

Phase I Screening Summary

147-16 97th Avenue, Queens, NY 11435
Block 10031, Lot No. 7

The Site consists of a single, rectangular-shaped 0.16-acre (7,000 square foot) tax lot, located on the southeast corner of the intersection between 97th Avenue to the north and 147th Place to the east, in the Jamaica section of the Borough of Queens City of New York, Kings County, New York (**Figure 1**). The Site is identified by the street address 147-16 97th Avenue, and as Borough 4, Block 10031, Lot No. 7 (**Figure 2**) on the New York City Tax Maps.

The elevation of the Site is approximately 40 feet above mean sea level (amsl). The depth to groundwater at the Site is approximately 30 feet below grade surface (bgs). Groundwater flows to the south-southeast towards the Bergen Basin, and is consistent with the regional trend. The Site is zoned for commercial (C4-5X) use.

History:

Site history was determined based on a review of Sanborn fire insurance maps and city directories. The Site was shown as two small tax parcels to the north along Beaufort Street (now 97th Avenue) and east along Abbott Street (now 147th Place) in 1901. The eastern parcel was developed with a 1-story dwelling in the center of the lot while the western parcel remained vacant. Both properties were vacant and undeveloped by 1991, and they remained this way through 1951, at which time the two lots were combined, and a 1-story stationer's warehouse was constructed on the eastern portion of the Site. By 1986, the warehouse was identified as crate storage. A new, 1 to 2-story building was constructed across the entirety of the Site by 1987 and identified as manufacturing. The Site has remained relatively unchanged from 1987 to the present day.

Surrounding properties were primarily undeveloped, with sparse residential and retail development, by at least 1901. Beaufort Street (now 97th Avenue) was adjacent to the north; Abbott Street (now 147th Place) was adjacent to the east; Liberty Avenue was further to the south; and Guilford Street (now Sutphin Boulevard) was further to the west. By 1925, dense residential development was to the east across 147th Place and dense retail development was to the northwest along Sutphin Boulevard. Additional residential development was constructed to the north and northeast across 97th Avenue by 1942. Areas directly to the south and west remained sparsely developed until 1963, at which time a building identifies as electric contractors and storage was constructed to the southwest with commercial development beyond, including an auto body repair shop. By 1987, a parking lot was developed adjacent to the west. This parking lot was replaced with a warehouse by 1990. Surrounding properties remained relatively unchanged from 1990 to the present day.

The Site address (147-16 97th Avenue) was not identified in the city directories.

The surrounding properties were identified predominantly as residential uses, with a number of commercial/retail and light industrial uses since 1920, the earliest city directory researched that identified listings. These included warehouses/storage, offices, metal recyclers, and various retail uses. Given the timeframe for these operations and their potential prior use, the area cannot be confirmed as having no subsurface impacts; however, no specific operation or activity was noted that warrants additional investigation. In addition, several of the adjacent/surrounding properties were listed on regulatory databases indicating hazardous waste generation, petroleum storage and/or petroleum releases; these listings are detailed below in the Environmental Database Search section, where they were determined unlikely to represent a significant environmental concern to the Site.

EBC's review of historical information did not reveal evidence of recognized environmental conditions (RECs) in connection with the Site or adjoining properties.

Site Inspection:

EBC representative Thomas Gallo inspected the Site on May 21, 2019. Mr. Gallo was accompanied by Mr. Gurdial Singh of Sunny Builders NY Corp. The reconnaissance included a visual inspection of the building interior (offices, warehouse areas, restrooms, and storage/mechanical space), the sidewalks immediately adjacent to the Site building, and the exterior of adjacent properties.

The Site consists of a single, rectangular-shaped tax lot, which is developed with a single 1-story industrial building, with a partial loft area and no basement. The building occupies the entire footprint of the Site, fronts to the north along 97th Avenue, and has a reported area of 8,722 square feet (SF). The Site building was most recently occupied by The Marble Shop, a marble cutting and wholesale company, and consists of warehouse space, restrooms, and offices. The warehouse area is accessible via one pedestrian entrance and two garage door entrances along 97th Avenue (north) and one pedestrian entrance along 147th Place (east). Sidewalks border the property to the north and east along 97th Avenue and 147th Place, respectively.

The building is reportedly heated and supplied hot water by electric-powered and natural gas-fired equipment. No evidence of underground or aboveground storage tanks (USTs/ASTs) (e.g., vent or fill pipes) was observed on the property or reported to EBC at the time of the Site inspection. The EDR database report did not identify any registered ASTs or USTs for the Site, and there are no known spills/releases attributed to the property.

No storm drains were observed during the Site inspection. Storm water from the Site flows to curbside drains along the adjacent roads (97th Avenue and 147th Place). Curbside drains discharge to the NYC municipal sewer system. Several interior floor drains were observed throughout the Site building. These floor drains reportedly discharge to the New York City municipal sewer system and, as such, are exempt from UIC Program regulations. No chemicals were observed near the floor drains. No significant staining, corrosion, odors or other evidence of potential environmental impairment was observed around the floor drains.

No fluid-containing equipment (i.e., hydraulic vehicle lifts, trash compactors, elevators, electric transformers) suspected of containing PCBs was observed onsite. In addition, as the existing building was constructed in 1986, the presence of PCB-containing light ballasts and other equipment is unlikely.

No suspect asbestos-containing materials were observed during the site inspection. As the building was constructed in 1986, the presence of asbestos-containing materials is unlikely. However, it is possible that roofing, roof flashing and other (inaccessible) building materials may contain asbestos.

Interior and exterior painted surfaces were generally in good to fair condition, with no evidence chipping, peeling and well-worn paint. In addition, as the building was constructed in 1986, the presence of lead-based paint is unlikely.

No visual or olfactory evidence of mold or water damage was identified at the Site during the site inspection.

Environmental Database Search:

EDR was retained to provide a computerized database search of the project area within an ASTM-standard radius of the Site. A list of the databases searched and the search radius is shown on the summary table below. EBC reviewed the database output to determine if the property appears on any of the regulatory agency lists.

| SUMMARY OF FEDERAL, STATE AND TRIBAL DATABASE FINDINGS | | | |
|--|-----------------------------|--------------|-------------------------------------|
| Regulatory Database | Approximate Search Distance | Site Listed? | # of Sites within the Search Radius |
| Federal NPL | 1 mile | No | 0 |
| Federal Delisted NPL | ½ mile | No | 0 |
| Federal SEMS | ½ mile | No | 0 |
| Federal SEMS Archive | ½ mile | No | 0 |
| Federal RCRA CORRACTS | 1 mile | No | 0 |
| Federal RCRIS Non-CORRACTS TSD | ½ mile | No | 0 |
| Federal RCRA Generators | Site & Adjoining | No | 0 |
| Federal Institutional Control/ Engineering Control Registry | Site | No | N/A |
| Federal ERNS | Site | No | N/A |
| Federal Brownfield Sites | ½ mile | No | 0 |

| SUMMARY OF FEDERAL, STATE AND TRIBAL DATABASE FINDINGS | | | |
|---|-----------------------------|--------------|-------------------------------------|
| Regulatory Database | Approximate Search Distance | Site Listed? | # of Sites within the Search Radius |
| State and Tribal NPL | 1 mile | No | 0 |
| State and Tribal CERCLIS (SHWS) | 1 mile | No | 5 |
| State and Tribal Landfill or Solid Waste Disposal Sites (SWF) | ½ mile | No | 12 |
| Registered Recycling Facility List (SWRCY) | ½ mile | No | 7 |
| State and Tribal LTANKS/LUST | ½ mile | No | 45 |
| State and Tribal Registered UST | Site & Adjoining | No | 1 |
| State and Tribal Registered AST | Site & Adjoining | No | 0 |
| State Chemical Bulk Storage (CBS) | ¼ mile | No | 4 |
| State Major Oil Storage Facility (MOSF) | ½ mile | No | 0 |
| State and Tribal Institutional Control/Engineering Control Registry | Site | No | N/A |
| State and Tribal Voluntary Cleanup Site | ½ mile | No | 7 |
| State and Tribal Brownfield Sites | ½ mile | No | 5 |
| State Spill Sites | 1/8 mile | No | 24 |
| Registered Drycleaners | ¼ mile | No | 1 |
| NYC E-Designated Sites | 1/8 mile | Yes | 70 |
| EDR Historic Auto Stations (HIST AS) | Site & Adjoining | No | 0 |
| EDR Historic Cleaners (HIST CL) | Site & Adjoining | No | 0 |
| Manufactured Gas Plants (MGPs) | 1 mile | No | 1 |

The Site was listed on the E-Designation database as having a HazMat and Air restriction (E-175), which was determined during the Downtown Jamaica Redevelopment completed by the City in September 2007 (CEQR 15DCP081Q). The HazMat E-Designation requires that a facility conduct testing and sampling protocol and remediation where appropriate as well as a mandatory construction-related health and safety plan. The HazMat E-designation requires the issuance of a building permit by the NYC Department of Buildings before the property can be redeveloped. The Air E-Designation requires the use of natural gas or electricity for hot water

and HVAC equipment. The Air E-designation requires the issuance of a Notice to Proceed by the NYC Office of Environmental Remediation (OER) before the property can be redeveloped.

The database search generated information on the following listings for the surrounding properties within ASTM radius guidelines that could potentially impact the Site:

State and Tribal CERCLIS: Five SHWS listings (K – Jamaica Gas and Light MGP, Beaver Road & 158th Street; K – Jamaica Holder Station, 158th Street & Liberty Avenue; 148-28 Hillside Avenue; Former Duraspect Electroplating, 87-83 139th Street; and 107-35 Merrick Boulevard) were identified within a one-half mile radius of the Site. Given that each of these facilities is located over one-quarter mile in a dense urban area and hydraulically cross- to downgradient, it is unlikely that these facilities represent a significant environmental concern to the Site.

State and Tribal Landfill or Solid Waste Facilities (SWF/LF): Eight SWF/LF listings (A1 Auto Parts Inc., 97-15 Sutphin Boulevard; New York City Auto Salvage Inc., 148-36 Liberty Avenue; City Mason Division of S.R.M., 1-5 Avenue and 150th Street; South Side Auto Parts Inc., 97-09 150th Street; Tic Tac Auto Inc., 150-08 Beaver Road; Easy Does It Auto Salvage Inc., 150-08 Beaver Road; J&J Auto Wreckers Inc., 150-35 Liberty Avenue; and Liberty Scrap Metal Inc., 95-49 Tuckerton Street) were identified within a one-quarter mile radius of the Site. A1 Auto Parts, Tic Tac Auto Inc. and Easy Does It Auto Salvage Inc. were identified as an inactive vehicle dismantling facility. New York City Auto Salvage Inc., South Side Auto Parts Inc., J&J Auto Wreckers Inc. and Liberty Scrap Metal Inc. were identified as an active vehicle dismantling facility with no violations listed. The City Mason Division of S.R.M. was identified as an inactive C&D processing – registration facility. Based upon their inactive status, distances and/or the presumed hydraulic gradient, these facilities are unlikely to represent a significant environmental concern to the Site.

Four additional SWF/LF listings were identified between one-quarter and one-half mile from the Site; however, based upon their distances in a dense urban area, the presumed hydraulic gradient, and/or that the site and surrounding area is supplied potable water from a municipal source, it is unlikely that these facilities represent a significant environmental concern to the Site.

Registered Recycling Facility List (SWRCY): One SWRCY listing (Jamaica Recycling Metal Heaven, 147-20 Liberty Avenue) was identified within a one-quarter mile radius of the Site. This facility is identified as an inactive RHRF – registration facility. Based upon its inactive status, distance and the presumed hydraulic gradient, this facility is unlikely to represent a significant environmental concern to the Site.

Six additional SWF/LF listings were identified between one-quarter and one-half mile from the Site; however, based upon their distances in a dense urban area, the presumed hydraulic gradient, and/or that the Site and surrounding area is supplied potable water from a municipal source, it is unlikely that these facilities represent a significant environmental concern to the Site.

State and Tribal LTANKS: Twenty-six (26) facilities were identified on the State and Tribal LTANKS database within a one-half mile radius of the Site. Each of the 26 facility listings received regulatory closure from the NYSDEC and are not expected to be an issue of concern for the Site. In addition, none of the closed LTANKS listings are located adjacent to the Site.

State Chemical Bulk Storage Sites (CBS): Four CBS facilities identified on the CBS databases within a one-quarter mile radius of the Site. A summary of these listings is as follows:

- Atlas Transit Mix (ID No. 2-000185), 95-11 147th Place, located approximately 405 feet north-northwest and hydraulically downgradient of the Site. This facility is identified on the CBS-AST database with one 300-gallon fiberglass reinforced plastic AST containing hydrochloric acid which was installed in 1989. This facility was not cross-referenced on the LTANKS or NYSPILLS databases.
- Mec-Tec Automotive Inc. (ID No. 2-000453), 148-20 Liberty Avenue, located approximately 550 feet east and hydraulically downgradient of the Site. This facility was cross-referenced on the NY AST database with four, 55-gallon steel ASTs containing waste oil/used oil which were each installed prior to April 2017. This facility was not cross-referenced on the LTANKS or NYSPILLS databases.
- J&J Auto Wreckers Inc. (ID No. 2-000435), 150-35 Liberty Avenue, located approximately 1,060 feet east-northeast and hydraulically downgradient of the Site. This facility was cross-referenced on the NY AST database with one, 275-gallon steel AST containing waste oil/used oil which was installed in 2003. This facility was not cross-referenced on the LTANKS or NYSPILLS databases.
- Honeywell Farms (ID No. 2-000057), 155-25 Styler Road, located approximately 1,260 feet east and hydraulically downgradient of the Site. This facility was cross-referenced on the NY UST and CBS AST databases with one, 20,000-gallon steel UST containing diesel, installed in 1970; one, 20,000-gallon steel UST containing #2 fuel oil, installed in 1970; five, 4,000-gallon fiberglass reinforced plastic USTs containing diesel, installed in 1973; and one, 550-gallon fiberglass reinforced plastic UST containing lube oil, installed in 1973; and one, 3,000-gallon fiberglass reinforced plastic AST containing sodium hydroxide which was installed in 1978. This facility was cross-referenced on the LTANKS database in connection with one spill, which opened in December 1991 when contaminated soil was discovered during a tank pull and was closed by the NYSDEC on March 31, 2006.

Based on the information provided by the database, their distance in a dense urban area, the presumed hydraulic gradient, and/or that the Site and surrounding area are supplied potable water from a municipal source, it is unlikely that these facilities represent a significant environmental concern to the Site.

NYSDEC Voluntary Cleanup Program (VCP): Seven VCP listings were identified within a one-half mile radius of the Site. A summary of these listings is as follows:

- 97-11 Sutphin Boulevard (ID No. 17CVCP067Q), 97-11 Sutphin Boulevard, located adjacent to the south and hydraulically crossgradient of the Site. This facility entered the VCP prior to January 2017. Limited additional information is provided by the database; however, remediation is ongoing.
- 145-07 95th Avenue (ID No. 16CVCP031Q), 145-07 95th Avenue, located approximately 630 feet west-northwest and hydraulically crossgradient of the Site. This facility entered the VCP prior to September 2015. Limited additional information is provided by the database; however, remediation is ongoing.
- 93-43 Sutphin Boulevard – Sutphin Plaza Hotel (ID No. 14CVCP258Q), 93-43 Sutphin Boulevard, located approximately 790 feet northwest and hydraulically crossgradient of the Site. This facility entered the VCP prior to April 2014. Limited additional information is provided by the database; however, remediation is ongoing.
- 147-22 Archer Avenue (ID No. 16CVCP036Q), 147-22 Archer Avenue, located approximately 1,220 feet north-northwest and hydraulically upgradient of the Site. This facility entered the VCP prior to November 2015. Limited additional information is provided by the database; however, remediation is ongoing.
- 148-12 Archer Avenue (ID No. 18CVCP025Q), 148-12 Archer Avenue, located approximately 1,250 feet north and hydraulically upgradient of the Site. This facility entered the VCP prior to October 2017. Limited additional information is provided by the database; however, remediation is ongoing.

Based on their distance in a dense urban area, the presumed hydraulic gradient, and/or that the Site and surrounding area are supplied potable water from a municipal source, it is unlikely that these facilities represent a significant environmental concern to the Site.

Two additional VCP facilities were identified over one-quarter mile and/or hydraulically cross-to downgradient of the Site. Therefore, based on their distance in a dense urban area, the presumed hydraulic gradient, and/or that the Site and surrounding area are supplied potable water from a municipal source, it is unlikely that these facilities represent a significant environmental concern to the Site.

New York State Brownfields Sites (BROWNFIELDS): Five BROWNFIELDS listings (Jamaica 94th Avenue, 147-20 94th Avenue; 147-25 94th Avenue; The Crossing at Jamaica Station, 147-22 Archer Avenue; K – Jamaica Gas & Light MGP, Beaver Road & 158th Street; and K – Jamaica Holder Station, 158th Street & Liberty Avenue) were identified within a one-half mile radius of the Site. Each of these five facilities is located over one-eighth mile and/or hydraulically cross-

to downgradient of the Site. Therefore, based on their distance in a dense urban area, the presumed hydraulic gradient, and/or that the Site and surrounding area are supplied potable water from a municipal source, it is unlikely that these facilities represent a significant environmental concern to the Site.

State Spill Sites (NYSPILLS): Twenty-four (24) facilities were identified on the State and Tribal NYSPILLS database within a one-half mile radius of the Site. Twenty-three (23) of the 24 listings received regulatory closure from the NYSDEC and are not expected to represent a concern to the Site based on their regulatory status, presumed hydraulic gradient and/or that Site and surrounding area are supplied potable water from a municipal source. In addition, none of the listed closed NYSPILLS listings are associated with an adjacent property.

A review of the information provided regarding the one remaining active NYSPILLS listing (Commercial Property, 145-01 101st Avenue), including the nature of the release, its distance and the presumed hydraulic gradient, indicates that this spill is unlikely to represent an environmental concern to the site.

Registered Drycleaning Facilities (DRYCLEANERS): One DRYCLEANERS listing (HWC Dry/C&G Cleaners, 95-19 Sutphin Boulevard) was identified within a one-quarter mile radius of the Site. This facility was cross-referenced on the RCRA database as a former hazardous waste generator, with no listed violations. Based on the information in the database report, its distance, the presumed hydraulic gradient, and that the Site and surrounding area are supplied potable water from a municipal source, it is unlikely that this listing represents a significant environmental concern to the Site.

NYCDCEP Environmental Designation Sites (E-DES): Seventy (70) E-DES listings were identified within a one-eighth mile of the site, two of which are located adjacent to the Site. Both of the adjacent properties are each designated with the same HazMat and Air restrictions as the Site. Therefore, there is no information in the database report that indicates the E DES listing represent a significant environmental concern to the Site.

NYS Manufactured Gas Plants (MGPs): One MGP site (Jamaica Gas & Light, Beaver Road and 158th Street) is listed in the database report. This facility is located approximately 1,810 feet northeast and hydraulically upgradient of the Site. Based on its distance and that the Site and surrounding area are supplied potable water from a municipal source, the listed MGP is unlikely to represent a significant environmental concern to the Site.

New York City Department of Buildings Information

Computerized Property Profile Overviews (PPOs) available from the New York City Department of Buildings (NYCDOB) Building Information System (BIS) website were reviewed for information regarding the subject property. Pertinent information regarding the Site is summarized below:

According to the PPO, 2 Actions are listed for the Site: one alteration, dated in 1986, and one Certificate of Occupancy (C/O), dated in 1987. The C/O indicates that the Site was developed with one, 1-story manufacturing building with a mezzanine. The first floor was occupied by a miscellaneous steel fabrication and assembly shop, warehouse, office, parking and loading berth. The mezzanine was occupied by an office

No DOB or Environmental Control Board (ECB) violations are listed for the Site.

One Complaint was identified for the Site, dated in July 1991, and related to no permit for the roof-mounted air conditioner carrier; however, the Complaint is closed.

Threes Jobs/Filing and no ARA/LAA job are listed for the Site. The listed Jobs/Filings are summarized as follows:

- No. 420821864, dated March 12, 2013, proposal to install two new voluntary exhaust fans with filters;
- No. 420821864, dated May 2, 2014, post approval amendment; and
- No. 421928533, dated February 14, 2019, proposal to demolish warehouse.

Conclusions/Recommendations

Based on the results of the records review and interviews, it was determined that there were no recognized environmental conditions (RECs) identified with regard to the Site. However, the following environmental concern was identified:

- The Site has been assigned an E-designation for HazMat and Air restrictions (E-175) as part of the Downtown Jamaica Redevelopment completed by the City in September 2007 (CEQR 05DCP081Q). The Air E-Designation requires the use of natural gas or electricity for hot water and HVAC equipment. The HazMat and Air E-designations require the issuance of a Notice to Proceed by the NYC Office of Environmental Remediation before the property can be redeveloped. The Air E-Designation requires the use of natural gas or electricity for hot water and HVAC equipment. The Air E-designation requires the issuance of a Notice to Proceed by the NYC Office of Environmental Remediation (OER) before the property can be redeveloped.

An E-designation does not interfere with the present use of the Site; however, E-designations do prevent the release of building permits subject to a detailed environmental review and release by the NYC Office of Environmental Remediation. As such, EBC recommends the Site owner submit a soil and groundwater testing protocol to the NYC Department of Environmental Protection, Office of Environmental Planning and Assessment, and begin remediation activities once approved.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1922 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 200 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.
