked by scaffolding until October 2011. The attached pdf illustrates existing site conditions from Google maps.
On March 27, 2010 you provided verbal comments regarding shifting one or two of the well locations closer to the area where product was detected by Liro (see attached Liro report Figure 4-3) and closer to wells MW-02 and MW-13 where high VOCs were detected prior to remedial excavation (see Liro report Figure 4-2).
To address your request, we have shifted the locations as shown on the attached pdf identified as "Figure 2 - Proposed MW Locations". Also shown on this figure is the estimated groundwater flow direction to the southwest. As you will see, three of the four proposed wells are down gradient of the areas where product was detected and high VOCs in groundwater. We have evaluated the existing conditions and have located the wells at the best locations possible to facilitate drilling. Since artesian conditions exist at this site, we will install the wells in accordance with the March 25th work plan but will keep the wells relatively shallow.
URS would like formal approval of the revised well locations so we can schedule the drilling and sampling." AZ

Thanks,

Kevin J. Shanahan

Project Manager

PETROLEUM DISCOVERED DURING GEO TECHNICAL BORING NEAR BULK HEAD AT DEPTHS OF 4-6 FEET. WILL DRUM THE WASTE MATERIAL AND CONTINUE CLEANUP.

DEC Investigator Remarks:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "ZHAO/SIGONA"
06/06/01 4:30pm: Zhao talked to Marcus Simons: The owner is Hudson River Park Trust (the State or City agency). Its address is 267-295 Greenwich Street, Manhattan, NY 10017. Tel# is (212)791-2530. There is no more drilling for the site. The project AKRF works on is Rt 9A DOT project. Vadim Brevdo, DEC HAZ Waste Section, worked on this project a few years ago with AKRF. AKRF geussed that the pollution came out from adjacent Con Edision Power Plant. Report will be sent to the Department.

06/06/2001 Reference to spill number 0102942 (closed due to duplicate calls)which reported on the same day.

11/21/05 Spoke to Marcus Simons of AKRF (646)388-9527. He said nothing has been done in this area since the contamination was discovered. He doesn't see anything happening here for quite awhile. - Rutland

9/7/06 - Austin - Assigned from Albany to Region 2 staff (Ketani) for review and closure - end

9/28/06 - Raphael Ketani.

An engineering firm was doing a geotechnical boring and discovered oil in the boring. They drummed the soil and cleaned up the oil. The oil was at 4' to 6' below grade. Nothing has happened since.

I tried calling Mr. Simons of AKRF (646) 388-9527, but could only leave a voice mail. His e-mail is msimons@akrf.com. I tried

calling Mark Gallagher of Langan Engineering at (212) 479-5400, but could only leave a voice mail. I contacted the Hudson River Park Trust at (212) 627-2020 and spoke to Laurie Silberfeld, Chief Counsel for the park.

Ms. Silberfeld said that there is a former Con Ed manufactured gas plant (MGP) site nearby. She said that someone from Albany DER was handling the case, but she didn't know who off-hand. She said to talk to Jane O'Connell, EG2 at Region 2 of DER.

I talked to Ms. O'Connell. She said that the MGP site is being handled by Albany DER, but 57th Street and 12th Avenue is 2 blocks south. She doesn't believe the oil there made its way from the MGP site. She said there is a facility that stored #6 oil at this location.

I received the following e-mail from Mr. Simons:

This northernmost part of Hudson River Park has not yet been built so nothing has happened yet in the vicinity of 57th St. There is a "permanent" Con Ed fuel oil barge with a bulkhead underground/aboveground pumping facility (connected to the power plant on the other side of the highway). It would be my strong suspicion that this is the source of the oil release. Some subsurface disturbance in the vicinity of this pumping facility will eventually be required, but that will be 2007 at the earliest.

AKRF is still involved in the project and will work with the Hudson River Park Trust once the design details are finalized to make sure construction in the vicinity addresses this release. Feel free to call me if you have additional questions.

Marcus

_____
Marcus Simons
Senior Vice President

AKRF, Inc.
440 Park Avenue South, 7th Floor
New York, NY 10016
(P) 646 388-9527 | (F) 212 726-0942

9/29/06 - Raphael Ketani. I spoke to Mr. Simons. He said that AKRF is still involved, but the Hudson River Park Trust hasn't finished its designs for this part of the park and so no progress has been made on investigating the area further. However, he said there is a large fuel barge permanently moored at the pier at 57th Street. He said it serves as a large floating tank and pipes go from there through the ground to a Con Ed power plant. He said that the power plant serves the subway system. Mr. Simons added that many investigations and borings have been done at the site. He said that nothing will happen until, maybe, sometime in 2007. I asked him for a report concerning the borings that found oil and any other data he can give me. He said he will put something together.

Mr. Gallagher called me back and said that his company is not involved in the project.

1/11/07 - Raphael Ketani. I spoke to Mr. Simons. He said he had forgotten that I had requested documentation regarding the site. He said that nothing is happening and that things are still in the planning stage. He said that he will send me documentation in the next several days.

6/22/07 - Raphael Ketani. I tried to call Mr. Simons, but could only leave a message.

Axel Schwendt, assistant to Mr. Simons, called me back. He said that he didn't know what DEC was looking for in a report. He said that nothing is happening at the site as the Hudson River Park is still work on finishing park property that is south of the site. I told him to have Mr. Simons keep me posted as regards events at the site. He said he will.

10/23/07 - Raphael Ketani. I tried to contact Mr. Simons, but could only leave a voice message requesting an update regarding investigative activity at the site.

Mr. Schwendt returned my call. He said that nothing has happened at the site. He added that there are no plans to do construction at the site and dig up the area for at least 2 years. I told him that DEC is not going to wait even 1 year for the investigation to begin. I added that something has to start very soon. I told him to talk to Ms. Silberfeld and tell her that an investigation plan has to be submitted to DEC now. He said that he will talk to her.

10/24/07 - Raphael Ketani. I tried to contact Ms. Silberfeld, but could only leave a message.

Ms. Silberfeld called me. She said that the site is a Con Ed facility. She said that Con Ed has a barge and fueling facility at Pier 98 at 57th Street. She added that DOS stores its trucks at Pier 97, which is just south. She said that Pier 98 is about 6 blocks south of the MGP site, not 2 blocks. Ms. Silberfeld mentioned that once DOS moves its trucks to the other side of 12th Avenue during the coming spring and Hudson River Park is ready to construct, then both piers 97 and 98 will be demolished. Hudson River Park has a lease with Con Ed that expires in 2009 and the ending of the lease and the need to investigate the spill and construct the park will serve as leverage against Con Ed. The top 2 feet of the soil along 12th Avenue will be removed and the contamination investigation will take place in sync. with the park construction.

10/29/07 - Raphael Ketani. I made an unannounced site visit. I took pictures of pier 97 and pier 98 (pictures are in E-docs). Pier 97 is a parking and maintenance facility for DOS garbage trucks. Pier 98 is a pumping facility for Con Ed. Beyond this is another pier which is possibly pier 99. It is a DEP facility. Beyond this pier is a construction site.

8/18/08 - Raphael Ketani. The case is being prepared for transfer due to a case realignment within the unit. As no work is scheduled until 2009, the case manager should simply call the responsible party and see when this work is scheduled to take place.

Caller Remarks:

50 MILE FEEDER LINE IS MISSING 400 GAL IN THE LINE - LEAKING AT 50GAL PER HOUR - RUNS INTO WESTCHESTER COUNTY - NRC #483125

DEC Investigator Remarks:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "O'CONNELL"
REFERED TO CON EDISON MONITOR FROM TIBBE.

5/10/99: ERT Masood Akbar - boat in water patrolling Harlem River (no oil seen). Feeder from W49 St SS to Sprain Brook. (CAE)

5/10/99: John Hegerty (Transmission Ops) - Checking manholes, PFT vans deployed 7 to 8 AM starting at 125th St/Broadway and going north and south (2 vans). (CAE)

5/11/99: Spoke to John Ryan (TO) - Con Ed believes they have found leak at 59th St/11th Ave. They found wood wedged against the feeder. (CAE)

5/12/99, 0354 AM: message from CIG Joe Devoti - leak clamped at 0300 hrs. (CAE)

5/12/99, 5:05 PM: message from CIG Rich Roach - total amount of dielectric fluid lost as of 1600 hrs today is 2365 gallons. (JHO)

5/18/99: met at site with Ray Turkin, Joe Floryshak. Excavation is approx 200 feet long between 58th and 59th St on 11th Ave. There is still contaminated soil at the leak location and south of it. Leak is about 75' south of the corner of 59th St IFO middle of garage bay of building at 550 W59th St (southern bay). There is a cement bottom in the excavation about 3' deep from about 10' south of leak to 59th St. All contaminated soil removed down to bottom. Told Ray & Joe (1) remove more contminated soil, (2) review subsurface drawings to try to understand if a well is feasible, and (3) call me to visit site when this is done. (CAE)

5/20/99: Con Ed has used guzzler to remove soil beyond concrete wall but started hitting obstructions at 3' down. Agreed to take sample and backfill. A well is infeasible because groundwater is at least 25' down (according to George Vassilev - MEG). They are going to take 6 samples: 1 each from the bottom, east and west walls for BTEX (grab) and df (composite).

7/11/00: Con Ed submits spill closure request, including report from MEG of soil sampling results. 3 soil samples collected - two results have high TPH. (JHO)

APPENDIX B SITE NO. 28.

~~~~~~~~~~~~~~~~~~

e2mis no. 124-751:

5/10/99 07:26

FROM MEASURING EQUIPMENT AT THE ENERGY CONTROL CENTER AT W.65 ST. IT HAS BEEN DETERMINED THAT TRANSMISSION FEEDER M52 THAT RUNS BETWEEN W.49TH ST SUBSTATION AND SPRAINBROOK SUBSTATION HAS LOST APPROX.00 GALS OF DIELECTRIC FLUID AT A RATE OF 50 GALS PER HOUR.

At 11:00 CGO reports all manholes in Bronx except 29558 have been checked - no leak found. At 11:15 TO crews report all Westchester

manholes have been checked and no leak was found. At 14:15 all Manhattan manholes have been checked except 61800. PFT van found highest barhole 50' s/o 59th St abd at 19:00 VNR began excavating. At 19:40 signs of fluid in soil found after pavement broken - excavation continues. 11-7 shift 5/11 excavation continues - trench is 25 feet long and no leak found (although there is still wet soil). Leak detection system oos - leak rate undeterminable. Pipe is resting on wood blocks on top of Amtrak tunnel. At 15:00 Amtrak reports that tunnel was checked and no fluid was found. Temp clamp installed at 02:00 on weep leak. Feeder returned to service at 03:19 5/12/99. Clean up of trench continues. No other leak found. Engineering inspection of pipes performed and areas of pipe and coating marked out for repair. On 5/14 temp clamp was removed from Fdr 52 and banding applied. Banding could not stop leak. Plidco clamp reinstalled and leak stopped. 220 style repair barrel installed over temp clamp. Permanent repairs completed 22:10 5/14. CSD reports that 2384 gallons of fluid were lost. Chem lab reports 99-04864 24.1 ppm benzene in fluid. Chem Lab reports 99-04863 0.87 ppm benzene is soil.

On 5/18/99 Chris Englehart (NYSDEC) and representatives from remediation met at leak location and discussed remediation. Addtional soil to be removed from area south of tunnel and well installed. Coating repairs in progress. On 5/20 Chris Englehart (NYSDEC), MEG geologist, Ray Turkin and Jerry Materazzo met at leak site. Allstate Power vac removed additional soil from trench
~~~~~~~~~~~~~~~~~~

and exposed concrete tunnel roof. Additional soil was also taken out south of tunnel. No well could be installed because of concrete tunnel and steel beams outside of tunnel wall. Additional samples taken by MEG geologist as per DEC recommendation. MEG geologist will write report. Permission

was given by DEC to backfill excavation. Allstate Power Vac removed total of 140 cubic yards of soil from leak site. Chem lab reports 99-04863 0.016 ppm TCLP benzene in soil.

Caller Remarks:

FOUND DURING EXCAVATION: UKNOWN WHERE IT IS COMING FROM: CONED # 159953. NO OT 5 QUESTIONS: STILL INVESTIGATING

DEC Investigator Remarks:

159953. Ken Collazo Supervisor in code 753 reported to R. Slote of Transmission Operations that during a code 753 mark out, he discovered oil in an excavation at the corner of 59th St. and West End Ave. He reports that there may be Transmission Operations manhole in the area and that this oil may have come from the feeder that impacted the sewer line indicated in e2mis report 159069. Trans Ops crew is being scheduled to go out to the location

to inspect any manhole in the area to help determine if the oil is coming from a Transmission Feeder pipe. Ken was directed to contact EHS Remediation as well as this could be a historic spill.
==========
ERT P. Walsh was spoken to about this incident. P. Walsh has a call into B. Cohen of EHS remediation to notify him of what was found. Trans Ops crews will be inspecting MH 60137 at the corner of 59th St. and West End Ave. on the 3-11 shift. The transmission feeders running through the MH is 38M73 and 38M74. This spill report will be closed once the inspection is completed and the feeders,are determined, to the extent possible, not to be leaking.
M. Pillig, 86856,7/22/05
==========

2/7/2012 - changed Lead DEC from Joe O'Connell to JFeng.

Found historical spill site. Client Aberham Heschel School.

DEC Investigator Remarks:

10/14/09- Zhune spoke to Jason Hayes from Langing Engeneering 212-479-5427. left message.

10/15/09- Jason Hayes called and said they are going to built a school at this site. Right now there is a parking lot and a auto shop. They will plan to take down the building and develop the site as a school. The site is E designated overseen by the Mayor Office of Environmental Remediation (OER).

Langang Engeneering is doing Phase II and found historical spill at the site. They will send the report to DEC with a remedial action plan on November.

12/02/09- zhune. Jason Hayer called to say that they are internally reviewing the report. they expect to have the Remedial Plan ready for submission to the DEC in two to three weeks.

Caller Remarks:

lab results show contamination

DEC Investigator Remarks:

06/29/11-Zhune spoke to Greeg Shkuda from ERM 631-756-8947. Site is a NYC public library annex. Library is not in used (not allow people there). During Phase II investigation 20 soil borings were installed. Crude oil (unrefined oil) was found in one of the soil borings. The Forensic analysis results are going to be send to the Department.

Charles Guder from TRC Engineer Inc. emailed the Phase I and phase II for the proposed primary/intermediate and high school located at 521 west 43rd street.

The site is being considered for use as a new primary/intermediate public school and high school. The site is currently developed with a six story document storage building, with a basement owned by the New York Public Library. The existing six-story building will be converted to a seven-story school building for develponment of the school and the foundation is planned to remain in placed.

Phase I.- It was performed by TRC Engineers Inc. on September 21,2010. The following recognized conditions (RECs) were identified in the phase I:

1.-Several structures were present on the Site prior to construction of the existing building. As a result, historic fill

material from demolition of the prior structures may be beneath the site.

2.-The historic use of the site for varnish and machinery storage; a garage with one 550 -gallon gasoline UST; machinery, lighting, and drug and phermaceutical companies; a printing press; a motor repair shop; and, other manufacturing operations.

3.- There are Two (2) # 2 fuel oil aboveground storage tanks on the Site, a 10,000-gallon AST and a 1,400 gallon AST. Oil stannning was observed associated with the 10,000-gallon AST, the fill line for the 10,000-gallon AST was recently replaced, a tird vent line was observed outside the building along west 44th street and the condition and location of the 1,400-galon #2 fuel oil tank is unknown.

4.-Stanning was observed on the building surface including the basement floor, presumably associated with leak from building equipment (i.e potential petroleum product).

5.- The Site is a generator of hazardous wastes, including fluorescent light bulb crushing operations, and is listed in the Resource Conservation and Recovery Information System Generator/ Transporters (RCRIS Gen/Trans) database as a small quantity generator (SQG) (NYR000105007)

Phase II.- It was performed by TRC Engineer Inc. on july 21, 2010. Included the installation of five(5) sub -slab vapor samples were collected and analyzed for VOc's. Petroleum and clorinated solvent compounds were detected at concentrations exceeding the standards
The concentration of PCE in samples TRC-SG3 and TRC-SG5 exceeded the correspomding AGV of 100 ug/m3 at concetrations of 490ug/m3 and 570ug/m3 respectively. The concentration of TCE in two samples TRC-SG3 and TRC-SG5 exceeded the corresponding AGV of 5 ug/m3 at concentrations of 150ug/m3 and 400ug/m3 repectively.

Eighteen soil borings were advanced in the site building and sidewalk and a total of 17 soil samples were collected and submitted for laboratory analysis. There was no evidence of contamination observed in the analytical data from the samples collected from the soil borings with the exception of observations of petroleum impacts (elevated PID readings, petroleum odors, staining, in samples collected from soil borings TRC-SB1, TRC-SB4, TRC-SB9, TRC-SB12 and TRC-SB13. In adition, Light Non-Aquos Phase Liquid (LNAPL) was identified on groundwater (perched water above bedrock) at boring location TRC-SB1.

A sample of the LNAPL was collected on March 1, 2011 and submitted to the laboratory for fingerprint analysis. The results of the fingerprint analysis performed on the LNAPL collected from TRC-SB1 exhibit characteristics of an unknown motor oil an also a non-calibrated fuel type.

Two bedrock groundwater monitoring wells were installed in the sidewalks outside the site building. Two (2) groundwater samples representative of the bedrock aquifer were collected from each monitoring well. There were no VOC's, SVOC's, metals, cyanide, PCBs or pecticides detected above the Class GA Values in groundwater collected from the bedrock aquifer.

Five metals (arsenic, cadmium, total cadmium, lead and mercury) were detected at concentration greater than unrestricted Use SCOs in three (3) soil samples;

TRC-SB2 (Arsenic: 29.8mg/kg, cadmium: 13.3mg/kg, Total Cadmium: 143mg/kg.
TRC-SB4 (Total Chromium; 143mg/kg, Lead: 106mg/kg, Mercury: 0.383).
TRC-SB6 (Total Chromium: 33.1mg/kg.

02/07/12 Mike Hughes is going to meet with Down Hetrick and Joseph Crua to decide whether they want formal plan for the "geo vent".

02/07/12- J. Vought and Zhune called Lee Guterman to inform her about curent situation. Lee noticed concerns about confirmation of vapor mitigation, Indoor, ambient sampling, or pressure field extennsion measurements.

DISCOVERED 1200 GALS #4 FUEL ON CONCRETE LEAKING INTO GETTING CLEANUP CONTRACTOR ,PLEASE CALL U.P.S. AS SOON AS POSSIBLE,UPS

MAINT TO INVESTWILL EXCAVATE AND REPAIR

DEC Investigator Remarks:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "M TIBBE"
TRASFERED FROM SULLIVAN TO TIBBE.

6/5/07-Matthew Klaas (Albany DER)
-Upon review of all paperwork in the file, it appears the spill is much smaller than it was originally believed. The tank diameter was listed incorrectly which caused too large a volume to be reported.
-483 gallons of fuel oil were released and 165 gallons were recovered, leaving a loss of 318 gallons of fuel oil.

6/6/07-Matthew Klaas (Albany DER)
-Attemted to contact Bob Esperto at UPS at 212-631-6364. He is no longer working at the site, however I was refered to a new contact. Dominick Casamassina at 212-631-6364.
-They do not have reports at their site dating back to 1992. Since the spill the site has been filled and there has been no report of odor, product, or further spills.
-Attempted to contact Christopher J. Kopley of Environmental Science Services at 203-221-2753, the company who did the tank assessment to try and identify if they did any work besisdes re-evaluating the tank. The number is no longer valid, and have no further way to contact anyone from ESS.

6/11/07-Matthew Klaas (Albany DER)
-Drafted a letter to UPS facility at the listed address requesting information regarding the spill site indicating that we got record of the tank calibration, but have nothing about the cleanup of the site.

08/06/07: Received call from Julie Straub, UPS Corporate (404) 828-8991. They are checking archives and ESS records for information about cleanup of spill, will get back to us. Martin Brand DER Albany.

3/31/09 - Austin - Transferred from Needs Reassignment to Rahman for further work to remeidate and close - end

06/16/10 Performed site visit today.The site has two 15,000 gallon UST (non active)and two 4,000 gallon diesel and gasoline USTs(active).They plan to close those two USTs after subsurface investigation around the tank to ascertain that no contamination exist at the site due to usage of the tanks. UPS rep at the site: Dominick Casamassina, UPS, 643 W 43rd Street,NY, NY 10036, attn: 5th Floor, Plant Engineering.Currently, they are in the bidding process.(sr)

01/06/12 I spoke with Dominic. He told me that they plan to abandone the tank in 2013.I said we can’t wait that long. Tank area should be investigated for any possible release from the tank.He will get back to me in two weeks.(sr)

ACTIVE HAZARDOUS SPILLS - MISC. SPILL CAUSES - EQUIPMENT FAILURE, HUMAN ERROR, TANK OVERFILL, DELIBERATE SPILL, TRAFFIC ACCIDENT, HOUSEKEEPING, ABANDONED DRUM, AND VANDALISM - IDENTIFIED WITHIN 1/2 MILE SEARCH RADIUS.
All spills mapped and profiled within 1/8 mile. Between 1/8 mile and 1/2 mile search radius, spills reported to be greater than 100 units and spills reported in the NYSDEC Fall 1998 MTBE Survey are mapped and profiled. Spills reported to be less than 100 units are listed in a table at the end of this section.

Please Note: * - Compass directions can vary substantially for sites located very close to the subject property address.

#2 FUEL OIL	PETROLEUM	1000	GALLONS	1000	GALLONS	SOIL

Caller Remarks: NO REMARKS GIVEN FOR THIS SPILL

DEC Investigator Remarks:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "KRIMGOLD"
6/22/04. J.Krimgold at site. According to delivery slip actual amount spilled ~6000 gal. Oil delivery Co. Metro Fuel Group delivered oil to wrong (1000 gal) tank instead of to 15,000-gal tank system. Oil released through top of tank, spilled in basement on concrete floor. Some oil went to drains in floor. Action Envt'l (contact Tod @973-896-6185) performing clean up.

Ambient Group (Mike Borello cell # 917-376-4179) was hired by CBS as envt'l consuling firm.

6/29/04. J.Krimgold met at site with Paul Puccio (CBS), Mike Borello (Ambient), and Tod (Active Env.). Inspected buildings' basements adjacent to 857 10th Ave and also owned by CBS. Found oil seepages into buildings ~50 and 100 ft respectively from place where release occurred. Oil and water accumulation in pits installed by contractor in basements floor.

12/22/05: This spill transferred from J. Krimgold to S. Kraszewski. Reviewed Remedial Action Monitoring Plan prepared by Ambient Group, Inc. dated 6/23/05. Report is conglomeration of remedial work performed at site from day spill occurred to above-mentioned date. Based on data, conclusions and recommendations are proposed for AOCs (Areas of Concern.)

AOC #1: Basement of CBS building where spill occured. 3 feet of contaminated soil were removed immediately after spill for majority of basement floor; approx 200 tons soil removed. 22 soil borings were advanced in basement to delineate and monitor plume. Free product and GW measurements were taken to determine thickness of product and GW levels. Also, 3 monitoring wells were installed around building exterior to monitor possible free product migration. Borings in basement were converted to total Fluid Recovery wells and would eventually work in tandem with an enhanced fluid recovery system. Initial recovery system involved extracing GW + product from borings to an oil/water separator. Soon after this system was functional, an SVE system was installed to remediate soil. Both systems have been operational since late 2004. Data in report is given as Total Recovery Trend for both

systems combined. Data start from Sept 2004 and end in Feb 2005. Overall trend is a decline in product recovery from contaminated wells. Only a handful of 22 wells are still recovering product or vapors, and even fewer recover significant amounts. Proposed action is quarterly monitoring.

AOC #2: Adjacent building sub-basement had free product/water seeping through wall at approx 600 gallons/day. Series of wall drains connected to GW pump collect GW for treatment. Borings and MWs not possible in this location. Summary of system will be provided in separate rpt.

AOC #3: Free product migration into sub-basement of nearby building (not adjacent to original spill area.) Free product is migrating through preferential pathways between buildings. Walls are rubble-masonry foundations with a history of GW infiltration. 5 MWs have been installed and quarterly monitoring is recommended.

Need: report for Recovery System at AOC #2, monitoring updates for AOCs #1 and #3 - SK

12/22/05: Called Michael Borello at Ambient Group. He no longer works for them. I was transfered to Gloria, she would find out info about site and have someone contact me. - SK

12/22/05: John Mascioli from Ambient Group called regarding spill. I requested any recent documents and monitoring reports he had. Also, Remedial Action Monitoring Plan from June 2005 is missing two figures dealing with MWs at AOC #3. He said they've been monitoring monthly since May for AOCs #1, #2 and #3. They are renewing permit for AOC #2 oil/water separator next week and he will send me document along with missing figures and recent monitoring report. John mentioned that monitoring data for AOC #1 is inconclusive for many wells. - SK

01/09/06: Called John Mascioli at Ambient Group, asking about site update report supposedly due last week. John said he is waiting for lab to send him some final results before he can send out report. He expects it to be complete this week. - SK

01/30/06: Joseph Holtzberg from Ambient called (917-861-7238) to inform me about site. He wanted to know what information I need to simplify scenario. I said I was still waiting for recovery system update and monitoring data I talked to Jon Mascioli about. They're almost finished with report and will send it very soon, he said. Also, he would like to have a meeting after I have reviewed report to hammer out a time frame for site activity. I told Joseph I would contact him after I had looked over report. - SK

02/02/06: Received documents from Ambient Group. Reviewed Volatile BTEX Air Sampling Results for two SVE systems at 857 10th Ave. Influent and effluent samples since Sept are clean. It appears SVE systems have performed well for extracting petroleum. However, regarding liquid extraction for these wells, no data exists from Feb. 2005 to present. Must have MW and liquid phase extraction data for this system. Received document with latest oil/water separator effluent results for 513 West 56th St., adjacent to CBS basement. Three separate effluent removals show consistent amounts of oil and water, roughly 1/3 of liquid is oil, rest is water and silt. Attached is request for one-year extension of discharge permit. Permit is issued by DEP; DEC does not regulate discharge into sewer. Since amount of oil recovered is constant this seems like plausible request. Continue operation of system until discharge slows or oil is no longer present in effluent. Currently, no seepage is occuring for 518 West 56th St., 3rd area of concern determined in June 2005 Site Investigation Rpt. After in-wall drain tap collector at 513 was installed, seepage through 518 basically ceased. It seems that collector is taking care of both sites. I spoke with Joseph after reviewing documents. I asked for MW measurements and records for liquid phase extraction data. He said information will be sent out as soon as he can arrange it. - SK

02/22/06: Reviewed Jan. 2006 Quarterly GW Monitoring Rpt submitted by Ambient Group. Static water level measurements were performed for 5 MWs, both on- and off-site. Also, static level measurements were taken in 24 soil vapor extraction wells. Results are as follows:

1) Only MW-5 in CBS courtyard exhibited free product, 0.25" in depth. GW samples taken from each well revealed dissolved contamination exceeding GW standards for VOCs and SVOCs including BTEX and MTBE for MW-5 only.

2)Five of 24 recovery wells in CBS basement exhibited free product from 1 to 8 inches thick.

3)Approx. 2 feet of silt is present in each recovery well, reducing efficiency significantly.

Ambient recommends:

a)Continued quarterly monitoring of 5 MWs.
b)Removal of silt accumulations in recovery wells, purging of wells and then additional static water level measurements.
c)Increase frequency of free product removal from recovery wells.
d)Continued operation of wall drain tap and oil/water separator in adjacent building.
e)Evaluate capacity loss from 24 vapor extraction wells.
f)Perform a survey of GW flow to determine its direction.

Site plan does not show locations of 5 MWs, only a CBS basement diagram is provided showing extraction wells. Also, report uses terms "extraction well" and "recovery well" synonymously. Ambient must clarify these issues. - SK

02/23/06: S. Kraszewski spoke with John Mascioli from Ambient Group.

CBS contact info: Alan Krupski
CBS Braodcast Center
527 West 57th Street
New York, NY 10019

We clarified information regarding fluid extraction system and SVE system. Apparently, it’s a dual-phase recovery system where a drop tube inside PVC recovers total fluids which are then pumped into an oil/water separator for collection and removal. Each of 22 SVE recovery wells contains a drop tube for fluid recovery. Also, in latest rpt it was observed that MW-5 contained product where it previously had none. Since updated site plan was not available with MW locations, it was possible that contamination was spreading. However, MW-5 is located next to adjacent basement where a wall drain tap is installed and already collecting fuel oil. Since contamination is known to be there, no cause for alarm is necessary. - SK

02/27/06: Two letters sent out, one addressing SVE systems and requesting addt’l air sampling & analysis of all petroleum-related VOCs, not just BTEX. This rpt is due by March 30. Other letter approves Ambient’s recommendations for continued operation of fluid extraction system. They also will perform required maintenance on extraction wells and keep wall drain taps with oil/water separator in service. GW flow direction will be recalculated. Comprehensive site plan that includes all wells with 2 basement systems was requested in next quarterly rpt. - SK

04/05/06: Spoke with Joe Holtzberg and John Mascioli. Within a week or two, more well readings and air sampling from two systems. By mid-April sampling and gauging work will be underway. Also, Joe and John stressed their client's concerns about how long this work could last because this persistent contamination may be migrating from off-site. I said it will be easier to make a determination after these results arrive at my desk, and the faster I receive them the faster they will have an answer. - SK

06/22/06: Received email from Sean Wallace at Ambient Group, new project manager for site. Email included influent and effluent air sample results from SVE system. Results are clean for both influent and effluent. I called Sean and asked if I could receive entire report, not just pieces. He will mail me a copy of report and fax me rest of results, i.e. GW analyticals, gauging and product thicknesses. GW results show some elevated SVOCs and VOCs in MW-5 as well as 0.4 feet of product. Several other wells exhibit 0.1 to 0.2 feet of free product. MW-5 is located next to adjacent building where a passive recovery system consisting of wall taps to drain oil is already installed. - SK

06/26/06: Received & reviewed April 2006 Quarterly GW Monitoring Rpt from Ambient Group. Influent and effluent air sampling results from both SVE systems found no VOCs above detection limits. Since no VOCs were detected from extraction wells, system may have removed all it is capable of removing. 5 recovery wells exhibited 0.1 to 0.2 feet of remaining free product. MW-5 had 0.4 feet of free product, but is next to wall drain tap, which is currently recovering product. Also, MW-5 detected MTBE, not found in diesel, slightly above TOGS standards. Samples from MWs 1 to 4 had no VOCs or SVOCs detected. MWs 1 to 3 are located outside along building perimeter. Ambient recommends continued monitoring and sampling of all wells and SVE emissions, free product removal and pulsing of multiphase system. - SK

06/30/06: Spoke with Sean Wallace regarding report. I asked that they always include a site plan displaying entire site, with neighboring streets and other adjacent buildings, plus all MWs, borings and recovery systems. I asked about drain tap system in adjacent basement, and Sean said it is recovering less and less. I asked for manifests of recovered fluids and he said he would get them to me quickly. Also, I told Sean that since SVE system is not recovering any volatiles next course of action would be to shut it down rather than running it and monitoring. I discussed conversation and report with J. Kolleeny. He recommended asking Sean to shut down parts of system that are no longer recovering free product. I sent Sean an Email approval for recommendations in report. - SK

08/07/06: SK met on-site with Sean Wallace from Ambient group (212-944-4615) and with Alan Krupski from CBS. Having never been on-site before, I wanted to inspect SVE systems and wall drain-tap system. Effluent from both SVE systems reveals no VOC consituents in air. Ambient is proposing to shut down only one system, SVE2. Ambient will pulse system to see if conditions change at equilibrium. This system runs vertically in each well located in basement. SVE1 will remain on for now in case any odors may appear. Several wells exhibit free product of an inch or less, so they will continue to recover from them. Wall drain tap is still recovering an oil/water mixture because it seems that bedrock forms a depression along basement wall where oil has settled. Only about 10% of mixture is actually oil. I requested that Ambient submit a recommendation for futher action regarding operation of systems, especially SVE2. Report is due by end of August. - SK

08/31/06: Received July 2006 Quarterly GW Monitoring Report from Ambient Group. Influent and effluent samples from SVE2 show no VOCs or SVOCs detected. GW samples from perimeter MWs reveal no SVOCs or VOCs above TOGS levels. Several recovery wells still exhibit several inches of free product. Ambient recommends continued removal of free product, use of wall drain tap system and O&M of horizontal system SVE1. SVE2 will undergo a pulse test in conjunction with monitoring of all wells to see if system may have an impact on GW; monitoring and sampling of MWs may continue based on results of pulse test. SK sent out approval letter for all recommendations. - SK

12/01/2006 - Sean Wallace (Ambient Group) called, asked that project be reassigned due to SK's departure from DEC. They believe remedy is done and are looking to turn system off. I (Vadim Brevdo) suggested they prepare & submit final remediation rpt, which should be consistent with DER-10, and we will review and decide whether remedy is completed or must go on. I committed to discussing this with my staff and having project re-assgined to other P.M.

12/05/06: This spill case transferred from S. Kraszewski to J. Kolleeny. Spoke with Sean Wallace of Ambient Group. He said pulsing of SVE system has not increased recovery; also, several wells still have a little free product (0.01-0.02 ft.) that does not seem to be going away, they may consider other options including bioremediation. They are not asking for spill closure yet, but will submit rpt presenting current site status and asking for permanent shutdown of SVE system. - J. Kolleeny

12/14/06: Received email from Sean Wallace (Ambient Grp.) with attached rpt summarizing pulse test of SVE2 system (in eDocs, rpt has no title page, no Fig. 1). Email stated: "Here is latest rpt for project, concerning pulse test of SVE 2 system, which we call horizontal system. 22 basement wells are hooked up to SVE system. At start of project, most wells had some free product (8/2004). By 8/2006 only 3 wells (deepest wells) had any product, and after we pumped those out, levels never came back above 0.02 ft. This is when we did shutdown monitoring. Sep-Oct 2006. I'm still collating all previous quarterly rpts along with intial rpts on remediation. Jan 2007 is next scheduled Quarterly; we'd like to make it last one. We will be collecting GW samples, air samples from SVE1 (vapor control system - vertical piping system under new concrete floor) and water & free product levels to demonstrate current conditions are not health concern. We are suggesting that at this point, to attack remaining fuel, bioremediation will be most effective, if further action is called for." - J. Kolleeny

12/28/07: Received email from Sean Wallace of Ambient Grp. stating: "We are planning shutdown test of vapor control system at 857 10th Ave (CBS Spill # 04-03162). Purpose is to determine if there will be detectable odor or measuarable VOCs in basement area or upper floors if this system is not operating. Plan is to monitor over a weekend. Thus, system would be off for 2-3 days. Would DEC require test to cover longer period of time? This is our main question at this point. As discussed previously, there is no more free product in observation wells. System in place now is installed under new concrete floor poured after excavation of top few feet of contaminated soil. There is gravel bed laying over plastic membrane. Horizontal piping leads to carbon bed filter. Inlet and outlet sampling of this system has come back non-detect since April 2006." I sent email reply: "It would be preferable to wait 5 to 7 days to see if odor problems or detectable levels of VOCs develop in building. Please let me know if this is acceptable. Also, is there any residual dissolved-phase GW contamination at site, since free product seems to have been taken care of? (Is GW sampling being performed on regular basis?)" Sean sent reply: "We will take your suggestion to CBS. They definitely want to do things in most acceptable manner, so we will plan for week-long monitoring event. Last GW sample was taken during July '06 Quarterly Monitoring. Method 8270 showed Acenaphthene and Fluorene at 2.5 ug/L and phenanthrene at 0.96 ug/L (D.L. 5.2 ug/L) in only one of monitoring wells in interior courtyard. Method 8260 showed MTBE at 5 ug/L (not additive in fuel #2) and n-butylbenzene and tert-butylbenzene around 2.5 ug/L (D.L. 1.0 ug/L). Perimeter wells were non-detect. We will take samples again for January event." - J. Kolleeny

03/20/07: Reviewed January 2007 Quarterly Monitoring Report (in eDocs). Report shows no contam in monitoring wells MW-1 through MW-5 (perimeter & courtyard wells), but low levels of dissolved VOCs (highest are MTBE at 139 ppb and naphthalene at 51 ppb) in several basement wells located near 3 basement wells that still have small amounts of product (from 0.02 ft. to 0.1 ft.); also VOCs in oil/water separator influent, including 169 ppb naphthalene, 122 ppb 1,2,4-trimethylbenzene, and 47 ppb total xylenes, but effluent to sewer is within limits. Influent and effluent air samples for vapor control system SVE1 all ND. Report recommends pulsing SVE1 system to determine if vapor control is still necessary, reducing GW monitoring frequency from quarterly to semi-annual, and continuing to operate perimeter wall drain tap and oil/water separator system until inlet concentrations of target compounds allow direct discharge to sewer. I sent email approving these recommendations to Sean Wallace of Ambient Group

on 3/20/07, with cc to Allan Krupski of CBS (212-975-2689, awkrupski@cbs.com), asking that basement wells be monitored in addition to perimeter/courtyard wells. Also asked that SVE1 pulse test include indoor air sampling for specific hydrocarbon compounds, that system influent sample be collected when system is re-started, and that scope of work for indoor air sampling be submitted to DEC when available. Changed spill status from P3 to P2. - J. Kolleeny

04/24/07: Received email from Sean Wallace of Ambient Group on 4/19/07, with attached proposed protocol for shutdown test of SVE-1 system with concurrent indoor air monitoring for VOCs (in eDocs), to be performed week of 4/23-27/07. Sent Sean an email asking if this document was for me to review/approve before they do the test; he sent reply stating it was sent to me for information purposes only and that it addressed all concerns I expressed in our phone conversation several weeks ago. - J. Kolleeny

07/09/07: Received June 2007 SVE1 Shutdown Test Results rpt by Ambient Group on 6/14/07 (in eDocs). Rpt presents results of indoor air monitoring for total VOCs during 10 days system was shut down, and results of vapor influent grab sample from when system was re-started. According to Ambient, TVOCs detected in indoor air were not above naturally varying background levels. Rpt lacks conclusions & recommendations sections. Spoke with Sean Wallace of Ambient on 7/9/07 and pointed out lack of Conclusions and Recs, and asked for clearer presentation of indoor air results. He said he would revise rpt and re-send. He also said no odors were detected in work spaces of bldg while system was shut down. - J. Kolleeny

09/07/07: Received email from Sean Wallace of Ambient on 9/4/07, with attached SVE1 Shutdown Test Results report revised as of 9/4/07 (in eDocs): "Revised report on shutdown test of SVE system. Revisions include 2nd graph of real-time TVOC response with outside air monitoring point included. Site map with sampling locations noted (in pdf with comments). Conclusions section added to body of report. On side note, NYCDEP sewage discharge parameters do not include any SVOCs. As part of recent bi-annual monitoring required for this project, we took grab sample of GW coming into Oil Water Separator unit. This is untreated GW that after separation is discharged to sanitary sewer. There were no VOCs above detection limits. I am assuming that even if all parameters on list were passing quality, presence of SVOCs would still prohibit direct discharge to sewer? We will have monitoring report to you shortly." I spoke with Sean and said I don't think there are DEP discharge limits for specific SVOCs, but he should check with DEP. On 9/7/07, I completed review of revised report, which concluded that residual soil contamination poses no threat to human health via vapor migration into occupied spaces and recommended discontinuing operation of SVE1 system. I issued letter (in eDocs) to Alan Krupski of CBS (cc to Sean Wallace) approving this recommendation, and noting that sampling & gauging of monitoring wells for dissolved-phase contam and product, and operation of perimeter wall tap drains and oil/water separator should continue. - J. Kolleeny

06/06/08: Reviewed Aug.'07 and Feb.'08 Semi-Annual Monitoring Rpts by Ambient Grp. (in eDocs). Aug.'07 rpt presents results of GW sampling done 8/16/07, showing low to moderate levels of VOCs in some wells (including MTBE up to 195 ug/L), and moderate levels of some SVOCs in influent to oil-water separator. Well gauging shows measurable product in only 1 well, B5, at 0.01 to 0.02 ft. Report recommends continuing operation of perimeter wall drain tap & oil-water separator system in basement of 513 W. 56th St. bldg until influent concentrations of target compounds allow direct discharge to sewer, and continuing semi-annual product level gauging and GW sampling of basement and perimeter wells. Feb. '08 rpt presents GW sample results for 2/8/08, showing some increases in dissolved contam levels in number of wells; product detected in 2 wells - B5 at 0.02 ft. and B9 at 0.1 ft. Sample of influent to oil-water separator showed almost no contaminants detected, with 11.35 ug/L total VOCs, and 4.84 mg/L TPH. Report recommends continuing semi-annual product gauging and GW sampling, and notes that continued operation of perimeter wall drain tap & oil-water separator system may not be necessary and may be able to be shutdown or replaced with an alternative device more appropriate for existing conditions. On April 28, 2008, Sean Wallace of Ambient Grp sent me an email asking for response to Feb. '08 report; I replied that report didn't actually make a proposal requiring approval/disapproval. Therefore, Ambient prepared and

submitted report called: "Request for Cessation of Groundwater Treatment Portion of Remediation Activity at...[site address]," dated 5/7/08 (in eDocs). I reviewed report, noted that although influent to oil-water sep had no significant VOCs for last two samples, in Feb. and March '08, SVOCs were not analyzed in Mar.'08 sample and had only one event with no detections (in Feb.'08; SVOCs were also not analyzed in Nov. '07 sample, and Aug. '07 sample had SVOC exceedances). I sent email to Sean Wallace: "I've been reviewing Request for Cessation of GW Treatment...etc., dated 5/7/08 and I noticed in table presenting results of samples of untreated GW entering oil-water separator, that samples were not analyzed for SVOCs during Nov. '07 and Mar. '08 sampling events. Sample collected in Feb. '08 was analyzed for SVOCs, results were below detection limits. I request that another sample of system influent be collected & analyzed for VOCs and SVOCs, to provide another data point and confirm absence of contamination in GW collected by perimeter wall drain tap system, before issuing approval to discontinue operation of that system. Please let me know if this request can be accomodated." Sean sent reply saying they will collect sample next week. - J. Kolleeny

06/30/08: Received pdf of Request for Cessation of Groundwater Treatment Portion of Remediation Activity report, revised June 25, 2008, from Sean Wallace of Ambient Group (212-944-4615) via email on 6/25/08 (in eDocs), got hard copy on 6/27/08. Report is same as May '08 report except now has data for influent sample to oil-water separator for 6/4/08 showing all VOCs and SVOCs below detection limits, with mentions of new data in text. I sent letter (in eDocs) approving request to discontinue operation of perimeter wall drain tap and oil-water separator system by email and regular mail to Thomas Guzzi (tjguzzi@cbs.com) of CBS (replaced Alan Krupski), with email cc to Sean Wallace. - J. Kolleeny

11/10/08: Received hard copy of Sept. 2008 Semi-Annual Mon Rpt by Ambient Group, dated Oct. 23, 2008 (in eDocs). Rpt notes that Sept. '08 sampling event show some increases in dissolved-phase contam in basement wells, and states that compounds detected and their ratios are more indicative of gasoline than diesel/heating oil; however, I note that highest compound in each sample was naphthalene. Four basement wells had measurable free product, up to 0.18 ft. Rpt recommends continuing with semi-annual product gauging and GW sampling. - J. Kolleeny

10/28/09: Completed review of April 2009 Semi-Annual Mon Rpt by Ambient Group, dated June 24, 2009, hard copy received on July 13, 2009 (in eDocs). Rpt recommends cutting back semi-annual GW and product monitoring schedule to annual, but I noticed that 0.6 ft. of product was detected an outdoor well (C2, aka MW5). I called Sean Wallace of Ambient on 10/27/09, said I'd like GW monitoring to continue semi-annually, and that I wanted free product removed by vac truck and wells gauged more often for product. Also asked that future rpts have historic GW and product thickness data (instead of only for most recent event as this rpt had). Sean agreed, and also sent table with historic and most recent product data (in eDocs). On 10/28/09 I sent email (in eDocs) to Thomas Guzzi of CBS, cc's to Bill Grieco of CBS and Sean Wallace of Ambient: "I have completed review of April '09 Semi-Annual Mon Rpt by Ambient Group dated June 24,'09, received by DEC on July 13, '09. Rpt recommends change in frequency of GW sampling at site from semi-annual (i.e., twice yearly) schedule to annual schedule. This recommendation cannot be approved at this time. Data in rpt indicate that one of outdoor monitoring wells, C2 (aka MW5), had 0.6 feet of free product when last gauged in April '09. Removal of free product at spill sites is considered high priority by DEC. We require that product be removed from this well, preferably by vac extraction to exert influence on area around well and encourage addt'l product to come into well, and that rate of product recharge into well after recovery event be monitored to determine appropriate schedule for ongoing gauging of well for product and for future product recovery events. Meanwhile, sampling of GW from indoor and outdoor wells for presence of dissolved-phase GW contam should continue on semi-annual basis; since last sampling event was on May 1, '09, next semi-annual sampling event should be performed first week of Nov. '09. Results of product recovery event and product recharge monitoring, as well as upcoming GW sampling round, should be presented in next semi-annual monitoring rpt, with appropriate recommendations for further action. Rpt should include tabulated historical GW and product thickness data, in addition to recently collected data. Please feel free to contact me if you have any questions." - J. Kolleeny

11/09/09: Received email from Sean Wallace of Ambient: "To keep you up to date. We've scheduled remediation contractor for this week and should be able to have rpt ready prior to holiday. I also went to site (11/6/09) to check on conditions of well that had free product, C2, which was purged during April 2009 event. There was no free product detected, but there was noticeable odor in this well and one adjacent to it, B23. These two are deepest wells and are right next to foundation wall of building to west. But I just wanted to let you know that there is no free product accumulation in well since last measured April 30, 2009. Inside well B17 that had 0.05 ft reading on free product before being pumped in April also has no free product at this date. Our full rpt, as I say, should be available before holiday." - JK

12/08/09: Reviewed Nov. 2009 Semi-Ann Mon Rpt by Ambient Grp, dated 12/2/09 (in eDocs). Rpt presents results of Nov. '09 GW sampling & well gauging. Two basement wells had relatively small amts of free product (B9 had 0.03 ft; B10 had 0.12 ft). Perimeter wells had no product or VOC exceedances. Courtyard & basement wells had moderate levels of total VOCs, mostly consistent with previous results; worst basement wells were B8 with 208 ug/L total VOCs, B10 with 202 ug/L TVOCs, and B21 with 201 ug/L TVOCs; worst courtyard well was C2 with 874 ug/L TVOCs (well had free product in April '09); other courtyard wells had much lower TVOCs, in 30-40 ug/L range. Ambient Grp recommended continuing semi-annual monitoring of all wells, with product recovery when detected; short-term (3-month) study of weekly vac truck pumping or other means of applying vacuum to basement wells to see if product recovery can be enhanced in this way; and development of enhanced bioremediation stragegy, possibly with targeted use of existing SVE (dual-phase?) system for hydraulic control. If this last strategy is adopted, short-term vac truck study will not be done. This will be discussed at upcoming meeting. - JK

12/11/09: Attended meeting at CBS, with Sean Wallace of Ambient Grp, Chris Tomasello of Reliant Consulting Svcs., Inc., Thomas Guzzi and William Grieco of CBS. Chris Tomasello presented plan for addressing remaining contam, involving application of combo of bioremedial solutions and surfactant. I mentioned that bio may not be effective if there is remaining free product in subsurface; Chris said they would try to recover as much product as possible by vac truck before beginning. I asked how they would establish hydraulic control (necessary when surfactant is applied to ensure contam doesn't migrate); Chris suggested us of vac truck on down-gradient wells. I said I would have to check with other DEC to see if that's acceptable. Chris mentioned that he has used this approach successfully at other sites. I asked if they had info on screened interval of existing wells, and said it would be good in general if they had clear 3-D picture of subsurface beneath bldg, including shape of bedrock and thickness of aquifer, before implementing plan; Chris agreed that they needed to do some addt'l site characterization work. Sean said they already had some info re: depth to bedrock and aquifer thickness, and would sent it ASAP. Received email with subsurface profiles and aquifer info from Sean later in day (in eDocs). Meeting concluded that they would examine wells and put together plan for addt'l site characterization and submit. - J. Kolleeny

04/07/10: Sent email inquiry to Sean Wallace of Ambient Grp: "Can you give me update on site? When we met in Dec. '09, we agreed that Chris Tomasello would put together a work plan for addt'l investig to delineate soil contam and determine subsurface bedrock configuration, so that he can design remedial plan. Any progress on that? Also, I was wondering if recent heavy rains have caused any unusual appearance (or disappearance) of free product from wells? Have wells been gauged for product recently? (How often are they checked?) If wells haven't been gauged for product since big rains of March, I'd like to request that they be checked." I got email reply from Sean: "Last week Chris and I went out with borescope and confirmed well construction type. Basement wells are slotted down to bottom. So both above and below water line. Two of courtyard wells are not slotted at all. These were historically part of first 5 monitoring wells established. All other wells that are labeled B are of slotted construction type. Chris is putting together statement of our findings. We took readings today also and found very little change since last monitoring event. Only one well had measureable free product at 0.05" and it was well that has almost always had small amount. Two of wells that are usually dry did have some water, but in general, and I'll have to put chart together, I didn't notice that water level was significantly different. Today we had vacuum truck suck out all wells and tomorrow we'll gauge recharge and then

take water samples. After this we'll be in position to write rpt with recommendations either for further vacuum truck events or possibly a soil washing/bioremediation event." He then sent follow-up email: "I just compared water levels and there is an extra 0.5' to 1' of water in most wells. More soon!" - JK

06/07/10: On 5/19/10, received email from Sean Wallace of Ambient Grp with pdf of April 2010 Semi-Annual Monitoring Rpt (in eDocs). On 6/4/10, received hard copy of rpt, plus pdf of lab data (in eDocs). On 6/7/10, sent email to Sean noting that rpt did not include product thickness data. Got email response from Sean with attached recent and historic product thickness data (in eDocs); email stated: "Here are water levels from May 26th visit on Page 1. Two wells with measureable free product in usual spot (B9 & B10) and B8 is showing some slight product, which it hasn't for awhile. But in Aug 2006 B8 had 1.7 ft (see Page 3 for historical summary of oil layer thickness detected in each well). Page 2 is a map of basement to show locations and also to correlate with graph on Page 4 where I attempt to represent graphically relation of water level to bedrock depth, as measured in each well. Note that lines of well are marked on diagram as A, B, C, D, and E. These are East West gradient. I took liberty of trying to show North-South gradient for Courtyard section and a slice through middle of basement that covers area where free product persists." Will review rpt. - JK

07/09/10: Finished review of April 2010 Semi-Ann Rpt by Ambient (in eDocs). Sent email (in eDocs) to Thomas Guzzi of CBS, cc's to William Grieco of CBS and Sean Wallace of Ambient, approving rpt recommendations: "I have reviewed April 2010 Semi-Annual Monitoring Rpt for this spill site, by Ambient Group, Inc. Report recommends:

1. Continuing bi-annual (i.e., twice yearly) monitoring of all wells, with vacuum truck removal of any measurable free product;
2. Performing short-term (3-month) study of free product development using vacuum truck pumping of basement and courtyard wells to influence areas around the wells and evaluate if free product recovery rates can be enhanced in this way.
3. Presenting to CBS an enhanced remediation strategy to help move spill case toward closure, involving use of bioremediation in conjuction with soil washing to move residual oil from unsaturated zone soil to water table where it can be recovered by pumping.

These recommendations are approved. Ambient Group should proceed to implement recommendations. Feel free to contact me if you have any questions." - J. Kolleeny

12/20/10: Received email from Sean Wallace of Ambient Group, with attached pdf file: "Please find attached rpt [in eDocs] for 2nd monitoring event of 2010. Please let me know if you require anything else at this time. I am preparing rpt on effects of vacuum truck pumping (3 events, to be completed by end of year) under separate cover." - J. Kolleeny

12/29/10: Reviewed Nov. 2010 Semi-Annual Mon Rpt by Ambient Group, dated 12/20/10 (in eDocs). Rpt summarizes Nov. 2010 GW sampling event, showing low to moderately low levels of dissolved VOCs in basement wells, very low VOCs in courtyard wells. Basement well B5 had "small but visible layer of oil in sample bailer." Rpt states that Ambient will continue bi-annual monitoring of wells, with removal of free product by vac truck when detected, and that Ambient will present an enhanced remediation strategy to help move spill toward closure; bioremediation will be discussed in conjunction with soil washing to mobilize potential residual product from vadose zone to water table where it can be recovered by pumping. - JK

03/11/11: On 3/10/11, received email from Sean Wallace of Ambient Group with attached pdf file of Jan. 2011 Spill Monitoring Addt'l Rpt: Brief Rpt on Effects of Vacuum Truck Pumping for Enhancing Free Product Recovery (in eDocs). Email stated: "Please find attached our rpt on effects of vacuum truck pumping on enhancement of free product recovery at this site. Our next scheduled Monitoring event is in May. We plan on taking some water level measurements next month (April)." On 3/11/11, I sent email: Thanks for pdf file of rpt. I note that you are now recommending annual GW sampling and periodic product recovery as needed.

What happened to idea of bioremediation plus soil washing to de-sorb residual oil from soil, as mentioned in Nov. 2010 Semi-Annual Rpt? Is that no longer being pursued as remedial approach? Please let me know about, and then I will respond to this rpt's recommendations." Sean Wallace sent reply: "Soil washing has been recommended, as you note. However, our client has many levels of decision makers and, as consultant, we are not made privy to mechanism they are using internally to consider further remediation. Our November recommendation was put forth as way to bring closure within a year and I will make that case to them again as we approach next scheduled monitoring event. In absence of remedial action, we feel it would be still be acceptable to monitor dissolved concentrations on less frequent basis, as long as more frequent checks for free product were in place, as a precaution. If your dept recommends that we follow up on our Nov 2010 rpt suggestion of soil washing, based on lack of progress with vacuum truck method, then we would of course assist our client in moving forward with that remediation step. Main concern expressed is that there is no 100% guarantee of success and I believe this lack of certainty is cause for hesitation. One train of thought is if levels of dissolved hydrocarbons measured in wells remain consistent, client may wish to pursue a more passive approach. However, if DEC suggests more active remediation, that would carry weight." Rpt presents data on product thickness before & after vacuuming thru Dec. 2010; data show traces of product (up to 0.03 ft. in Dec. 2010, up to 0.07 ft in May 2010) in couple of wells. Rpt recommended reducing dissolved-phase GW sampling from semi-annual to annual, gauging wells for product quarterly and doing vacuum recovery as needed. - JK

4/22/11: I sent email to Sean Wallace of Ambient Group: "Sorry it's taken a while to get back to you about this site. Recommendation in your last rpt to change GW sampling schedule from semi-annual to annual is not approved. DEC's mission is to move spill cases toward closure in an expeditious manner. Semi-annual sampling is not onerous, in my opinion, and will do better job of establishing trends in contaminant levels than will annual sampling. Product recovery may be performed periodically on an as-needed basis, as recommended. However, I would still prefer that Responsible Party follow up on earlier suggestions about developing an enhanced remediation strategy to move this case more quickly toward closure." Received email reply from Sean Wallace: "Thank you. We will inform our client of decision and of preference to follow previous path, i.e., soil washing leading toward expeditious closure." - J. Kolleeny

06/09/11: On 6/7/11, received email from Sean Wallace of Ambient Group, with attached pdf file of May 2011 Semi-Annual Mon Rpt (in eDocs); email stated: "Here is rpt for first bi-annual monitoring event for 2011. We are preparing recommendation for an enhanced remediation strategy to present once more to our client, CBS." Will review mon rpt. - J. Kolleeny

12/2/2003 Transferred from Sangesland to Rommel

2/25/2004-Vought-Spill transferred from Rommel to Vought.

File review by Vought:

Supplemental Remedial Action Report (ATC Associates, David Winslow 212-353-8280). Clinton Association for a Renewed Environment authorized ATC to remove four (1000-gallon) gasoline USTs, six (550-gallon) gasoline USTs and one (275-gallon) waste oil UST, oversee the removal of historic fill and the installation of a vapor barrier membrane at 740-744 11th Avenue and 557-561 West 52nd Street. Contaminated soil found beneath four (1000-gallon) USTs resulting in filing of spill #0305881 which was closed after the removal of approximately 34 tons of contaminated soil. Additional contaminated soil was found and this spill number was opened and approximately 74 tons of contaminated soil was excavated and removed after excavation to bedrock. "A Singel Barrier Containment System was installed beneath the floor slab of the building..." "In addition ATC supervised the installation of a soil cap on Januar 5, 2004. The containment system consisted of a vegetative and protective layer, 18" of soil including 6" of top soil, a geotextile filter fabric, protective layer, 6" of compacted soil subgrade". Approximately 3777.5 tons of historic fill were also removed from the site. "The upper one foot of the weathered schist was removed to expose comptent bedrock". No groundwater was encountered abover bedrock at this site. No bottom samples were collected due to the presence of bedrock. Report request No Futher Action. Soil analyticals show no TAGM 4046 Soil Cleanup Objective exceedences. Spill closed by Vought due to lack of exceedances, extraordinary amount of soil excavation (3777.5 tons) and competency of bedrock.

---

DEC Investigator Remarks:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "HARRINGTON"
Reassigned from DEC Sigona on August 4, 2003, as per Letter from

P. David Smith, Bureau Director, Remedial Bureau B.

This spill has been consolidated under spill No. 8904939

DEC Sigona performed field inspections on 10/22/2002 and 10/23/2002 and observed 4,000 gallon steel tank removal activities. There were low levels of petroleum contamination on the tank top and overburden. When the tank was removed at approximately 11:30 A.M. on 10/23/2002 there was petroleum contamination and free product sheen on the water table visible in the tank excvataion. The concrete pad was removed underneath the tank.

The DEC Sigona requested that the excavation be backfilled with pea gravel to enhance the vapor recovery effort. The tank was located immediately adjacent to the foundation wall for the Bull McCabe Restaurant located downgradient of the site. GSC indicated that monitoring wells and pea gravel will be installed at the former 4K tank location. AJS 10/24/2002.

caller removing old tank and found contamination.

DEC Investigator Remarks:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SANGESLAND"
On June 13, 2001, DEC Sigona received a tank closure report from AKRF, dated June 13, 2001.

Spill was reassigned to Steve Sangesland on Feb 7, 2002 as per request.

3/25/2002 - Sangesland reviewed the AKRF Closure Report dated June 2001. The report outlines the removal of a 550 tank and the excavation of contaminated soil down to a depth of 18 feet (ground water level). Four sidewall samples were taken. All were clean for VOC's, Three were clean for SVOC's. One side wall sample had SVOC levels over STARS, AKRF suggested that these levels were within "typical background fill" levels.

The report was missing a scaled site plan showing the location of the former tank and the subject excavation. The report also did not identify if any groundwater sampling had been conducted.

3/28/2002 - Sangesland spoke with Arnold Fleming of AKRF (212- 696-0670) and requested a resubmittal with both a site plan and ground water VOC/SVOC test results.

4/10/2002 - Julie Foley of AKRF called to say more contaminated soil was found around two additional tanks on this site. A new spill number was called in (0110824) and assigned to Tim DeMeo.

The site is a huge excavation site now and the new building going up on this site will be "500 West 56th St".

**********Actions Taken**********

1) Sangesland changes the listed address for this spill to 500 West 56th Street.

2) Sangesland closed out the new spill number (0110824) and referenced that spill number back to this spill number.

3) Sangesland directed AKRF to write a single closure report for the property referencing the new address (500 W 56th)and including both tank/spill locations.

4) AKRF requested the DEC to return the copy of the June 2001 AKRF report sent in previously.

********** Notes rolled over from Spill #0110824 ********

2/14/02 Plaza Construction and its subcontractors struck 2 abandoned UST's while excavating for a new building foundation at construction site. Tanks removed from site prior to DEC inspectin. Approximately 20 cu. yds. of contaminated soil was stockpiled on site for disposal.

DEC Spills requested from AKRF Inc. (environmental consultant) copies of analytical data from stockpiled soils, disposal manifests and scaled site drawing depicting former tank locations.

Ray Ranami - Plaza Construction 917-577-4656

****

7/2/2002 - Sangesland reviewed a "Closure Report" dated June 28, 2002 and submitted by AKRF (Sarah Lopas 646-459-3525). The report basically brings together the data for 3 seperate tank pulls from the property over a 1 year period. Two of the three locations had "End Point Soil Samples" which exceeded TAGM SVOC levels. AKRF states that this is common for background levels, but there is no "back up data" to prove the point.

Sangesland spoke with Sarah Lopas at AKRF about the issue and she'll check it out and get back to the DEC soon.

7/15/2002 - Sangesland spoke with Andy Rudko of AKRF concerning the high SVOC levels at two of the tank pull areas. Andy said the SVOC levels were from historical fill, he also said that at this point the site has been over excavated to clear for the new building. Instead of putting together an exposure report based on historical fill all around the area, Sangesland requested a

letter and photographs to document the fact that the area had been excavated further and that AKRF believes the contaminated soil is gone.

2/14/2003 - Sangesland reviewed an AKRF submittal dated January 16, 2003 which contains photographs of the site. These photos clearly show the over excavation of the site down to a "sub-basement" depth. Design drawings were also submitted which showed a deep basement area was to be dug out. Clearly the contaminated soil areas are gone from this site.

UNDERGROUND STORAGE TANK FAILED OVER TIME AND CAUSED SOIL CONTAMINATION - SOIL WILL BE STOCKPILED

DEC Investigator Remarks:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SANGESLAND"
On August 15, 2001, DEC Sigona received spill closure report from AKRF dated August 14, 2001. See file for details and copy of

report.

12/01 Spill re-assigned to Sangesland

AKRF submitted a letter dated Dec 27, 2001 which included a second copy of the Aug 14, 2001 report and a series of photographs showing the complete excavation of the city block down to bedrock.

There was a problem with the PBS registration on the site. Sangesland asked AKRF to re-submit the PBS forms with the correct address (old PBS had the wrong city block) along with info on ALL of the tanks found and removed from the site.

From a technical/environmental point of view the site is clean and will be closed out as soon as all of the administrative paperwork has been submitted and reviewed.

2/4/2002 AKRF has submitted copies of all updated PBS registration forms (PBS # 2-604810). All tanks have been removed from the site. The whole site has been excavated down to bedrock. All petroleum related contamination on this site has been removed.

Spill Closed.

WILL BE REMOVING TANK AND SOIL:

DEC Investigator Remarks:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "KRIMGOLD"
Contaminated soil letter sent to:

Raber Enterprises LLC

Attn: Marc Levine

175 Canal St.

New York,NY 10013

Mr. Levine says a phase II investigation was done as part of a property sale. The new owner has hired Langan Engineering to remove the tank and any contaminated soil.

Contact at Lang an Engineering is: Tarek Khouri 212-479-5400

5/6/2004 Sangesland spoke to Mr. Khouri from Langen Engineering. He confirmed that the area will be excavated and the tank removed. They will take photographs of the hole and will take endpoint samples to be tested for VOC's & Sock's. A final report will be prepared and forwarded to Jake Krimgold.

5/11/04. J.Krimgold @ site. Contractor unable to remove the tank due to a structural constraints. Will excavate contaminated soil around tank and close tank in-place. Agreed that at least three post-excavation samples will be taken.

J.Krimgold observed excavation and found two more UST partially filled with gasoline and water. Preliminary observation suggests that the size of tanks 1080 and 550 gal. The current owner has no knowledge of these tanks. Also no records was found in PBS DB. J.Krimgold requested immediately register all tanks at this site with PBS unit before continuation of tank closure.

11/17/04. J.Krimgold has reviewed the report dated June 28, 2004 submitted to the Department by Langan Engineering regarding the above mentioned site. Based on the information provided, the petroleum release which was on this site has been satisfactorily cleaned up and all USTs has been closed in place or removed. PBS application was filed. Therefore, no further investigation or response will be required concerning the petroleum contamination at these specific sites at this time. NFA letter.

WHILE EXCAVATING TANK FOUND SOIL CONTAMINATION: TOOK SAMPLPES:

DEC Investigator Remarks:

Sangesland spoke to rep from Gannet Flemming - no need to send a CSL - They know the process and will submit a report as soon as the work is complete

9/9/05-Vought-Spoke to Joel Rogers (Gannett Flemming 516-671-8440) and contaminated soil was removed and endpoint samples were collected. One fuel oil UST and one gasoline UST onsite. Groundwater was present in the bottom of the excavation. Samples were also collected from piping runs and remote fills. One groundwater sample was collected. Active construction going on. Endpoint samples did show TAGM exceedences. Site is DEP E site and vapor barrier will be installed. Groundwater at 12' below grade. Groundwater samples were below TOGS and therefore no passive ventilation system. Site will be excavated down to bedrock over most of site. Minor PAH exceedences attributable to fill material. One soil sample had 63000ppb napthalene. Additional soil excavation required at area of excavation. After excavation for foundation is complete sidewall samples and bottom groundwater samples will be collected. Dewatering will occur for building construction. Groundwater samples show minor PAH and MTBE exceedence. See also spills 0506800, 0507015. Two additional 550-gallon USTs discovered. DEC requires: soil endpoint samples and groundwater samples upon reaching limits of excavation for foundation.

10/18/05-Vought-Site visit by Vought on 10/14/05. Onsite was Jessica Ferngrem(Gannett Fleming) and Jerome Kung (Verizon 646-483-6554). Also on site were owners of 607 West 47th Street (Felix Guralnik) See also spill #. Free product coming from under 607 West 47th Street and flowing into groundwater in excavcation of adjacent Verizon site. Site visit to 607 West 47th street showed waste oil tanks in very poor condition and numerous puddles of waste oil on garage floor. DEC required Verizon: 1)collection of one endpoint soil sample from sidwall under 607 West 47th st 2)submission of analyticals of free product sample 3)regular interrmittent sampling of dewatering effluent as remedial method 4)submission of PBS registration. NYCDEP discharge permit obtained by Verizon. Vought called Joel Rogers and left message that he will be faxed a copy of the letter. Vought also faxed copy to Ferngrem and emailed to Kung.

11/28/05-Vought-Received message from Rogers that hydraulic line ruptured. Vought returned call and line broke from construction equipment. Spill on perched water on bedrock and will be cleaned using adsorbent pads and boom. No further action on this minor spill required.

05/05/06-Vought-See also closed spill #0507015 at same location.

05/17/06-Vought-Spill transferred from DEC Vought to DEC Ketani as per DEC Austin.

6/22/06 - Raphael Ketani. I spoke to Ms. Jessica Ferngren ((516) 669-1504)of Gannett Fleming. She said they are almost ready to send DEC the closure report. She said that the wall of the neighboring building was waterproofed. [This spill is downgradient from a garage (605 W. 47 St.) with 2 waste oil tanks and sloppy housekeeping.]

7/10/06 - Raphael Ketani. I spoke to Ms. Ferngren. She said the closure report will probably be sent in August. Right now it is being reviewed by the client.

8/17/06 - Raphael Ketani. I tried to reach Ms. Ferngren, but could only leave a voice mail.

9/6/06 - Raphael Ketani. Ms. Ferngren left me a message requesting my mailing address. I sent her a message back with the correct address.

9/15/06 - Raphael Ketani. The following tanks were removed from the site: 3000 gal., 5000 gal., five 550 gal., and a 275 gal. However, there are no PBS records or registrations for the site.

I finished reviewing the September 2006 Underground Storage Tank and Spill Closure Report. There were moderate to extremely high concentrations of SVOCs at some of the boring locations. Most of these locations are associated with tanks that have been removed or their piping,though a few are not.

9/18/06 - Raphael Ketani. I spoke to Ms. Ferngren about the need to register the tanks and about the very high SVOC concentrations at some of the former tank locations. She said that the soils at the tank locations looked clean, but staff in her office couldn't figure out why the results were so high. She just figures there was urban fill mixed in. I told her that these high sites were at the former locations of the tanks. She said that the soil looked clean and that all of the soil was removed anyway and delivered to a facility that takes very contaminated soil. She said she will send in a PBS registration form.

9/20/06 - Raphael Ketani. Nick Lombardo of the PBS Unit came over to me to discuss the PBS registration for the site. He said that Ms. Ferngren had told him that the site is registered. He showed me a PBS registration for the neighboring property, 610-630 W. 48 Street. He said that Ms. Ferngren told him this was the same property as the new owners had combined both 617-623 and 610-630, and planned to build on both. The registration for 610-630 is #2-344818 and shows all of the tanks listed in the September 2006 Underground Storage Tank and Spill Closure Report as closed and removed, and even lists other tanks not indicated in the report for 617-623.

I spoke to Ms. Ferngren and told her DEC would prefer that the form list 617-623 as this is where the majority of the tanks came from. She asked whether both addresses can be listed on the registration form. I spoke to Mr. Lombardo and he said that she should get Verizon to submit a letter to DEC requesting that both addresses be listed. I relayed the message to Ms. Ferngren. She agreed to do this.

Based upon the Underground Storage Tank and Spill Closure Report and the PBS registration #2-344818, I am closing the spill case.

DRUM FELL OFF LIFT CABLE CAUSING SPILL - CLEAN UP IN PROGRESS

CON ED 132484

DEC Investigator Remarks:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "O'CONNELL"
While maintenance crew were lowering four 55 gallon lube oil drums with lift crane, the drums broke away from the pallet and crashed to the floor. Multiple drum leakage resulted in 15 gallon spill to floor. No lube oil entered trenches and no worker was injured. The four lube oil drums were received shrink wrapped on a pallet. During the transfer from the 34' level to the basement the drums broke free of the shrink-wrap and landed on the basement floor. 15 gallons of lube oil leaked from multiple drum leaks. The oil was contained and the damaged drums placed in over pack drums. To prevent a reoccurrence of this type of spill, oil drums will be individually moved with the uses of a barrel lifter.

ENVIRONMENTAL SITE STUDY DONE - GROUND CONTAMINATION FOUND RESULTING FROM TANK LEAKING. PROPERTY IS ABANDONED GAS STATION. 10TH AVE CORP. OWNER ISAAC GATWEN, 18 WOODHAVEN, NEW YORK CITY

DEC Investigator Remarks:

4/12/04-Vought-Spill transferred from Tibbe to Rommel as per Rommel.

12/7/04 Reassigned from Rommel to Foley. Issued certified letter (Robert Gans, Swing Time LLC Corp., 1270 Saw Mill River Rd, Yonkers NY 10710) requiring site assessment for ten gas USTs removed 7/99. Report to be submitted by 3/7/05.

12/21/04 Certified letter returned as attempted, unknown.
12/22/04 Resent certified letter to Robert Gans (617 11th Avenue, NY NY 10036).

12/27/04 Spoke to Perry Burkett(same address as R. Gans-617 11th Ave, NY NY 10036 (212-582-1951, 212-246-0856(fax)), general counsel for Robert Gans, Swingtime LLC. Will send correspondence and reports that were previously submitted to Steven Saccaccio. Stated that Saccaccio had approved remediation and subsequent construction of building currently on property.

1/4/05 Received reports from P. Burkett.
1) Letter workplan dated 5/22/00.
2) Letter and fax from B. Pachmohr dated 6/5/00 including field notes and proposal for an additional monitoring well.
3) Fax from S. Saccacio to former tenant, Dr. Oscar Sandoval and his atty M. Perle, indicating the planned building will not interfere with the remaining spill investigation and potential remedial obligations.
4) Soil Removal Summary Report from American Environmental Assessment Corp. dated 7/5/00.

10 gasoline USTs had been located in the SE corner of the property. They were removed prior to the construction work and the site assessment that was performed at the time did not reveal any contamination around the tank field. American Environmental Assessment Corp.(AEAC) was contracted to further investigate. On 5/24/00, AEAC installed three test pits. Soil around the former tank field had been impacted by gasoline. Between 5/31 and 6/14/00, 860 tons of contaminated soil were removed. GW was encountered at 13'bgs. Two samples at 10'bgs showed elevated concentrations of VOCs (total BTEX at 4133ppb(E-5), and 2525ppb(E-4)). Rock was encountered at a depth of approx 6'bgs which dropped off towards the SE corner to 10-12'bgs.

1/6/05 Received copy of tank removal affadavit from Petroleum Technology stating ten 550gal gas tanks were removed on 7/20/99.

1/10/05 Issued letter requiring installation of three monitoring wells. Two along 11th Ave (adjacent to soil sample locations E-4 and E-5) and one along 45th St (btwn S-2 and S-3). Report due 4/15/05.

See spill #s 0001837, 0001719.

3/24/05 Met with M. Roux, Roux Associates. If bedrock is encountered, they will core through bedrock (only at location closest to E-5, highest soil cont.). Will take soil samples at all locations(highest PID and at gw interface). GW samples will be taken if encountered before bedrock.

4/20/05 Met Roux(Marty) and ADT Drilling on-site. Refusal at 9'bgs in first boring on northside of W45th St. Second boring(northernmost) on 11th Ave had some hits on the PID up to 700ppm. Sample from 15-17'bgs was wet. ADT installed monitoring well. Third boring to be drilled later.

4/28/05 Spoke to M. Roux. Report expected to be submitted by 5/20/05.
6/15/05 Reveived Ltd. Subsurface Investigation Report dated 6/14/05. Attempted to install three wells. Two were successful(MW-2 and MW-3). Soil had some detections of BTEX below TAGM RSCOs. Groundwater showed lower levels of BTEX in MW-2(68ppb benzene, 4ppb toluene, 300ppb ethylbenzene, 232ppb xylenes). GW in MW-3 showed one hit for MTBE at 10ppb, with no other VOCs detected.

6/16/05 Letter sent to R. Gans requesting confirmatory GW sample be collected at end of July 2005.

8/19/05 Letter from Roux Assoc. with results of gw analysis from 7/27/05. Concentrations of BTEX above GWQS in MW-2 (30ppb

benzene, 240ppb ethylbenzene, 182ppb xylenes). Concentrations in MW-3 were below GWQS. This appears to be due to residual soil contamination as indicated by boring logs. Potential for exposure from soil vapor is not expected, however, according to the report, a vapor barrier had been installed beneath the building.

Caller Remarks:

1500 GALLON TANK WAS BEING PULLED AND THE FILL PIPE WAS LOOSE AND IT DUMPED INTO THE HOLE; CLEANING UP AT THIS TIME

DEC Investigator Remarks:

Sangesland spoke with Eric Kutter requesting additional information on this spill.
Spill #0604434 was associated with removing 1500 gal oil storage tank - when they were pulling it out, they thought it was empty. After taking it out, tank rolled and about 1 gal of oil poured out. All was cleaned. The site will be soil tested (because it is a tank pull) and the area will be over excavated as part of the future construction.

Because this spill was so small and the site will be over excavated for the new construction, this spill case is being closed out. If additional contamination is found in the endpoint samples taken after the tank pull, a new spill number will need to be called in.

Note: Spill #0604424 is on the same property, but is located about 50 ft away and is associated with 8 - 550 gal buried gasoline tanks.

01/16/08- Shaminder - This spill is being handled under Track 4 area of BCP site C231059.

DEC Investigator Remarks:

need to send a TTF letter

11/7/05 - Raphael Ketani. I am sending a TTF letter today regarding the site. I will send one copy to Angela Donnolo, ATC Management, 1501 Broadway, NY, 10036, and one to 605 West 48 Street, LLC.

Nov. 7, 2005

A "Tank Test Failure Letter" was sent to:

Joseph Dounolo
Advanced Cout. Corporation
605 West 48th St.
New york, NY 10036

12/1/05 - Raphael Ketani. Letter received from Thomas Leddy, President of Pro Test ((718) 815-6292. Piping is disconnected from the two tanks. Tanks are partially excavated. Studying feasibility of removing the tanks or bioremediation of soil around and under tanks.

12/21/05 - Raphael Ketani. I spoke to Mr. Leddy and he said that one tank was pumped out, but the other is still leaking into the sub-basement. Nothing has happened at the site, as far as he knows, and he doesn't know if another contractor was hired to cleanup the site.

1/4/06 - Raphael Ketani. I spoke to Mr. Joe Bernotas of ATC Management ((917) 337-1702). He is not the owner, but works for the owner. He said that the tanks are out of the ground and empty, but he is waiting for the environmental company to clean out the tanks and get rid of them.

2/8/06 - Raphael Ketani. Jerry Tiss of JLC ((212) 420-8119/ (917) 617-3894) called me to say that they removed the tanks. He said that the problem was a leaking fill line. I told him all of the contaminated soil has to be removed. He asked whether the soil under the sidewalk had to be removed. I told him "yes." He said he couldn't get too close to a neighboring building to get more contaminated soil as the wall is brick. I told him I would need an engineers letter telling me that he can't go any further. He said he would get it. Mr. Tiss said that he will take 2 end-point samples after removing the contaminated soil. I told him to send me the results. He said he would.

2/13/06 - Raphael Ketani. I received a FAX from Mr. Tiss. The letter discusses whether there is a need to remove more soil, but doesn't address safety, structural integrity issues. The letter states that the site has been satisfactorily remediated, pending the results of samples that were sent to the lab.

2/15/06 - Raphael Ketani. I received a revised 2/10/06 letter from Mr. Tiss of JLC. It states that they can't go any further without damage to the foundation and structural elements.

3/2/06 - Raphael Ketani. I tried to call Mr. Tiss, but could only leave a message.

3/15/06 - Raphael Ketani. I spoke to Mr. Tiss today. I asked him what is happening on the site. He said that they filled in the pit and have received the analytical soil results. I asked him to send the results.

3/16/06 - Raphael Ketani. I received the soil analytical results today.

3/17/06 - Raphael Ketani. I reviewed the soil analytical results and found them as either non-detect or a few SVOCs that were just above TAGM. In light of the received documentation and the engineer's letter, I am closing the case.

3/29/06 - Raphael Ketani. Mr. Bernotas of ATC Management called to request an NFA letter. I told him I will send one out for the

site.

DEC Investigator Remarks:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SANGESLAND/DO"

6/7/06- DECP iper took lead from Sue LAsdin due to associated spill at same address.

According to Environ, talks w/ employees revealed that there was a UST on site that has recently been abandoned in place. The Dept has no information on this tank and may be less than 1100 gal. Regardless, soil analytical and/or passing results before abandonment has not been received. Address currently using 2 manifolded 275 AST though used old fill line. This fill line has recently been replaced. If passing tank results cannot be provided, then boring will need to be performed.

9/28/06= DEC Piper reviewed subsurface investigation report. Due to refusal at shallow depths<3 ft., soil samples were not able to be collected. No organic vapors detected in these borings around tank. Borings around fill line revealed soil contamiantion. Further work is warranted.

6/19/07 DEC Piper spoke w. Drew Bonas w. Environ, He has been back and forth w. owner and will let me know outcome of upcoming meeting .

12/12/07- DEC Piper reviewed case. Based on spill info and site consitions, spill to subsurface was minimal and poses no significant threat to health and env. Residual contamination exists. This spill will be consolidated into 0514611. 0209507 will be closed.

DEC Investigator Remarks:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SANGESLAND"
3/21/2002 Sangesland received a message from Curt Schmidt (from ATC) (212-353-8280 ext 326). He said he sent in a report in July 2001 and would like closure on the site. Sangesland asked him to resubmit the report, which he will now do.

Mr. Schmidt said he believes the tank failed a tank test, ATC did some borings around the tank in the courtyard which came back below STARS. The remote fill was replaced and the tank then passed the tank test. No contaminated soil was found.

If the report submitted backs up the summary above, the spill number will be closed out.

4/13/2002 Sangesland received another copy of this report.

Cover letter from Curt Schmidt (ATC) dated 4/3/2002 states that the tank in question (4,000 gal - #2 oil) has been re-lined; The manway has been rebuild and the UST has passed a pressure test on Aug 10, 2001.

UST Tank location is in the courtyard at the rear of the apartment building at 425 West 48th St. In June 2001, ATC advanced 5 borings to a level "just below" the bottom of the tank. 4 on each side of the tank and 1 in the presumed downgradient direction. ATC says "no physical or olfactory evidence of fuel oil was detected..... no groudwater was encountered". Samples were tested for VOC's and SVOC's (Methods 8021 & 8270). Trace levels of VOC's were found, but none exceeded the TAGM 4046 Levels.

Based on the sampling data presented by ATC and the documentation of the tank being rebuilt and retested, the DEC will close this spill number out.

4/13/2002 - Spill Closed.

Caller Remarks:

Caller reporting a tank test failure it was an above ground tank and a pressure test was used no spillage

DEC Investigator Remarks:

Vivek Nattanmai. December 29, 2005

Reviewed the spill report, identified the property owner and sent a letter dated 12/28/05 to the property owner requesting for information.

January 9, 2006

The letter was undelivered because of 'insufficent address'.

The report is closed because this is above ground tank and there are no testing requirements for above ground tanks. In addition to this, no spillage occurred.

SPILLS CLOSED ON JANUARY 9, 2006. VIVEK NATTANMAI.

DEC Investigator Remarks:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "VOUGHT"
10/16/02 SA/OD TTF LETTER SENT.

FILE TRANSFERRED FROM VOUGHT TO OBLIGADO

1/19/06- Obligado - File review. From spill report, apparently a tank test failure for diesel tank, soil affected.

From PBS, number is 2-602720. There are 2 underground storage tanks at the site. The site was inspected on 11/4/04 by DEC Rossan. A NOV letter was subsequently sent. Among violations for USTs was a failure to test tanks and unreconciled inventory records. Check tank tightness records and there is no file for this site. Call number on PBS report, spoke to the President, George Greeve at (201)529-3666 (ext 1306), said they spend $600,000 to fix the problem and to call Rich Vihonski at (201) 225-7557 who can give all neeeded information. Called Nich and left message.

2/1/06 - Obligado - received email from Austin. Apparently this site has already been referred to legal for enforcement by Tipple. The text of email read as follows:

231032 Coach USA Bus Garage (Tipple)
no reference spill #
520 West 46th Street, Manhattan
RI end 01/31/06
status Notes: RP has failed to perform the required investigation & remediaiton. Repeated attempts to obtain required documentation have been unsuccessful. Case has been referred to DEC legal for enforcement.

9/18/06 - Obligado - Close and consolidate with open spill number 0206549.

3/14/2003-Vought-Spill transferred from Rommel to Vought. Odors reported at adjacent residence located at 12 West End Avenue (see spill #0212324). FDNY on-site and issued citation. FDNY left site by time of NYSDEC call-back.

4/24/2003-Vought-Site visit by Steve Muller (516-395-5957) on 3/17/2003. No detectable odors in adjacent residences found with

PID in building directly adjacent to north. Steve spoke with Rommel and Rommel requested soil borings. Steve submitted proposal to Gaseteria and will send it to NYSDEC upon their approval.

1/27/2004-Vought-File review by Vought:

Tank Test Failure Letter from DEC(Zhao)-3/17/03.

Email from Gannett Fleming(Manfred Bohms) to DEC(Rommel) 1/16/04. Gannett Fleming performed Phase II at 2-10 West End Avenue and wishes to submit results to DEC and discuss proposed remedial measures. Contact info for Bohms is (516)671-8440x1308 and fax 516-671-3349.

Phone Conversation between DEC(Vought) and Bohms-1/23/04. Removal of three active USTs and ten more USTs suspected on-site. Gasoline contaminated soil and groundwater discovered. Gaseteria no longer owner of site. New owner is 2-10 West End Avenue Association, LLC. 419 Park Avenue South NYNY Mr. Terry Soskin 212-889-3500. Site will become apartment complex via excavation to bedrock or below groundwater (whichever is encountered first). Dewatering permits will be obtained if necessary.

Phase II Report-Gannett Fleming-Manfred Bohms-1/21/03. Phase II conducted at 2-14 West End Ave. Gaseteria formerly located at 2-10 West End Ave and a former auto repair garage located at 14 West End Ave at the corner of W60th St. Naeva Geophysics conducted radar survey on 12/8/03 and found three (4000-gallon) gasoline USTs, three dispenser islands and "three areas that USTs were suspected to be located south of the northernmost in-service 4000-gallon UST". The three areas are suspected of housing nine USTs and one additional UST was discovered totalling thirteen USTs. The radar survey of 14 west end Ave did not detect the presence of USTs but two 275-gallon ASTs were observed the in the basement. Nine geoprobes were performed at 2-10 West End Ave and one boring was performed at 14 West End Ave. Four groundwater samples were also collected. Soil analyticals show 73ppb benzene(SB3), 2900ppb xylene(SB3), 3000ppb MTBE(SB3), 440ppb MTBE(SB5), 10000ppb xylene(SB5), 820ppb benzene(SB4), 21000ppb benzo(a)anthracene(SB1), 19000ppb benzo(a)pyrene(SB1), 14000ppb napthalene(SB7). Soil analyticals also show minor SVOC TAGM 4046 exceedances attributable to fill material. Groundwater analyticals show 230ppb benzene(SB3GW), 190ppb benzene(SB4GW), 800ppb benzene(SB5GW) and 14ppb benzene(SB6GW), 17ppb napthalene(SB3GW), 52000ppb MTBE(SB3GW), 38000ppb MTBE(SB4GW), 420ppb MTBE(SB5GW), 88ppb napthalene(SB5GW) and 19ppb MTBE(SB6GW).

NYSDEC requires:1)updated PBS registration 2)Stipulation Agreement due to scheduled construction of residential building 3)delineation across West End Avenue, across 59th Street and on southwest corner of 59th Street and West End Ave 4)EPA Method 8260 and 8270 analysis due to napthalene, benzo(a)anthracene and VOCs in groundwater. Vought called Bohms to explain requirements and left message to return call to DEC. Vought sent STIP with above requirements on 1/29/2004.

1/29/2003-Vought-Spoke with Steven Muller (516-395-5957). New owner is Cambridge Company. Money held in escrow for Gaseteria to clean up site. Gannett Fleming will prepare RAP. DEP also involved in site. Gaseteria shutting down dispensers and fencing property today. Gaseteria will perform standard tank pull and remove concrete and prepare Tank Closure Report and review RAP with respect to Gaseteria property. Gaseteria will remediate groundwater within discharge limits. Amtrak tunnel adjacent to property.

2/3/04-Vought-Received call from Barbara Herr(Ten West End Development Corp. 212-453-3785) that incorrect two different spill numbers are on STIP package sent 1/28/04. Vought corrected STIP, refaxed and remailed with 3/5/04 deadline.

2/9/04-Vought-Received email from Bohms. "An Amtrack rail line passes diagonally across West End Avenue from north to south

between W. 58th Street and W. 60th Street". DEC's requested well locations are positioned on top of rail line. "Additionally, Amtrack and IRT yards are located further to the west".

2/18/04-Vought-Received certified letter return as underliverable due to "attempted not known". Vought called Herr and left message to return call to DEC either confirming receipt or with correct address.

2/25/04-Vought-Spoke with Muller and Gannett Fleming will be preparing a RAP which includes STIP requirements. Muller will confirm that wells cannot go across street due to location of the tunnel.

2/27/2004-Vought-Received signed Stipulation Agreement from Cambridge Companies (Perry Soskin) executed on behalf of 10 West End Development Corp, LLC. Stipulation was implemented by DEC Kunkel on 3/11/04. Implemented Stipulation was not sent to 10 West End Development due to expected Stipulation Agreement from Gaseteria regarding 2-10 West End Avenue. Vought wanted to ensure that Gaseteria sign Stipulation due to the majority of contamination originating from Gaseteria property. Vought received Hazardous Waste Mitigation Plan from Gannett Fleming.

3/18/04-Vought-Site meeting with Vought(DEC), Muller(Applied Geosolutions), Porcelli(Gaseteria), Madigan(Gannett Fleming), Bohms(Gannett Fleming) and Soskin(Cambridge). Stipulation Agreement signed by Gaseteria after assurance by DEC that Gaseteria would only be held for contamination eminating from 2-10 West End and not 14 West End. Gaseteria will peform test pits to identify areas of soil contamination and find stockpiling sites. If contaminated soil is found in test pits it will be excavated and endpoint samples will be collected. Construction of the residence scheduled to begin in July/August 2004. Standing water present in railroad tracks containing algae inferring that the water has been there for long time and is groundwater (depth corresponds approximately with expected depth to groundwater). No sheen or odor from water in railroad tracks. DEC will not require off site water samples from far side of tracks AS OF YET due to lack of hydraulic connection to site inferred by water in tracks. Meeting resulted in the following requirements: 1)EPA Method 8260/8270 due to gasoline, fuel oil, waste oil and hydrualic oil. 2)Regular intermittent (initial, during and final) sampling of dewatering water for 8260/8270 for study of groundwater contamination and remediation 3)Due to adjacent railroad tracks no offsite wells are required (dewatering samples will be used for groundwater investigation).

3/25/04-Vought-Review of Hazardous Material Mitigation Plan (Gannett Fleming) dated February 2004. "This Mitigation Plan is required by the New York City Department of Planning and DEP for the redevelopment of the site". Plan included installation of monitoring wells (not feasible after rexamination of railroad tracks). Soil planned to be excavated to groundwater or bedrock (two story underground garage planned for new building). Plan also proposed installation of a foundation vapor barrier, removal of all onsite USTs, removal of contaminated soil, community air monitoring program and dewatering activities. In addition to above requirements, DEC approves workplan except for: 1)installation of monitoring wells 2)Method 8021 (DEC requires 8260).

3/25/04-Vought-Sent letter to Gaseteria and 10 West End Development approving of Mitigation Plan with additional requirements of: 1)EPA Method 8260/8270 on all samples due to gasoline, fuel oil, waste oil and hydrualic oil. 2)Regular intermittent (initial, during and final) sampling of dewatering water for 8260/8270 for study of groundwater contamination and remediation 3)Due to adjacent railroad tracks, no offsite wells are required (dewatering samples will be used for groundwater investigation) DEC requires removal from plan of: 3)installation of monitoring wells 4)Method 8021 (DEC requires 8260). Vought sent letter summarizing above on 3/25/04.

4/5/04-Vought-Reviewed DRAFT mitigation plan incorporating above requirements as requested by Gannet Flemming prior to submission to DEC. Vought sent email to Bohms and Muller with edits.

4/6/04-Vought-Received phone call and email from Bohms discussing edits and Mitigation Plan approved by DEC Vought. Vought sent letter to Bohms approving of plan.

4/13/04-Vought-Received letter sent to Soskin returned to sender as "not deliverable as addressed". Letter was addressed as:

Mr. Perry Soskin
2-10 West End Associates, LLC.
419 Park Avenue South
New York, NY 10016
Fax: 212-889-5131

Vought called Herr and requested call back to DEC with correct mailing address.

5/4/04-Vought-Spoke to Steve Muller and two additional USTs discovered (one 275-gallon) waste oil and one (2000-gallon) heating oil. Muller will update PBS registration. Excavation still continuing until clean soil detected. Site visit scheduled for 4/17/04.

5/13/04-Vought-Vought spoke to Muller and site visit arranged for 5/17/04 to examine limits of excavation and locations of endpoint samples.

5/19/04-Vought-Performed site visit on 5/17/04. Approximately 1700 tons of impacted soil was removed. USTs removed included three (4000-gallon) gasoline USTs, fifteen (550-gallon) gasoline USTs, one (1000-gallon) fuel oil UST, one (550-gallon) waste oil UST, one (2000-gallon) fuel oil UST and one (275-gallon) waste oil UST. Building excavation will continue to sidewalk and to groundwater. Dewatering projected to begin in 9/03. UST closure report expected to be received by 7/1/04.

9/16/04-Vought-Called Bohms for an update. Muller preparing draft UST Closure Report. Dewatering plan not drafted as excavation for foundation has not started. DEC will be notified upon beginning excavation.

10/6/04-Vought-New file review by Vought:

Split Spoon Sample Analysis (Gannett Fleming)-6/14/04. "As you are aware, Gannett Fleming split two post excavation soil samples..." There are some discrepancies between our results, mainly the xylenes concentrations in the northeast sample". Applied Geosolutions sample showed 1660ppb xylene and Gannett Fleming sample showed 10700ppb xylene.

Additional Soil Sampling (Gannett Fleming)-6/14/04. "...we are submitting the analytical data from additional soil sampling performed by Gannett Fleming..." "This soil sampling was conducted to confrim our belief that soils in the eastern portion of the property were cross-contaminated during soil remediation activities". "Please note that these results do not represent post-excavation conditions. Additional excavation is planned at the site".

Groundwater Sample Analysis (Gannett Fleming)-6/18/04. "....Gannett Fleming collected three groundwater samples from test pits excavated by Gaseteria on June 8 and 9, 2004". Groundwater analyticals show 170ppb MTBE(NWTPGW), 360ppb benzene(SWGW), 2500ppb toluene(SWGW), 1200ppb ethylbenzene(SWGW), 5800ppb xylene(SWGW), 7200ppb MTBW(SWGW), 16ppb benzene(WGW), 15ppb toluene(WGW), 44ppb xylene(WGW) and 1100ppb MTBE(WGW).

DEC requires: 1)collection of endpoint soil samples at final terminus of excavation for foundation. Vought sent email to Muller and Bohms with above requirement and requesting status of further excavation for foundation and dewatering.

10/7/04-Vought-Received call from Bohms. Vought returned call and left message to return call.

10/8/04-Vought-Received message from Bohms and returned call and left message.

10/19/04-Vought-Site visit by Vought to witness collection of endpoint soil samples. Onsite were Gannett Fleming(Dennis), Applied Geosolutions(Muller) and Perry Soskin. Soskin requested letter from DEC stating that we were satisfied for cleanup for application for foundation permit. Soil still present in excavation (not excavated to bedrock yet) and fieldstone from former building foundations for sidewalls. Since further excavation is planned, these endpoints will not be considered. During collection of endpoint soil sample from under UST location, free product and heavy gasoline odors noted. Vought called Perry Soskin and left message in order to notify him that DEC would not produce the letter due to oustanding DEC requirements for remediation, non adherence to the CAP and possible H&S impacts to future residents.

11/23/04-Vought-Reviewed Underground Storage Tank Closure Report (Applied Geolsolutions) dated 11/9/04. "The service station was comprised of three petroleum USTs in two tank cavities and three pump islands with seven dispensers". To the north of the site is an office building (to be razed for the new residential apartment tower), to the east is an automotive repair facility, to the south is a multi-level parking garage and to the southwest is an IRT building housing a power plant for the subway system, to the west is a parking lot". Sensitive receptor survey shows closest receptor as school located 500' to the north. Bedrock encountered 5" below grade in northeast corner of the site. Wood, coal ash and slag found in the southern portion of the site. Groundwater present at 15' below grade. Former site assessment by Gannett Fleming showed groundwater concentrations of groundwater concentrations up to 43ppb toluene, 1500ppb ethylbenzene, 9400ppb xylene and 6600ppb 1,2,4-trimethylbenzene. Tank removals included three (4000-gallon) gasoline USTs, one (550-gallon) waste oil UST, ten (550-gallon) gasoline USTs, one (1000-gallon) heating oil UST, one (275-gallon) motor oil UST, and one (2000-gallon) heating oil UST. Report contains many endpoint analyticals from various eexcavation pits that were created (some of which were filled back in) however the Department is only concered with endpoint sampling from the final limits of excavation. Approximately 4042 tons of impacted soil were removed from the site. Community Air Monitoring as per DER-10 was performed during soil excavation and disposal. Report concluded that "based on the UST removal and site remediation activities, Gaseteria has adequately delineated the petroleum contamination in the onsite soils and conducted sufficient excavation to remove the petroleum contaminated soil from the site". No requirements issued as further excavation and dewatering will occur due to foundation construction.

1/6/05-Vought-Spoke to Manfred and DOB will not issue permits until they receive regulatory letter. Manfred will draft a letter and send it to DEC for signature and revision.

1/31/05-Vought-Reviewed manfreds draft letter and all points of letter approved by DEC in 4/7/04 approval letter of Plan. Vought called Manfred back who will call Cambridge to have them contact DEC.

3/4/05-Vought-Received message from Manfred. Vought returned call and spoke to Manfred who is completing test pit report. Six test pits were installed (two on Gaseteria property). Test pits were dug to groundwater. Groundwater at 15' below grade across entire site. Bedrock at 11' on east side. Groundwater samples collected during test pit installation. In 3/04 or 4/04 general excavation will begin and contaminated soil will be segragated and disposed of accordingly. Letter referred to above on 1/6/05 will be cc'd and sent to NYCDEP.

3/18/05-Vought-Received and reviewed Test Pit report (Gannett Fleming) dated 3/8/05 and received on 3/10/05. "As part of pre-construction work, Gotham Greenwich Construction (Gotham) excavated seven test pits at 2-16 West End Ave..." "During excavation petroleum contaminated soil was observed immediately above the groundwater interface and petroleum sheen on the groundwater surface in TP-1 and TP-3. Since TP-1 and TP-3 were not located on the former Gaseteria property and the contamination observed in these pits is not likely to be assoicated with NYSDEC Spill Number 0212404, Gannett Fleming notified NYSDEC and Spill number 0412188 was assigned to the property. Six groundwater samples were collected. Groundwater analyticals show 600ppb benzene(TP5), 700ppb toluene(TP5), 810ppb ethylbenzene(TP5), 2100ppb xylene(TP5), 3200ppb MTBE(TP5), 26ppb benzene(TP6), 16ppb toluene(TP6), 150ppb ethylbenzene(TP6), 310ppb xylene(TP6) and 510ppb MTBE(TP6). "Contaminated groundwater will be removed from the site as part of the dewatering system operated during foundation construction as indicated in the approved Hazardous Material Mitigation Plan".

3/18/05-Letter from Gannett Fleming to NYCDEP Cabbagestalk dated 3/9/05. The remaining work to be completed is excavation of remaining contaminated soil, treatment and discharge of contaminated groundwater and installation of a vapor barrier. "Since these three items are an integral part of the construction phase of site development, a Department of Buildings permit for the construction of the building must be secured before the remaining remedial measures can be implemented. Therefore we request that you provide the necessary approval so the construction permit can be obtained".

3/19/05-Vought-Received call from ASR Muller who was requesting concentration limitations for treatment. Vought gave Muller NYCDEP Nazaire to call for limits.

6/3/05-Vought-Received message from Manfred Bohms (Gannett Flemming). Vought returned call and spoke to Bohms. In sidewalk in southwest corner of site a utility structure was found made of bricks extending to 30’ below grade with oil at bottom. Sample collected for fingerprinting. No excavation performed as of yet as piling will be driven soon. Soil to begin being removed next week. Dewatering unit will be delivered and set up next week and will be running in a few weeks and predwatering sample will be collected. Bohms will contact DEC upon obtaining dewatering permit from DEP.

6/9/05-Vought-Received call from Bohms that product in sidewalk vault is dielectric fluid with no PCB content. Vought returned call and calls were placed to ConEd and will be reporting spill to hotline and no product recovery as of yet.

6/16/05-Vought-Letter from ASR Muller to DEC Vought-6/10/05. "In a correspondence dated October 15, 2004 (attached) the requirement of a vapor barrier and/or passive venting system to prevent vapor migration was added to the Stipulation Agreeement implemented by the NYSDEC on March 11, 2004. Based on the following information this additional requirement is no longer needed". Info provided: 1)basement of building will be garage and "as part of construction a ventiulation system will be installed in the basement to evacuate vehicle exhaust" 2)removal of 4042 tons of impacted soil 3)dewatering of site 4)removal of any new contaminated soil encountered during dewatering 4)installation of "structural waterproofing membrane" to prevent groundwater intrusion into the subfloors. "Therefore I kindly request that the added requirement of a Vapor Barrier of any kind be removed from the Stipulation Requirements". Vought sent letter no longer requiring installation of vapor barrier provided the installation of the vehicle exhaust system and the waterproofing membrane.

6/16/05-Vought-Letter from Gannett Fleming (Bohms) to DEC Vought-6/10/05. "As requested we have prepared this letter to document the actions taken regarding the discovery of dielectric fluid in a utility vault under the sidewalk immediately southwest of 10 West End Avenue". Free product about 10" thick and new spill was called in by ConEd. Oil is "100% Feeder 51 dielectric fluid". Analytical fingerprint results included with letter.

6/20/05-Vought-Received call from Steve Hicks (Gannett Fleming). Vought returned call and spoke to Hicks and WR Grace vapor barrier system is being installed. Vought faxed him copy of 6/16 letter and June 10, 2004 letter.

7/19/05-Vought-Site visit by Vought with Gannet Flemming(Bohms and Hicks) and ASR Muller. Dewatering system started on 7/11/05 and initial water samples collected same date. Analyticals of groundwater still not back from lab. Sheen observed on groundwater (no free product). Dewatering system will be sampled monthly and will have 2-3 extraction points. Expected time of system operation is five months. Dewatering not taken place due to awaiting discharge permit from NYCDEP. Additional contaminated soil to be removed. No vapor complaints received to date and non-detected during site visit. DEC requires: 1)endpoint samples to be taken at terminus of excavation despite depth below groundwater. No dielectic fluid observed in excavation.

9/12/05-Obligado- Spill transferred from Vought to Obligado.

9/30/05- Obligado- Called Steve Muller at ASR to inquire about dewatering activities. Left message.

10/3/05- Obligado - Spoke with Manfred Bohms (516) 671-8440. Said they took an soil endpoint sample, tried to call DECVought prior to sampling, but unable to reach him, so they took sample anyway. Site status - excavation, dewatering, gw sampling, is ongoing and should continue for about 2 months before foundation is laid. A letter report containing results of soil and gw sampling should be received by the department in about 3 weeks.

10/4/05 - Obligado - Spoke with Steve Muller, site meeting scheduled for 10/6/05 at 1000.

10/5/05- Obligado - Phone conversation with Manfred Bohms, Fleming will be onsite on 10/6/05 to take soil samples from bottom of footing excavation. Agree to meet Dennis Matigan on site.

10/6/05- Obligado - Site visit with DEC Sun, Dennis Mattigan (516)578-9415 (Ganette Fleming), Muller (ASR) and Tomasello (ASR). Excavation ongoing, down to approximately 30 ft bgs beneath former gaseteria portion of site (southern half). Excavation proceeded down into bedrock, and footings will be installed into bedrock so soil samples from footing excavation could not be taken. DEC requires: Since base of excavation is in bedrock, 1) no enpoint soil samples need to be collected. 2) Collect one ground water sample from sump pit dug down into bedrock. At time of site visit, sump pit dry due to dewatering, so Fleming and ASR will each collect 1 ground water sample the following morning, when sump pit has recharged.

10/24/05 - Obligado - Review closure request by ASR, based on ground water sample collected from sump pit in bedrock below limits and soil on Gaseteria half of property completely removed. Request NFA. Wait to get results from Gannete Fleming, who also collected samples and has been taking monthly ground water samples from dewatering system.

10/25/05 - Obligado - Dennis Mattigan (Gannet Fleming) called from Gannet Fleming. Said they had reached the extent of excavation (approximately 35 ft bgs)in northwestern portion of the site. Did not encounter bedrock at base of this area of excavation. Told Dennis to collect
two soil endpoint samples.

10/26/05 - Obligado - Steve Muller called, said that they were installing a moisture barrier on the southern half of the site.

10/27/05 - Obligado - Call Dennis Matigan, inform him that DEC will visit site to see membrane installation.

11/16/05 - Obligado - Received call from Dennis Matigan, he will be collecting a soil sample from below a footing in the northern portion of the site.

11/29/05 - Obligado - Spoke to Manfred Bohms, said he will send GW results from dewatering tomorrow. Soil excavation almost complete. No more soil endpoint samples will be collected due to bedrock.

12/7/05 - Obligado - Meeting with Gaseteria. NFA granted. Sent letter 12/8/05

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "DEMEO"
PBS #2-605827

10/7/2002 DeMeo responded to the site and witnessed the tank test failure.

5/8/03 TJD

Demeo contacted by Paul Stewart (ACT) who has been retained by Dime Savings Bank to perform an investigation at 525 W45th Street due to tank test failure. Mr. Stewart stated (4)borings were installed soil/groundwater samples taken from each location. He reports no contamination found. Mr. Stewart was not aware the Department is pursuing an enforcemnt case against registered tank owner for non-compliance.

Mr. Stewart will be submitting a work plan to further investigate this property including either removing tank or sampling soils beneath tank and investigating buried fill line.

See also spill 0206549

5/22/03 TJD

Site visit. Demeo on site to witness uncovering of 2,000 UST. When manway was accessed tank contained approximately 60 gallons of #2 Fuel Oil. Tank had previously been pumped dry and cleaned by PTC. Unknown how oil reemerged into tank. A small hole was cut into tank bottom and a soil sample was collected. No visual or olfactory indicators or contamination were present in sample. Laboratory analysis subsequently revealed all petroleum constitituents are below TAGM. Fill and vent lines were removed from tank and properly disposed.

5/29/03 TJD

Site visit. Demeo on site to witness excavation, removal and inspection of feed and return product lines. Action Environmental performing work under supervision of ACT. Product lines were excavated from tank to perimeter of tenant space. A small excavation was opened inside tenant space where product lines penetrate foundation wall (beneath slab) from boiler room. No visible or olfactory indicators of petroleum contamination was identified in area of piping runs.

6/3/03 TJD

Closure report submitted by ACT. NFA letter issued.

Additional notes:

9/24/02 Amtrack spill reported (0206549)

9/28/02 Letter sent to Tokay Realty requiring tightness test

10/7/02 Tightness test conducted (tank failed)

10/22/02 Letter requiring retest and/or tank closure sent

10/22/02 Tightness test performed (tank failed)

10/28/02 Follow-up letter sent requiring subsurface investigation

10/29/02 Tank taken out of service. Temporary tank installed.

2/21/03 New 1500 gal AST installed (not registered)

6/3/03 NFA issued. Old 2000 gal UST still active in PBS.

New 1500 gal AST not registered.

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SUN"
11/06/01: MF-R9 OTHER SPILLS AT SITE 9314775, 8807198,CLOSED 9516313,CLOSED, 9604842, CLOSED, 9415731, CLOSED.

02/18/2004- AUSTIN - REASSIGNED TO SUN

10/15/04-On 10/15/04 Sun sent a letter to Michael Matri of Hess requiring by 11/30/04 to submit the following information: 1)Tank Closure Report, 2)Locations of tank and/or line test failure, 3)Subsurface investigation report, including current and historical soil and groundwater analysis, and 4)A surrounding property sketch including property layout and usage.

10/18/04-On 10/15/04 Sun received from Micael Matri of Hess a Revised Spill Closure Report, prepared by EnviroTrac, dated December 2002. The report indicated that Hess removed 2,150 tons of soil from the site. Out of 20 soil samples collected following the UST removal, VOCs were detected in excess of their respective TAGM guidelines in only 3 (SP-2, SP-3 ans SP-10). Semi-VOCs were detected above their respective TAGM guidelines in only 2 of the samples (SP-14 and SP-20). Since there are no potable water supply well within a 1/4-mile radius of the site and this spill occurred prior to the removal of the 2,150 tons of soil that Hess removed during the UST removal, and only few VOC and SVOC concentrations higher than the NYSDEC standards,this spill is closed.

Caller Remarks:

found underground tank/approx. 1000gal ust, loss of product to soil

DEC Investigator Remarks:

Construction company was digging test pits and discovered an old 1000 gal UST. Excavator cut a small hole in top and approx 1 gal spilled to soil. Liro Construction is environmental rep on site.

Sangesland told Steve Frank at Liro to pump out the tank and remove the impacted soil immediately. He said the empty tank will be pulled later in the excavation/construction process.

12/02/11-Hiralkumar Patel.
11:47 AM:- received message from Steve (718-321-3136 Ext. 236) from LiRo. he mentioned that tank has been pumped out

12/06/11-Hiralkumar Patel.
9:22 AM:- spoke with Steve. he mentioned that tank and about 15 yards of contaminated soil has been removed. they did not collected any endpoint samples as the area, where the tank was found, will be excavated down to bedrock as part of new construction. Steve mentioned that they dug down to about 8.5 ft and the bedrock is at about 12 ft bg. currently, there is a building on-site which will be demolished soon. Steve mentioned that contaminated soil has been stockpiled on site and will be diposed once contractor start digging for new buiding. informed him that the Department requires removal of contaminated soil to prevent any cross-contamination. asked him to submit a cleanup report (including work description, reason for not collecting endpoint samples, site map and disposal manifests) by the end of 12/16/11. Steve mentioned that Rob Patsakos is the field supervisor for construction company.
9:33 AM:- left message for Mr. Patsakos and asked him to submit cleanup report by 12/16/11.

01/11/12-Hiralkumar Patel.
8:38 AM:- received email from Craig from LiRo including a work plan. as per work plan, no endpoint samples were collected after removal of 1,000 gal UST as additional site excavation is required for site redevelopment. LiRo is proposing to collect endpoint samples after the final excavation needed for site redevelopment. as per plan, former tank area will be excavated to 12 ft bg.

Craig T. Taylor
LiRo Engineers, Inc.
Ph. (716) 882-5476 Ext. 239
Fax (716) 882-9640
email: taylorc@liro.com

10:06 AM:- spoke with Craig. as excavation for site redevelopment may take months, asked Craig to submit spill cleanup report by the end of 02/10/12.
10:08 AM:- sent email to Craig. informed him that spill cleanup report must be submitted by 02/10/12. email copied to Steve Frank (franks@liro.com) and Frank Dubinsky (FDubinsky@moncon.com).
12:42 PM:- received revised work plan indicating that spill cleanup report will be submitted by the end of 02/10/12.

alternate address: 533-547 W 52nd Street
total of 9 buildings on lot.
no other spills or PBS record found for the subject site. spill(s) and PBS(s) records for other buildings on lot.

01/12/12-Hiralkumar Patel.
10:46 AM:- received call form Frank Dubinsky, representative of property owner. he mentioned that they subdivided lot 1 on block 1081 and created a new lot 101. and lot 101 is not part of Clinton Parkview Apartments.

Material Spilled	Material Class	Quantity Spilled	Units	Quantity Recovered	Units	Resource(s) Affected
TRANSFORMER OIL	PETROLEUM	25.00	GALLONS	0.00	GALLONS	SOIL

Caller Remarks:

found what may be transformer oil on 75 gals water in vault -- no sign of transformer leak so far -- sample taken clean up pending results.

DEC Investigator Remarks:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "O'CONNELL"
CON ED

E2 MIS REPORT

25 gallons of trnsformer oil from transformer on 75 gallons of water in vault 3484 ... Possible entry into sewer due to existing water line on vault walls higher than fluid level now in structure. Not able to verify sewer connection as per conduit palte #29-D-2. A PCb sample was taken by W Ward... a release di not occur at this location due to mark on wall is an oily substance and considering it is a vault it will be assumed it has a pump and or drain at this time.

DEC INSPECTOR NOTES

1/4 /00, 2:05pm - left message for Albert Gordon, DEP spoke with Ray Lo, stain on vault wall approx. 2 feet above current fluid level. Acid to supervise, probable drain in vault. Opened sewer trap which goes to adjacent vault, some traces of oil sample taken, but will treat as SO-499 in meantime. Believe transformer has porous bottom .

Update @4:00pm- Ray Lo left voice mail. Stanley Baldwin DEP just left site. Tanker truck enroute to drain transformer.

Material Spilled	Material Class	Quantity Spilled	Units	Quantity Recovered	Units	Resource(s) Affected
#2 FUEL OIL	PETROLEUM	0	GALLONS	0	GALLONS	SOIL

Caller Remarks:

Mr. Jacobs indicated that strong fuel odors present in building at 562 w 52nd street. Happens when it rains. He is a commercial tennant at site, and can allow access to basement where vapors are detected.

DEC Investigator Remarks:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "DEMEO"
5/1/02 TIPPLE/ see also spill # 9912977 Demeo conducted site visit, inspected basement of notifiers building, bottle recycle center next door as well as vacant loton the other side of the notifiers property. Demeo found no olfactory or visual evidance of a petroleum release in any of the areas he inspected. The notifier Bill Jacobs was given the hotline number and advised to call immediately upon olfactory or other indications of a petroleum release. nfa at this time

see also 99-12977

12/17/03 TJD

Bill Jacobs (impacted citizen) contacted RWA directly, stating he is still intermittently being impacted by petroleum vapors inside his business. As per RWA direction, Demeo performed another site visit. No problems of main floor of business. In basement low levels (<5PPM on PID) of petroleum type vapors were identified. No tanks at location, building is on gas heat. No obvious signs of a release: No spillage or seepage noted on floor or walls. A loose sewer cap was identified & Mr. Jacobs was informed that the loose sewer cap can be the pathway for vapors. He was instructed to repair and/or replace sewer cap. As per RWA no further DEC action is planned.

DURING TEST PITS FOUND FREE PRODUCT: WILL BE SCHEDULING A VAC TRUCK TODAY

DEC Investigator Remarks:

10/11/07-Hiralkumar Patel. spoke with Eric (212-631-9000) at Emteque. site is under development. during demolition and initial soil excavation, found free product. after that Emteque did borings at site. Eric has results of sample analysis and will send it. Eric believes that there are about 8 gasoline USTs at site.

left message for Bonnie Campbell (718-222-2500).

alternate address: 131-139 E 60th Street

no PBS record found.

10/12/07-Hiralkumar Patel. received sample analyticals from Eric. found few SVOCs in samples.

visited site. spoke with Bernard McCaffrey, project manager. as per Bernard, they found five 275 gal tanks from site. but haven't observed any product on ground. as a part of construction, they will excavate entire lot to about 15 ft bg for foundation work. no sign of contamianted soil or vapor/odor noticed at site. asked Bernard to register tanks that have been removed from the site.

Bernard McCaffrey

Ph. (718) 222-2500 (O)
(347) 686-2143 (C)
Fax (718) 222-2501
email: bmcaffrey@twotrees-dumbo.com

based on site observations, case closed.

10/29/07-Hiralkumar Patel. received email from Eric. they found another 2000 gal waste oil tank at site. asked Eric to see any contaminated soil at site and if any, ask to take endpoint samples according to DER-10.

06/20/08-Hiralkumar Patel. received closure report (on 04/01/08) from Emteque. they removed all soil from the site and currently construction company is blasting bedrock for foundation work. no endpoint samples taken as all soil removed as regulated material.

spoke with Eric at Emteque. he mentioned that currently they are 40 ft bg and about 25 ft into bedrock. no soil left at entire site. Eric mentioned that no groundwater encountered yet.

based on submitted report, case closed.

06/30/09-Hiralkumar Patel. recevied email from Eric requesting NFA.
07/14/09-Hiralkumar Patel.
2:33 PM:- spoke with Eric regarding mailing address for NFA. he asked to send letter to:

Caller Remarks:

fumes from a truck that was cleaing out a groundwater storage tank

DEC Investigator Remarks:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "VOUGHT"
10/02/2002-VOUGHT-Spoke with Dan Caravan. Mobil station remediation going on next door to above address. Remediation system is a SVE system. Above address has a fresh air injection system for basement. Truck used to pump out SVE system had released vapors into fresh air injection system which then pumped vapors into above address. Dan Caravan took PID into above address and found non-detect levels. Caravan also installed a carbon filter at intake of fresh air injection sytem to prevent reoccurence of problem. Spill closed by Vought,

in excess of 100 gal - contained inside of the bldg but floor is not sealed - speedy dry & pads were put down

DEC Investigator Remarks:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SAWYER"
Sangesland DDO

Problem with longterm bad practice with waste oil dumping. Six used oil tanks in a pit. Tanks fill up and the tanks tend to over fill and flow over into a containment pit. Long term, this oil has flowed through the cinderblock containment wall and gone down into the building basement.

Chrysler Corporate office is taking lead to pay for cleanup. Building will under go a total renovation. There will be a showroom on the ground floor and service will be on the 2nd and 3rd floors. Repair of this spill is a small part of this renovation.

7/21/2003-Vought-Called Kevin McGrath and left message. Vought called Chrysler and spoke with Bob Sampogne (212-765-6633) and clean up crew is working all day. Vought will perform site visit on 7/21/2003.

7/22/2003-Vought-Site visit performed on 7/21. Visit summary: Waste oil spill on concrete from approximately seven manifolded 275 AST's. Concrete in good condition with no visible pathways to subsurface. Building scheduled for complete demolition in three weeks. No sewers or drains affected. Spill cleaned using speedy dry. PBS search indicated no waste oil tank registration. Vought called Sampogne and he will return call with registration information. Vought spoke to Kevin McGrath who is designing new waste oil containment room with secondary containment. According to McGrath their is another room under the AST area which is heavily impacted. No mention of the room was made by Sampogne. Site visit by Vought on 7/22 to inspect basement room. Speedy dry on basement floor with large area of oil staining over three rooms with small puddles of free product. Waste oil also found on floor of sprinkler room. Oil possibly entrapped in walls from second floor sink connected to ASTs on first floor. NYSDEC requires (in addition to above requirements) soil borings through three rooms and one in sprinkler room (a total of four borings). Vought sent letter with requirements to Melissa.

7/23/2003-Vought-Spoke with Melissa who will be performing site visit on 7/30. Melissa stated that she will send email to Vought with responsible party information.

7/24/03-Vought-Received call from Steven Boutin (Action Environmental 518-437-0337 (off) 518-441-7130 (cell)). Vought returned call.

8/7/2003-Vought-Letter to DEC from Daimler Chrysler-Floors and walls in AST area were pressure washed and preliminary soil samples were collected from below basement floor.

8/21/20003-Vought-Site visit by Vought on 8/21. Met with Kevin McGrath (EarthTec Enviro). Soil contamination found in soil boring along west wall of basement. Inspection of boiler room yielded two USTs (unknown product status) and a sump pit filled with free product. NYSDEC requires immediate 1)removal of impacted debris 2)emptying of tanks and sump pit 3)registration of USTs and waste oil tanks 4)site plan with boring locations and tank features 5)product recovery amounts 6)delineation of soil and groundwater contamination under UST room and/or endpoint sample analysis 7)disposal manifests 8)borings through base of waste oil impacted wall.

8/25/2003-Vought-Received call from Steve Shoiniere (518-951-2262) from Earthtec in Albany who just spoke with Melissa Michaels. Hauler want PCB analyticals on product before disposal. Results will not be in until Wed or Thurs. Pickup is scheduled for Friday and Vought will receive call back upon pickup.

8/26/2003-Vought-sent letter with requirements of 8/21 and Stipulation Agreement.

8/29/03-Vought-Email from Melissa-Vac truck on site and all product from ASTs and sump pit was removed.

9/4/03-Vought-Signed stipulation agreement received by DEC.

9/16/03-Vought-Stipulation Agreement signed by Regional Director.

9/19/03-Vought-Spoke to Steve (Earthtec) and conference call is scheduled for 9/22 to duscuss updates.

9/22/2003-Vought-Spoke with Melissa and Steve. Dealer sent in PBS registration, Vought will check with PBS. All product was removed. Fingerprint analysis was performed on product. Workplan will be submitted to DEC.

1/7/04-Vought-Spill transferred from Vought to Austin.

01/27/04 - Sawyer - Spill transferred from Austin to Sawyer.

5/20/2004- Sangesland- Spill number 0401882 was called in. This spill number comes from a "hit" found on a monitoring well associated with an ExxonMobil Station at the corner of West 51st St & 11th Ave. The specific well with the "hit" is actually closer to the Chrysler/jeep building. ExxonMobil consultant (Dan Canavan 631-285-6684) said they will run a fingerprint on the sample and may try to disassociate the "hit" from the Exxon Mobil Station.
12/21/05 Sharif/ Case was transferred to Koon Tang for reassignment.

3/1/06 - project manager info. (KST)
Melissa M. Michaels, P.G., CHMM
DaimlerChrysler
800 Chrysler Drive
CIMS 482-00-51
Auburn Hills, MI 48326
phone: 248-512-3152
Fax: 248-576-7369

Reviewed case file. Only slight exceedance of a few benzo compounds in soil, e.g 300 - 500 ppb of benzo(a)antracene, and 1200 ppb Chrysene. No VOCs or CVOCs in perched water, only slight detection of SVOCs - 77 ppb Pyrene. Site is closed. - KST

11/29/07-Vought-Received call from Kevin McGrath (EarthTech 518-951-2251) who called and inquired why spill was closed and also indicated that oil staining will be pressure washed from floors and water from second floor drop sink into basement. Cleaning will begin monday(11/3) and on wed(11/5), 6(250-gallon) waste oil ASTs will be removed. ASTs will be replaced with lubecubes. Two (10,000-gallon) above ground ASTs for fuel oil are not piped but floor area around vault had free product in it. Vault had free product which was removed and floors were cleaned. Vault has not been inspected in two years and unsure if product present. Consent order signed for original investigation and unsure if tanks in basement are registered.

12/5/07-Vought-After review of PBS database no registration found for site. DEC requires: 1)submission of PBS registration. Site inspection scheduled for 12/7 at 1:30pm.

12/7/07-Vought-Site visit by Vought. Earth Tech onsite installing new waste oil ASTs. Vought also met with Bob Sampogne (ph:212-765-6633 fax:212-399-7449). No signs of spill from second floor sink however USTs still present in boiler room and no investigation was done of subsurface as per 8/21/03 notes above which requires delineation of soil and groundwater under UST room. Since soil and groundwater was never investigated in boiler room and since free product found in sump, Spill 0751290 was opened due to possibility of heavy soil and or groundwater contamination beneath the boiler room floor. See spill 0751290 for further info on basement spill. This spill remains closed by Vought as separate and distinct spill.

SMALL OIL SPILL Con Edison Incident No. _120402_____

CLEANUP CHECKLIST NYSDEC Spill No. _____

Name of person completing checklist: R TREMBERGER, SPLICER, 52045, H WATSON, SUPERVISOR, 10161

Con Edison Operating Department responsible for spill cleanup:

(1) A small oil spill is a spill of oil containing less than 50 ppm PCBs that does not meet the criteria for a de minimis spill and satisfies either of the following

conditions:

? It is totally contained in an impervious structure, such as a manhole, vault, or moat, or

? It meets all of the following criteria:

- No sewer or waterway is affected, and

- No private property is affected, and

- No personal injuries are involved, and

- Cleanup is completed within 72 hours of the spill discovery, and

- Less than 50 gallons of oil, petroleum product of any kind, or dielectric fluid is spilled.

(2) Material spilled/discovered:

0 Oil (type); PCB concentration: less than 50 ppm; known / unknown.

X Dielectric fluid; PCB concentration: less than 50 ppm; known / unknown.

If unknown PCB concentration, was sample collected? X Yes 0 No

Environmental Detailed Incident Report

(3) Sample submitted for analysis? X Yes Sample ID No. 98-10824 0 No

For what parameters? X PCB 0 Benzene 0 Other Parameters

Copy of chain of custody form attached? 0 Yes 0 No

(4) Amount spilled/discovered: 5 GALLONS If leak/spill is continuing, rate N/A

(5) When was spill discovered? Date: 10/08/98 Time 11:05

(6) Location of spill. (Be as precise as possible. Include cross streets, manhole numbers, equipment box numbers, etc., as appropriate.)

MANHOLE 62183

W 51ST 400’ N/N/C 10TH AVE

0 Sketch attached

(7) Source/cause of spill. (Be as precise as possible. Include equipment numbers, if possible.)

N/A SHEEN

X Unknown

(8) Description of area affected by spill (include dimensions as appropriate)

(9) Containment/Cleanup Activities (per GEI 2.11, 2.13, 2.16, 3.2, or 3.3) 0 Sketches attached.

0 Tightened valve.

0 Placed drip plan.

0 Sealed leak.

0 Blocked nearby sewers/drains with spill kits.

0 Removed/recovered liquid/solids.

0 Used absorbents to remove residual fluids.

0 Removed contaminated vegetation.

X Removed visible traces of oil.

X Washed stained areas.

0 Excavated contaminated soil, bluestone.

0 Other

0 See attached contractor report.

(10) Identify who performed cleanup:

0 Con Edison personnel/department?

X Name of contractor: CLEAN HARBORS, INC.

0 Contractor report attached.

(11) Cleanup completed on Date: 10/09/98 Time*: 13:00

*Note: If the cleanup is completed more than 72 hours after the spill was discovered, the spill is a large oil spill.

(12) Con Edison personnel directing cleanup: H WATSON, SUPERVISOR,10161

Con Ed e2mis #141662 Notes:

On March 06, 2002, D. Murphy, 99355, Supervisor of Maintenance and Construction Services reported while preparing for an abatement in manhole 61804, feeders M51 & M52 he found approximately 1/2 pint of oil on 200 gallons of water. Chem Lab was notified to take samples and will be at location this afternoon. Tag no. 29055 was hung. Manhole will not be pumped out within 24 hours due to manpower and return of lab results. No sewer, waterway or private property affected. No smoke, fire, injuries or

outside impact. Called CIG, spoke with R. Roach, at 11:42am.

Material spilled/discovered:

Oil Type: INSUFFICIENT AMOUNT TO DO OIL ID.

PCB Concentration (ppm) <1.0PPM

Sample submitted for analysis?

Yes Sample ID No CC01814

YES-LSN No. 02-01861-001, 02-01862-001

PCB <1.0PPM

Amount spilled/discovered: 1/2 PINT OIL, 200 GALS WATER

When was spill discovered? Date 03/-6/02, Time 10:50AM

Clean Harbors completed cleanup on 3/7/02-3/8/02

Caller Remarks:

TANK REMOVAL FROM LOCATION AND GROUND CONTAMINATION FOUND. SOIL IS STOCKPILED AWAITING TEST RESULTS.

DEC Investigator Remarks:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "KOLLEENY"

11/07/05: This spill transferred from J.Kolleeny to S.Kraszewski.

11/30/05: Reviewed Post-Excavation Site Assessment Report prepared by Emipre Environmental Services, submitted December 2002. 650 tons of contaminated soil was removed and disposed of by Allied Waste. Six end point samples were taken from excavation area and analyzed. Two samples show 5 SVOCs above RSCO standards.

Only one sample had a PID reading: 0.4ppm.

No VOCs were detected. However, depth of the soil borings are not given for any samples taken. Nor is it mentioned if GW was encountered during borings or during tank excavation. Also, no fill port labeled on the diagram and no sample taken at fill port. Must call about fill port and samples. - SK

01/04/06: Only contact number available is for Derek Martin, Heating Coordinator for NYCHA. Several unsucessful attempts to contact him thus far. Will continue to try and reach him. - SK

01/09/06: Frank Inoa from NYCHA called with additional information about the assessment report. The report contains information about the piping: the vent and fill lines were capped and the suction and return lines were removed. Soil excavated during removal of these lines was also disposed of properly. It is not likely that GW was encountered during the excavation. Frank called the consultant for more information and is waiting for their call. - SK

01/13/06: Frank Inoa from NYCHA called with additional information for the site assessment. Soil along the fill lines and near the fill port was removed but samples were not taken. Talked with Jon about this situation and we decided that the site assessment was incomplete without the sampling of the fill port area and along the fill lines. I will email Frank a notification of remaining work to be done at the site:

Sampling of the fill port area

Sampling of the vent, fill, suction and return line area for every 20 feet of piping
A Work Action Plan for review by the Department

- SK

03/17/06: Sent out Email to Chris Sawyer mentioning additional soil borings along the fuel lines and next to the fill port. - SK

11/28/06 - JKann - report submitted on 11/14. DEC lead transferred from S.Kraszewski to J. Kann.

07/03/09 - J.Kann - work plan for investigation submitted in March 2009. Additional work proposed around the old fill port and lines. Email sent on July 3 include the following : "- The June 2006 report identifies an area of concern due to shallow contamination (SB-04). The focus of the 2009 work plan should be on this area. Based on the 2006 report, boring logs and the report indicate no petroleum odors or PID readings in the shallow samples of SB-6 and SB-5. Why are additional borings proposed in this area?"

09/15/09: J.Kann - GF's response was "As for Harborview Houses, the borings are in a very limited space.
Since SB-04 was the boring area of concern, a couple of the new
delineation borings surrounding the new boring proposed in the same area
of SB-04 are at the same locations of SB-05 and SB-06. The analytical
samples collected from SB-05 and SB-06 in 2006 were collected from 16-20
feet below ground surface. There is no shallow analytical to confirm
that these areas around the fill lines and fill port are not impacted.
Since that data is three years old and it was unclear where impacts were
coming from the first time, borings in the area of SB-05 and SB-06 will
help delineate the shallow impacts."
WP was approved on 07/10/09.

07/22/10: J.Kann - spoke with Gordon of Clean Ventures (908)878-9043. He said that one boring included in the plan by the fill line was not able to be advanced because of a scaffold being present. He asked if it could be completed with hand auger. I said that would be fine and to collect two samples one at 2 feet and one at 5 feet because previous reports showed some shallow exceedences.

10/18/10: J.Kann - SAR received on 10/5/10.

11/23/10: J.Kann - comments sent to NYCHA on SAR.

3/22/11: Revised report sent on 11/30/10. Minor exceedences of SVOCs in fill area along fill pipe. Boring logs describe the area as "fill material: brown m.sand, trace brick, anthracite". A qualitative exposure assessment was included in the report.
NFA.

DEC Investigator Remarks:

03/18/08-Hiralkumar Patel. visited site on 03/17/08. met with service manager at Honda showroom at 706 11th Ave. no spill happened at this site. actually, employee from 706 11th Ave, smelled oil and called FDNY. FDNY found odors from excavation on street on W 50th Street.

during site visit, found building at 684 11th Ave (alt. addresses: 549-551 W 49 St, 556-562 W 50 St, 553-557 W 49 St, 684-704 11th Ave) under internal renovation.

ConEd doing work on street; on W 49th Street and W 50th STreet. met ConEd person at the site, who is working on W 49th Street project (and doesn't know about anything on W 50th Street project). found heavy odors in close proximity to one of excavation along W 50th STreet, which is next to Honda showroom site. no odors noticed about 10 ft away from excavation pit. found excavation bottom covered with plastic sheet. neither ConEd person nor contractor were at site to give further information about project.

found open spill case at 700 11th Ave site (spill #: 0103148).

as no spill found at 706 11th Ave, changed spill location info in spill report to 700 11th Ave.

case closed. refer to spill #: 0103148.

2 OUNCES ON 50 GALLONS OF WATER: NO TO 5 QUESTIONS: 207492

DEC Investigator Remarks:

8/9/07, 2:38 PM: received e-mail from Dave Rubin, Con Edison Remediation group:
"FYI, attached is a Con Edison EMIS report for a spill that occurred this morning in the 11th Avenue Sidewalk Area adjacent to the Astor Site. Con Edison was excavating in the area that had previously been backfilled following completion of remedial activities (between the secant piles at the Con Edison property line and the 11th Ave. curb line). After the heavy rain yesterday, the excavation filled up with water and needed to be pumped out in order for work to continue. When the crew went to pump out the excavation they noticed a sheen on the water. The water was pumped into a drum and the attached report was called in (Con Edison is in the process of identifying the corresponding NYSDEC spill number). Excavation activities have since been completed; backfilling remains." Assigned to Bryan Wong (PM for Astor Substation site) for follow up.

Sent e-mail to Con Ed (Rubin): "Any idea what the source of the sheen was? Is it related to street runoff from the rain or did the sheen come out of the soil? Has a sample been collected for product ID?"

Response from Con Ed (Rubin):" Please see below for responses to your questions [in bracketed CAPS], and advise as to whether any further action is required on Con Edison's part (we are storing the drummed water onsite pending your response).

"Any idea what the source of the sheen was? [CON EDISON CANNOT CONFIRM THE SOURCE]. Is it related to street runoff from the rain or did the sheen come out of the soil? [BOTH ARE POSSIBLE CONTRIBUTORS TO THE OBSERVED SHEEN. THERE WAS NO OBSERVABLE SHEEN WHEN THE EXCAVATION WAS OPEN DURING YESTERDAY'S RAINFALL EVENT. WHEN THE CREWS RETURNED THIS MORNING THE SHEEN WAS PRESENT. THERE IS NO WATER-TIGHT CONTAINMENT ON THE 11TH AVENUE SIDE OF THE EXCAVATION (ONLY STEEL SHEETING) TO "ISOLATE" THE SIDEWALK AREA. SURFACE RUNOFF LIKELY ENTERED THE EXCAVATION DUE TO THE INTENSE NATURE OF THE STORM EVENT.] Has a sample been collected for product ID? [NO - CON EDISON WAS PLANNING TO DISPOSE OF THE DRUMMED LIQUID AS NON-HAZARDOUS OILY WATER BASED ON GENERATOR KNOWLEDGE FROM PRIOR SITE INVESTIGATION/REMEDIATION INFORMATION]" (JHO)

207492. see eDocs

1/3/99

Spoke to Nick. He is working for the Arch Diocese. When they uncovered the tank to isolate and retest, they found a hole in the top of the tank - there was no soil contamination noted. They are proposing to close the tank in place with foam, but due to restricted acess (in a courtyard) they are unable to remove the 5000 gallon tank. They are proposing to cut throught the bottom of the tank in two locations to collect soil samples. He will forward a summary of the exposure and the analytical (8021 and 8270) to my attention. JMR

2/25/00 REPORT RECEIVED.

01/26/04

REassinged from Rommel to Austin
02/17/04: Reassigned from AUSTIN to KRIMGOLD.

07/28/05 Tank Closure Report indicates tank was filled with Polyurethane Flowable Foam and closed in place 01/06/00. PBS #2-285722. No soil contamination noted. Closed. LNK.

Closure report from RND services Inc., dated 10/7/02 reviewed.

Total of ten 550 gallon gasoline UST's removed from site. Total of 62.5 tons of contaminated soils were identified and removed for disposal from site (manifests provided). Total of (9) endpoint samples collected from excavation. All laboratory analysis of samples were below TAGM 4046 guidance values.

No water sampling data provided in report. RND services contacted to determine if water sampling was performed, it was not. At the request of RND services (Sharima Ryan) an e-mail was sent today identifing deficiencies and requiring additional work.

10/29/03 TJD

Demeo contacted by RND Services (Sharima Ryan) regarding status of proposed work/sampling plan for above referenced site. Plan is dated October 2003 was received @R2 on October 17, 2003. Work plan outlines proposed well location. Well location verbally approved on this date.

11/21/03 TJD

As directed RND attempted to install one well in an effort to obtain a water sample. Refusal encountered. Well location moved and reattempted, again refusal due to competent bedrock. Screening of the drill cuttings did not exhibit any evidence of contamination. No further action required. Spill closed.

Caller Remarks:

2 SAMPLES WERE TAKEN:

DEC Investigator Remarks:

E2MIS 153465

J.Zaffuto#4553 of Transmission Ops. was investigating a report of a missing manhole cover on mh62163 when he discovered approx. 50 gal. of oil on approx. 3700 gal. of water in M62163. The source and cause of the spill are unknown. There will be two samples taken, one for PCB and one for ID by the Chem Lab. The cleanup is pending.

May 20, 2004

Clean Harbors pumped out the manhole and Clean Venture Power washed the manhole. Pending receipt of sampling results the waste from the manhole was treated as 50-499 PPM PCBs.

Lab Sequence Number: 04-03858-001 PCB 3 ppm.

Lab Sequence Number: 04-03859-001 Fingerprint of oil indicated dielectric fluid.

Leak coming from crack in one inch line from fdr 54. Location of leak was about 6 inches from end wall, on southeast side of manhole. To make repairs south side of manhole wall around fdr pipes broken out. According to Gerry Materazzo, Field Operations Planner, Transmission Operations, Joe O'Connell, Construction Inspector, Transmission Operations, found damp soil found manhole, adjacent to manhole wall underneath feeder pipe. Affected area about 12 inches along wall, about 6 inches wide. Soil was removed. Upon completion of repairs, samples will be taken to verify completeness of cleanup.

Called ERT - Steve Martis at 0955 hrs to inform him of damp soil found outside MH. Estimated amount would be less than a pint.

South wall of manhole broken out. Confirmed with SSO that leak was actually on M55 not M54. Clean Ventures removed 1800 gallons of liquid under bill of lading CVCC051901 on 5/20/04. Permanent repairs started at approx 12:00 5/20/04 with barrel through wall. Permanent repairs completed at 19:22 5/20/04. The tanker that pumped out the manhole was checked and it was estimated that there were 60 gallons of dielectric fluid in the tanker.

Update: June 4, 2004

Manhole was pumped out by Clean Harbors on May 20 and shipped via Clean Harbors Manifest MAQ248913. On June 4, 2004 Tom Columbia of Clean Harbors informed Ron Silva, Senior Specialist, Transmission Operations, that approximately 10% of the tanker 3150 gals of oil/water mixture that was removed from the manhole was dielectric fluid, or about 315 gal. Total amount dielectric fluid removed is 315 (Clean harbors) and 60 gal (Clean Venture) = 375 gal.

Update: June 16-04

After the contamined soil was removed, samples were taken on May 25 by Jacques Whitford outside the south wall of the manhole. Samples were taken under both feeder pipes, adjacent to the manhole wall and under both feeder pipes about 1.5 feet away from the wall.

The samples were analyzed for dielectric fluid via method 8100, and Benzene (both total & TCLP). The analysis was conducted by Environmental Testing Lab. The Chain of Custody number was DD18026; the LSN number was 04-04062. The lab was unable to associate the hydrocarbons in the soil with any known reference standard. The results ranged from 66.4 ppm to 734 ppm.

Based upon the above results, any potential contamination was removed. The repairs made involved installed a repair barrel on the feeder pipe, through the manhole wall. The repair barrel encompassed the leaking one inch line.

SUSPECTED LEAK FROM FEEDER M52. FEEDER TERMINATES AT SPRINGBROOK SUB-STATION IN YONKERS. PUMP HOUSE LEVELS INDICATE A LOSS OF 232 GALLONS. UNKNOWN WHERE OR WHY. CON EDISON CREWS ARE CHECKING RIVER AND MANHOLES. CON EDISON REFERENCE 121637.

DEC Investigator Remarks:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "O'CONNELL"
SEE ALSO SPILL # 9811143.

STEPHEN CRIBBIN OF CONED CALLED IN TO UPDATE THE SPILL: LOCATION FEEDER M52, MANHOLE 61733 IN BROADWAY AND 119TH STREET, MANHATTAN ABOUT 100 GAL OF DIELECTRIC FLUID IN THE MAHOLE OF 1000 GL OF WATER. SAMPLE WAS TAKEN DEC 2 1998 AND THE LAB RESULT INDICATED THE SAMPLE CONTAINS 5 PPM OF PCB. TO FIND OUT WHERE LEAKS COMES FROM. THEY WILL EVALUATE THE MANHOLE. NO SEWER IS AFFECTED.

2/12/99: Update from ERT Wallace: There was no impact to the environment, was contained to manhole. Cleanup epair was completed on 4 DEC 98. Final spill amount 100 gallons.

12-02-98 2:25pm

Dave Perez, ERT- Have S&D on water as a precaution(feeder runs under river) I told him , if location is found overnight to update hotline and also leave me a voice mail.

Notify Steve Sangesland if possible of his response.

Notify Region 3

12-02 3:38pm Dave Perez.

S&D has been up and down Harlem River between 225th & Fordham Rd, no oil seen.

Update 12-04-98

Stephen Cribbon of ConED called in to update the spill.

Location: Feeder M52. MH 61733. About 100gal of dielectric fluid in the MH on 1000 gal. of water. Sample was taken DEc.2,1998 and the lab rsults indicated the sample contains 5ppm of PCB. To find out where leaks come from, they will evacuate the MH and clanup the manhole, no sewer affected.

CON ED E2MIS NOTES

Meter reading descrepancy of 232 gals. on FDR M52,River Patrol boat requested.

5gph leak declared on M52

17:05 Partol Boat reported no oil found in Harlem river Crosing.

17:20 Pumphouse & PURS inspected, no leaks.

19:50 all Bronx MH checked, no leak found

01:10 Pipes exposed, no leak found

07:00 Only indications found at 120th St.(old Leak) and 117th St.

10:10 MH 61733 at B'way s/o 119th St. was opened to ckeck and dielectric fluid was found entering the manhole through the wall sleve.

VNR to begin excavating outside the MH

11:20 leak was discoverd to be on feeder M51 not M52

11:15 - 11:30 Notified that USI flow meter on leak detection system was found jammed at Sprainbrook Station,when the flow meter was repaired at Sprainbrook S/S flowmeter showed flow into tanks at Sprainbrook S/S. Tank levels have not changed at Sprainbrook S/S but gauges may not be functioning correctly. Because of theis information there may not be a leak on feeder M52 and the 232 gallons originally reported as lost was not.

UPDATE: 01/17/10 0246 The amount hasn't changed but have found unk amount of oil in soil at 155 St and Harlem River Dr. They will work to put a temp. clamp on feeder.

DEC Investigator Remarks:

DEC PIPER responded to site 1/17/10 at 1pm . Con ed had already made permanent repair to leaking feeder approx 550- 600 gal spilled to soil. Excavation was 10x 7 and approx 8' deep. Crews were using a guzzler to continue removing soil. Sidewalls have been shored. Endpoint samples will be collected. Once shoring is removed, soil excavation will continue horizontally.
Con Ed # 219935

The floor of the excavation consisted of bedrock so no floor samples were taken. The side and end walls were each sampled. The side wall samples were taken immediately adjacent to the leak location. All samples meet the DEC closeout criteria of less than 10,000ppm TPH. This spill is closed. See e-docs if warranted.

3/18/10 - Austin - Spill contained and cleaned up by Con Edison - See eDocs for the report - spill report closed - end

Caller Remarks:

USI ALARM INDICATES A LEAK OF 600 GALLONS PER HOUR. UNCONFIRMED IF THERE IS A LEAK OR NOT. SPRAINBROOK SUBSTATION IN WESTCHESTER (CROSSES THE HARLEM RIVER).

DEC Investigator Remarks:

False Alarm. ConEd never created an incident number to backup this telephone report, according to ERT Mike D'Agostino on 8-3-06.

Feeder M61 may have had a hiccup, however, which led to a thirty gallon release at the Sprainbrook substation in Region 3. See 0604887 and (201521).

Closed on that basis.

3 OUNCES OF OIL BASED PAINT: FROM A CARTING VEHICLE, WHILE PICKING UP PAINT, SPILLED INTO DRAIN: NO TO 5 QUESTIONS. e2MIS 156283.000

DEC Investigator Remarks:

Employee reports he discovered a Filco Carting garbage truck leaking fluid from the back of the truck in our parking lot. The driver stated it was paint he picked up at a non-Coned location. Approximately 3 ounces spilled into the storm sewer located in the middle of the parking lot. Approximately 2 quarts leaked onto the asphalt of the parking lot. The bottom of the sewer is filled with water that shows no movement. Pads were placed on the bottom of the sewer and the asphalt is being cleaned. Filco is sending personnel to assist in the clean up. We do not know if the paint was oil or latex based. Clean up is ongoing.

18-Nov 0945
Update
The NYC DEP came to inspect site. They issued an order to Filco to clean the area. The pads were removed from the sewer and no paint was left on the water. The owner of the location where the paint was picked up by Filco stated that the paint was latex based. The asphalt area is being cleaned.

Update - As of 12:30 hrs Vic Faster reported that a Filco crew came onsite at 1000hrs and cleaned up the asphalt. The truck drain was plugged to prevent further leaking and the vehicle was removed from the location to their garage. Clean up complete. Vehicle removed from site.

6 OUNCES OF UNKNOWN OIL ON 50 GALLONS OF WATER IN AN EXCAVATION. SAMPLES TAKEN. CLEAN UP PENDING TEST RESULTS. CON EDISON REFERENCE NUMBER 145508.

DEC Investigator Remarks:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "O'CONNELL"
E2MIS NOTES 145508

@16:35 hrs P.Keelan #19995 senior spec reported to W.Lee #33243 that he founded 6oz of unknown oil in 50 gal of water in excavation in parking lot at w.50 st yard @16:25 hrs. Hung sign #S01143 Took two sample one for pcb and one for oil id. Chain of custody #CC07815 Reason for entering site: Maintenance, Digging excavation for transfomer.

Lab results complete- PCB level <1ppm - ID - Lubricating oil.

Clean harbors called to perform clean-up of oily water and soil on 10/11/02.

10/12/02

Clean harbors removed approx 3 cubic yards of oily soil and 100 gallons of oily water.

10/14/02

No visible sheen on water or contaminated soil evident. When a jar of water was taken from excavation it there was no evidence of oil by sight, smell and touch.

10/15/02

Clean harbors returned and vacuumed out approx 1000 gallons of water. Intermittent sheens were evident while removing water. Approx one cubic yard of debris was removed. It is necessary to dig to bedrock for the new foundation support column. The trench is surrounded by old foundation walls from a previous building.

10/18/02

Clean Harbors removed all soil and debris from trench. There are four concrete walls surrounding trench. There is no soil present to clean. The floor is bedrock.

This appears to be an old sump pit from the basement of the previous building on this site. All walls and bedrock were double washed.

There is no longer any contaminated soil or oil present.

I spoke with Jane O'Connell and described the excavation. She stated that as long as all soil was removed and there are four walls and bedrock floor the spill clean up is complete and we could pour the concrete footing.

10/19/02

Concrete footing is poured. No oil or sheen present at any time.

4-17-02 @ 13:35 . M Vasquez #17135 reports that while doing an inspection @ w 49 st substation, located @ 637 w 49 st He

discovered 1/2 pint of an unknown oil had leaked in the tranfer switch cabinet and the concrete floor in trans #3. There is or was no smoke or fire involved. No sewer or waterway affected. No injuries related to the spill. Weather conditions did not contribute to the hazard of the spill. No private property affected. Source and cause of spill are unknown.

There is oil filled equiptment in the structure (a transformer) . Environmental yellow tag # s01872 was applied. No water involved. No sewer connection. No sump or sump pump. No substantial cracks. There is a dielectric filled feeder in the structure. Samples are to be handled by the supervisor of the station. Oil absorbent pads were placed as well as "balonies" . Cleanup is pending sub station personell

UPDATE: 5/1/02 @12:18 pm

Per Michael Butchar's, Supervisor SSO, #20259 email note of April 18, 2002, the spill was contained by SSO/M it was coming from a valve below the buckholtz

switch. SSO/M tightened the valve.

Stu:

E2MIS 142328 (TR3 @ W.49th St. WO# 157937) has been addressed and no leaks are present at this time. On 18 March 2002 we found residual oil in the control cabinet that appeared to have migrated from a gas detector relay valve. The fittings were tightened and the cabinet cleaned.

1/9/2003

On January 7, 2003 a inspection was performed of W49 St substation. Joe Susco, Robert Sanchez, Patrick Keelan, Mike Butchar represented SSO. Kerry Foley represented the DEC. This incident was inspected and all agreed that the clean up and repairs were completed sufficiently to close out this spill.

DEC INSPECTOR'S NOTES

CON ED E2MIS REPORT 10-31-2001

3 qts of unknown fluid in the south tunnel of the station. The source of the spill is from a sump that overflowed in the tunnel.It was determined that the sump pump had a defective float which was repaired. The unknowm fluid was squeeged back into the sump, the sump is connected to a skimmer tank. The spill did not enter the sewer or the waterways. Chem-lab took a sample.

Cliff granger generated 2 incident#'s 134180 & 134181 they are to be voided.

Spill has been cleaned up and the defective float switch has been repaired.

OIL FOUND IN DRAIN LINE FROM BOILER ROOM, UNKNOWN ORIGIN. CLEANUP PENDING.

DEC Investigator Remarks:

10/12/10-HRAHMED- Spoke to Joe Lazarus from NYC DOE (718 361 3742). As per him, they hired a contractor to clean up a clogged drain in the boiler room. While cleaning, the contractor found hardedned oil in the drain that clogged the drain. The cleared the

drain. No more oil is comming and there is no odor in the school or in the boiler room. Discuss this issue with RSE Randall Austin. In the discussion he mentioned this could be a one time event, could be tar, roofing material. If no more oil is showing up in a couple of days, we can close the spills. Will follow up to check if oil is comming.

10/15/10-HRAHMED- Spoke to Mohammad Hamida from DOE. As per him, no more oil is comming and there is no petroleum odor in the school. Asked him if they notice more oil is comming call the spill hotline.

This case is closed.

Caller Remarks:

cleanup complete - to look further into cause and remediate if necessary

DEC Investigator Remarks:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "TIPPLE"

Sangesland spoke to Anthony Lara at PTC.

He says the building noticed a small crack in the basement foundation wall with a small amount of #6 oil coming through the wall. Building manager says that there were two 7500 gal tanks abandoned 20 years ago in the sidewalk just on the other side of this basement wall. PTC has been hired to open up the sidewalk on the weekend of 11/15 - 11/16. They will open the tanks and check if the tanks were actually closed out properly.

11/19/03 one 10,000 gal tank exposed when sidewalk opened, 19' of #6 oil in tank disposed of by PTC ian Costello Branch services--631-563-7300 ex-21 fax-7389

12/18/03 ROBERT DELGADIO--516-683-0200

1/13/04 tipple reviewed proposal for delineation//continuous screaning of borings in response letter//

3/15/04 Tipple spoke with Anthony Lara(Big Anthony)after review of the 2/25/04 submittal. Minor SVOC exceedances in a limited area adjacent to building. PTC will fill the tank with slurry and grout and epoxy seal the building wall to prevent potential future human exposure .

4/27/04 TIPPLE UPDATING// PTC completed work //nfa

under ground vault on fire fd is on the scen along with con edison release has been confirmed the capicitors contained 18 oz of askarel above 500 ppm called in at 6:10am no visible signs of oil in the vault capicitars did burn up

DEC Investigator Remarks:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "O'CONNELL"
Con Ed e2mis #135812:

3/06/01 14:20 hrs.

The New York Fire Dept. reported at 22:48 hrs. on 3/05/01 a possible transformer fire in front of 444 West 56 Street between 9th & 10th Ave. The Fire Dept. was advised at 22:50 hrs. by #9 to assume 500 ppm PCB's until other wise informed. Carl Bruce #89045, Red Wagon Supervisor, reported at 23:22 hrs. that the fire is in vault V1383 located in front of 434 West 56 Street. V1383 shows askarel capacitors in the network protector. Previous PCB history data from records indicate 10 ppm. Note: At 23:27 hrs. the Fire Dept. was informed of the askarel by #9 TD and told to use all possible caution. Cliff Graner #48414 , #9 General Supervisor informed C. Bruce, #9 Red Wagon, at 23:33 hrs. of askarel capacitors and told him to inform Fire Dept. on scene to use all possible caution. Manhattan Control Center (MCC) #9 notified the ERT of this incident at 23:45 hrs.

ERT, Ray Lo, arrived on site at 00:05 hrs. Carl Bruce reported at 01:43 hrs. that the fire door in vault V1383 is burnt up and the network protector is totally destroyed.

NOTE: In order to fully inspect the network protector compartment and transformer vault, the network protector has to be isolated. At 06:00 hrs. Carl Bruce reported that the I&A completed isolation of the switch (NWP) in vault V1383. Richard Smith, I&A Mgr., reported at 07:30 hrs. that work is at a stand still at this location since a chemist is required to do air monitoring of asbestos. At 07:32 hrs. Astoria Chem Lab notified to dispatch a chemist.

At approx. 09:30 hrs. Rich Smith and Rich Zoeller reported the following information regarding this incident to the Environmental Desk: A network protector fire completely destroyed the network protector switch in transformer vault V1383 located in front of 434 West 56 Street between 9th & 10th Avenue. The network protector contained three (3) askarel filled capacitors, asbestos arc chutes, barriers and an asbestos backboard among other components. Since each capacitor contained 6 ounces of askarel, a total of 18 oz. of askarel was released (due to the fire) to the network protector (NWP) compartment. In addition there was approx. 50 gallons of water in the NWP compartment. The source of the askarel was the capacitors. The source of the asbestos was the components of the network protector switch. The cause for both releases was the fire. There was active fire and smoke involved when the network protector was burning. There is oil filled equipment in the structure - the transformer in the vault (adjacent compartment). Askarel components were involved. There was standing water but visual movement was not verified. There is a sewer connection in the transformer vault which was not affected. There is no concrete sump, and no sump pump in the NWP compartment. There is no evidence of release to sewer or waterway. Visible substantial cracks were not verified. The melted network protector,

askarel, asbestos and water was on the concrete floor of the compartment. No environmental spill tag was installed since there will be no entry to the compartment until air monitoring indicates no signs of asbestisides and it is safe for entry. No samples were taken and no initial cleanup action taken due to the air monitoring that will be performed. Hillman Environmental will be performing the air monitoring. (Note: the ERT attempted to contact Airtek Envir but there was no response to the phone calls. It was also thought that ATC was removed from the contract listing .... logged by Zoeller, 11940, 3/8/01)

Following Inserted by Zoeller, 11940, 3/8/01 13:45

3/6/01 07:00 AM Zoeller prepares ACP7 to cover emergency abatement of vault and transmits it to EH&S for processing

3/6/01 09:30 AM Hillmann arrives on location and starts area and excursion monitoring.

3/6/01 15:00 PM Zoeller requests Chem lab to schedule atmosphere testing prior to entry into V1383.

Crew will be dispatched and perform testing immediately prior to entrance at 08:00 on 3/7/00.

3/6/01 15:59 PM ACP7 received by NYCDEP

3/6/01 16:00 PM Radtke report that Lou First identifies some staining on face of building directly adjacent to V1318. Zoeller notified. Radtke contacts Astoria Chem lab to arrange for wipe samples to be taken of the stained area, grating and fire damaged door.

3/6/01 17:36 PM Hillmann faxes air monitoring results to Sean Mahoney (ERT)

Pretest Results: Transf #1 Inside <0.002 f/cc

Transf #2 Inside <0.002 f/cc

Street Level #1 <0.002 f/cc

Street Level #2 <0.002 f/cc

Excursion Limit Transformer Vlt <0.03 f/cc

3/6/01 17:40 Sean Mahoney contacts Zoeller to notify that all samples are reported as less than the detection limit.

UPDATE @ 18:23 hrs.

ERT, Sean Mahoney reported that the Chem Lab is on location taking wipe samples. He also indicated that the asbestos sampling results have been received.

03/07/01 10:46 Received lab results, lab sequence # 01-02285

#1-wipe sample: outside school wall Aroclor - none PCB - <1.00 ug/100 cm 2

#2-wipe sample:outside top of vault grate Aroclor - none PCB - <1.00 ug/100 cm 2

#3-wipe sample:door middle of panal Aroclor - none PCB - <1.00 ug/100 cm 2

UPDATE: 3/07/01

NOTE - The following information is part of the main report detailed above: Ray Browne, I&A Supervisor, reported at 06:51 hrs. on 3/06/01 that the intervault ties were disconnected in vault V1383, Feeder 21M31. Ray Browne also reported that ERT, Ray Lo, requested air samples. He has crew on location waiting for air samples to be taken.

UPDATE: 3/08/01

Frank Garafola #15481, I&A Supervisor, reported at 16:08 hrs. on 3/07/01 that I&A South crews entered the network protector compartment in vault V1383 and found 2 of the askarel capacitors (of the network protector) intact and 1 capacitor with a hole in the bottom of the can. Based upon his inspection and this

information, the amount of askarel released is only 6 ounces and not 18 oz. The I&A was doing an asbestos abatement when they discovered the status of the capacitors. Mr. Garafola stated there was asbestos on the cables, shells & limiters and pieces of arc chutes and backboard in the network protector compartment. All of this debris will be cleaned up during the abatement.

The plan for the cleanup is to do the asbestos abatement first, take air samples and wait for a clear air report. Once the air analysis is good, the I&A will do the oil / askarel cleanup.

Abatement of network compartment commences on 3/7/01. Airteck Envir on site performing monitoring. Remote decon being prepared. Abatement and cleanup will follow written procedures as prepared by Zoeller.

3/8/01 - Cleanup continues. All debris disposed of as PCB/Asbestos. A total of five fifty-gallon drums filled with solid PCB/Asbestos debris and transported under the one trip rule back to 281 Eleventh Av temporary PCB storage. The compartment was abated of all unneccessary asbestos. Entire cleanup was

completed by 14:00 hrs on 3/8/00. Airtek initiated final clearance testing at 14:00 hrs. Clearance obtained at 18:00 hrs. Negative air shut down and decon dismantled. Crew double washed entire compartment with Oil Free. Two additonal fifty gallon drums of PCB debris were transported to 281 Elventh Ave. Entire

compartment now ready for chem lab to perform wipe sample. Arrange for Chem Lab to arrive on 3/9/01

3/9/01 Chem lab arrives at 10:00 hrs to perform wipes as per grid drawing. 37 wipes in total.

Caller Remarks:

THEY DID SAMPLING ON THE SITE. CLEAN UP IS BEING INVESTIGATED.

DEC Investigator Remarks:

IVI is currently providing environmental consulting services related to the #6 oil contamination identified at 421 W54th Street. The building is currently under renovations and
contamination was identified beneath the sub-basement concrete slab, where an elevator pit is to be constructed. IVI collected grab water samples from two locations, and sent them to Worldwide Geoscience, Houston, Texas for forensic analysis. Based upon a telephone
conversation with Worldwide, the samples were identified as 40 to 60 year old #6 oil. The samples were characterized as water with a petroleum product emulsion. IVI has sent samples to York Analytical Labs for analysis of dissolved VOC and SVOC as well. At this time, the
final laboratory reports of analysis have not been issued by Worldwide or York.

IVI has been asked to develop a plan for investigation of the contamination. This plan will involved soil and groundwater sampling necessary to provide a full delineation of contamination, and will provide data necessary to develop an appropriate cleanup strategy. The
property owners are very much interested in developing a plan that will allow for investigation and cleanup, while moving forward with the buildings current redevelopment/renovation activities.
all correspondence should be sent the owners legal
counsel:

Mr. Reed Rubenstein
Greenberg Traurig, LLP

800 Connecticut Avenue, N.W.
Suite 500
Washington, DC 20006
Telephone: (202) 331-3100
Facsimile: (202) 331-3101

8/1/06- DEC Piper reviewd subsurface investigation report. As per report there is slight concentrations below TAGM for VOC and SVOC in several areas. GW samples revealed ND. DEC Piper phoned Steve Gustems. They will be removing contaminated soil.

8/16/06- DEC Piper responded to site and met Steve Gustems. While on site Piper observed small l=globules of oil on water in excavation. Steve will continue planned work for installation of elevator and monitor liquids in open excavation. 25+ drums of solid and liquid ready for disposal.
10/27/06- DEC Piper reviewed closure request. As per report and analytical, this spill is closed. See e-docs if warranted.

Caller Remarks:

unk oil seeping out of ground on commercial site. On site contact # 212-300-2727 Ms. Simmons. They have cracks in the basement which is seeping through. The building is run on natural gas. They would like a call back.

DEC Investigator Remarks:

06/12/09-Spoke to Allen Fredman (212 788 4310) of DOH. As per him this is a commercial real state running on gas. DOH Rosemary Addison(212 676-8916) inspected the site. As per her report, the meter reading was 45 ppm. She noticed cracks in the basement floor. No body lives in the basement. As per her it’s not emmegency to respond. Investigation is necessary to find the source. Allen faxed DOH inspection report, see eDocs in NonFoil section.

6/15/09- DEC Piper performed inspection. Due to flooding of con ed service box with water and oil from street runoff, fluids are leaching into this address. This seems to be a ongoing issue. I recommended to owner, to wait for a dry spell as this month has already seen more than twice the average of rainfall already. Once the area dries, to seal the bawsement with a two part epoxy paint. If that does not work, then to develop a freanch drain to the sump to control the seepage. There was minor amounts of petroleum observed though it was not coming from building. No additional action warranted by owner. Spill closed.

HIT AN UNDER GROUND OIL TANK DURING EXCAVATION. SO IT CONTAMINATED THE SOIL FOR METALS AND OILS.

DEC Investigator Remarks:

Sangesland spoke to Don Hickey at the site. He said the site is already being dug out and remediated under another spill number. During the excavation, they hit a newly discovered tank and had an additional spill on the site. Samples from this tank have been tested and found to be non-hazardous. Site will continue to be dug out and remediated as before.

Caller Remarks:

ABANDONED 3 500 GALLON TANKS ARE FILLED WITH WATER CAUSING SOIL CONTAMINATION. REMEDIATION IN PROGRESS.

DEC Investigator Remarks:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "SANGESLAND"
6/18/2002 - Sangesland received this spill report and could not make contact with anyone at the site by telephone. A check of PBS records indicated that no tanks had been registered.

Sangesland went to the site. It appears there are 3 tanks in the floor of this one story parking garage building. The top 1 ft of asphalt & soil was removed showing the top of the tanks. There was a strong smell of petroleum which required a large standing fan to vent the room.

Sangesland was able to speak via phone with Romeo Santos (contractor). Mr. Santos stated that the tanks were still partially filled with a water/petroleum mixture and that Petroleum Tank Cleaners was scheduled to pump them out later this day (6/18/2002). Mr. Santos also stated that he expected to pull the tanks within the next day or two.

Sangesland stated that no excavation work could be done on the site until the proper PBS forms had been filed.

Once the forms were filed, the tanks could then be removed, and proper endpoint samples would be required to prove the site was clean.

6/19/2002 Mr. Santos hand delivered the PBS forms to the DEC office.

6/27/2002 Mr. Santos called DEC Sangesland to request permission to back fill the hole. He had test results from 5 soil endpoint samples (all non-detect). Sangesland said if they were non-detect then the hole could be back filled.

Mr. Santos was told to submit a closure report which will include the endpoint samples, photographs, waste manifests etc.

8/15/2002 Sangesland reviewed a UST Closure Report submitted by Don Carlo Environmental Services Inc. (718-857-1800).

* UST tanks were excavated and impacted soil was removed.
* Manifests were provided.
* End point samples were taken from each side wall and from the

  bottom of the excavation.
* Soil tested for Method 8021- result was all NonDetect.

Based on this report - Spill Closed

DEC Investigator Remarks:

Con Ed was on site digging and found gasoline contaminated soil.
Cross Ref Spill #9403727 relating to NYC Sanitation site at 650 West 57th St.

10/05/05 I notified LiRo (S. Frank) about the spill.AZ

ConEd says via e2mis report # 161308 of 9/30:

THIRD PARTY SPILL FOUND ON NON CON EDISON COMPANY PROPERTY. LOCATION F/O # 650 W.57 ST E/O 12 AVE .N.Y.N.Y. TIME:04:40 A.M.
FELIX ASSOCIATES CONTRACTORS WORKING FOR CON EDISON WAS EXCAVATING AND FOUND A STRONG ODOR OF GASOLINE IN THE EXCAVATION. ALL WORK IS STOPPED AND EXCAVATION IS BARRICADED. NO FIRE, NO SMOKE, NO INJURIES, NO IMPACT TO PRIVATE PROPERTY, NO SEWERS, NO WATERWAYS. M.CAMPANELLI #13447-09/30/2005

THIRD PARTY SPILL. OPERATION REVIEW :09/30?2005--06:45 A.M. SPOKE WITH SUPERVISOR TIM LANGAN ABOUT THIS TASK,AND FOUND

SITUATION AS STATED ABOVE.TIM CALLED CHEM-LAB AND SET UP THE APPOINTMENT FOR SOIL TESTING. CHEM-LAB WILL BE ON LOCATIO ON SATURDAY MORNING 10/1/2005 TO TAKE SOIL SAMPLES. THE SITUATION WILL BE ADDRESSED WHEN THE RESULTS COME BACK. THE JOB IS NOW IDLE AND PENDIND SAMPLE RESULTS. GARY SOSO 52484-09/30/2005

THIRD PARTY SPILL UPDATE. Operational update Oct 4th 2005 1:20 p.m. Reported the spill to CIG, Mr.Mc quire and ERT Mr. Duke, because I was under the impression that the third party spill was not reported to CIG. Informed them of third party spill as indicated on 9/30/2005.

Interviewed Troubleshooter dispatcher Micheal Campanelli and he informed me that he did report the third party spill to CiG on 9/30/2005 at 5:15 a.m. Chem-Lab results received oil identification-analysis indicates the presence of a substance similar to a light fuel oil
received PCB-analysis by EPA 608/8082.
aroclor 1242-< 1.0 ppm
aroclor 1254 < 1.0 ppm

OVERFILLED THE TANKS, HARD TO TELL IF WATER IS EFFECTED, DELIVERIES ARE BY BARGE: STILL INVESTIGATING
MARK CELL# 917-559-5519

DEC Investigator Remarks:

7/28/2006 Sangesland spoke to Mark at PTC. He said there was an oil spill of unknown size into a vault area around a buried tank. Sangesland spoke to "Larry" who is the property manager of "Pier 94". He says the vault is way out on the end of the pier close to the water. The vault is a heavy cement structure that is so thick there is "no way it could leak" out into the river. The oil apparently leaked from a fill port into the vault during an overfill of the tank. Larry says there was no more than 1 or 2 gallons of oil floating on top of some water in the bottom of the vault.
US Tanks(Keith-917-669-1093) has been hired to vac & clean the vault area out.
09/28/06 Rahman- I spoke with Larry, who indicated that the spill was minor)one gallon) and it was cleaned up. He would send DEC the fact sheet shortly.
09/29/06 Rahman- USA environmental was retained to clean up the oil spill and remove all oil contaminated liquid at 755 12th Avenue.Tanks were overfilled by amount of five gallons and oil stood on top of a half inch of water.USA Environmental removed approx 50 gallons of oil water mix from the floor. No excavation was needed.NFA required.

E2MIS 148125

4-29-03 @ 15:00

W teller #16086 reports that while doing maintenance work in v9263 he discovered 255 gallons of an unknown oil on the concrete floor in the structure. No visual evidence of leaking or dripping from the transformer at this time. Sewer connection not verified. Sump is concrete. Samples are being taken at this time.

Update 4-29-03 @ 16:47

EPA # nyp 004 110 490 was issued by ERT S Mahoney. An over 50 tanker has been ordered and en-route to the location. Cleanup to start asap.

4-29-03 @ 18:05

D Richards #88492 reports that there is in fact water mixed with the oil spill, (possibly 20 percent water). Cleanup is in progress at this time. He also reports that the sump pump piping is rotted and that there is aprox. a 6 inch seperation in the pipe . The part of the pipe that exits the structure was inspected and there is no evidence of oil in the pipe.

D Richards # 88492 reported to N Muldoon # 18723 that at 19:22 hrs the partial cleanup was complete with 25 gallons of oil and 200 gallons of water was removed from the vault. There was no solids removed. Final cleanup pending removal of transformer.

Update 4-29-03 @ 23:53

Lab Sequence Number: 03-03508-001

Analysis indicates the presence of a substance similar to a dielectric fluid

Lab Sequence #03-03507-001

Total PCB <1 ppm

5/12/03 cleanup was 100 % complete . The structure was double washed with slix and all liquid and solids were removed by the vactor truck. Spill tag # 18002 was also removed. Supervisor V. Mirance reported that the transformer had been replaced on 5/12/2003.

Caller Remarks:

soil sampling is being done. vac truck is en route, active leak.

DEC Investigator Remarks:

10/13/05-Vought-See also spill #'s:0506652, 0506800, 0507015 for onsite spills. Vought spoke to Joel Rogers (gannett Flemming 516-671-8440) and source of spill is possibly adjacent site. Free product entering at corner of excavation. Oil coming coming out of wall from adjacent mechanics building. Vought will perform site visit on 10/14/05 at 3:30pm and will meet with Jessica Ferngrem (516-669-1504). Rogers will be out of country.

10/14/05-Vought-Site visit by Vought. Onsite was Jessica Ferngrem(Gannett Fleming) and Jerome Kung (Verizon). Also on site were owners of 605 West 47th Street (Felix Guralnik). Free product coming from under 605 West 47th Street and flowing into groundwater in excavcation of adjacent Verizon site. Site visit to 605 West 47th street showed waste oil tanks in very poor condition and numerous puddles of waste oil on garage floor. According to Felix, he has had numerous problems with first floor tenant and operator of waste oil tanks. DEC requires: 1)removal of all debris and emptying of waste oil tanks 2)performance of soil boring under waste oil tank location. Vought will sent out soil contamination letter to Felix with above requirements.
NOTE THAT BUILDING OWNERS (FELIX AND ALEX) ARE COMPLIANT WITH DEC REQUIREMENTS BUT SPILLER IS TENANT OF FIRST FLOOR (MR. AZHAR IQBAL). AS SUCH VIOLATIONS SHOULD BE WRITTEN TO OCCUPANTS OF FIRST FLOOR.

11/2/05-Vought-Received call from ECO Jordan. Two volations were written by ECO's (failure to register PBS and failure to investigate.

05/17/06-Vought-Spill transferred from DEC Vought to DEC Ketani as per DEC Austin.

6/22/06 - Raphael Ketani. I tried to call Jessica Ferngrem [cell (516) 669-1504] (516)671-8440, but could only leave a message.

Ms. Ferngrem called back to say that everything has been cleaned up at her property 617-623 West 47 Street. She said she will submit a cleanup report very soon. She said that the property the oil came from was 605 West 47 Street.

I called up Jerome Kung (646) 483-6554, owner of 607-611 West 47 Street. He said they are in the process of trying to sell the property. He said that when it is sold, either he or the new owners will tear down the building and remove the contamination which is under a ramp. The ramp prevents the contaminated soil from being removed. Mr. Kung said that a woman under Joe Sun of DER Section B is in charge of the project for his property.

I talked to Mr. Sun and he said Sarah Andersen may be the person he is referring to.

6/23/06 - Raphael Ketani. I spoke to Ms. Andersen and she told me to keep my oil spill case open and to keep it in my name just for the sake of the spill.

7/28/06 - Raphael Ketani. I spoke to Ms. Ferngrem regarding the report. She said that Verizon and her are still working on it and that I should get it in August. I asked about any oil seepage from 605 West 47 Street. She said that they put up a barrier against the building. So there is no more oil seepage.

8/14/06 - Raphael Ketani. I talked to Jerome Kung about the spill. He said his consultant, Ms. Ferngrem, will send me the report soon for the cleanup of the oil that entered the property from 605 West 47 Street.

8/30/06 - Raphael Ketani. I contacted Mr. Kung (646) 483-6554 regarding the cleanup report. He thought that Ms. Ferngrem had sent it. I told him that I had nothing. He said that he will call her and have her send me the report.

9/18/06 - Raphael Ketani. I received the closure and tank removal report for 617-623 West 47 Street (#0506652; part of the block of properties held by the owners of 610-630 W. 48 St.) from Ms. Ferngrem. I reviewed it and found it acceptable. There were very high concentrations of SVOCs listed. When I spoke to Ms. Ferngrem about this, she said she was aware of the concentrations, but the soil looked clean and no one had any idea why the concentrations were so high. She said that the soil was removed as part of the entire remediation project.

11/10/06 - Raphael Ketani. I spoke to Mr. Kung. He said the property still hasn't been demolished.

The only issue with this case is removal of the contamination from under the ramp. This can't be done without demolishing the building.

4/5/07 - Raphael Ketani. I spoke to Mr. Kung about his property, 607-611 W. 47 Street. He said that the entire building on that site was torn down some time ago. He said that the soil was dug out down to 23 feet and so the contamination is gone. He added that a new building is now standing on the entire site and the adjacent properties. Mr. Kung said that he will send me the manifests for all of the soil that was removed. I told him that would be fine.

4/24/07 - Raphael Ketani. Mr. Kung never sent the manifests. So I made a site visit. The site now contains the Verizon truck garage. It occupies the entire site, 607-611 W. 47 St. and 617-623 W. 48 St. (associated closed spill case #0506652). I took one picture.

Based upon my conversation with Mr. Kung on 4/5/07, the closed spill case #0506652 for the neighboring property and the site visit I made today, I am closing the spill case.

4/30/07 - Raphael Ketani. Jessica Fergren of Gannett Fleming (516) 671-8440 left a message stating that she will send the soil manifests for the site.

CLEAN UP PENDING TEST RESULTS. CON ED REF # 156323.

DEC Investigator Remarks:

H.Muniz#16825, Sr. Field Operator notified the control center on 11/20/04 at 01:05hrs. to report he found approx. 8 gallons of an unknown oil and no water in M60978, which is located on the North side of W.58 ST 100' w/o 11Ave. H.Muniz#16825 was in M60978 to ID and mark phases on feeder 22M62 when he discovered the spill. There was no fire or smoke involved and no sewers or waterways were affected. H.Muniz#16825 says there is some oil in the sump. There were no injuries related to this spill and the weather conditions did not contribute to the hazard of this spill. There was no private property affected. The source and cause of the spill is unknown. There is oil filled equipment in M60978, the primary feeder cables. There is no water in M60978. There is a sump in M60978. There was a yellow environmental
tag numbered #44969 hung in M60978. There were three samples taken from M60978, one for PCB's, one for oil ID and one for Flashpoint. The samples are marked priority E. The chain of custody
form number is #DD20560. There was no initial cleanup action taken. The cleanup is pending crews and test results.

11/20/04 04:25
UPDATE : The feeder number was incorrectly given as 22M62, it is really 23M62. H.muniz#16825 notified the control center to say that after taking samples he says that there is approx. 6 gallons of unknown oil and some water, not 8 gallons as he had earlier stated. A cleanup has been setup for 11/20/04 at 07:00hrs.

Lab Sequence Number: 04-09657-001 - PCBs < 1 ppm
Lab Sequence Number: 04-09657-002 - Flash Point, PMCC > 140 deg F
Lab Sequence Number: 04-09660-001 - Analysis indicates the presence of a cable oil.

11/20/04 12:02 W. Dixon # 86121 Underground splicer/cleanup person called to report that at 11:30 the cleanup was completed. The structure was double washed with slix. 1 bag of ppe was generated as a result of this spill. The flush truck removed all liquid. The spill tag # 44969 was removed.

Caller Remarks:

DURING EXCAVATION, SOIL CONTAMINATION WAS FOUND, POSSABLY BELEIVEDTO BE GASOLINE, UNKNOWN AT THIS TIME. SAMPLES WERE TAKEN

DEC Investigator Remarks:

9/9/05-Vought-Spoke to Joel Rogers (Gannett Flemming 516-671-8440) and contaminated soil was removed and endpoint samples were collected. One fuel oil UST and one gasoline UST onsite. Groundwater was present in the bottom of the excavation. Samples were also collected from piping runs and remote fills. One groundwater sample was collected. Active construction going on. Endpoint samples did show TAGM exceedences. Site is DEP E site and vapor barrier will be installed. Groundwater at 12' below grade. Groundwater samples were below TOGS and therefore no passive ventilation system. Site will be excavated down to bedrock over most of site. Minor PAH exceedences attributable to fill material. One soil sample had 63000ppb napthalene. Additional soil excavation required at area of excavation. After excavation for foundation is complete sidewall samples and bottom groundwater samples will be collected. Dewatering will occur for building construction. Groundwater samples show minor PAH and MTBE exceedence. See also spills 0506800, 0507015. Two additional 550-gallon USTs discovered. DEC requires: soil endpoint samples and groundwater samples upon reaching limits of excavation for foundation

10/13/05-Vought-Spoke to Joel Rogers and see also spill #0506652, 0506800, 0507015 and 0508375. All three spill numbers will be addressed in one report. Three spill numbers will be consolidated once bedrock is reached and dewatering begins.

10/18/05-Vought-Site visit by Vought on 10/14/05. Onsite was Jessica Ferngrem(Gannett Fleming) and Jerome Kung (Verizon 646-483-6554). Also on site were owners of 607 West 47th Street (Felix Guralnik) See also spill #. Free product coming from under 607 West 47th Street and flowing into groundwater in excavcation of adjacent Verizon site. Site visit to 607 West 47th street showed waste oil tanks in very poor condition and numerous puddles of waste oil on garage floor. DEC required Verizon: 1)collection of one endpoint soil sample from sidewall under 607 West 47th st 2)submission of analyticals of free product sample 3)regular interrmittent sampling of dewatering effluent as remedial method 4)submission of PBS registration. NYCDEP discharge permit obtained by Verizon. Vought called Joel Rogers and left message that he will be faxed a copy of the letter. Vought also faxed copy to Ferngrem and emailed to Kung.

10/21/05-Vought-Received call from Greg Earnst (Gannett Flemming). Vought returned call and left message to return call. Vought spoke to Earnst and west side of 607 West 47th Street had product coming from under building. Vought did not require new spill number due to existing spill number 0508375. Product will be vaccumed out and underpinning will be installed. Paint on membrane will be applied to underpinning and voids will be filled with cement slurry.

10/25/05-Vouight-ECO will be performing site visit to 607 West 47th Street on 10/24/05. Vought received call from Joel Rogers. Vought returned call and left message to return call. Vought received second call from Rogers. Vought returned call and spoke with Rogers.

11/15/2005-Vought-Spoke with Joel Rogers and he will include tank closure report with above requirements and report will be submitted by 1/15/06.

05/05/06-Vought-This spill closed and referred to open spill #0506652 at same location.

BELIEVED TO BE A THIRD PARTY SPILL-SAMPLE TAKEN CLEANUP PENDING

RESULTS. CON ED #136736.

DEC Investigator Remarks:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "FOLEY"
Con Ed e2mis #136736:

4/30/01 14:30 hrs.

Carl Bruce #89045, Emergency Supervisor #9, reported at 14:11 hrs. that B. Fergus #12602, Troubleshooter, reported at 14:00 hrs. that he found approx. 75 gallons of unknown oil in service box SB10817 located in front of 419 West 56 Street. According to Mr. Bruce, the oil is possibly home heating oil. #9 was responding to an outage at 419 W 56 Street when they discovered the oil. The service box was full to the top with oil. The source and cause of the spill is unknown but possibly due to a fuel oil delivery to 417 West 56 Street. Checked conduit plate #30-E-2 and verified no sewer connection. Only secondary cables in service box. Concrete sump not verified. Spill tag #22353 installed. Samples will be taken for PCB, Oil ID and Flash point. Chain of Custody AA21631 issued. No initial cleanup action taken other than placing pigs around service box to prevent migration. Cleanup pending flash point analysis.

UPDATE @ 16:51 HRS.

Lou First, EH&S Manager, reported at 16:22 hrs. that he is on location with ERT Bill Capune. They have reevaluated the condition of the structure and based on the dimensions of the service box and our discussion it was determined that there is approx. 1/4 inch of oil on top of approx. 500 gallons of water. This equates to approx. 3 gallons of oil. He stated that the fluid is at the top of the structure and that if the cover were to be placed back on, the fluid would probably go onto the street. The crew will therefore remain on location until relieved by an underground crew. It was also reported that the courier arrived at approx. 16:35 hrs.. Samples will be brought to Astoria for analysis. A discussion of the cleanup then ensued.

Environmental Desk will make arrangements for cleanup of this structure.

UPDATE: @ 17:50 hrs.

Environmental Desk called Clean Harbors at 17:10 hrs. to make arrangements for cleanup of this structure. Clean Harbors confirmed at 17:25 hrs. that they would be able to clean this structure on the 3 to 11 pm shift. Notified Carl Bruce, #9 Supervisor and Flush SOAX of status of cleanup. Note: Clean Harbors will pump service box and do cleanup but they need results of lab analysis before they leave location. Flush SOAX on midnight shift will provide information to Clean Harbors.

05/01/01 02:30 hrs

Flash Point results: (214) Units: Deg. MDL: F

05/01/01 02:30 hrs lab seq #01-05300-001, PCB <1.0 PPM

5/1/01 21:06 Received lab results lab sequence # 01-05324-001

Analisis indicates the presence of a substance similar to a degraded light fuel oil.

UPDATE: 5/09/01 @ 18:29 HRS.

A Chem Lab technician called requesting information about a sample from this service box. The Tech. wanted to know what type of sample we wanted, PCB or Oil ID since he didn't have enough of a sample to do both tests. From our discussion I discovered that he was referring to a different Chain of Custody form. The Chain of Custody form issued was #AA05251, dated 5/09/01 and requested by Mike Melendez, UG North Supervisor. Apparently the manhole was re-sampled again on 5/09/01. I instructed the technician to do a PCB test.

UPDATE: 6/27/01

Lab Sequence #01-05543-001

Oil Identification Analysis by NYSDOH 310-13 (Hydrocarbon Scan)

Insufficient amount of sample extracted to perform oil identification.

Lab Sequence #01-05542-001, Total PCB = < 1.0 ppm

6/28/01 13:47 J. Shin # 85201 Underground (cleanup) supervisor called to report that the cleanup was complete 100% at 13:30. The tanker had removed 550gallons of a water/oil mixture. There was no solid debris. The structure was double washed with slix. & spill tag # 18666 was removed.

163305. 03-11-06 15:45HRS. R Valenzuela #92468 Flush Superviser reports that at 15:28 hrs he discovered 3 gallons of heating oil mixed with 100 gallons of water in service box 10817 located at 417-419 West 56 St. He was at this location to assist emergency desk with verification of oil in street from a third party spill. As per Valenzuela an oil delivery was made 3 days ago when a spill occurred . Oil remained in street and made its way into Con-Ed service box. No fire or smoke is involved and no injuries were reported. No sewers or waterways were affected and weather conditions did not contribute to the hazard of the spill. The source of the spill is known to be a third party oil vendor. and no private property was affected. Environmental Tag # 51125 was hung and 2 liquid samples were taken (PCB and FLASH POINT), using chain of custody form # EE13717. Ther is 100
gallons of standing water with no visible movement. There are no sewer connections or sumps .
ERT T.Regan 07430 was notified as was CIG C.Haynes # 87736. at 16:05 hrs. G Anelli

UPDATE 3-11-06 16:39. ALL STATE POWER VAC contacted at this time to set up clean up . I was informed by Donald (superviser) that a crew will be on location within 2 hours.
Since there are no lab results at this time ,the clean up will be treated as 50-499ppm . ERT notified at 16:45 hrs ,spoke to B Capune #85485 . G Anelli 14059

UNK HOW SPILL GOT IFO ADDRESS - CON ED PUT DOWN PIGS FOR CLEAN UP - SPILL IS CONTAINED IN A POTHOLE BETWEEN THE CURB & A CON ED SERVICE BOX - THIRD PARTY SPILL - REF #136582

DEC Investigator Remarks:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "O'CONNELL"
CON ED E2MIS REPORT 4-20-01

Approx. 1gal. of possible fuel oil had spilled on the sidewalk in front of 417W 56th Street. It appears that there was a recent fuel oil delivery to this building and the oil leaked onto the sidewalk and had migrated towards the curb and our service box. The oil is presently contained in a small pothole between the curb and our service box. He cannot get access to the service box due to a car parked over it.

#9 crew placed absorbent pads and pigs down to contain the spill and prevent any migration into our service box. The crew is also to inform the building owner/superintendent of the spill.

As per ERT this is a reportable spill.

Cleanup was completed at 21:50hrs.

25 gals unk material on 25 gasl of water - in an underground structure

no con ed # yet

DEC Investigator Remarks:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "O'CONNELL"
Con Ed e2mis no. 141-758 notes:

On 3/11/02 at 11:55 H. Anderson # 141758 of the cable dept. reported that at a manhole #-47123 that is located at the NEC W. 48 St. & 12 Ave. he found an oil like substance mixed with water in the structure. He also states that there is a tag already in the structure & was calling as per the status. He gave me the tag number 28473 & structure number. I tried to look up the incident & found no record.

I informed Bob Pellegrino # 38620 Environmental sr. specialist of the situation. He tried to look up an incident on this structure as well & found nothing, so he advised me to have the employee make another report of the substance & remove the old tag.

He reports that he found 25 gallons of an unknown oil mixed with 25 gallons of water. He states that there was no sewers or water ways affected. & no sewer connection in the structure.

The oil is from an unknown souce & the cause is also unknown.

He also reports that he will call back with a new tag number & chain of custody # because he has neither in the truck at this time. He was also infomed that 2 samples will need to be taken.

Update 3-11-02 @ 21:09 hrs.

Lab Sequence Number: 02-02020-001

Insufficient amount of sample extracted to perform oil identification.

UPDATE: 3/19/02

John Comerford #08212 reported at 12:25 hrs. on 3/12/02 that the manhole was cleaned on 3/12/02 by the following crew: T. Elphick #08204, S. Abandolo #87315 and M. Pluchino #87326. One drum of solid debris including PPE was generated and removed. The walls and floor were double washed with Slix and rinsed with the Vactor truck. Spill tag #00771 was removed. The tanker removed 500 gallons of oil and water from the structure. The cleanup was completed at 12:10 hrs.

Con Ed e2mis #137345:

5/31/01 11:55 HRS.

Frank Popolizio #00042, Project Manager Major Services, reported at 11:25 hrs. that Peter DePalma of Rock Rose Construction reported at 11:10 hrs. that an unknown oil and water is coming into his excavation site. There is a service box adjacent to the excavation which is located on West 48 Street 150 feet east of 12th Ave on the north side of 12th Ave. The service box is collapsed approx. 8 inches from grade. The Contractor suspected that the oil & water was coming from the grating box. Frank Popolizio traced the oil and water that was running down the street towards our structure & the excavation to a building located at 605 West 48 street, which is possibly a garage. He suspects that there was a diesel fuel delivery at this location and it spilled onto the sidewalk & street. Someone washed the oil down the street with water and it migrated to our service box and the excavation. This a 3rd Party Spill. The source of the spill is from a possible diesel fuel delivery and the cause is unknown. Frank Popolizio was at this location for a field meeting with the Contractor to discuss problems with the building. He reported that there is approx. 5 gallons of oil and approx. 10 gallons water on the surface of the service box area. He has no access to the service box.

UPDATE @ 14:08 hrs.

Red Wagon crew arrived at location to investigate and to take samples. Environmental Desk (E.D.) called Shawn Barrett of Clean Harbors at 13:30 hrs. and requested their services to clean this location. He will send a 4 person crew and Vactor truck to location. E.D. also called for a photographer to take pictures of this incident. E.D. also called the Corporate Courier at 14:02 hrs. to pick up the samples.

UPDATE @ 18:30 hrs.

Clean Harbors arrived on location at approx. 17:15 hrs. Underground North crew to meet Clean Harbors to assist in cleanup if required.

EPA # NYP 004 083 929 issued by ERT, Bill Capune.

UPDATE 6/1/2001 @ 02:40 HRS

WHILE REMOVING BASEMENT FLOOR SLAB FOUND CONTAMINATED SOIL AND ODOR: WILL BE CALLING CLEAN UP COMPANY

DEC Investigator Remarks:

1/19/07 - Raphael Ketani. I made a site visit at 2:15PM and met the owner, Julian Ramono, and his lawyer, Michael Fleishman (212) 695-8100. We went down to the basement. The basement floor had been completely removed and new sewer pipes had been installed. We went to the back of the basement. Mr. Ramono said that there used to be a bathroom here. The odor of a cleaning solution was obvious in the entire basement, but not strong. I took PID meter readings. At the back wall of the back area of the basement, the readings were 2800 ppb. The ambient air in the back basement was about 1800 to 1900 ppb. Vapors at the floor and at the opposite wall to the very back were about 2100 ppb. I measured the vapors as we went to the front of the basement. The vapors in the open trenches dropped to 1500 ppb in the middle area and then to about 990 ppb at the front end of the basement in the trench. I told Mr. Ramono that he needed to hire an environmental firm to start an investigation. He said he would.

1/23/07 - Raphael Ketani. The owner is Palazzo Realty, Inc., 802 9 Avenue, NY, 10019-5635. I sent Mr. Ramono a CSL. The block and lot are 01044/0002.

2/16/07 - Raphael Ketani. Mr. Khouri of Langan Engineering (212) 479-5450 called and said that 3 soil samples were taken at the site and PID readings by Professional Environmental Services. The PID readings were done with a ppm PID meter and didn't detect anything. The soil samples had some hits of SVOCs, but everything was well below the cleanup limits or non-detect.

I told Mr. Khouri that I had high PID readings during my visit. I asked him when the sampling was done. He said on 1/22/07. I told that this didn't make sense as I had high detections with the PID and I definitely smelled something. I asked him to have the consultants go back and take 3 more samples and test for a wide range of volatiles, instead of just method 8260B. He said he will talk to the owner of the property and the consultants.

Mr. Khouri called me back at 2:40PM and said that he spoke to Mr. Ramono. He said that Mr. Ramono told him the vapor barrier system and passive system would be too expensive. Instead, Mr. Ramono wanted to install an active venting system under a new concrete slab. I told Mr. Khouri that as along as the system can maintain a negative pressure under the slab and collect the vapors and vent them, then the system will be an acceptable means of managing the vapors. I told Mr. Khouri to do the calculations for the active system to see if it is feasible, and, if it is, then to submit a set of engineer approved plans. He said he would do this.

2/22/07 - Raphael Ketani. Julian Ramono called asking what should be done regarding the vapors at the site. I told him what I had told his consultant, Mr. Khouri. I said that, initially, we should find out whether there are volatiles in the soil that were not previously detected by the other analytical methods. I told him this should happen before we take any steps towards possibly installing a vapor barrier and venting system. He seemed to agree with me. I told him that 3 soil samples should be taken in the back area of the basement and that each sample should be tested for the full (62 analyte) suite of VOCs. He said he would have this done.

I received a call at 2:41 PM from Mike Cassidy (917) 714-5083. He said he will take 3 soil samples for volatiles. He asked what method should be used. I told him to talk to the laboratory he chooses and ask them what the advantages are between the various methods. I told him our concern was to find what was vaporizing in the basement and to test for the suite of 62 analytes to try and find it. He said he will find the appropriate method and do the sampling.

3/9/07 - Raphael Ketani. I received a call from Mr. Cassidy regarding the 3 soil samples that were taken. He said he had the results and that there were only a few hits for each sample and that all of the hits were well below TAGM limits. I told him to send me the analyticals.

I received the soil analytical results and almost all of the analytes were non-detect. There were several VOC hits in 2 of the 3 samples, but these were very far below the TAGM limit.

3/12/07 - Raphael Ketani. I spoke to Mr. Cassidy about the analytical results. I told him that the results were very good. However, I told him that a plan had to be submitted by an engineer which deals with the high vapors. Mr. Cassidy said he will talk to Mr. Ramono. He added that Mr. Ramono was already looking at the idea and costs of installing a vapor barrier of some kind.

4/4/07 - Raphael Ketani. John Capola (914) 946-4300, ext 106 of Carnel & Assocs. called and left a message. He said he had spoken to Mr. Ramono and understood that some kind of vapor barrier was needed for the site. He said he wanted to put a "rat slab" with a passive vapor system. I tried to call Mr. Capola, but could only leave a message that the vapor barrier was the only issue left for the case and the last requirement of DEC.

4/10/07 - Raphael Ketani. The plan for the vapor barrier (which mentions a subslab exhaust system, but doesn't show it) system was received yesterday.

Based upon the analytical results, the plan for the vapor barrier and the other documents in the case file, I am closing the

spill case.

11/27/07 - Raphael Ketani. I received several e-mails last week from Mark Tibbe, Geologist Tech III Region 2, regarding work that is taking place next to the site. In summation, the situation is that there is a former transit bus depot site (spill #9613939) next to 802 9th Avenue. The bus depot was torn down and the contractors began to treat the soil underneath. They pumped a treatment solution. However, the solution and some oil started showing up in the soil of the unslabed basement. The MTA will test the oil to see whether it is the same type of diesel fuel that the buses used to run on. If there is a match, then the MTA will take it upon themselves to seal the basement at 802 9th Avenue.

The e-mails are below:

You took a sample of the oil to compare with the product at 54th Street?

>>> "Jones, Eric" <Eric.Jones@nyct.com> 11/21/2007 2:18 PM >>>
There was oil and water in his basement which he stated occurred during the time of our injection in the area close to his building.

Eric Jones, CCM

Email: Eric.Jones@NYCT.com

Eric,
I am not sure what to do. The spill (attached) is closed, but you stated that there was still a problem at the site, right? Could you please explain exactly what transpired that prompted your call to me yesterday.
Mark

>>> "Jones, Eric" <Eric.Jones@nyct.com> 11/20/2007 12:30 PM >>>
Mark,

Pursuant to our conversation, here is the address for the bldg. located at the SW corner of our property. According to the bldg. owner there is an open spill number from earlier this year when he first reported odors in his basement to the DEC. Please let me know the spill number and the

status of any DEC response/enforcement action.

If our culpability is determined (GC fingerprint and/or soil sampling) and our attorney concurs I will have a remedial design prepared for the installation of a vapor barrier with passive vent pipes prior to the building owner pouring a pre-planned concrete floor slab in the basement.

Eric Jones, CCM

WHILE ESCAVATING DUG UP THE ABOVE MATERIAL - POSSIBLY FUEL OIL

DEC Investigator Remarks:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "O'CONNELL"
e2mis no. 150-840:

On October 21, 2003, Construction Management Frank Santos reports that at 10:55 hours contractor Felix Industries (working for Con Edison) was excavating to install a new 4" gas service and found approximately 4 gallons of unknown black dirt (which spells like fuel oil) in an excavation. Chem. Lab was also notified at 11:05 hours to respond to the location and take samples.

10-29-03 SOIL CLEANED UP, PUT IN CONTAINER AND BROUGHT BACK TO THE YARD AS PENDING ANALYSIS. CHEM LAB TOOK SAMPLES FOR PCBS AND TPH. RESULTS SHOW THAT THERE ARE NO PCBS AND 64 PPM TPH WHICH IS VERY LOW. WASTE WILL BE DISPOSED OF AS NON-HAZARDOUS OILY DEBRIS. CLEAN UP COMPLETE.

OIL FOUND IN THE ABOVE VAULT BY CON ED WORKERS, CON ED SPILL 3149581 - SAMPLES TAKEN, CLEAN UP AWAITING TEST RESULTS

DEC Investigator Remarks:

E2MIS 149581

On 7/31 @ 11:00 Curtin # 18450 of I&A while working in V-4520 on FDR 21M25 he discovered approx 5 gallons of an unknown oil that may be cooking oil (because the structure is in front of a Restaurant) atop 45 gallons of water. The reason for being at that site was to investigatre a defective pump. He found the sump pump was not running and saw that the wiring was missing. The spill was on the concrete structure floor. Two samples will be taken for PCB and ID and courier will be called for pickup. No initial cleanup actions taken at this time.

Update: Lab Results Posted @ 18:37
Lab Sequence Number: 03-06343-001
Analysis indicates the presence of a substance similar to a dielectric fluid.
Lab Sequence Number: 03-06344-001
PCB < 1.0 ppm

Update: 11/18/03 @ 09:29 hrs.
As per discussion with R. Pagano #48703 no cleanup action was taken on 11/12/03. The vault was de-watered by an over 50 tanker for #9 to investigate the smoking vault condition. #9 reported that the transformer looks good and there is no sign of any leak.
The I&A to follow up and check the transformer.

11/19 @ 14:10
At 14:02 Diaz # 09784 of I&A reported that the cleanup wa completed as of 13:45. No solid waste was removed. All liquid waste was removed by the Vactor truck. The structure was double-washed with degreaser-SLIX. The Environmental tag # 35971 was removed.
There was no visible sign as to the source of the spill.

11/4/02 TJD

Citizen complaint regarding unreported spill at 364 W51st, manhattan. FDNY was at location 11/1/02 and spread absorbent. Demeo

on site 11/2, after interviewing complaintant and building tenants the managing agent was contacted (Big Apple) and the fuel delivery company was identified, Petro Oil. Roberet Carini (Oil manager - Petro Oil) was contacted and directed to return to location and clean spill which is estimated to be less than 10 gallons of #2 oil. Repeated calls from original complaintant led to subsequent site visit 11/3. A cleanup was performed but was not satisfactory. Strong petroleum vapors are reported to still exist. Surficial cleaning of stained concrete and sampling of soils or excavation of impacted soils without sampling is required (cracks in concrete are evident).

11/4/02 TJD

Demeo spoke with Bob Carini of Petro and notified him cleanup performed was not adequate. Petro has retained Milro Associates to perform remainder of Job. DeMeo spoke with Milro (Paul) and directed him to open concrete and remove contaminated soils and to a clean endpoint. Samples are required.

COPY ECO'S.

12/27/02 TJD

Report from Milro reviewed. All petroleum impacts from overfill have been remediated. Concrete landing excavated and petroleum impacted soil removed. Endpoint samples below TAGM. Spill closed.

SMALL OIL SPILL Con Edison Incident No. _120252_____

CLEANUP CHECKLIST NYSDEC Spill No. _98-08139_____

Name of person completing checklist: V TRAVIGLIA, SPLICER, 52045, H WATSON, SUPERVISOR, 10161

Con Edison Operating Department responsible for spill cleanup: TRANS OPS

(1) A small oil spill is a spill of oil containing less than 50 ppm PCBs that does not meet the criteria for a de minimis spill
and satisfies either of the following

conditions:

? It is totally contained in an impervious structure, such as a manhole, vault, or moat, or

? It meets all of the following criteria:

- No sewer or waterway is affected, and

- No private property is affected, and

- No personal injuries are involved, and

- Cleanup is completed within 72 hours of the spill discovery, and

- Less than 50 gallons of oil, petroleum product of any kind, or dielectric fluid is spilled.

(2) Material spilled/discovered:

0 Oil (type); PCB concentration: less than 50 ppm; known / unknown.

X Dielectric fluid; PCB concentration: less than 50 ppm; known / unknown.

If unknown PCB concentration, was sample collected? X Yes 0 No

Environmental Detailed Incident Report

(3) Sample submitted for analysis? X Yes Sample ID No. 98-10500 0 No

For what parameters? X PCB X Benzene 0 Other Parameters

Copy of chain of custody form attached? X Yes 0 No

(4) Amount spilled/discovered:2 GALLONS If leak/spill is continuing, rate N/A

(5) When was spill discovered? Date: 10/2/98 Time: 11:15

(6) Location of spill. (Be as precise as possible. Include cross streets, manhole numbers, equipment box numbers, etc., as appropriate.)

MH #61724

W 47TH ST & 12TH AVE.

0 Sketch attached

(7) Source/cause of spill. (Be as precise as possible. Include equipment numbers, if possible.)

X Unknown

(8) Description of area affected by spill (include dimensions as appropriate)

MH FLOOR

(9) Containment/Cleanup Activities (per GEI 2.11, 2.13, 2.16, 3.2, or 3.3) 0 Sketches attached.

0 Tightened valve.

0 Placed drip plan.

0 Sealed leak.

0 Blocked nearby sewers/drains with spill kits.

0 Removed/recovered liquid/solids.

0 Used absorbents to remove residual fluids.

0 Removed contaminated vegetation.

X Removed visible traces of oil.

X Washed stained areas.

0 Excavated contaminated soil, bluestone.

0 Other

0 See attached contractor report.

(10) Identify who performed cleanup:

0 Con Edison personnel/department?

0 Name of contractor CLEAN HARBORS

0 Contractor report attached.

(11) Cleanup completed on Date 10/4/98 Time* 0945

*Note: If the cleanup is completed more than 72 hours after the spill was discovered, the spill is a large oil spill.

(12) Con Edison personnel directing cleanup H WATSON JR., 10161

1/2 gal of dielectric fluid. drip rate of 1/2 gal per hour. spill source is feeder #38 mikes or 38 mikes 74 spilled onto soil. clean-up is in progress. con ed ref # 161354.

DEC Investigator Remarks:

161354. 10-3-05 @ 22:20. S Callinan # 57798 reports that while digging an excavation on the e/s west end av 20' n/o w 59 st, he discovered that 1/2 gallon of transmission feeder fluid had leaked from a feeder (either 38m73 or 38 m 74) into the soil of the excavation. There was or is no smoke or fire involved. No sewer or waterway affected. No injuries and weather had no affect. There is a drip rate of 1/2 gallon per hour. No private property affected. Access anytime. S Callinan # 57798 has called Transmisiion Operations to respond to the leak and is utilizing a contractor on location to excavate the affected soil. J Moran # 01182.

Update 10/24/05. A clamp was installed on the midnight shift and a repair barrel was installed on 10/4/05. All visibly contaminated soils were removed by All State Power vac
under the direction of CCI L. Crilley. DF fluid loss estimated between 1/2 and 1 gallon. All soil down to a series of concrete ducts and gas main was removed. No post samples were taken for this reason. This was confirmed by M&CS CCI John Terlecki. See email below.

Mike- as discussed all efforts listed below have been done , the ducts and 20"gas main prohibit sampling beneath the leak, the leak itself was barely visible.
We will be restoring the area by Wednesday night. Thanks- JT

John,
Please call me on my cell phone prior to restoration. My understanding is that the area below the leak location contained a series of concrete ducts that we would be unable extract soil samples. I know that we removed whatever contaminated soils there were and then powerwashed the ducts. If this is the case then we could restore. If not, we should arrange for some verification sampling. I'd like to talk to you in any event prior to restoration. Thanks. (347) 386 - 5506

DEC Investigator Remarks:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "DEMEO"

SEE ALSO SPILL # 0330069

9/24/02 TJD

Diesel fuel leaking from tunnel wall from an unknown source. Location of leak is western tunnel wall beneath 45th street between 10th and 11th Ave. Demeo has site meeting 9/25 to investigate spotential source.

9/26/02 TJD

Demeo inspected site with Patrick Teeter (Amtrack). Inspection consisted of accessing tracks at 38th Street and walking along track to impacted area north of 45th street. Track Bed is approximately 25 feet below street level. Oil was observed dripping

slowly from bedrock fractures along west wall. Oil suspected to be either diesel or #2 Oil is running down from rock fracture along rock face and accumulating both on ground surface and in debris lying along the track bed. The petroleum is also impacting a catch basin adjacent to track with an unknown discharge point.

Two buildings along 45th Street were inspected as potential sources. The first a bus Company (PBS 2-602720) has (2) Diesel UST's. The second an apartment building (PBS 2-605827) has (1)

#2 Oil UST. No obvious sign of a problem at either location and no other obvious sources in immediate vicinity of spill. Both above facilites sent letters requiring owners to test tanks. Awaiting results.

5/8/03 TJD

Bus Garage passed tank test. Apt. Bldg failed test. See also spill 0206999.

4/15/04 TJD

Investigation of the apartment building UST revealed they were not the source of the petroleum disharge which is impacting the Amtrak ROW. Upon completion of the investigation of 525 West 45th Street, DEC again contacted the Bus Garage (Coach USA) to inform their management additional investigation of their property was necessary. Coach USA was given the option of performing the necessary investigation with their contractor of choice or allowing a state contractor access to the property to conduct an investigation on DEC's behalf. Coach USA decided to perform the investigation themselves.

Coach USA retained the services of Bristol Contracting to perform the required investigation. The initial investigation by Bristol revealed a loose pipe fitting at the bottom of the remote fill spill bucket. The two UST's at the bus garage were filled via a single remote fill. The remote fill was directly connected to the 2000 gal UST, a crossover line was connected to the 4000 gal UST. This design created significant backpressure during deliveries. Excavation in the vicinity of the remote fill revealed a large volume of contaminated soils. The contaminated soils extended to the south & east beneath the driveway area.

Upon excavation of approximately 50 cubic yards of contaminated soils down to bedrock, several fractures were identified as suspected pathways for the product to migrate to the railway cut where diesel fuel was leaching out of the rockface and accumulating along the Amtrak Right Of Way. The connection between the bedrock fractures and the impact area was confirmed by several dye tests.

Upon confirmation of the hydraulic connection, Coach USA was informed that the Department rrequires them to remediate all petroleum contamination both on their property and off-site on the Amtrak property. A field meeting with all involved parties was held on April 1, 2004.

A new spill (0330069) was reported following discovery of the contaminated soils beneath the remote fill on 2/23/04.

A letter of responsibility, Stipulation Agreement and a corrective action plan was mailed to Coach USA on 4/15/04.

2/23/05 - Austin - Project reassigned from DeMeo to Tipple

8/23/05 - Raphael Ketani. Case transferred to Jeff Vought.

9/19/06 - Obligado - Site site was left off the original list of sites to be transferred to Obligado from Vought. Transfer from Vought to Obligado. Was previously researching case under a different spill number 0207355. Closed that spill number and consolidated with this open spill number 0206549.

04/30/07-Vought-After review of notes above including fact that Coach USA was the source as owner of remote fill that was the source of the spill, Coach entered a Stipulation Agreement under spill #0330069 this PIN closed and case referred back to DEC Obligado who reopened spill #0330069. DEC Vought, DEC Obligado, DEC Piper and DEC Urda had meeting and DEC Urda will not close case referral originally submitted by DEC Demeo until follow up is received from Obligado. Spill closed by Vought.

10/01/07-Vought-Recevied notice from AGs office that Coach payed NYS amount of 2999.86 for cost of cleanup. Costs were possibly low as per DEC Austin. Vought called DEC Demeo as per Austin to confer that only 2999.86 was incurred by state.

11/27/07 - Obligado - After review of the file, this spill should be reopened because Coach USA has not provided documentation that remediation of the Amtrack right of way has been performed as per September 23, 2004 letter from Tim Demeo to Richard Vihonski. This spill number is also listed on the Stipulation Agreement, which Coach signed and agreed to remediate both spill numbers 0206549 and 0330069. This spill number is reopened.

I called Richard Vihonski (201)225-7557 to get an update on Demeo's requirements. Left message to call back the DEC.

11/30/07 - Obligado - Called Mr. Vihonski again. Left a message.

12/12/07 - Obligado - Have not heard from Mr. Vihonski. Called again and left a message to call back DEC. As Mr. Vihonski has not been returning my calls I trided calling the Coach President - George Greeve 201)529-3666 (ext 1306). I left a message to call back the DEC.

George Greeves called me back shortly after. I discussed with him the 2 spill numbers and the September 23, 2004 letter from DEC DeMeo. He asked me to fax the letter to him and he would contact the appropriate person. I faxed him the letter.

2/27/08 - Obligado - Received a voice mail from Mr. Greeves. He was following up on our previous conversation. He inquired if Mr. Vilhonski had taken care of our requirements

3/3/08 - Obligado - Called back Mr. Greeve. I left message saying the DEC requirements have not been met.

3/26/08 - Obligado - Had meeting with Richard Vilhonski (Coach USA), Jinesh Sheth (Bristol Contracting), and Dennis Occonner (Bristol Contracting). According to Richard, a package was submitted to the DEC in response to the September 23, 2004 letter. This was submitted to Michelle Tipple after Tim DeMeo left. They said the package addressed most of these comments in the letter and they will resubmit it to me within 4 weeks.

8/19/08 - Obligado - Email from Jinesh. They will submit the report via cd.

10/22/08 - Obligado - AFter review of report emailed Jinesh with following comments:

"Please submit a revised and scaled Figure 2 Site Map that shows all of the following:

- Entire layout of property between West 45th and 46th St, including adjacent Amtrak property.
- Location of existing USTs, dispensers, lines, and fills ports.
- Location of former abandoned/removed USTs
- Boring/Monitoring Well locations
- location/extent of surface spill on Amtrak property
- Any other pertinent information

Please also revise Figure 3 and Figure 4 so that the initial/final extents of excavation and soil sampling locations are overlaid on the new site map.
Thank you. Please revise the figures and resubmit them to me as pdf files via email within 30 days. Please call me if you wish to discuss this matter."

3/26/09 - Obligado - Still have not received revised maps. Sent email to Jinesh requiring maps within 15 days or case would be referred to legal for enforcement.

6/10/09 - Obligado - Reviewed revised Maps submitted by Jinesh on 4/20/09. The maps address the above comments. After review of all documentation I called Jinesh for some follow up questions. 1) Where does the drain pipe on the amtrak property go? According to Dennis Occonor who was also on the call, those pipes were damaged and not functional. 2) Did they broom sweep and inspect the bedrock on the amtrak property for fractures or possible conduits, as they had done on the Coach USA property. They said they did and they did not find any fractures or conduits through which the product could have traveled. The bedrock was previously blasted out in order to build the tunnel and it acted as a basin to trap the product. 3) Are there walls or foundations north and west of the remote fill that would have prevented migration in those directions. According to Jinesh, yest there were building foundations to the west and north down to bedrock that prevented the movement of product in those directions. They also opened up the tank area to inspect and retrofit tanks and lines. They did not see any signs of leakage and they found no evidence of contamination. 4) Finally, I asked Jinesh to provide a photograph of the amtrak outcrop to show there is no more leakage.

6/29/09 - Obligado - Received photodocumentation of clean outcrop. AFter discussion with DEC Tibbe, sent No Further Action letter to Coach USA, cc to Jinesh.

retire feeded cables leaking.clean up pending results 130085

DEC Investigator Remarks:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "O'CONNELL"
e2mis 130085

0905, 2/23/00 - Small amount of unknown dielectric oil found on concrete floor of station basement. Estimated quantity less than 1 fluid ounces. Retired feeder cable directly above spill with open end cut showed evidence of dielectric oil leeching out of cable. Further inspection of area showed second cable in same

condition with small spill of unknown oil on concrete floor below. Amount again estimated at less than 1 ounces. No oil entered any waterways, sewers or trenches.

Samples to be taken of fluid for analysis. Station could not collect sufficient quantity to determine PCB content. Oil spill to be treated as possible PCBs for cleanup.

Vendor called in to perform clean up. Vendor Clean Harbors completed cleanup at 2000 hours. The transformers the cables were connected to were removed from service over 15 years ago and the cable ends left cut. Over time a small amount of dielectric

oil leaked from the cut ends. The ends of the cables were now capped to prevent fluid spills.

6 OUNCE SPILL OF MERCURY LAYING ON TOP OF OF OLD STEAMFLOW METER UNKNOWN CAUSE SPILL CONTAINED AND CLEANUP SCHEDULED FOR 06/04/97 AREA HAS BEEN SEALED

DEC Investigator Remarks:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "ENGELHARDT"

@ 12:12 HRS A.TIAO REPORTED FINDING A MERCURY SPILL BEHIND THE H.P. PLANT CONTROL ROOM PANEL. IT LOOKS TO BE AN OLD SPILL FROM A RETIRED STEAM FLOW METER. I ESTIMATED APPROXIMATELY 6 OZS. IN THE AREA. WE LOCKED THE CONTROL ROOM DOORS TO DENY ACCESS TO ALL PERSONNEL.THE ASTORIA CHEMICAL LAB. WAS NOTIFIED OF THE SPILL AND WILL REPORT TO WEST 59 ST. FOR THE CLEAN UP ON 6-4-97.@ 12:57 NOTIFIED CIG MR. MASSERIA OF THE INCIDENT.AT 12: 00 HRS. ON 6-04-97 THE CHEM LAB PERSONNEL COMPLETED THE CLEAN UP OF MERCURY IN THE HP CONTROL ROOM. THE MERCURY VAPOR READING IN THE CONTROL ROOM IS .015 AND SHOULD ONLY BE ENTERED WITH RESPIRATOR PROTECTION. THE CONTROL ROOM DOOR HAS BEEN RE- LOCKED TO PREVENT ACCESS BY ALL PERSONNEL. REG #992-7-0022-000 ISSUED BY STATION TO REMOVE RETIRED MERCURY METERS FROM STATION. THE CONTROL ROOM HAD BEEN CLOSED FOR 7 YEARS.
THIS INCIDENT WAS REOPENED ON 9/23/99. WHILE PLANNING THE REMOVAL OF THE HP CNTL ROOM AND ASSOCIATED EQUIPMENT, ADDITIONAL FREE MERCURY WAS DISCOVERED AROUND THE METERING EQUIPMENT AND THE FLOOR BELOW. THE CONTROL ROOM AREA HAD BEEN OPENED AND WELL VENTILATED ON 9/16 FOR THAT REMOVAL PLANNING. PREVIOUS AIR MONITORING BY CHEM LAB HAD INDICATED READINGS WELL BELOW THE '.1 MG/CU METER' PEL.. THE AFFECTED AREAS WERE ROPED OFF FOR CHEM LAB CLEANUP.
STATION EHS AND OUR 'EI' GROUP DECIDED THAT THIS NEW MERCURY FINDING WAS NOT ANOTHER SPILL FROM THE SAME EQUIPMENT, BUT PREVIOUSLY SPILLED MATERIAL THAT WAS NOT VISIBLE DURING 1997. THE SUSPECT MERCURY CONTAINING EQUIPMENT DID NOT INDICATE ADDITIONAL LEAKAGE.
ASTORIA CHEM LAB PERFORMED CLEANUP ON 9/20 AND 9/21. THE FINAL READING WAS LESS THAN 0.01 MG/CU METER HG. THEY CONFIRMED STATION DECISION TO OPEN PREVIOUS INCIDENT. NEW FREE MERCURY DISCOVERED (SEVERAL OUNCES) DID NOT BRING THE TOTAL TO ONE POUND (RQ). SUSPECT EQUIPMENT WILL BE REMOVED AND DISPOSED OF ENTIRELY AS MERCURY CONTAMINATED. WORKERS INVOLVED WILL DON PROPER PPE AND HAVE GEI/MERCURY AWARENESS TRAINING. THIS INCIDENT REPORT WILL BE KEPT OPEN TO ADDRESS ANY NEW DISCOVERIES DURING THE HP REMOVAL

Update 5/17/04:
The spills noted in 1997 and 1999 were cleaned up by the ChemLab. EI's were asked to check their logbooks for further evidence of spill related activity. There were no entries for spill related activities. The demolition of the HP Control Room was completed in August of 2000. And there is no further documentation on this incident. It is being entered as closed.

EMPLOYEES DISCOVERED RESIDUAL UNKNOWN PRODUCT IN THE TUNNEL - DOESN'T APPEAR TO BE GOING ANYWHERE AT THIS TIME - NO CLEAN UP AT PRESENT

DEC Investigator Remarks:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "RODRIGUEZ"
8/25/95: 60-day letter from Con Ed to USEPA. States that 25 gallons of oil was found in abandoned intake tunnel on the 58th St side of the plant during an inspection of the tunnel. No oil entered the river, because it was blocked in the tunnel by a mud and silt dam at the mouth of the tunnel. A contractor was brought to the site to clean the tunnel. It was determined that the oil is old lube oil and dielectric fluid. Since the initial cleaning, oil has reappeared in the tunnel and was removed by a contractor. The mud and silt dam at the mouth of the tunnel effectively prevents any discharge into the river. The source of the oil has not yet been determined. (JHO, 3/12/03)

SPILL REASSIGNED FROM O'CONNELL TO RODRIGUEZ. (JHO, 3/12/03)

the following letter was sent on july 21, 2003

July 21, 2003

Nelayne Rios
Environmental, Health, and Safety Manager, West 59th Street Generating Station
Consolidated Edison, Inc.
850 12th Avenue
New York, NY 10019

RE: Spill # 9505836. Intake Tunnel Investigation Request

Dear Ms. Rios:

This letter pertains to a 25-gallon petroleum spill found in the 59th Street Generating Station intake structure on August 11, 1995. Con Edison cleaned the spill according to a 60-day letter sent by Con Edison to the Environmental Protection Agency. The letter was dated August 25, 1995. Con Edison never identified the source of the spill.

The Department has data from the vicinity of the station showing the presence of petroleum in the ground. Due to proximity to the station, the Department has reason to believe that oil is seeping into the intake structure.

The Department requests that Con Edison inspect the intake tunnel to find if there is oil present. In the event that the presence of oil is confirmed in the intake structure, a more extensive investigation will be further warranted.

Please notify the Department the inspection date so that we can observe it. If you have any questions, please contact me at 718-482-4007.

Sincerely,
/s/
Abraham E. Rodriguez
Environmental Engineer 1

SPILL RE-ASSIGNED BACK TO O'CONNELL

5/11/06: e-mail to Dan Barry, Env. Manager for 59th St station, requesting update on status and schedule to inspect the tunnel if it has not been done yet. (JHO)

6/13/06: following inspections by Dan Barry's staff, cleanup was completed. See e-docs for closure documentation. (JHO)

Caller Remarks:

OILY WATER SEPARATOR COULD HANDLE FLOW.

DEC Investigator Remarks:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "ENGELHARDT"
7/19/95: Lou Terri - On corner of 59th St & 12th Ave. Heavy rain - sewer plugged. Water flooded building, basement and West Side Highway tunnel. Sump pumps in tunnel were not working. mechanic fixed pumps - pumped water to settling tanks before oil/water separator - could not handle flow and sludge overflowed. About 2 feet of water in the basement - some of sludge went into discharge tunnel - ~10 gallons. Had hard boom outside, and deployed two more. MEG cleaned sludge out from insode boom. Sampled water inside boom - 2.5 ppm oil & grease. Building was cleaned, and o/w separator was put back in service. To clean the sludge tank. Must check capacity of tunnel pumps vs. capacity of oil water separator.

3/12/03: According to 9/25/95 60-day letter from Con Ed to USEPA, 2 of the 800 gpm flood control pumps have been manually locked out. They will not be used unless there is a sever flood and no oil is present. Close out. (JHO)

Caller Remarks:

1 GALLON OF UNK OIL ON 300 GALLONS OF WATER. SOIL WAS ALSO IMPACTED CLEAN UP PENDING.

DEC Investigator Remarks:

02/23/10 - See eDocs for Con Ed report detailing cleanup and closure.

01/05/10-Hiralkumar Patel. DEC Austin assigned case to Patel for review.

as per emis report:
- contaminated water and soil at water interface was found during excavation work for demineralization system
- collected water and soil samples for product ID and TPH
- found oil similar to lubricating oil
- approx. 15 yards of contaminated soil was removed
- removed all soil to bedrock
- collected endpoint soil sample from soil right above bedrock
- once bedrock was exposed, the infiltration of groundwater diminished
- the bedrock had no noticable staining

as per submitted site map, excavation trench was 6 ft wide and 4 ft deep. no contamination found in endpoint sample.

10:13 AM:- spoke with Mr. Little (347-203-3823) at ConEd. he mentioned that the trench where contamination found was part of a water intake tunnel. part of this tunnel was abandoned and cut off around 1950s when they installed a stack. circular concrete wall was stack goes down to 10 ft depth and was installed in bedrock and area inside stack walls was backfilled with soil. impacted trench was excavated to install a tank for their demineralization system. contractor excavated all soil out and area was filled with concrete. Mr. Little mentioned that there is no possible source of lubricating oil in area, but there was a pump located before stack was constructed. all soils removed from area down to bedrock.

based on available information, case closed.

On 12/7/04 OMA M. Bland and T. Dancy found film of oil in #1 and #2 sumps. SS T. Benjamin was notified. #1 and #2 sump pumps were shut down. Pads were placed on top of the oil film. Upon further investigation it appears that there is an oil film in the trenches around 115 ID Fan pedestal and in the #3 sump. SS. A. Rodney inspected the OWS and it appears that there might be a sheen of oil in one of the compartments. #3 sump pump and the OWS were shut down. Envr.
Engr. J. Lamalfa was requested to investigate the OWS. Dock PIC C. Webster ispected the SPDES outfalls and there was no evidence of any sheen at any outfall. All-State PowerVac was called for a clean up response. It appears that the source of the oil is the 115 ID Fan lube oil system. Exact cause is unknown but it appears that residual oil leaked into the tranch system. J. Lamalfa reports that there is a sheen in the collection compartments but there is NO sheen or evidence of oil in the discharge compartment.

about 1 quart of unknown oil was spilled.con ed # 155960

DEC Investigator Remarks:

01/10/08 - See eDocs for Con Ed report detailing cleanup and closure.

155960

At 12:45 on 10/25/04, CI Clovis Wright found about less than 1 quart of a thick oil like substance mixed with soil during the preparation for a construction project on the city water line . The mixture seems to be historic and there does not appear to be any point source for the fluid. Mr. Wright notified EHS Manager Dan Barry. Mr Barry and EHS Engineer John Burke investigated site and informed SS Mario DeCorla-Souza to report as spill. Clean up is pending.
Water/Sewer: NO
Substance: Unknown oily substance
Source: Unknown
Cause: Historic spill

10/27/04
On checking area this morning at approx. 0730 hours an additional area of oily substance was found mixed with the sand and gravel. This mixture was approximately 10 feet from the original discovery. We are revising the spill quantity to 1 gallon. It is now known upon talking to persons who were in the station in the early 1990's that a #6 oil line was retired and removed. This line was adjacent to the line now being replaced. Operations will suit up - to clean both areas today. Waste will be placed in 55 gal. drum. Sampling will be done for pcb. Job briefing was done on job site by J.Burke. After digging a few inches, it does not appear that the oil is contained near the surface. J. Burke notified. EHS will arrange for a contractor to perform this clean up.

PCB oil samples taken on 10/27/04.
10/28/04 PCB results returned one sample <1 ppm the other sample was 2 ppm. The extent of the contamination is unknown at this time. Contacted AllState Power Vac (APV) and EHS Remediation for possible solutions.

10/29/04 - Work plan. After clean up by HEC. ECI will remove remaining pipeline in area. Work should be completed by AM 10/30/04. APV to then bring in vac truck to develop "bore" holes for sampling and determining the extent of the contamination.

10/30/04 - APV in to make bore holes. Found solid concrete after six inches. Had APV remove all gravel in area via vac truck. No signs of contamination in area. Gravel taken out by APV and disposed of as non-hazardous waste. Clean up completed at 14:30.

Update 01-MAR-2005 by J. Burke
Area was inspected on 14-FEB-2005 by EHS Engr J. Burke, EHS Mgr D. Barry and NYSDEC Env Engr. George Breen. There is water over the area were the clean up was performed and there is no sheen on the water. Incident to be submitted to NYSDEC for closure.

Caller Remarks:

North of #3 & #4 condensate tanks located in the basement. Came from return drain valve. No clean up at this time.

DEC Investigator Remarks:

e2mis no 153885

approximatly 1 gallon of #6 fuel oil was discovered north of #3 and #4 condensate tanks located in the basement. The fuel oil is on top of water within a surrounding moat constructed around the condensate tanks. The clean up began on discovery of the spill, with absosrbant pads, and a sump pump, to be used for pumping the sheened water into 55 gallon drums. There are no basement openings under both tanks and spill is contained within the moated area.

Fire/Smoke: NO
Waterway/Sewer: NO
Substance: #6 fuel oil
Source: 118 micro motion return drain valve
Cause: Valve left open
Private property: NO

inspections of moated area, including tank underside ,will be made for the next few days to confirm that no floating oil particles drifted away from cleanup area. steve martis (ert) was consulted @ about 14:00 to discuss status of any required spill reporting. he had called operations in the morning and with the potential that spill would not be cleaned within a two hour period, notified the nysdec for precautionary reasons @09:34

upon further inspection of area @15:00, small floating particles of oil were discovered by environmental engrg inside moat wall. operations was requested to cleanup and did so. stop date was deleted and ert steve duke notified @07:30 on 06/17 that stop date will not be entered again until station ehs makes additional inspections and is fully confident in closing out this report. small particles were discovered by env eng under tank @ 07:45 on 06/17. operations is in process of cleaning. all is contained and floating on moated stagnant water. ert will be notified when final inspection made this morning.

operations did not report on exact time of final clean-up. based on another thorough inspection by me on 6/22 @ 08:00, final time of cleanup will be as noted

Update 01-MAR-2005 by J. Burke
ROOT CAUSE: Operator left drain valve for micromotion meter loop open when unit was returned to service. Operator was not aware that drain valve was open because that item was not included on operating order to remove protection.
CORRECTIVE ACTION: Operations has changed policy regarding operating orders. All drains and vents that are opened to establish that a line is pressure free are now added to the operating order. This will ensure that all valves are returned to their normal operating postion when the protection is removed following work on the system. Policy is in full force at this time.

Caller Remarks:

ROOF TAR FROM RAIN WASHED UNTO CONCRETE FLOOR. NO FIRES, SEWERS, WATERWAYS OR SMOKE. ALL ROPED OFF AND CLEAN UP WILL FOLLOW TEST RESULTS.

DEC Investigator Remarks:

Prior to Sept, 2004 data translation this spill Lead_DEC Field was "O'CONNELL"
e2mis no. 151566:

at 10:50, 'ei' discovered 1 pint of oily substance on 7th floor retired gallery roof access area in hp. there are retired 25 cycle reactors immediately south of spill area that do not seem to be invloved. the potential source after roof inspection was agreed to be leeching roof insulation tar substance carried by rain water along the storm drain. area was roped off pending sample results. cleanup will follow.

further discussion on source and testing lead to decision to reclassify incident type to oil-unknown type. cleanup could not start until initial test results for
potential roof tar acm came back. cig and ert (pontecorvo) were consulted/notified. @ 11:45 when the final decision to reclassify was made. agency notification

was made @ 13:45

Spill cleaned up on 12/31/03 as presumed ACM and presumed PCB. Waste and PPE stored in asbestos locker. Samples were taken.
Asbestos bulk samples
came back as non-ACM. PCB Results pending. Waste moved to Hazardous Waste Storage Area and labeled as "Waste Pending Analysis"

Total PCB <1 PPM

Waste drum was removed from Haz Waste Storage Area and was relabeled and disposed of as Non-Hazardous Waste - Oily solid waste.

Caller Remarks:

THERE IS AN OIL/WATER MIXTURE ON THE GROUND UNDER BOILER #14 / CON ED SPILL #150555

DEC Investigator Remarks:

Con Ed e2mis #150555:

10/1/03
At approx 1109hrs, Mike Bernardo discovered an oily water spill of approx 30gal beneath boiler 114. The amount of water in the mixture was approx 27gals and the amount of lube oil in the mixture was approx 3gals. The source of the spill is still being determined. The mixture consists of mainly water which spilled in the basement concrete flooring in the vicinity of the Air Pre-Heater and the FD fan. A slight sheen was noticed in sump #3 and that sump pit pumps were shut off. Pigs were placed in the gutters. There was no oil in the oily water separator and no oil was discharged to a waterway or city sewer. Cleanup is in progress.

Sample of oil water taken by Results for oil signature analysis. Inspection of area indicates that oil likely to have come from three sources over time: 114 ID Fan Turbine pedestal and Fan I/B bearing pedestal (oil from bearing seal leaks); 114 FD Fan duct between FD Fan and Airpreheater (oil sucked into FD fan from bearing seals); and 114 FD Fan Turbine pedestal and Fan I/B and O/B bearing pedestals (oil from bearing seal leaks). Watch and house maintenance cleaned up about 3 drums of waste. WO# 59T-03-45406 entered to clean up oil water mixture.

AllState Power Vac called in to clean up oil water under 114 FD Fan duct and oil on ID and FD Fan pedestals. Heyrich is scheduled to perform Boiler wash on Boiler 115. Scope of that contract covers work cleaning FD Fan duct work. Heyrich will start cleaning 114 FD
Fan duct work of oil on 03-OCT-2003.

All-state Power Vac completed clean up. Pedestals powerwashed. Floor cleaned. All clean up waste handled as non-hazardous waste. 3 drums liquid and 7 drums oily solid debris placed in non-hazardous waste area for disposal. Heyrich cleaned inside 114 FD fan ductwork. Waste to be disposed off as non-hazardous waste as part of bolier wash contract. All clean up completed by 16:00 03-OCT-2003
