RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Tank Info:

Tank Number: 001
Tank Id: 3503
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

I04 - Overfill - Product Level Gauge (A/G)
D00 - Pipe Type - No Piping
C03 - Pipe Location - Aboveground/Underground Combination
F03 - Pipe External Protection - Original Impressed Current
G03 - Tank Secondary Containment - Vault (w/o access)
H00 - Tank Leak Detection - None
A00 - Tank Internal Protection - None

Tank Location: Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Tank Info:

Tank Number: 001
Tank Id: 8788
Material Code: 0001
Common Name of Substance: #2 Fuel Oil (On-Site Consumption)

Equipment Records:

H00 - Tank Leak Detection - None
G00 - Tank Secondary Containment - None
J02 - Dispenser - Suction Dispenser
I04 - Overfill - Product Level Gauge (A/G)
A00 - Tank Internal Protection - None
D01 - Pipe Type - Steel/Carbon Steel/Iron
B00 - Tank External Protection - None
C00 - Pipe Location - No Piping
F00 - Pipe External Protection - None

Tank Location: Aboveground - contact with soil.... Tank bottom rests on soil, allowing no visual inspection.

Tank Type: Steel/Carbon Steel/Iron
Tank Status: Closed - Removed
Pipe Model: Not reported
Install Date: Not reported
Capacity Gallons: 7000
Tightness Test Method: NN
Date Test: Not reported
Next Test Date: Not reported
Date Tank Closed: 08/01/1998

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

DEC Memo: "Property is being sold. Purchaser did a Phase 2 on the site and found contaminated soil. CSL Letter sent to: Ann Walley, Walley Coal Company Inc., 260 Lee Ave. Bklyn, NY 11206 02/21/07-Hiralkumar Patel. received call from Ms. Walley. she asked for any report on soil contamination. explained her that DEC got compalint from purchaser and based on that DEC sent out letter requiring soil investigation/cleaning. received call from Mr. Leonard Aloï (718-931-1888), Ms. Walley's lawyer. he was not agree with letter that was sent to Ms. Walley and agrued on not having written report with DEC on such compalint. as per lawyer, Ms. Walley will not do anything until DEC provides them copy of soil investigation report. he wanted to report this to attorney general's office as DEC issued letter without having written report. received fax from Mr. Aloï requesting investigation report. 02/22/07-Hiralkumar Patel. spoke with Ray at ESPO. he will email me investigation report. received soil investigation report from Ray (zpatan@espl.com). abstract: - garage on site - groundwater level was measured at a depth of 8 ft from grade - geomorphologic pattern of site indicates that the regional water flow direction is towards west or the East River direction - slight petroleum odor and sheen observed in sample from boring SB-1 at 8-10 ft bg - strong petroleum odor detected in sample at boring SB-2 at 4-10 ft bg - strong petroleum odor detected in sample at boring SB-3 at 8-10 ft bg - water sample collected at SB-1 at 8-10 ft bg - water is turbid/opaque, dirty gray and some organic smell was detected. oil sheen was observed in water sample. - no contamination found in water sample

found PBS record on site. PBS#: 2-034312 site had one 1080 gal
Kerosene tank and one 550 gal gasoline tank. both tank were
underground and removed in Nov. 1990. 02/27/07-Hiralkumar Patel. sent
out another CSL to Ms. Walley, requiring submission of detailed site
plan including surrounding area and soil/groundwater delineation.
letter emailed to Mr. Aloï. 03/12/07-Hiralkumar Patel. received fax
from Mr. Aloï, but unclear. left message for Mr. Aloï to submit this
letter in clear writing and to submit investigation report.
03/22/07-Hiralkumar Patel. received request from Mr. Aloï to extends
report submission deadline as property is under contract for selling.
received email from Ray Kahn as he needs to discuss about
investigation/cleanup. Ray Kahn ESPL ENVIRONMENTAL CONSULTANTS CORP.
106 West 32nd Street New York, NY 10001 Ph. (212) 330-7501 (O) (917)

for Mr. Kahn. 03/23/07-Hiralkumar Patel. received call from Mr. Kahn.
he has been hired by new owner, Robert Kraus. he is planning to
investigate at location of previous USTs and will remove contaminated
soil found during previous investigation. asked Mr. Kahn to
investigate soil around previous UST systems (including fill port
location, dispenser island and piping locations for previous gasoline
tank). asked Mr. Kahn to send current owner's information. sent copy
of letter, previously sent to Ms. Walley, to Mr. Kahn.
04/19/07-Hiralkumar Patel. received call from Mr. Kahn from ESPL. he
will send final closure report. received report from Mr. Kahn.
abstract: - groundwater level measured 8-10 ft bg - regional water
flow direction is towards west or to the East River direction -
excavated area of previous soil borings (SB-1, SB-2 and SB-3) -
excavated area of previous soil boring SB-1 (Area 1) to 10 ft bg
and collected endpoint sample EP-1. little SVOC contamination found
in sample - excavated area of previous soil borings SB-2 and SB-3 (Area 2)
and took soil samples: one from excavation bottom (EP-2) and
one from each side walls (W-1 to W-4) - excavation in Area 2 was
limited based on a safe proximity from the northern abandoned
building and from on-site three story unstable building - no
contamination on western border and eastern wall of excavation in
Area 2 was limited by a large bolder running north to south and
embeded deep in the ground - groundwater stream was encountered
during the excavation of Area 2 at approx. 10 ft bg following
compounds found over limit:
-----EP-2-----W-1-----W-4-----limit
MTBE-----683-----740-----120
Benzo(a)anthracene-----5,076-----224
Benzo(a)pyrene-----4,464-----61

Dibenzo(a,h)anthracene-----544-----143
04/20/07-Hiralkumar Patel. left message for Mr. Kahn.
04/23/07-Hiralkumar Patel. spoke with Mr. Kahn. he took EP-2 sample at about 10 ft depth in excavation and as per him, water that was found in excavation was not groundwater. Mr. Kahn spoke with old owner and as per old owner, tanks were removed from area of excavation where found contamination (previous boring SB-2). Mr. Kahn didn't found any underground pipes related to previously removed tanks but as per old owner they were using gasoline and kerosene tanks for their own purpose (filling vehicles etc). old owner told Mr. Kahn that dispenser pump was along neighbours wall (toward endpoint sidewall sample W-2, where no contamination found). Mr. Kahn doesn't know future planning at site. asked Mr. Kahn to send current owner's information. 04/27/07-Hiralkumar Patel. received call from Mr. Kahn. he gave property owner's contact info. he mentioned that remaining contamination is contained as groundwater sample that was taken at SB-1 found clean and distance between SB-1 (groundwater sampling location) and SB-2 (highest contamination spot) was about 20 ft. discussed with DEC Austin. he asked for Phase I as found MTBE in soil endpoint samples. he also asked for further soil/groundwater delineation (based on Phase I). spoke with Mr. Leifer and Mr. Kahn over the phone. explained them that the department requires Phase I report. Mr. Leifer mentioned that they will use same building for office purpose. Rabbi Kraus, property owner Attn.: Nathan Leifer 1274 49th street Suite 245 Brooklyn, NY 11219 Ph. (718) 812-4482 Fax (718) 599-7126 05/21/07-Hiralkumar Patel. received Phase I report from ESPL. abstract: - based on the USGS groundwater contour maps, the regional groundwater flow in the area is to the south east and the site lays approx. 11 ft above sea level spoke with Mr. Kahn. mentioned him that regional groundwater flow has mentioned in different directions in Phase I and investigation report, submitted previously. explained him that the department requires site specific groundwater flow direction and groundwater samples as bottom endpoint sample EP-2 was taken almost at soil-water interface, which found MTBE contaminated and this sample could be downgradient from previous water sample location SB-1. sent letter to Mr. Kraus requiring groundwater flow direction and groundwater sampling. letter faxed to Mr. Kraus and Mr. Kahn. 06/19/07-Hiralkumar Patel. received soil/groundwater delineation report. they installed three monitoring wells covering excavation Area 2 . no contamination found in groundwater. site specific groundwater flow direction is northeast to southwest. based on available report, case closed. sent NFA to Mr. Kraus. letter faxed to Mr. Kraus and Mr. Kahn."
Remarks: "FOUND CONTAMINATED SOIL; EXCEDEING"

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110000853443

[Click Here:](#)

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

HAZARDOUS WASTE BIENNIAL REPORTER

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click Here:

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance

information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

01/07/2004. Also See Spill Nos. 8902747 and 9611420 for further site history. On 5/17/2001, DEC Sigona & Rossan performed a site inspection at 569 Myrtle Avenue, PBS No. 2-600866. The site was under construction, and being developed into a new state-of-the-art gas station. Met with Mike Buscemi, Maximum Distributors, 556 Central Avenue, Bethpage, New York, 11714 (516)933-0700. Mike said the tank removal and installation was supervised by a Licensed NYFD, contractor and plans were filed and approved by NYFD by Charles Nalbone of Maximum Distributors. The owner of the station is Ivan Muller (718)871-0097. Mike's been working on the station for 8-9 months. They removed a number of 550's and 4,000 gallon USTs in 2000. Phoenix Environmental supervised closure activities and documented a closure report on tank removal. 631-864-4200. Ivan Muller, 1616 48th Street, Brooklyn, N.Y. 718-366-2259. Mike Buscelli toured the site and showed where the tanks were installed and piping systems. The tanks were reportedly double walled FRP with leak detectors. Mr. Buscelli will send copy of plans and results of Phoenix site assessment to DEC. DEC Sigona called Mike Buscemi on Monday May 21, 2001, and left message requesting an update on status of site assessment/tank closure report and copy of installation plans. They said he would be contacted and would replay ASAP. On May 23, 2001, the DEC (Sigona) received a copy of the engineering plans for the new tanks and a laboratory test report from EcoTest Laboratories, dated June 16, 2000. The test results indicate that petroleum contaminated soils were found during the field sampling performed by Phoenix Environmental. The information submitted by Maximum Distributors does not include all of the information we requested. Mr. Buscemi suggested that we contact the owner for additional information. At this point, the DEC has determined that the EcoTest Laboratory report along with the notification by Phoenix Environmental to the DEC Spill hotline will satisfy one of the requirements of a site assessment under EPA 40 CFR 280.72: identification of the release of a regulated substance by an owner or operator closing an UST. However, additional investigation is warranted and required by Article 12 of the Navigation Law (NL) because the report indicates that the groundwater may have been contaminated following the closure of the gasoline and used oil USTs. The EcoTest laboratory test results cannot be used in place of a complete tank closure report or a site assessment. On May 23, 2001, The DEC (Sigona) sent a letter to Ivan Muller requiring the facility owner to hire a qualified environmental consultant to prepare a valid tank closure and site assessment report, if they have not done so already. These reports must be developed in accordance with 40 CFR 280.72 and DEC's SPOTS Memo No. 14, entitled, Site Assessments at Bulk Storage Facilities, dated August 1, 1994. The DEC plans to inspect this facility after the tanks have been installed to ensure that the plans have been properly implemented. DEC requested that 569 Myrtle LLC submit a copy of the tank closure report, a complete site assessment, and waste manifests for the disposal of petroleum contaminated soils, by June 15, 2001. 12/05 - Further investigation needs to be performed. 4/1/09 - Austin - Transferred from Needs Reassignment to Patel for further work to remediate and close - end 04/17/09-Hiralkumar Patel. visited site. its a citgo gas station with a store at the intersection of Myrtle Ave and Classon Ave. owner was not available at the site. Ivan **property owner** Ph. (718) 871-0097 Amna Kirmani **store manager** Ph. (718) 783-3744 received message from Ivan. 06/04/09-Hiralkumar Patel. alternate addresses: 569-577 Myrtle Ave, 184-190 Classon Ave

other spills: 9611420, 8902747 PBS #: 2-600866. as per PBS record, site had nine 550 gal and one 4,000 gal gasoline USTs and one 275 gal other oil UST. all tanks removed in April 2000 and replaced with two 10,000 gal gasoline UST and one 8,000 gal diesel UST. currently active tanks were tested in March 2006. Station owner: 569 Myrtle Ave LLC 1616 48TH Street Brooklyn, NY 11204 Attn.: Ivan Muller Ph. (718) 871-0097 (347) 234-1786 Fax (718) 871-9350 email: ivanmuller1@gmail.com reviewed old file.

-* spill #: 8902747 was reported on 06/15/1989 as five 550 gal tank systems failed tightness test. case closed and was referred to spill # 0003150. spill #: 9611420 was reported on 12/17/1996 as gas fumes were reported in sewer. case was reported by FDNY at 579 Myrtle ave (FDNY building). after further investigation found that site at 569 Myrtle Ave could be the source of gas odors in sewer. case closed and was referred to spill # 0003150. - in May 2001, someone from senator Velmanette Montgomery's office had made an inquiry regarding an abandoned gas station at Myrtle ave & Classen ave - as per notes from 9611420, site had 10- 550 gal and one 4,000 gal USTs - Maximum Distributors removed 550 gal and 4000 gal tanks - Phoenix Environmental supervised closure activities and documented a closure report on tank removal - on 05/22/01, received fax from Phoenix environmental with copy of sample analyticals; three soil samples collected (S1-A, S1-B and S1-C); each sample was analyzed for gasoline range organics and composite of three sample was analyzed for VOCs via 8260 - found high GROs in two samples (S1-A: 320 ppm, S1-B: 210 ppm) and found heavy VOC contamination in composite sample - on 05/23/01, DEC Sigona sent letter to Ivan Muller requiring to submit tank closure report, via certified mail (7000 1670 0001 5118 1213). received signed receipt (for letter delivery) at 10:46 AM on 06/14/2001. soil analyticals from June 2000:

-----S1-A,B,C
Toluene-----4,300
Xylene-----63,000
1,2,4-Trimethylbenzene-----53,000
1,3,5-Trimethylbenzene-----17,000

Citgo Petroleum Corp. Maximum Distributors Inc. **tank removal company** 556 Central Avenue Bethpage, NY 11714 contact: Mike Buscemi Ph. (516) 933-0700 Fax (516) 933-2244 Phoenix Environmental **environmental company observed tank removal activities** Ph. (631) 864-4200

-* 12:29 PM:- left message at Maximum distributors. 12:30 PM:- spoke with Paul Sherwood at Phoenix environmental. he will look for reports and will call back. 07/06/09-Hiralkumar Patel. 2:17 PM:- spoke with Mr. Muller. he will call back. 2:18 PM:- spoke with Paul at Phoenix regarding reports. he will call back. 07/06/09-Hiralkumar Patel. 2:37 PM:- received message from Mr. Muller (Cell: 347-234-1786). 07/07/09-Hiralkumar Patel. 12:29 PM:- left message for Mr. Muller. 1:30 PM:- received call from Mr. Muller. explained him regarding open spill case. he requested letter from the department. 07/08/09-Hiralkumar Patel. 9:36 AM:- received call from Paul from Phoenix. he found few disposal sample analyticals only. as per his record, Phoenix environmental was hired to monitor excavation (PID monitoring during excavation) and characterization of excavated soil. they collected samples and sent to lab (analyticals in file previously submitted by Citgo) and owner disposed off excavated soil. no other documents with Phoenix. 2:25 PM:- sent letter (via certified

re-sampling of groundwater from existing wells. he will talk to Mr. Muller. 2:18 PM:- spoke with George Muller. informed him that the department requires re-sampling of groundwater from the existing wells and the report must be submitted by the end of 10/05/12. 2:39 PM:- sent email to Paul. asked him to submit groundwater sampling report by 10/05/12. also asked him to provide site-specific groundwater flow direction, if water found in well MW-3. 01/08/13-Hiralkumar Patel. 4:14 PM:- spoke with Paul regarding groundwater sampling results. he will check record and will call back tomorrow. 01/11/13-Hiralkumar Patel. 3:49 PM:- spoke with Paul. he is preparing report and will submit next week. asked him to send sample results for review. 3:54 PM:- received email from Paul including results of groundwater sample from MW-1 and MW-2. groundwater analyticals: -----MW-2 Ethylbenzene-----170 1,2,4-Trimethylbenzene---110 02/11/13-Hiralkumar Patel. 2:21 PM:- sent email to Paul inquiring about report for re-sampling. email copied to Mr. Muller. discussed with DEC Austin. based on available soil and groundwater analyticals, the Department requires determination of site-specific groundwater flow direction, which requires installation of additional monitoring well as well MW-3 is dry. 03/19/13-Hiralkumar Patel. 1:50 PM:- spoke with Paul and asked to submit re-sampling report by the end of 03/22/13. 04/08/13-Hiralkumar Patel. 1:14 PM:- left message for Paul. 1:16 PM:- spoke with Mr. Muller. he will call back. 4:20 PM:- sent email to Paul and asked to submit re-sampling report. email copied to Mr. Muller. 04/12/13-Hiralkumar Patel. 12:26 PM:- left message for Paul. 04/23/13-Hiralkumar Patel. 12:52 PM:- spoke with Mr. Muller who asked to call his brother George who owns the property. 1:41 PM:- spoke with George Muller. he mentioned that he and his brother own the property. he will talk to Paul regarding re-sampling report. informed him that the department requires further investigation. George Muller asked to send letter to Ivan Muller's address. George Muller Ph. (917) 337-6083 05/01/13-Hiralkumar Patel. 3:26 PM:- received email from Paul including resampling report (sampling results submitted earlier on 01/11/13). 12/07/15-Hiralkumar Patel. discussed with DEC Vought and DEC DeMeo. after reviewing available information, case closed administratively based on following: - source removal (tank and possibly some contaminated soil) in 2000 (15 years ago) - no contamination in deeper soil sample - results of groundwater resampling during Oct. 2012 - no change in site use" "CALLER STATES WHILE DOING A DIG FOR A NEW TANK CONTAMINATED SOIL WAS FOUND."

new owner of a property which is now under construction. Apparently the former owner dug out the tanks and left a pit. Now that the new owner has started construction, approx 8 ft below the bottom of the pit they found floating gasoline product. They are in the process of removing product and contaminated soil. Since the consultant knew the DEC procedure and had already started, no contaminated soil letter was sent. 7/26/2005 Sangesland - a second Spill Report came in on this site (#0505029). A vapor complaint from a neighbor with the smell of gasoline (95 degree temp today). Sangesland left a voice mail with Chris DeCarlo at Flemming Shue asking him to confirm that the stock piled material is covered and as much Vapor Abatement as possible has been done. 9/19/05-Reassigned to A. Obligado. (Sun) 9/19/05- Obligado- Reviewed fax from Christopher De Carlo of Fleming Lee Shue consultants dated 9/8/05 requesting case manager be assigned to site. Called De Carlo to give him contact info. DeCarlo stated that they completed excavation of soil and taken clean soil endpoint samples. GW sample from bottom of excavation is 18 ppm MTBE and 3.9 ppm benzene. Asks if they can request closure of spill number. Tell him the NYSDEC needs to see the UST closure report before a judgement can be made. DeCarlo says report is in progress and NYSDEC should receive it shortly. 9/19/05 - Obligado - Follow up phone conversation with De Carlo. Ask him to send DEC foundation and vapor barrier details. Inquire about site status - site construction on hold pending permit for excavation. Ask him not to begin construction until the department reviews designs and UST excavation results. 10/28/05 - Obligado - Received phone call from De Carlo, says he had sent DEC Remedial Action Report and was waiting for DEC response. Told him that haven't seen report yet, and to email pdf of report. 10/31/05 - Obligado - review Remedial Action Report. 5 gasoline USTs removed previously, no records of soil disposal or analyticals. Upon beginning of FLShue's involvement of the site, the USTs had already been removed and an excavation 3 to 4 ft deep was on site. Continued excavation to 9-10 ft bgs. Excavated laterally until no contaminated soil encountered. 354 tons of soil removed from site. Soil results show no VOC exceedences in endpoint samples, only PAH exceedences in one soil sample, SB-2. Ground water sample collected from bottom of excavation show 3.9 ppb benzene and 18 ppb MTBE. Building construction will include 20 mL high polypropylene vapor barrier. Request NFA based on low concentrations and vapor barrier. Call Chris and leave message. Sent email approving building construction. Need to discuss closure. 11/3/05 - Obligado - Call Chris De Carlo (212) 675-3225, left message "

Contact Name: VELIA KRANICH
DEC Memo: "3/14/03 REASSIGNED FROM ROMMEL TO VOUGHT. 9/26/03 SHAR addendum for installation of extraction well, EW-1, and monitoring well, MW-5 received. 11/25/03 Reassigned from Vought to Foley. 12/8/03 Received Feasibility Pilot Testing, Analysis, and Report for SVE (Delta, 12/3/03) which concludes SVE is a viable option. 3/19/04 3Q2003 monitoring report received. DTW 7-10'bgs. Total BTEX from ND(MW-6, MW-7) to 231,200ppb(MW-3). MTBE from 5.1ppb to 77,100ppb(MW-3). 0.76' LNAPL in MW-3 and 0.02' in MW-4. 3/19/04 4Q2003 monitoring report received. Total BTEX from ND(MW-6) to 106,670(MW-3). MTBE from 4ppb(MW-7) to 77,500ppb(MW-3). 0.82' LNAPL in MW-3 and 0.16' in MW-4. 4/16/04 1Q2004 monitoring report received. Total BTEX from ND(MW-6 and MW-8) to 111,640ppb(MW-3). MTBE from ND(MW-8) to 77,500ppb(MW-3). 0.55' LNAPL detected in MW-3. 5/7/04 Portfolio meeting: Tanks were abandoned in place and found to be filled with concrete slurry. Adjacent to grade school. Pilot performed on MW-5 for MPE. Tight soils. Off-site wells, MW-7 and MW-8 OK. To submit RAP in a couple weeks. 0.3-0.6' of LNAPL detected. Install SVE first to address potential vapors to school. 5/26/04 Mailed stip. Due back 6/28/04. 6/29/04 Stip fully executed by T. Kunkel. 8/6/04 Received 2Q04 monitoring report. 0.37' LNAPL in MW-3. BTEX from ND(MW-6,7,8) to 74,490(MW-4). 8/31/04 Received Investigation Summary Report dated 8/27/04. 10/8/04 Mailed response to ISR. Requested borings/wells along Hewes Street, crossgradient of MW-4 and MW-5 and along the east side of Kent Avenue, downgradient of MW-3. Report due 12/15/04. 10/18/04 Cross-reference spill #9903413 for waste oil tank failure. Waste oil added to material spilled. 10/29/04 Received RAP and pilot test data for SVE. RAP does not address groundwater impacts. 10/29/04 Issued sidewalk access letter for installation of three monitoring wells 1) one along the east side of Kent Ave.(MW-9) 2) two on the south side of Hewes St.(MW-10, MW-11). Report due 12/15/04. 12/16/04 Received Subsurface Assessment Report for three additional wells installed on 11/15/04. Contaminated soils detected in MW-9 at 9.5-10.5'bgs. MW-10 and MW-11 had clean soil and gw. DTW 9.5-12.5'bgs. On 10/21/04, a round of GW samples were collected. MW-1 (0.5') and MW-3 (0.24') both contained LNAPL. DTW 7.17-9.67'bgs during 12/10/04 survey. Total BTEX ranged from ND(MW-7, MW-10, MW-11) to 415600ppb(MW-3). MTBE from ND(MW-8, MW-10, MW-11) to 272000ppb(MW-3). 1/3/05 Spoke to A. Lapine. Will send me a letter as an addendum to the RAP addressing groundwater concerns (will install PRBs to address free product simultaneously). Would like to install SVE and monitor groundwater. 1/17/05 B. Fisher will send out RAP addendum letter 1/18. 1/20/05 Received RAP addendum dated 1/18/05. The addendum addresses Delta's proposal to passively collect LNAPL from on-site MWs and to evaluate the potential need to address on-site dissolved-phase impacts in GW upon effective operation of the SVE system. A passive skimmer will be installed in MW-1(4 well). MW-3 and MW-4 are 1 wells and LNAPL recovery is not practical. However, LNAPL thickness will be monitored quarterly to ensure LNAPL thickness does not change. 1/21/05 Issued letter approving RAP and RAP

addendum. 3/28/05 Update from B. Fisher: SVE blower is on order and should be here within the next week or so. Have begun construction of the SVE shed in the shop. Once the blower is received, they will complete the trenching of the extraction wells. Installed the passive skimmer in MW-1. System to be installed by mid to late April. 4/27/05 Portfolio meeting- Across from Brooklyn Navy Yard. Contamination discovered during divestment. New owner (Mark Sapozhnikov) in 3/01. Source is tank mat (abandoned tanks with concrete slurry). Grace school is upgradient but adjacent. Currently constructing SVE system. System should be operating within the next two weeks. Passive skimmer operating in MW-1. 6/28/05 4Q04- 0.50' LNAPL detected in MW-1 and 0.24' in MW-3. BTEX from ND(MW-6,7,10,11) to 103750ppb(MW-3). MTBE from ND(MW-10,11) to 64500ppb(MW-3). 10/4/05 1Q05- DTW 7.24 to 9.55' bgs. 0.36' LNAPL detected in MW-1 and 0.11' in MW-3. BTEX from ND(MW-6,10,11) to 113890ppb(MW-3). MTBE from ND(MW-10,11) to 75400ppb(MW-3). 2Q05- DTW 6.69-8.96' bgs. 0.05' LNAPL detected in MW-3. BTEX from ND(MW-6,8,10,11) to 120740ppb(MW-3). MTBE from ND(MW-8,10,11) to 50300ppb(MW-3). 12/6/05 3Q05 - DTW 7.09-9.02' bgs. 0.03' LNAPL in MW-1. BTEX from ND(MW-6,8,10,11) to 124500ppb. MTBE from ND(MW-8,10,11) to 48900ppb(MW-3). 3/16/06 Met with BP and Delta. Divested in 2001. Abandoned tanks were not removed due to proximity to adjacent grade school building. Historically, MW-3 produced 3-4gal LNAPL which was extracted and hasn't reappeared since. In 1Q05, the owner detected product in the interstitial space of the mid-grade tank and sampled. Delta suspects that the tanks are out of compliance. Start-up of SVE is pending Con Ed upgrade within the next couple of weeks. 4/26/06 4Q05 - DTW 6.6-9.11' bgs. 0.05' LNAPL in MW-1 and 0.03' LNAPL in MW-3. BTEX from ND(MW-6,8) to 153020ppb(MW-3). MTBE from ND(MW-10) to 36100ppb(MW-3). 6/8/2006 - Feng - project reassigned to RJFeng. (RJF) 12/27/2006 - Feng - 2Q2006, 11/21/2006, by Delta. Groundwater sampled and gauged 4/14/2006. 11/14 monitoring wells were sampled. DTW 6.63' to 9.32' bg. Flows West-Northwest. LNAPL in MW-1 (0.31'), and MW-3 (0.27'). MW-1, 24,374 ppb BTEX, 277 ppb MTBE. MW-2, 1,163 ppb BTEX, 6,160 ppb MTBE. MW-3, 122,800 ppb BTEX, 45,000 ppb MTBE. MW-4, 93,660 ppb BTEX, 147 ppb MTBE. MW-5, 1,857 ppb BTEX, 24.1 ppb MTBE. MW-6, BTEX ND, 11.6 ppb MTBE. MW-7 was destroyed 1Q2005. MW-8, Dry. MW-9, destroyed 1Q2006. MW-10, 16.2 ppb BTEX, less than 1 ppb MTBE. MW-11, 605 ppb BTEX, less than 1 ppb MTBE. MW-12, 1,212 ppb BTEX, 65.2 ppb MTBE. MW-13, 934 ppb BTEX, 32.1 ppb MTBE. MW14, 22,950 ppb BTEX, 3,320 ppb MTBE. (RJF) 12/28/2006 - Feng - 3Q2006, 12/11/2006, by Delta. Groundwater sampled and gauged 7/27/2006. 11/14 monitoring wells were sampled. DTW 6.72' to 9.01' bg. Flows West-Northwest. LNAPL in MW-1 (0.14'), and MW-3 (0.09'). MW-1, 21,886 ppb BTEX, 334 ppb MTBE. MW-2, 1,239 ppb BTEX, 3,880 ppb MTBE. MW-3, 136,520 ppb BTEX, 18,200 ppb MTBE. MW-4, 75,610 ppb BTEX, 3,030 ppb MTBE. MW-5, 1,478 ppb BTEX, 13.3 ppb MTBE. MW-6, BTEX ND, 12.9 ppb MTBE. MW-7 was destroyed 1Q2005. MW-8, Dry. MW-9, destroyed 1Q2006. MW-10, ND, less than 1 ppb MTBE. MW-11, 4.95 ppb BTEX, 0.60 ppb MTBE. MW-12, 102 ppb BTEX, 4.2 ppb MTBE. MW-13, 1,750 ppb BTEX, 21.4 ppb MTBE. MW14, 15,782 ppb BTEX, 1,950 ppb MTBE. (RJF) 3/6/2007 - Feng - 4Q2006, 2/15/2007. Groundwater sampled and gauged 10/19/2006. 12/12 monitoring wells were sampled. DTW 5.80' to 10.73' bg. Flows north-northwest. No LNAPL. MW-1, 23,637 ppb BTEX, 276 ppb MTBE. MW-2, 1,008 ppb BTEX, 905 ppb MTBE. MW-3, 123,860 ppb BTEX, 17,900 ppb MTBE. 36,210 ppb BTEX, 310 ppb MTBE. MW-5, MW-6, MW-8, and MW-10 are low in BTEX and MTBE. MW-12, 2,326 ppb BTEX, 37 ppb MTBE. MW-13, 782 ppb BTEX, 9.5 ppb MTBE. MTBE. Email Delta for the updates and status of the SVE system. (RJF) 3/6/3007 - email from D. Taylor. It's been some difficulties running the SVE. Multiple site visits were required to refine the system operation to the point that could maintain operation for more than a few days after each O&M visit. It is now running at both wells (SVE-1 and SVE-2) on a consistent basis without the shutdown issues that had in the past. O&M report will be submitted in 2 weeks. (RJF) 4/19/2007 - Feng - Portfolio meeting with BP and Delta. The site was excavated and installed new tanks in the south and north portion. Plan to excavate more soil source. The SVE only to address the vapor issue for the school. It was used to have LNAPL in MW-1 and EFR events performed until no recovery. Delta will wait until the completion of the new gas station and will re-install the well-network. RAP addendum will be submitted. (RJF) 7/24/2007 - Feng - Tank Closure Report, 5/18/2007, by LongShore Environmental Inc.. On April 24, 2007, 4 (4,000-gallon) gasoline double-wall steel USTs and 1 single-wall steel 550-gallon Waste Oil UST were removed. The USTs were located in the west and northwest portion of the property. The tanks were in good condition. For the 4,000-gallon USTs excavation, 6 composite sidewall soil samples and 1 bottom sample were collected. Soil sample 4K-South Sidewall (east) at 7 feet bg, 500 ppb Benzene, 11,000 ppb Ethylbenzene, 24,000 ppb Toluene, 83,000 ppb Xylenes, 2,500 ppb MTBE, 300,300 ppb Total VOCs. 4K-West Sidewall, 20,690 ppb Total VOCs. Following endpoint sampling, the excavation was expanded both vertically and horizontally for the installation of the new tanks. Approximately 594.7 tons of soil was removed from the site. For the 550-gallon waste oil UST excavation, no impact was observed and all soils were returned to the excavation. 4 composite sidewall samples and 1 bottom sample were taken. Some slight exceedance of SVOCs were detected. LongShore recommended that the residual impacted soils be managed under the ongoing remediation effort under spill 00-09318. Email KE (BP) for updates of the site. (RJF) 7/27/2007 - Feng - 1Q2007, 5/3/2007. Groundwater sampled 1/5/2007. All 11 monitoring wells were sampled. DTW 6.55' to 9.18' bg. Flows to north-northwest. No LNAPL. MW-1, 9,721 ppb BTEX, 87.5 ppb MTBE. MW-2, 964 ppb BTEX, 912 ppb MTBE. MW-3, 103,250 ppb BTEX, 10,200 ppb MTBE. MW-4, 25,460 ppb BTEX, 50 ppb MTBE. MW-5, 729 ppb BTEX, 9.3 ppb MTBE. MW-6, BTEX ND, 9.3 ppb MTBE. MW-10, MW-11, ND. MW-12, 544 ppb BTEX, 26.2 ppb MTBE. MW-13, 1,240 ppb BTEX, 19.6 ppb MTBE. MW-14, 8,887 ppb BTEX, 1,070 ppb MTBE. (RJF) 11/28/2007 - Feng - 2Q2007, 8/29/2007. Groundwater sampled 4/5/2007. 10/11 monitoring wells were sampled. DTW 6.42' to 9.13' bg. Flows to northwest. LNAPL in MW-1 (0.03'). BTEX range ND to 101,490 ppb (MW-3). MTBE range ND to 5,230 ppb (MW-3). 3Q2007, 10/29/2007. Groundwater sampled 7/12/2007. 8/11 monitoring wells were sampled. DTW 6.90' to 9.29' bg. Flows to northwest. LNAPL in MW-1 (0.31'). BTEX range ND to 70,040 ppb (MW-3). MTBE range ND to 3,520 ppb (MW-3). 4Q2007, 11/16/2007. Groundwater sampled 10/4/2007. 9/11 monitoring wells were sampled. DTW 6.99' to 9.29' bg. Flows to north-northwest. LNAPL in MW-1 (0.28'). BTEX range ND to 73,790 ppb (MW-3). MTBE range ND to 3,150 ppb (MW-3). Remedial Action Plan Addendum, 11/2/2007, submitted by Delta. Between 5/31 and 6/5/2007, EnviroTrac, under the observation of Delta and on behalf of BP, performed soil over-excavation activities on the southern portion of the subject site. The soil was over-excavated to a depth of 10.5 feet bgs, and the over-excavation measured approximately 27 feet long by 20 feet wide. The location of over-excavation was determined based on known soil impacts in the area and due to the ineffectiveness of

the on-site SVE system. Groundwater depth was measured in the excavation to be 10.5 feet bg. Total of 297.52 tons of soil was disposed at the Clean Earth of Philadelphia as non-hazardous waste, manifests provided. 6 endpoint samples were collected at 8.5'-9' bg. SW-14, 471,060 ppb BTEX, 723,350 ppb total VOCs. SW-15, 204,810 ppb BTEX, 367,570 ppb total VOCs. SW-16, 37,141 ppb BTEX, 89,975 ppb total VOCs. No bottom sample was collected due to the presence of groundwater. Spoke with David Greffenius (Delta). The abandoned tanks may still in place, they were not removed due the structural restriction. The SVE system is shutdown because it has low/none recovery and that's why the soil excavation at that area was performed. Biweekly bailing of the LNAPL in MW-1 is performing, will be confirmed later on. DEC required additional delineation of downgradient of MW-1 to see the movement of LNAPL. Once the investigation is done, RAP for the entire site will be required. (RJF) 11/29/2007 - Feng - Letter to Kevin Endriss (BP). DEC requires LNAPL recovery, further downgradient delineation, RAP for the entire site. A brief investigation work plan to be submitted by 1/14/2008. (RJF) 1/2/2008 - Feng - Investigation Work Plan submitted by Delta via email. (RJF) 1/22/2008 - Feng - Reviewed Investigation Work Plan. EFR events will be conducted on MW-1 to remove LNAPL. 2 additional monitoring wells will be installed at the former MW-4 and MW-9 locations respectively. And a revised RAP will be submitted upon the completion of groundwater sampling of the newly installed monitoring wells. There is a building located north to the site and no groundwater monitoring wells can be installed to the north of MW-1. DEC emailed to Delta and required the EFR event to be started immediately. (RJF) 1/23/2008 - Feng - Email from Igor Goldstein (Delta). Monthly EFR events will be conducted. Investigation Work Plan is approved. Letter to BP and Delta. Required RIR and RAP to be submitted by 3/24/2008. (RJF) 2/1/2008 - Feng - sidewalk permit letter to Delta for installation of MW-16. (RJF) 2/13/2008 - Feng - 1Q2008, 2/7/2008. Active service station. The monitoring well network was gauged and sampled on 1/18/2008 as part of the quarterly sampling shedule. The site is being remediated via the current operation of an installed SVE system. 10 wells were gauged. DTW 6.48' to 9.07' bg. Flows to north-northeast. LNAPL in MW-1 (0.06'). 8 wells were sampled. BTEX range ND to 57,100 ppb (MW-3). MTBE range ND to 4,900 ppb (MW-3). (RJF) 4/15/2008 - Feng - Reviewed the Remedial Investigation Report, dated 3/24/2008, by Delta, pdf copy. On February 20 and 27, 2008, Associated Environmental installed two 2-inch diameter monitoring wells MW-15 and MW-16. MW-15 located southwest to the former tank field area and MW-16 at the sidewalk along Kent Ave. MW-15, final well depth at 18 feet, DTW 9 feet, 10 feet of 0.01-inch slotted schedule screen, set screen bottom at 16.5 feet. MW-16, final well depth at 15 feet, DTW 5 feet, 10 feet of screen set screen bottom at 12 feet. No soil sample taken. On 3/12/2008, the wells were gauged and no LNAPL detected. Two groundwater samples were collected. MW-15, ug/L, 2,100 benzene, 8,300 toluene, 3,700 ethylbenzene, 13,000 xylenes, 27,100 total BTEX, 430 MTBE. MW-16, 510 benzene, 15,000 toluene, 2,300 ethylbenzene, 10,000 xylenes, 27,810 BTEX, 57 MTBE. LNAPL in MW-1 recovery were conducted. 1/30/2008, EFR event, 0.5 gallon of LNAPL and 1,450 gallons of petroleum impacted groundwater was extracted. 2/18/2008, hand bailing, 0.01 feet of LNAPL. 2/26/2008, EFR event, 2,005 gallon of petroleum impacted groundwater was extracted. 3/19/2008, hand bailing, no LNAPL. RAP will be submitted 4/18/2008. (RJF) 5/5/2008 -

Feng - Reviewed Revised Remedial Action Plan, dated April 18, 2008. The Revised RAP calls for monthly EFR events on MW-1 and MW3. EFR effluent air will be sampled on monthly basis. Groundwater gauging and sampling will be quarterly. Letter to K. Endriss (BP) requiring the revised RAP to include the MW-15 and MW-16 area. Revision to be submitted 6/5/2008 (30 days). (RJF) 5/8/2008 - Feng - Conference call with K. Endriss (BP), G. Hinshalwood and I. Goldstein (Delta). The proposed revised RAP only for treating the source area. Delta will see 2 more quarters of sampling of MW-15 and MW-16 as well as the geochemical sampling to decide what remedy to propose. Delta will submit an addendum letter for conditionally approve the revised RAP. (RJF) 5/9/2008 - Feng - Reviewed the Revised RAP Addendum Letter, dated 5/8/2008 by Delta. Approve Revised RAP with the Addendum Letter. Approval letter to BP and Delta. (RJF) 6/16/2008 - Feng - Letter from Delta, 6/12/2008. On 5/29/2008, EFR event was conducted at MW-1 and found MW-3 to be an 1-inch diameter well and the size is not suitable for use in EFR events. Delta will continue EFR at MW-1 and install a 2-inch or 4-inch well in the MW-3 area. Schedule of well installation will be informed. (RJF) 6/18/2008 - Feng - Portfolio meeting with BP and Delta. The new well will put in as near the MW-3 as possible, will be 4-inch well. Utility will be marked out next week. (RJF) 10/27/2008 - Remedial Progress Report, dated 9/29/2008, by Delta. On 7/16/2008, MW-17 was installed. 4-inch diameter, closed to MW-3. Total depth 19 feet, groundwater was encountered at 10 feet. 15 feet of 0.02 slotted schedule 40 PVC screen. Monthly EFR events from May to 8/2008 on MW-1. Monthly EFR on MW-17 from 7/2008 to 8/2008. A total of 5,255 gallons of water was extracted and disposed. No measurable LNAPL in MW-1 during bailing event from 3/2008 to 9/2008. Groundwater was sampled for bio-parameters. Delta will propose RAP for bio-stimulation by 10/15/2008. They will provide work plan to EPA for their approval also. (RJF) 10/29/2008 - 2Q2008, 4/25/2008, by Delta, by Delta. Active service station. the monitoring well network was gauged and sampled 4/17/2008. The site is being remediated via monthly EFR events. First round of gauging and sampling event of the two new monitoring wells MW-15 and MW-16. 12 wells were gauged. Trace LNAPL in MW-1. DTW 6.66' to 8.88' bg. Flows to north-northeast. 10 wells were sampled. BTEX range ND to 62,900 ug/L (MW-3). MTBE range ND to 6,200 ug/L (MW-3). (RJF) 3/4/2009 - 3Q2008, 11/13/2008, by Delta. Active Service Station. The monitoring well network was gauged and sampled on 7/21 and 7/25/2008 as part of the quarterly sampling schedule. The site is being remediated via monthly EFR events. Also worth noting that this was the first round of gauging and sampling of one new monitoring wells (MW-17) which was installed on 7/18/2008. In addition, groundwater samples for geochemical parameters were also collected during this monitoring event. 13 wells were gauged. LNAPL in MW-1 (0.02'). DTW 5.64' to 9.34' bg. Flows to north-northeast. 9 wells were sampled. 4 wells were not sampled, MW-1 with LNAPL, MW-10, MW-12 and MW-16 insufficient sample volume. BTEX range ND to 57,100 ug/L (MW-3). MTBE range ND to 6,200 (MW-3). 4Q2008, 11/20/2008, by Delta. Active service station. The monitoring well network was gauged and sampled on 10/14/2008. The site is being remediated via Multi Fluid Recovery events. 13 wells were gauged. No LNAPL. DTW 7.11' to 9.80' bg. Flows to north-northeast. 13 wells were sampled. BTEX range ND to 68,900 ug/L (MW-3). MTBE range ND to 6,000 ug/L (MW-3). (RJF) 3/23/2009 - Reviewed the Work Plan Bio-Stimulation Remediation Pilot Study, dated 10/15/2008, by Delta. The Work Plan calls for the

application of 1,760 pounds of magnesium sulfate at a starting concentration of 55,000 mg/L in a single monitoring well MW-15. Monitoring program including gauge for the DTW, sulfate, sulfide, DO and pH immediately upon completion of the addition activities and 3 days after the addition, and weekly for 5 weeks. Groundwater will be monitored biweekly following the current procedure for 2 rounds and then continue quarterly. The Work Plan is approved. Report summarizing the pilot study and the recommendation for further corrective action will be submitted by 6/2009. Letter to BP and Dleta. (RJF) 7/24/2009 - 2Q2009, 7/17/2009, by EnviroTrac. BP Service station. The monitoring well network was gauged and sampled on 4/20/2009. 12 wells were gauged. LNAPL in MW-3 (0.10'). DTW 6.20 to 9.37 feet bgs. Flows to north-northeast. 11 wells were sampled. MW-3 with product and MW-6 were not sampled. Max benzene 2,500 ug/L (MW-17). Max BTEX 27,930 ug/L (MW-15). Max MTBE 1,900 ug/L (MW-17). 7/24/2009 - Reviewed Drilling and Well Abandonment Work Plan, dated June 25, 2009, by Delta. Delta proposes to abandon EW-1 and install MW-18 close to EW-1. Email to Delta for another well at the proximity of EW-2. Revised work plan due within 30 days. (RJF) 8/20/2009 - send email to Gordon Hinshalwood (Delta) letting them go ahead with the installation of 2 wells to replace EW-1 and EW-2 as we agreed to during the meeting with BP on 7/30/2009. SHARA due 11/2009. (RJF) 12/15/2009 - reviewed the Drilling and Well Abandonment Work Plan revision, dated 9/10/2009, by Delta. Delta will abandon 2 extraction wells EW-1 and EW-2, and will replace them with 2 new monitoring wells. SHARA will be in by 11/2009. (RJF) 4Q2009, 1/12/2010, by EnviroTrac. BP service station. The monitoring well network was gauged and sampled on 10/26/2009. 15 wells were gauged. LNAPL in MW-3 (0.26'). DTW 7.11-9.46' bg. Flows to north-northeast. 14 wells were sampled. MW-3 was not sampled due to product. Max benzene 1,400 ug/L (MW-17). Max BTEX 31,330 ug/L (MW-19). Max MTBE 1,100 ug/L (MW-17) 1Q2010, 4/9/2010, by EnviroTrac. The monitoring well network was gauged and sampled on 1/15/2010. 15 wells were gauged. LNAPL in MW-3 (0.02'). DTW 7.30-9.56' bg. Flows to north-northeast. 14 wells were sampled. Max benzene 2,400 ug/L (MW-17). Max BTEX 24,870 ug/L (MW-19). Max MTBE 710 ug/L (MW-17). 4/21/2010 - Reviewed Subsurface Hydrocarbon Assessment Report Addendum, dated 12/3/2009, by Delta. On October 11, 2009, EnviroTrac advanced 2 soil borings MW-18 and MW-19 to depth of 16 feet using Geoprobe 6620 DT hollow stem auger and direct push macro core sampling unit. 3 soil samples were collected. unit in ug/kg. MW-18 (9.5-10'), PID 13.4 ppm, 76J benzene, 4,500 xylenes, 14,471 total VOCs, 2,600 benzo(b)fluoranthene, 1,600 benzo(k)fluoranthene, 2,300 chrysene, 38,360 total SVOCs. MW-18 (12.5-13'), PID 59.4 ppm, 100J benzene, 1,557 total VOCs, 114 total SVOCs. MW-19 (12.5-13'), PID 1,195 ppm, 3,600 toluene, 16,700 xylenes, 26,000 1,2,4-trimethylbenzene, 9,500 1,3,5-trimethylbenzene, 64,190 total VOCs, 2,313 total SVOCs. The 2 wells were set and developed on 10/12/2009, and the wells were surveyed on 12/1/2009. On 10/26/2009, all the monitoring wells were gauged. LNAPL in MW-3 (0.18'). DTW 7.11' (MW-6) to 9.46' (MW-13). All the wells were sampled. BTEX range 0.53 ug/L (MW-11) to 31,330 ug/L (MW-19). MTBE range ND (MW-6, MW-10, MW-11 and MW-16) to 1,100 ug/L (MW-17). unit in ug/L. indeno(1,2,3-cd)pyrene, 360 naphalene, 406 total SVOCs. MW-19, 430 benzene, 20,000 toluene, 1,700 ethylbenzene, 9,200 xylenes, 31,330 BTEX, 16 MTBE, 140 isopropylbenzene, 440 n-propylbenzene, 22J p-isopropyltoluene, 3,700 1,2,4-trimethylbenzene, 1,100 1,3,5-trimethylbenzene, 86J n-butylbenzene, 1,200 naphthalene, 38,034 total VOCs, 960 naphalene, 963 total SVOCs. 4/23/2010 - email comments on SHARA to Delta. 1) rose diagram; 2) surrounding sketch; 3) check possible delineation at the commercial building and the school, and definite delineation around MW-19. work plan due 5/2010. 6/2/2010 - 2Q2010, 5/18/2010, by EnviroTrac. The monitoring well network was gauged and sampled on 4/14/2010. 15 wells were gauged. NO LNAPL. DTW 6.50-8.73' bg. Flows to north-northeast. 15 wells were sampled. Max benzene 1,000 ug/L (MW-3). Max BTEX 47,700 ug/L (MW-3). Max MTBE 2,100 ug/L (MW-3). 7/29/2010 - Enhanced Bioremediation Pilot Summary, dated May 31, 2010, by Delta. On October 26, 2009, all the wells were gauged for DTW, and presense of INAPL. Note that 0.18 feet of INAPL in MW-3. All the wells were sampled for baseline. On 11/3/2009, 460 lbs of magnesium sulfate was mixed with 1,000 gallons of water and gravity feed into MW-15 over a four hour period. 11/4/2009, sulfate sampled. MW-15, 5,420 mg/L. MW-18, 1,520 mg/L. MW-12, MW-16 and MW-14 also exhibit elevated sulfate concentrations compared to the baseline analysis, while the other wells MW-2, MW-5, MW-6, MW-10, MW-11 and MW-19 did not. The sulfate concentration in application monitoring well MW-15 initially spiked from less than 1.5 mg/L to 5,420 mg/L within the first 24 hours, and then gradually decreased to 75.2 mg/L after 80 days. In conclusion, the application was not exceed the boundary limit of 250 mg/L sulfate; the increase of sulfate in MW-10 was most likely indicative of background sulfate concentrations; only 6 wells were affected from the application point; elevated concentrations of sulfate in the application well consistently dissipated during the 80 days. 8/2/2010 - email comments on the pilot summary. 1) product in MW-3; 2) full scale work plan by 8/2010; 3) keep monitoring all the wells to ensure that there is no exceedances of the 250 mg/L criteria. 08/06/2010: This spill was temporarily (for 6 months) transferred to A. Doronova. - AD 08/09/2010: Received an e-mail: Ms. Doronova: Attached please find a work plan for the above-referenced site detailing our plans for a full-scale sulfate solution application. Please let me know if you have any questions. gh Gordon Hinshalwood, PhD- North American Operations Delta Consultants, an Oranjewoud N.V. Company Direct +1 914 495 9933 - USA Toll Free 800 477 7411 ghinshalwood@deltaenv.com - www.deltaenv.com DI the pfd copy of WP to eDocs. Will review. AD 10/2010: Discussed the WP with J. Koleeny and M. Tibbe of DEC. Arranged a conference call with G. Hinshalwoog of Delta. AD Mr. Hinshalwood was not available for a conference call. M. Tibbe left him a message. than 10 MTBE. NO LNAPL. NO flow contour. JF 7/5/2011 - received 2Q2011. eDoc. The groundwater monitoring well network was gauged and sampled on April 11, 2011. 15 wells were sampled. Max BTEX 37,400 ug/L (MW-3). Max MTBE 1,900 ug/L (MW-3). No flow was contoured. JF 10/28/2011 - 3Q2011, 9/28/2011, by Antea Group. The groundwater samples were collected on July 19, 2011. 14 wells were sampled. High BTEX and MTBE in multiple wells. MW-1, 881 ug/L BTEX, 4.3J ug/L MTBE. MW-3, 45,300 ug/L BTEX, 1,800 ug/L MTBE. MW-5, 381 ug/L BTEX, 20 ug/L MTBE. MW-13, 1,032 ug/L BTEX, 15 ug/L MTBE. MW-15, 12,480 ug/L BTEX, 59 ug/L MTBE. MW-16, 4,746 ug/L BTEX, 2.5J ug/L MTBE. MW-17, 9,010 ug/L BTEX, 370 ug/L MTBE. MW-18, 1,492 ug/L BTEX, 52 ug/L MTBE. MW-19, 13,300 ug/L BTEX, less than 5.0 ug/L MTBE. 5/1/2012 - 1Q2012, 3/28/2012, by Antea Group. Groundwater was sampled on 1/18/2012. MW-1, 0.01' of LNAPL. Multiple wells with high level of BTEX and relatively high MTBE. The next scheduled sampling for April 2012. 6/29/2012 - reviewed Drilling Work Plan, dated 6/11/2012, by Antea Group. Proposed 2 additional monitoring wells and 6 soil borings. The borings are to assess the soil quality in areas where historical data showed hydrocarbon impacts and/or soil data has not been evaluated. 2 wells are proposed to enhance the well network and further delineate the gw impacts previously identified at the site, intended to target those area adjacent to existing monitoring well MW-19 and former MW-8, as well as to the east of formerly abandoned USTs. Email with 14 comments to BP/Antea. see eDoc. Revised work plan by the end of July 2012. 8/27/2012 - 2Q2012, 6/29/2012, by Antea Group. The groundwater was sampled on April 9, 2012. The next sampling will be in July 2012. MW-1, 1,111 BTEX, 16 MTBE. MW-3, 45,800 BTEX, 1,100 MTBE. MW-5, 297 BTEX, 14 MTBE. MW-12, 123 BTEX, 9.9 MTBE. MW-14, 386 BTEX, 2.1 MTBE. MW-15, 11,420 BTEX, 47 MTBE. MW-16, 4,302 BTEX, 2.3 MTBE. MW-17, 7,920 BTEX, 250 MTBE. MW-18, 1,550 BTEX, 49 MTBE. MW-19, 19,620 BTEX, less than 10 MTBE. 10/10/2012 - Reviewed the Addendum to Work Plan for Additional Delineation, dated 7/31/2012, by Antea Group. 5 soil borings and 3 wells are proposed. Email to BP/Antea I am confused about which work plan do you want me to approve? Your email still attached the one dated 6/11/2012. And I have the revised one dated 7/31/2012 which you responded to our comments. Let me know. I am ok with your response on most of the parts. But I still insist to see delineation in those two buildings area next to the station as I put in the comment 2 and comment 7. MW-7 is far from the station which located across Kent Ave from the station but it still had shown MTBE during the monitoring of its time. I was just trying to say that distance might not a problem for the contaminant to migrate in this case. And if you look at the history of MW-1, MW-2 and MW-12 which located at the edge of the station property, they had high hit in their history. And one of these two building is a 3-story school . So yes, I insist to see the delineation to be done there. 11/30/2012 - 3Q2012, 09/27/2012, by Antea Group. The groundwater was sampled on July 26, 2012. The next sampling will be in October 2012. MW-1, 1,570 BTEX, 30 MTBE. MW-3, 48,300 BTEX, 1,200 MTBE. MW-5, 434 BTEX, 20 MTBE. MW-12, 231 BTEX, 16 MTBE. MW-13, 1,276 BTEX, 22 MTBE. MW-14, 1,457 BTEX, 2.7 MTBE. MW-15, 15,830 BTEX, 57 MTBE. MW-16, 2,753 BTEX, less than 2.5 MTBE. MW-17, 8,300 BTEX, 220 MTBE. MW-18, 1,539 BTEX, 52 MTBE. MW-19, 18,790 BTEX, less than 5.0 MTBE. 1/8/2013 - call from Chris Meyer of Antea Group. They did the drilling work according to the work plan except the PMW-20 and former MW-7 area due to the utilities/subsurface infrastructure. Will submit the investigation report. 12/17/2012 - email from Chris Meyer of Antea Group We are

MW-19, 2,537 BTEX. MW-24, 2,929 BTEX, 79 MTBE. 1/26/2016 - Feng - email from BP Nick Onufrak to DEC Vought and Feng Hello June and Jeff, We received a call from the tenant of 33 Hewes Street, Brooklyn NY. A Mr. Miller (847.538.9294) contacted Antea Group, by way of the neighboring gas station 677-87 Kent Avenue, Brooklyn NY when he observed what he believed to be fuel oil in the basement of the building. As 677-87 Kent Avenue is the location of active NYSDEC case number 00-09318, he was concerned whether the material in his basement was attributed to that open case. We ve been out to his property, gauged the nearby wells, screened the rooms with a PID, and we collected a few samples of the material, which have been sent to a lab for forensic analysis. NYSDEC case number 00-09318, has been associated with a historical gasoline release at the retails station. Based on an overall absence of the elevated PID readings that would accompany gasoline-range hydrocarbons, and absent

this update forensics data, we have yet to find a link between this material and the open spill number. Note that the current owner/operator of the retail station does have a permitted 6,000 gallon Fuel Oil UST. That said, we intend to work with the tenant of 33 Hewes Street, to clean out the basement of the accumulated material so that we might be able to further understand its origin. We thought you should be aware of this. Please give me a call with any questions. We'll let you know more as this develops. DEC Feng spoke to Mr. Chan Miller (347-538-9294) at 35 Hewes Street. The building is used as a Jewish elementary school. About 1 month ago, he found oil in his basement. His basement is about 15'x 15' and the oil was about 1-2 inches in depth flooded in the basement. He contacted BP and BP responded to the incident Wednesday last week. Between the incident and the time BP came, Mr. Miller had some guy from a lab took a few samples on 1/7/2016 and lab results show it is fuel oil/diesel/#2 oil. The basement is used for boiler room and sprinkler system. There are sumps/drain/sewage in the basement. He and his people cleaned up the basement today with mops and wipes. There is no smell/odor in the basement or the entire building. There is no tank at all for this building. He is in the school during the day 9:00am to 4:00pm if inspection is needed. Discussed with J. Vought and sent email to BP Nick Onufrak and Antea Gorup Chris Meyer Nick and Chris, I just spoke with the owner, Mr. Chan Miller (347-538-9294). He stated that there was 1 to 2 inches of oil in his basement which is used for boiler room and sprinkler system. He indicated that the building is used for elementary school. He stated that there were no vapors in the basement or in the entire building. The basement was cleaned up by Mr. Miller and his people today with mops and wipes. As the site is an elementary school, we want to ensure timely investigation/remediation. We are sending a responder, possibly Kumar Patel (copied above, 646-201-1488) tomorrow for a site inspection. Please let us know the schedule to monitor and clean up the basement. If possible, please have the current tenant/owner provide the tightness test data for the 6,000-gallon fuel oil UST at the location of the BP retail station. Please provide the forensic sampling report as soon as it is available. We are also be discussing this site with our PBS unit who may visit the BP station as well to ensure all is in working order. email to K. Patel the PBS record, 2013 inspection report and the 4Q2015 monitoring report of the BP station at 677-87 Kent Ave for tomorrow's inspection. 1/27/2016 - As per J. Vought, spill 15-10501 is added into UIS for 35 Hewes Street, Brooklyn. Conference call among Nick Onufrak of BP, Kumar Patel, Jeff Vought and June Feng. K. Patel stated that during this inspection this morning he did not see any oil drops. The basement is filled with sewage smell. The building kitchen is in the area and he suspected that is the kitchen grease trap. Mr. Miller will hire a plumber to check the sewage system. Nick has concern regarding the old abandoned USTs that near the school area but could not be removed due to structural integrity. Nick shall have the forensic report by Friday and he will share that with DEC as soon as it becomes available. email from Kumar Patel to DEC Vought and Feng I inspected site 35 Hewes Street this morning and met Mr. Miller. We walked through dining area and kitchen on first floor on our way to the basement. No petroleum odors noted in dining area or kitchen, but noted sewage/grease trap odors at the basement hatch which is inside the kitchen area. Found water on basement floor with strong sewage kind smell. No sign of petroleum product (sheen or odors) noted in the

U001839388

basement. Mr. Miller confirmed absence of petroleum odors in the building. Based on field observations, recommended him to have grease and sewer trap checked by a plumber. email to NYSDOH and NYCDOH Dear Mike, Nathan, and Chris, On 1/26/2016, we received an email from BP and their consultant, Antea Group, stating that they had been contacted by a tenant of 35 Hewes Street who had observed fuel oil in the basement of their building. The building is used as a Jewish elementary school. BP and Antea Group is managing a long term petroleum remediation project of gasoline contamination associated with an active BP gas station located at 677-87 Kent Ave which is immediately adjacent to 35 Hewes Street. Antea Group has gauged nearby monitoring wells at the BP station, screened 35 Hewes Street with PID meter, and collected product samples from 35 Hewes Street for forensic analysis. Antea Group noted that they had not found to date that they were the source of the seepage but still intended to clean up the basement for further inspection of the possible seepage source. We spoke with the school representative who noted that there were no odors in the basement or the entire building. According to BP, the forensic report shall be available this Friday. Kumar Patel from our Unit inspected the site this morning and met with the school representative. He noted no petroleum odor but did note sewage/grease trap odors at the basement hatch which is inside the kitchen area. Water on the basement floor was found with strong sewage smell. No sign of petroleum product (sheen or odors) were noted in the basement. The school representative also confirmed the absence of petroleum odors in the building during his inspection. Kumar recommended the school have the grease and sewer trap be checked by a plumber and the representative agreed to have it performed. Kumar noted the address on the building is 35 Hewes Street. I checked the NYCDOB database and alternative addresses for this location included 33-39 Hewes Street, 35 Hewes Street and 671 Kent Ave. I also checked ACRIS and the address in the deed and mortgage agreement is 33 Hewes Street. Let us know if you have any questions/comments, need additional information, or think a NYCDOH inspection is warranted Thank you as always, 2/29/2016 - 1Q2016, 2/29/2016. Groundwater was sampled 1/21/2016. LNAPL in MW-3 (0.4') and MW-17 (0.04'). MW-1, 190 BTEX. MW-5, 170 BTEX, 25 MTBE. MW-8A, 6,340 BTEX. MW-13, 402 BTEX, 11 MTBE. MW-15, 8,480 BTEX, 42 MTBE. MTBE. MW-24, 2,322 BTEX, 11 MTBE. During next event, LNAPL detected in MW-3 and MW-17 will be bailed and absorbent socks will be placed. In addition, ARCADIS is currently planning logistics to implement EFR events in MW-3 and MW-17 to address LNAPL in the first quarter of 2017. 5/8/2017 - Feng - 1Q2017, 4/7/2017, by ARCADIS. Monitoring on 1/25/2017. DTW 5.91 (MW-10) and 11.13 (MW-3). Flows to northwest. LNAPL in MW-3 and MW-17, bailed and stored in a 55-gallon drum onsite. MW-1, 63 BTEX, 4 MTBE. MW-8A, 6,647 BTEX. MW-13, 16 BTEX, 5 MTBE. MW-14, 65 BTEX, 4 MTBE. MW-15, 10,830 BTEX, 50 MTBE. MW-16, 917 BTEX. MW-18, 1,780 BTEX, 33 MTBE. MW-19, 29 BTEX. MW-24, 2,604 BTEX, 16 MTBE. 5/31/2017 - Feng - This spill is transferred from June Feng to Jeffrey Vought as per Jeffrey Vought. 12/12/17 - Austin - Assigned from Vought to Feng - end 1/30/2018 - Feng - Reviewed Monitoring Report 4Q2017, 1/24/2018, by ARCADIS. MW-22 was detected with product the first time, 1.89 feet. Arcadis is doing investigation to find the source of the product. email to Sahithi Rondla Sahithi, I reviewed the monitoring report and noticed that MW-22 was detected with product the first time. Regarding the findings of the investigation for the source of the product, you mentioned spill 15-10501. As I know, the school building did not have any tank back then. I checked the PBS record, no registration as of today. Back then, when DEC inspected the site when the incident occurred, the inspector noted there was sewage odor in the basement but no sign of petroleum. He then recommended for the grease trap be checked by a plumber. As you said, the product was estimated to be 6-7 years (+/- 2 years) old. It seems not matches the new unweathered product. You mentioned the product from upgradient of MW-22, Manhole 59638. The spill number is 05-06675. According to DEC notes, it is a Con Ed spill. 2 gallons of unknown oil on top of 60 gallons of water. It has been cleaned up by removing the product and re-capping the leaking 3c cable. The spill was then reclassified as dielectric fluid spill. Spill was closed on 1/10/2008. Have you checked to make sure that the monitoring well detected with product is the MW-22? Confirmed the monitoring well was not damaged or unlocked when it was gauged/sampled? MW-22 has been non-detected almost all the time since its installation in 2013. However, there is a closed-in-place tank field in the southeast corner of the site. The monitoring wells, MW-4, MW-15, MW-19, MW-8A, around the abandoned tank field have been either had product or high dissolved of VOCs concentration. MW-22 is located near the area. MW-22 is not upgradient all the time, if you check the flow direction, it varied or you may say it has been flowed to all direction. It shouldn't be surprised if you see detection in that monitoring well MW-22. Have you compared this product to the product from other wells that currently have product, e.g. MW-3 and MW-17, and the diesel product the station is selling? Have you done any product removal since its discovery to see if there is any return of the product? I recommend to do the product removal immediately before it migrates and dissolves more in groundwater while you continue to investigate for the source of the product. Email from Sahithi Rondla Ms. Feng, We are pretty sure about identification of the well, MW-22. The well was found to be intact with manhole cover and J-plug. I agree this well is in close proximity to former abandoned tankfield. However based on Antea's Soil Boring investigation in April 2016, a total of four soil borings were advanced (SB-20, SB-21, SB-22, SB-23) to assess the subsurface soils between the adjacent property to the northeast (school) and the subject site and two temporary monitoring wells (SB-20 and SB-22) were installed to further assess groundwater

conditions . VOC concentrations in excess of NYSDEC CP-51 Soil Cleanup Guidance for Gasoline Impacted Sites were identified in one of the borehole locations (SB-20); SVOC concentrations in excess of NYSDEC CP-51 Soil Cleanup Guidance for Fuel Oil Contaminated Sites were not identified in any of the four borehole locations. Laboratory results indicated that soil impacts identified along the northeast property boundary in the area of SB-20 are likely attributed to current BP assigned spill number 00-09318. Laboratory analysis performed on the two groundwater samples collected from temporary wells SB-20 and SB-22 identified several VOC concentrations above the GWQS in SB-20, but no GWQS exceedances in SB-22. Laboratory analysis identified several SVOC concentrations above the GWQS in the groundwater samples collected from SB-20 and SB-22. LNAPL was not detected in temporary monitoring wells (SB-20 and SB-22) during the assessment. Note that SB-23 is the closest boring to MW-22. Soil analytical data from SB-23 was clean. We compared the fingerprinting results from MW-22 to onsite historic LPH . LPH samples collected at MW-1 (Oct. 2004), MW-3 (March 2001 and Jan. 2013), and MW-8A (Jan. 2013) characterized by Torkelson Geochemistry in Antea Report as moderately weathered to weathered premium grade gasoline (no mention of diesel being present in any sample). However to clarify your question, we did not analyze diesel from existing service operations as we do not believe is required due to the location of current tank field. Coincidentally we are the site today performing 1st Qtr 2018 GW monitoring event. Per your suggestion, we will bail the LPH from MW-22. However I would like to clarify that though we are bailing, Arcadis on behalf of our client ,BP is not accepting the responsibility of LPH in MW-22 ,as we believe is not related to current open spill number 00-09318 at this time. Arcadis is still conducting further investigation into this. As I mentioned on the call, I will summarize the results of the chromatograms in a letter next week for your review. 5/7/2018 - Feng - 1Q2018, 4/24/2018, by Arcadis. Monitoring on 1/30/2018. DTW 7.26 (MW-24) and 13.75 (MW-23). MW-3, 1.08'. MW-15, 0.13', for the first time, 22,030 BTEX, 28 MTBE. MW-17, 0.05'. MW-22, 1.5'. LPH was bailed from MW-22 and stored in an onsite drum for offsite disposal. MW-1, 69 BTEX, 10 MTBE. MW-5, 17 BTEX, 11 MTBE. MW-8A, 1,518 BTEX. MW-14, 1,207 BTEX, 2 MTBE. MW-16, 560 BTEX. MW-18, 1,860 BTEX, 29 MTBE. MW-19, 167 BTEX. MW-24, 1846 BTEX, 19 MTBE. 4/4/2019 - Feng - 2Q2018, 7/16/2018, by Arcadis. Monitoring on 4/24/2018. DTW 6.52 (MW-10) and 12.35 (MW-23). MW-8A, 1,764 BTEX. MW-14, 752 BTEX. MW-15, 12,610 BTEX, 31 MTBE. MW-16, 138 BTEX. MW-17, 28,340 BTEX, 110 MTBE. MW-18, 1,970 BTEX, 28 MTBE. MW-19, 636 BTEX. MW-22, 0.54' LNAPL. MW-24, 1,218 BTEX, 14 MTBE. 3Q2018, 10/22/2018, by Arcadis. Monitoring on 7/10/2018. DTW 7.26 (MW-24) to 13.14 (MW-23). MW-1, 483 BTEX, 8 MTBE. MW-3, 0.40' LNAPL. MW-8A, 2,388 BTEX. MW-14, 1,442 BTEX. MW-15, 10,230 BTEX, 29 MTBE. MW-16, 189 BTEX. MW-17, 41,700 BTEX, 180 MTBE. MW-18, 2,410 BTEX, 29 MTBE. MW-19, 152 BTEX. MW-22, 0.68' LNAPL. MW-24, 1,998 BTEX, 73 MTBE. 10/10/2019 - Feng - 3Q2019, 10/10/2019, by Arcadis. Monitoring on 7/25/2019. DTW 7.00 feet (MW-24) to 13.28 feet (MW-23). MW-3, 0.15' LNAPL. MW-8A, 1,263E BTEX. MW-14, 779 BTEX. MW-15, 1,523 BTEX, 24 MTBE. MW-17, 17,540 BTEX, 93 MTBE. MW-18, 620 BTEX, 22 MTBE. MW-22, no LNAPL. MW-24, 629 BTEX, 71 MTBE. 12/11/2019 - Feng - email from Sahithi of Arcadis Ms. Feng, Just wanted to provide you an update on activities mentioned in RAP for the aforementioned site : -Arcadis installed Dual phase extraction (DPE) wells on November 6th & 7th ,2019 as stated in RAP submitted to NYSDEC dated July 24,2019.

-RAP outlines implementing first week long DPE event within 60 days following the DPE well install . So technically ,first DPE event should have been conducted before January 7,2019 -However due to upcoming holiday season, subcontractor scheduling and other logistics, Arcadis will delay this implementation by a week. Arcadis is scheduled to conduct this work during week of January 13,2019. I hope NYSDEC has no objection to our extension request by a week s time. Feng replied no objection. 3/20/2020 - email from Sahithi Rondla Ms. Feng, Per RAWP dated July 2019, Arcadis conducted 2 of 5-day DPE events so far in January & February 2020. However we are having to suspend March 2020 event because of ongoing global Covid-19 crisis. As you know this site operates as gas station in NY where the epicenter for Covid-19 currently is and we are having difficulty with staffing and dealing with logistics related to maintaining the separation distance based on the scope of work & on site business operations. I hope you understand our current situation and be assured that Arcadis will immediately mobilize to the site to conduct 3rd week long DPE event as soon as conditions improve. I will continue to keep you posted about our plans. In the meantime, please do not hesitate to let me know if you have any questions or concerns. Feng reply to Sahithi Rondla Sahithi, I understand. Everybody please stay healthy and safe! 4/2/2020 - Feng - 4Q2019, 1/27/2020, by Arcadis. Monitoring on 10/24/2019. DTW 7.70 (MW-24) to 15.45 (MW-23). LPH was recovered from MW-3, MW-17 and MW-22. The recovered LPH was stored in an onsite drum for subsequent offsite disposal at a EPA approved disposal facility. MW-2, 117 BTEX, 11 MTBE. MW-3, 0.66' LNAPL. MW-5, 90.6 BTEX. MW-8A, dry. MW-14, 1,275 BTEX. MW-15, 3,291 BTEX, 24 MTBE. MW-17, 0.02' LNAPL. MW-18, 1,830 BTEX, 20 MTBE. MW-19, 366 BTEX. MW-22, 0.15' LNAPL. MW-24, 1,219 BTEX, 77 MTBE. 5/11/2020 - Feng - 4/14/2020 email from S. Rondla. Due to COVID-19 pandemic, 2Q2020 field work, i.e. groundwater monitoring and 3rd DPE event pilot test, will be defer to later in the quarter until current situation gets stable. 6/8/2020 - Feng - 1Q2020 and VTE Event Summary Report, 5/29/2020, by Arcadis. Monitoring on 2/12/2020 and 3/16/2020. As of 3/16/2020 MW-1, less than 9 BTEX, 3 MTBE. MW-2, less than 14.5 BTEX, 3 MTBE. MW-3, dry. NO LNAPL. MW-4, abandoned well. MW-5, 74.4 BTEX, 7 MTBE. MW-6, less than 9 BTEX, 4 MTBE. MW-7, abandoned well. MW-8, abandoned well. MW-8A, dry. MW-9, abandoned well. MW-10, less than 9 BTEX, less than 1 MTBE. MW-11, less than 8 BTEX, less than 1 MTBE. MW-12, dry. MW-12A, less than 9 BTEX, 13 MTBE. MW-13, dry. MW-14, 7.2J BTEX, 2 MTBE. MW-15, 344J BTEX, 10 MTBE. MW-16, could not sample due to damaged well inner casing. MW-17, 6,290 BTEX, 36 MTBE. MW-18, 343 BTEX, 11 MTBE. MW-19, 3.7J BTEX, 2 MTBE. MW-22, less than 8.7 BTEX, less than 1 MTBE. NO LNAPL. MW-23, less than 9 BTEX, less than 1 MTBE. MW-24, 2,478 BTEX, 12 MTBE. DPE-1, 550 BTEX, 21 MTBE. DPE-2, 557 BTEX, 10 MTBE. 6/22/2020 - Feng - Reviewed VTE Event Summary. -Between November 6 and November 7, 2019, Arcadis oversaw the installation of 2 extraction wells (DPE-1 and DPE-2) by Hawk Drilling. -Drilled using hollow stem auger drill rig to 25 feet. -4-inch diameter, 15 feet of 0.02-inch slotted screen, 5 feet riser. -Each DPE wells includes a 5-foot sump so that pump intake can be adjusted during the VTE events to maximize mass recovery -2 multi-day VTE events were conducted in first quarter 2020, 1/20-23/2020, and 2/24-28/2020. -MW-3, MW-5, MW-8A, MW-15, MW-17, MW-18, MW-19 and MW-22 were used as observation -interface probe was used to collect depth to water and depth to product reading -a top-loading pneumatic pump was installed in each extraction well with the pump intake

positioned near the bottom of the well screen. -the pneumatic pumps were turned on to begin groundwater extraction -vacuum blower was turned on to begin soil vapor extraction -reading were collected every 60 min throughout the day -water discharge line from each pneumatic pump was run to a 250-gallon water storage tank and will be pumped to vac truck for disposal once it is full by Lorco Petroleum in Elizabeth, NJ. -the truck-mounted vacuum blower effluent line was connected to (2) 375-lb vapor-phase granular activated carbon (VGAC) units in series to allow extracted soil vapor to be treated before discharge to atmosphere. -DPE-1 recharge rate 5 gallons per minute -DPE-1 drawdown was limited to 1 ft -DPE-2 recharge less than 0.5 gpm -higher recharge rate in DPE-1 may be due to its presence of a former excavation -DPE-2 may be the representative of actual groundwater recharge rate at the site. -total 12,775 gallons of groundwater was extracted during the two VTE events. -max drawdown DPE-1 (1.2 feet), DPE-2 (6.1 feet), MW-15 (0.5 feet), MW-18 (1.0 feet), MW-3 (dry), MW-17 (0.4 feet), MW-5 (0.1 feet). MW-19 (0.4 feet), MW-8A (dry), MW-22 (0.0 feet). -vacuum applied in DPE-1 and DPE-2 from 4.9 in Hg to 6.3 in Hg. -air flow rates in DPE-1 and DPE-2 from 87 scfm to 132 scfm -all the monitoring wells, except MW-22, recorded induced vacuum during the VTE. -ROI is 35 feet. -DPE-1 mass recovery ranged 41 to 51 lbs/day -DPE-2 mass recovery ranged 16 to 25 lbs/day -total 196 lbs of vapor phase TPH were removed during the 2 VTE events Based on the high soil vapor mass recovery rates observed in DPE-1 and DPE-2 during the 2nd VTE event, Arcadis proposes additional VTE events at the site to continue removal of VOC mass from the subsurface. 3/2/2021 Feng - Monitoring 4Q2020, 1/29/2021, by Arcadis. Monitoring on 10/29/2020. DTW 6.78 (MW-24) to 13.60 (MW-23) below top of the casing. Water flows to east at hydraulic gradient of 0.03 feet per foot. LNAPL in DPE-1 (0.14) the first time. 0.4 gallons of LPH was recovered from the well via hand bailing using disposable bailers. LPH was sampled on 11/10/2020. LPH samples were collected from DPE-1 and MW-3 to identify the chemical composition and age o the LPH and to determine if the LPH observed in both wells have resemble to each other. LPH in MW-3 contained weathered premium grade gasoline, consistent with the historical fingerprinting analyses conducted in 2001 and 2013. LPH in DPE-1 contained weathered regular grade gasoline and had different composition to LPH detected historically in MW-1, MW-3 and MW-8A. Arcadis will proceed with mobile DPE events starting January 2021 but modifying the technology by using Catalytic Oxidizer unit instead of vapor phase carbon units for off gas treatment. MW-1, 338 BTEX, 22 MTBE. MW-2, < 3 BTEX, < 1 MTBE. MW-3, 0.16 LNAPL. 189,000 BTEX, 2,320 MTBE. MW-4, abandoned 7/2007. MW-5, not sampled due to rain water flooding the well. MW-6, not sampled annually. MW-7, well not sampled since 1/2005. MW-8, well abandoned 1/2007. MW-8A, not sampled due to insufficient water volume. MW-9, well abandoned 4/2006. MW-10, sampled annually. MW-11, sampled annually. MW-12, dry. MW-12A, < 3 BTEX, 5.9 MTBE. MW-13, inaccessible due to tire piles. MW-14, 849 BTEX, 3.7 MTBE. MW-15, 28.7 BTEX, 13.1 MTBE. MW-16, not sampled due to damaged well casing. MW-17, 5,480 BTEX, 69.4 MTBE. MW-18, 1,190 BTEX, 14.8 MTBE. MW-19, 73.2 BTEX, 5.0 MTBE. MW-22, < 3 BTEX, < 1 MTBE. MW-23, not sampled due to rain water flooding well. MW-24, 130 BTEX, 39.3 MTBE. DPE-1, 18,100 BTEX, 261 MTBE. DPE-2, 810 BTEX, 15.3 MTBE."

 Update By: JHOCONNE
 Site Description: "Location: The site is located in an urban area in East Williamsburg, Brooklyn and occupies Tax Block 2245 Lot 8. Site Features: The site is currently vacant. The site was previously occupied by a vacant one-story brick building with a paved parking lot. The building has been demolished but the foundation slab remains. Current Zoning and Land Use: The site is zoned R7A for residential use, with a C2-2 commercial overlay. The site is surrounded by commercial uses to the south and east, and by residential uses across Marcy Avenue to the west and across Lorimer Avenue to the north. Past Use of the Site: The site was developed prior to 1887 with 12 two-story residential homes. By 1935, the home on the corner of Marcy Ave. and Lorimer St. was replaced with a storefront. The other lots fronting on Lorimer St. contained a commercial building used for truck sales and service. The Charles Pfizer and Co. facility occupied the property from 1965 to 1987. From 1989 to 2007, a warehouse was operated on the site. These uses contributed to the petroleum contamination found at the site. Site Geology and Hydrogeology: Subsurface soils at the Site consist of a urban fill material mixed with bricks, coal ash, and other debris to approximately 5 ft below grade (bg). A native brown to grey silty-clay is present below the fill material to a depth of at least 12 ft bg. Bedrock in this area of Brooklyn is approximately 100 ft bg. Groundwater is present at a depth of approximately 10 ft bg and flows to the west-northwest toward Wallabout Channel. "
Env Problem: "Nature and Extent of Contamination: Prior to Remediation Soil: Based on the investigations conducted to date, the primary contaminants of concern detected in soil include SVOCs and metals. The contamination at the site was determined to be in the fill layer and beneath it to a depth of approximately 15 feet below grade over the entire site.

S113402003

Soil in two soil borings was contaminated with petroleum. Numerous SVOC concentrations in soil in three of six soil borings exceeds the Unrestricted Use Soil Cleanup Objective (UUSCOs) as well as the Restricted Residential SCOs (RRSCOs), including: benzo(a)anthracene at a maximum concentration of 630ppm (RRSCO is 1 ppm), benzo(a)pyrene up to 440 ppm (RRSCO is 1 ppm), benzo(b)fluoranthene up to 500 ppm (RRSCO is 1 ppm), benzo(k)fluoranthene up to 130 ppm (RRSCO is 3.9 ppm), chrysene up to 640 ppm (RRSCO is 3.9 ppm), fluoranthene up to 1,200 ppm (RRSCO is 100 ppm), indeno(1,2,3-cd)pyrene up to 180ppm (RRSCO is 0.5 ppm), phenanthrene up to 1,800 ppm (RRSCO is 100 ppm), and pyrene up to 1,400 ppm (RRSCO is 100 ppm). Metals were detected in two soil samples at concentrations exceeding both the UUSCOs and the RRSCOs, as follows: cadmium up to 7.73 ppm (RRSCO is 2.5 ppm), lead up to 1,060ppm (RRSCO is 400 ppm), and mercury up to 2.78 ppm (RRSCO is 0.81 ppm), and zinc 2,550ppm (RRSCO is 109 ppm). Groundwater: VOCs and SVOCs were the primary contaminants found in groundwater. Cis 1,2 dichloroethene (DCE) was identified at a maximum concentration of 99 ppb (compared to groundwater quality standard of 5 ppb), 1,1,1- trichloroethane (TCA) 140 ppb (compared with groundwater quality standard of 5 ppb), and naphthalene was detected at up to 95 ppb (compared to groundwater quality standard of 10 ppb). The chlorinated solvents detected in groundwater are from a suspected upgradient source. Soil Vapor: In soil vapor, TCA was detected at a concentration of up to 32,000 micrograms per cubic meter. The chlorinated solvents detected in soil vapor are from a suspected upgradient source. Post-Remediation: Remediation at the site is complete. Remaining contamination in soil and groundwater is being managed under a Site Management Plan. "

Health Problem:

"Direct contact with contaminants in the soil is unlikely because the site is covered entirely by a building. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not contaminated by this site. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Measures are in place to minimize the potential for vapor intrusion in buildings at the site and sampling indicates that soil vapor intrusion is not a concern for off-site buildings."

 Control Type: ENG
 Date Record Added: 08/08/2013
 Date Rec Updated: 06/16/2020
 Updated By: JLDYBER
 Site Description: "Location: The site is located in an urban area in East Williamsburg, Brooklyn and occupies Tax Block 2245 Lot 8. Site Features: The site is currently vacant. The site was previously occupied by a vacant one-story brick building with a paved parking lot. The building has been demolished but the foundation slab remains. Current Zoning and Land Use: The site is zoned R7A for residential use, with a C2-2 commercial overlay. The site is surrounded by commercial uses to the south and east, and by residential uses across Marcy Avenue to the west and across Lorimer Avenue to the north. Past Use of the Site: The site was developed prior to 1887 with 12 two-story residential homes. By 1935, the home on the corner of Marcy Ave. and Lorimer St. was replaced with a storefront. The other lots fronting on Lorimer St. contained a commercial building used for truck sales and service. The Charles Pfizer and Co. facility occupied the property from 1965 to 1987. From 1989 to 2007, a warehouse was operated on the site. These uses contributed to the petroleum contamination found at the site. Site Geology and Hydrogeology: Subsurface soils at the Site consist of a urban fill material mixed with bricks, coal ash, and other debris to approximately 5 ft below grade (bg). A native brown to grey silty-clay is present below the fill material to a depth of at least 12 ft bg. Bedrock in this area of Brooklyn is approximately 100 ft bg. Groundwater is present at a depth of approximately 10 ft bg and flows to the west-northwest toward Wallabout Channel. "
 Env Problem: "Nature and Extent of Contamination: Prior to Remediation Soil: Based on the investigations conducted to date, the primary contaminants of concern detected in soil include SVOCs and metals. The contamination at the site was determined to be in the fill layer and beneath it to a depth of approximately 15 feet below grade over the entire site.

FORMER CHARLES PFIZER & CO SITE (Continued)

S112139064

Soil in two soil borings was contaminated with petroleum. Numerous SVOC concentrations in soil in three of six soil borings exceeds the Unrestricted Use Soil Cleanup Objective (UUSCOs) as well as the Restricted Residential SCOs (RRSCOs), including: benzo(a)anthracene at a maximum concentration of 630ppm (RRSCO is 1 ppm), benzo(a)pyrene up to 440 ppm (RRSCO is 1 ppm, benzo(b)fluoranthene up to 500 ppm (RRSCO is 1 ppm), benzo(k)fluoranthene up to 130 ppm (RRSCO is 3.9 ppm), chrysene up to 640 ppm (RRSCO is 3.9 ppm), fluoranthene up to 1,200 ppm (RRSCO is 100 ppm), indeno(1,2,3-cd)pyrene up to 180ppm (RRSCO is 0.5 ppm), phenanthrene up to 1,800 ppm (RRSCO is 100 ppm), and pyrene up to 1,400 ppm (RRSCO is 100 ppm). Metals were detected in two soil samples at concentrations exceeding both the UUSCOs and the RRSCOs, as follows: cadmium up to 7.73 ppm (RRSCO is 2.5 ppm), lead up to 1,060ppm (RRSCO is 400 ppm), and mercury up to 2.78 ppm (RRSCO is 0.81 ppm), and zinc 2,550ppm (RRSCO is 109 ppm). Groundwater: VOCs and SVOCs were the primary contaminants found in groundwater. Cis 1,2 dichloroethene (DCE) was identified at a maximum concentration of 99 ppb (compared to groundwater quality standard of 5 ppb), 1,1,1- trichloroethane (TCA) 140 ppb (compared with groundwater quality standard of 5 ppb), and naphthalene was detected at up to 95 ppb (compared to groundwater quality standard of 10 ppb). The chlorinated solvents detected in groundwater are from a suspected upgradient source. Soil Vapor: In soil vapor, TCA was detected at a concentration of up to 32,000 micrograms per cubic meter. The chlorinated solvents detected in soil vapor are from a suspected upgradient source. Post-Remediation: Remediation at the site is complete. Remaining contamination in soil and groundwater is being managed under a Site Management Plan. "

Health Problem: "Direct contact with contaminants in the soil is unlikely because the site is covered entirely by a building. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not contaminated by this site. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Measures are in place to minimize the potential for vapor intrusion in buildings at the site and sampling indicates that soil vapor intrusion is not a concern for off-site buildings."

Site Description: "Location: The site is located in an urban area in East Williamsburg, Brooklyn and occupies Tax Block 2245 Lot 8. Site Features: The site is currently vacant. The site was previously occupied by a vacant one-story brick building with a paved parking lot. The building has been demolished but the foundation slab remains. Current Zoning and Land Use: The site is zoned R7A for residential use, with a C2-2 commercial overlay. The site is surrounded by commercial uses to the south and east, and by residential uses across Marcy Avenue to the west and across Lorimer Avenue to the north. Past Use of the Site: The site was developed prior to 1887 with 12 two-story residential homes. By 1935, the home on the corner of Marcy Ave. and Lorimer St. was replaced with a storefront. The other lots fronting on Lorimer St. contained a commercial building used for truck sales and service. The Charles Pfizer and Co. facility occupied the property from 1965 to 1987. From 1989 to 2007, a warehouse was operated on the site. These uses contributed to the petroleum contamination found at the site. Site Geology and Hydrogeology: Subsurface soils at the Site consist of a urban fill material mixed with bricks, coal ash, and other debris to approximately 5 ft below grade (bg). A native brown to grey silty-clay is present below the fill material to a depth of at least 12 ft bg. Bedrock in this area of Brooklyn is approximately 100 ft bg. Groundwater is present at a depth of approximately 10 ft bg and flows to the west-northwest toward Wallabout Channel. "

Env Problem: "Nature and Extent of Contamination: Prior to Remediation Soil: Based on the investigations conducted to date, the primary contaminants of concern detected in soil include SVOCs and metals. The contamination at the site was determined to be in the fill layer and beneath it to a depth of approximately 15 feet below grade over the entire site. Soil in two soil borings was contaminated with petroleum. Numerous SVOC concentrations in soil in three of six soil borings exceeds the Unrestricted Use Soil Cleanup Objective (UUSCOs) as well as the Restricted Residential SCOs (RRSCOs), including: benzo(a)anthracene at a maximum concentration of 630ppm (RRSCO is 1 ppm), benzo(a)pyrene up to 440 ppm (RRSCO is 1 ppm), benzo(b)fluoranthene up to 500 ppm (RRSCO is 1 ppm), benzo(k)fluoranthene up to 130 ppm (RRSCO is 3.9 ppm), chrysene up to 640 ppm (RRSCO is 3.9 ppm), fluoranthene up to 1,200 ppm (RRSCO is 100 ppm), indeno(1,2,3-cd)pyrene up to 180ppm

(RRSCO is 0.5 ppm), phenanthrene up to 1,800 ppm (RRSCO is 100 ppm), and pyrene up to 1,400 ppm (RRSCO is 100 ppm). Metals were detected in two soil samples at concentrations exceeding both the UUSCOs and the RRSCOs, as follows: cadmium up to 7.73 ppm (RRSCO is 2.5 ppm), lead up to 1,060ppm (RRSCO is 400 ppm), and mercury up to 2.78 ppm (RRSCO is 0.81 ppm), and zinc 2,550ppm (RRSCO is 109 ppm). Groundwater: VOCs and SVOCs were the primary contaminants found in groundwater. Cis 1,2 dichloroethene (DCE) was identified at a maximum concentration of 99 ppb (compared to groundwater quality standard of 5 ppb), 1,1,1- trichloroethane (TCA) 140 ppb (compared with groundwater quality standard of 5 ppb), and naphthalene was detected at up to 95 ppb (compared to groundwater quality standard of 10 ppb). The chlorinated solvents detected in groundwater are from a suspected upgradient source. Soil Vapor: In soil vapor, TCA was detected at a concentration of up to 32,000 micrograms per cubic meter. The chlorinated solvents detected in soil vapor are from a suspected upgradient source. Post-Remediation: Remediation at the site is complete. Remaining contamination in soil and groundwater is being managed under a Site Management Plan. "

Health Problem: "Direct contact with contaminants in the soil is unlikely because the site is covered entirely by a building. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not contaminated by this site. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Measures are in place to minimize the potential for vapor intrusion in buildings at the site and sampling indicates that soil vapor intrusion is not a concern for off-site buildings."

Site Code: 479327

Site Description: "Location: The site is located in an urban area in East Williamsburg, Brooklyn and occupies Tax Block 2245 Lot 8. Site Features: The site is currently vacant. The site was previously occupied by a vacant one-story brick building with a paved parking lot. The building has been demolished but the foundation slab remains. Current Zoning and Land Use: The site is zoned R7A for residential use, with a C2-2 commercial overlay. The site is surrounded by commercial uses to the south and east, and by residential uses across Marcy Avenue to the west and across Lorimer Avenue to the north. Past Use of the Site: The site was developed prior to 1887 with 12 two-story residential homes. By 1935, the home on the corner of Marcy Ave. and Lorimer St. was replaced with a storefront. The other lots fronting on Lorimer St. contained a commercial building used for truck sales and service. The Charles Pfizer and Co. facility occupied the property from 1965 to 1987. From 1989 to 2007, a warehouse was operated on the site. These uses contributed to the petroleum contamination found at the site. Site Geology and Hydrogeology: Subsurface soils at the Site consist of a urban fill material mixed with bricks, coal ash, and other debris to approximately 5 ft below grade (bg). A native brown to grey silty-clay is present below the fill material to a depth of at least 12 ft bg. Bedrock in this area of Brooklyn is approximately 100 ft bg. Groundwater is present at a depth of approximately 10 ft bg and flows to the west-northwest toward Wallabout Channel. "

Env Problem: "Nature and Extent of Contamination: Prior to Remediation Soil: Based on the investigations conducted to date, the primary contaminants of concern detected in soil include SVOCs and metals. The contamination at the site was determined to be in the fill layer and beneath it to a depth of approximately 15 feet below grade over the entire site. Soil in two soil borings was contaminated with petroleum. Numerous SVOC concentrations in soil in three of six soil borings exceeds the Unrestricted Use Soil Cleanup Objective (UUSCOs) as well as the Restricted Residential SCOs (RRSCOs), including: benzo(a)anthracene at a maximum concentration of 630ppm (RRSCO is 1 ppm), benzo(a)pyrene up to 440 ppm (RRSCO is 1 ppm, benzo(b)fluoranthene up to 500 ppm (RRSCO is 1 ppm), benzo(k)fluoranthene up to 130 ppm (RRSCO is 3.9 ppm), chrysene up to 640 ppm (RRSCO is 3.9 ppm), fluoranthene up to 1,200 ppm (RRSCO is 100 ppm), indeno(1,2,3-cd)pyrene up to 180ppm (RRSCO is 0.5 ppm), phenanthrene up to 1,800 ppm (RRSCO is 100 ppm), and pyrene up to 1,400 ppm (RRSCO is 100 ppm). Metals were detected in two soil samples at concentrations exceeding both the UUSCOs and the RRSCOs, as follows: cadmium up to 7.73 ppm (RRSCO is 2.5 ppm),

Control Code: 14
Control Type: INST
Dt record added: 08/08/2013
Dt rec updated: 06/16/2020
Updated By: JLDYBER
Site Code: 479327

Site Description: "Location: The site is located in an urban area in East Williamsburg, Brooklyn and occupies Tax Block 2245 Lot 8. Site Features: The site is currently vacant. The site was previously occupied by a vacant one-story brick building with a paved parking lot. The building has been demolished but the foundation slab remains. Current Zoning and Land Use: The site is zoned R7A for residential use, with a C2-2 commercial overlay. The site is surrounded by commercial uses to the south and east, and by residential uses across Marcy Avenue to the west and across Lorimer Avenue to the north. Past Use of the Site: The site was developed prior to 1887 with 12 two-story residential homes. By 1935, the home on the corner of Marcy Ave. and Lorimer St. was replaced with a storefront. The other lots fronting on Lorimer St. contained a commercial building used for truck sales and service. The Charles Pfizer and Co. facility occupied the property from 1965 to 1987. From 1989 to 2007, a warehouse was operated on the site. These uses contributed to the petroleum contamination found at the site. Site Geology and Hydrogeology: Subsurface soils at the Site consist of a urban fill material mixed with bricks, coal ash, and other debris to approximately 5 ft below grade (bg). A native brown to grey silty-clay is present below the fill material to a depth of at least 12 ft bg. Bedrock in this area of Brooklyn is approximately 100 ft bg. Groundwater is present at a depth of approximately 10 ft bg and flows to the west-northwest toward Wallabout Channel. "

Env Problem: "Nature and Extent of Contamination: Prior to Remediation Soil: Based on the investigations conducted to date, the primary contaminants of concern detected in soil include SVOCs and metals. The contamination at the site was determined to be in the fill layer and beneath it to a depth of approximately 15 feet below grade over the entire site. Soil in two soil borings was contaminated with petroleum. Numerous SVOC concentrations in soil in three of six soil borings exceeds the Unrestricted Use Soil Cleanup Objective (UUSCOs) as well as the Restricted Residential SCOs (RRSCOs), including: benzo(a)anthracene at a maximum concentration of 630ppm (RRSCO is 1 ppm), benzo(a)pyrene up to 440 ppm (RRSCO is 1 ppm), benzo(b)fluoranthene up to 500 ppm (RRSCO is 1 ppm), benzo(k)fluoranthene up to 130 ppm (RRSCO is 3.9 ppm), chrysene up to 640 ppm (RRSCO is 3.9 ppm), fluoranthene up to 1,200 ppm (RRSCO is 100 ppm), indeno(1,2,3-cd)pyrene up to 180ppm (RRSCO is 0.5 ppm), phenanthrene up to 1,800 ppm (RRSCO is 100 ppm), and pyrene up to 1,400 ppm (RRSCO is 100 ppm). Metals were detected in two soil samples at concentrations exceeding both the UUSCOs and the RRSCOs, as follows: cadmium up to 7.73 ppm (RRSCO is 2.5 ppm), lead up to 1,060ppm (RRSCO is 400 ppm), and mercury up to 2.78 ppm (RRSCO is 0.81 ppm), and zinc 2,550ppm (RRSCO is 109 ppm). Groundwater: VOCs and SVOCs were the primary contaminants found in groundwater. Cis 1,2 dichloroethene (DCE) was identified at a maximum concentration of 99 ppb (compared to groundwater quality standard of 5 ppb), 1,1,1- trichloroethane (TCA) 140 ppb (compared with groundwater quality standard of 5 ppb), and naphthalene was detected at up to 95 ppb (compared to groundwater quality standard of 10 ppb).

FORMER CHARLES PFIZER & CO SITE (Continued)

S112139064

The chlorinated solvents detected in groundwater are from a suspected upgradient source. Soil Vapor: In soil vapor, TCA was detected at a concentration of up to 32,000 micrograms per cubic meter. The chlorinated solvents detected in soil vapor are from a suspected upgradient source. Post-Remediation: Remediation at the site is complete. Remaining contamination in soil and groundwater is being managed under a Site Management Plan. "

Health Problem: "Direct contact with contaminants in the soil is unlikely because the site is covered entirely by a building. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not contaminated by this site. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Measures are in place to minimize the potential for vapor intrusion in buildings at the site and sampling indicates that soil vapor intrusion is not a concern for off-site buildings."

MAP FINDINGS

FORMER CHARLES PFIZER & CO SITE (Continued)

S112139064

Site Description: "Location: The site is located in an urban area in East Williamsburg, Brooklyn and occupies Tax Block 2245 Lot 8. Site Features: The site is currently vacant. The site was previously occupied by a vacant one-story brick building with a paved parking lot. The building has been demolished but the foundation slab remains. Current Zoning and Land Use: The site is zoned R7A for residential use, with a C2-2 commercial overlay. The site is surrounded by commercial uses to the south and east, and by residential uses across Marcy Avenue to the west and across Lorimer Avenue to the north. Past Use of the Site: The site was developed prior to 1887 with 12 two-story residential homes. By 1935, the home on the corner of Marcy Ave. and Lorimer St. was replaced with a storefront. The other lots fronting on Lorimer St. contained a commercial building used for truck sales and service. The Charles Pfizer and Co. facility occupied the property from 1965 to 1987. From 1989 to 2007, a warehouse was operated on the site. These uses contributed to the petroleum contamination found at the site. Site Geology and Hydrogeology: Subsurface soils at the Site consist of a urban fill material mixed with bricks, coal ash, and other debris to approximately 5 ft below grade (bg). A native brown to grey silty-clay is present below the fill material to a depth of at least 12 ft bg. Bedrock in this area of Brooklyn is approximately 100 ft bg. Groundwater is present at a depth of approximately 10 ft bg and flows to the west-northwest toward Wallabout Channel. "

Env Problem: "Nature and Extent of Contamination: Prior to Remediation Soil: Based on the investigations conducted to date, the primary contaminants of concern detected in soil include SVOCs and metals. The contamination at the site was determined to be in the fill layer and beneath it to a depth of approximately 15 feet below grade over the entire site. Soil in two soil borings was contaminated with petroleum. Numerous SVOC concentrations in soil in three of six soil borings exceeds the Unrestricted Use Soil Cleanup Objective (UUSCOs) as well as the Restricted Residential SCOs (RRSCOs), including: benzo(a)anthracene at a maximum concentration of 630ppm (RRSCO is 1 ppm), benzo(a)pyrene up to 440 ppm (RRSCO is 1 ppm), benzo(b)fluoranthene up to 500 ppm (RRSCO is 1 ppm), benzo(k)fluoranthene up to 130 ppm (RRSCO is 3.9 ppm), chrysene up to 640 ppm (RRSCO is 3.9 ppm), fluoranthene up to 1,200 ppm (RRSCO is 100 ppm), indeno(1,2,3-cd)pyrene up to 180ppm (RRSCO is 0.5 ppm), phenanthrene up to 1,800 ppm (RRSCO is 100 ppm), and pyrene up to 1,400 ppm (RRSCO is 100 ppm). Metals were detected in two soil samples at concentrations exceeding both the UUSCOs and the RRSCOs, as follows: cadmium up to 7.73 ppm (RRSCO is 2.5 ppm), lead up to 1,060ppm (RRSCO is 400 ppm), and mercury up to 2.78 ppm (RRSCO is 0.81 ppm), and zinc 2,550ppm (RRSCO is 109 ppm). Groundwater: VOCs and SVOCs were the primary contaminants found in groundwater. Cis 1,2 dichloroethene (DCE) was identified at a maximum concentration of 99 ppb (compared to groundwater quality standard of 5 ppb), 1,1,1- trichloroethane (TCA) 140 ppb (compared with groundwater quality standard of 5 ppb), and naphthalene was detected at up to 95 ppb (compared to groundwater quality standard of 10 ppb). The chlorinated solvents detected in groundwater are from a suspected upgradient source. Soil Vapor: In soil vapor, TCA was detected at a concentration of up to 32,000 micrograms per cubic meter. The chlorinated solvents detected in soil vapor are from a suspected upgradient source. Post-Remediation: Remediation at the site is complete. Remaining contamination in soil and groundwater is being managed under a Site Management Plan. "

Health Problem: "Direct contact with contaminants in the soil is unlikely because the

S112139064

site is covered entirely by a building. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not contaminated by this site. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. Measures are in place to minimize the potential for vapor intrusion in buildings at the site and sampling indicates that soil vapor intrusion is not a concern for off-site buildings."

that he will get to me. - Maloney 11/12/05 - left message with IVI Environmental. - Maloney Status of site needs to be confirmed with consultant. - Maloney Albany review (above) - kamalone 1/29/07 - Austin - Transferred from Albany assignment to Patel in R-2 office for further work - end 03/05/07-Hiralkumar Patel. visited site on 03/02/07. spoke with Mr. Balinco, property manager. he doesn't know anything about contamination soil at site. this property occupies block between Ryerson st and Grand Ave (main office). building area along Ryerson st is vacant since 1999, which was found with contaminated soil. asked Mr. Balinco to find out tank closure report. Yaniv Balinco Moishe's Self Storage 32 Grand Avenue Brooklyn, NY 11205 Ph. (718) 237-9735 Fax (718) 237-9771 email: ybalinco@moishesselfstorage.com 03/08/07-Hiralkumar Patel. tried to reach Mr. Balinco but he is on vacation and will be back on 03/27/07. 06/14/07-Hiralkumar Patel. PBS #: 2-602131. as per PBS record, site had two 5000 gal #2 oil USTs and were removed in 2000. from city records, property owner: Ryerson Street Realty Corp. 450 W 15th Street New York, NY 10011-7097 and alternate addresses: 35-57 Ryerson street, 315-333 Park Avenue, 32 Grand Avenue. sent letter to Mr. Balinco at 32 Grand Avenue and also to Ryerson St Realty corp requiring soil/groundwater investigation in area of previously removed tanks. letter emailed to Mr. Balinco. 06/26/07-Hiralkumar Patel. letter, that was sent to Ryerson St Realty corp address, came back undelivered. 07/25/07-Hiralkumar Patel. spoke with Mr. Balinco. he didn't receive any letter. sent copy of previously sent letter to Mr. Balinco at different email address (brooklynstorage@moishes.com). 08/20/07-Hiralkumar Patel. received call from Mr. Bartley from Accutech. he mentioned about tank closure report dated Oct. 18, 2000. asked Mr. Bartley to submit that report. James Bartley Accutech Environmental Services Ph. (732) 739-6444 Ext. 14 08/27/07-Hiralkumar Patel. received report from James. abstract: - report prepared on Oct. 18, 2000 - Accutech removed one 12,000 gal #2 UST and one hydraulic lift and abandoned one 12,000 #2 oil UST - western UST (UST #1) was located immediately adjacent to the footings of a loading dock existing on the adjacent property - was determined that the removal of UST #1 would seriously undermine the footings of loading dock, so UST #1 was abandoned-in-place with cement slurry - eastern UST (UST #2) was removed - stained soil was observed around the fill pipes of both USTs and on the bottom of the UST's excavation - groundwater was not encountered in the bottom of the UST's common excavation at approx. 16 ft bg - 8 inch thick concrete anchor slab, on which the USTs were installed, was found on the bottom of the UST's excavation - sandy clay found from 2 ft to 10 ft and silty clay was found from 10 ft to 16 ft depth - tops of the UST's were located approx. 3.5 ft bg - no holes were found in UST #2 - stained soil was removed from the northern, eastern and southern sidewalls and the bottom of the excavation - excavated was extended vertically to approx. 16 ft bg in the eastern portion of the excavation, between the edge of the anchor slab and the building foundations - UST #1 was inspected in place. no holes were observed on the exposed top and eastern side of UST #1 - hydraulic lift, located immediately adjacent to the eastern sidewall of the UST's excavation, was corroded and stained soil was observed on top, around and beneath the hydraulic lift - total of 113.47 tons of contaminated soil was removed - collected a total of 14 post-excavation soil samples from sidewalls and bottom of the UST's and hydraulic lift's common excavation - samples were analyzed via TCLP methods - found SVOC contamination in

 Updated By: RPMUSTIC
 Site Description: "Site Location: The site is located in an urban area at 553 Marcy Avenue in Brooklyn, Kings County. It is identified on New York City tax maps as Block 1747, Lot 1. The site is bordered by Stockton Street on the north, Marcy Avenue on the west and Myrtle Avenue on the south. Site Features: The site is approximately 2.1 acres in size. Currently a new building covering the majority of the site is under construction. The site previously included several attached industrial buildings which were demolished for redevelopment in 2015 and 2016. The remainder of the site was paved parking. Current Zoning and Land Use: Part of the site is zoned as residential with commercial retail businesses on the ground floor (R7D residential with a C2-4 commercial overlay), while the remainder of the site has residential zoning (R6A). The site is currently vacant and the on-site buildings have been demolished. The surrounding area includes multi-family residential buildings, schools, churches and retail stores. The site is located in a Type A en-zone. Past Use of the Site: Commercial and residential development at the site began prior to 1887. Cascade Laundry, a commercial laundry, began operating on part of the site prior to 1918 and expanded onto the other parts of the site over the succeeding decades before closing in 2010. Other past uses of the site include various retail stores, an oil paint factory, a carpet cleaning facility, a bakery, an upholstery factory, a furniture manufacturer, and a chemical factory. At some point in their history, Cascade Laundry used tetrachloroethene (PCE) in their operations, as evidenced by PCE-contaminated soil. Petroleum

MAP FINDINGS

FORMER CASCADE LAUNDRY (Continued)

S118628301

Env Problem:

contamination was also detected in the on-site soil, likely from leaking underground storage tanks. The top 4-8 feet of soil beneath the site is historic fill, which contains semi-volatile organic compounds (SVOCs), metals and pesticides. Site Geology and Hydrogeology: Subsurface soils at the site consist of historic fill materials to a depth of about 4 to 8 feet below grade. Silty sand and gravel is present immediately below this layer. The elevation of the property is about 30 feet above mean sea level and the land within the immediate area slopes gradually from southeast to northwest. Groundwater at the site is present at a depth of about 25 feet below grade. The groundwater flow direction is northwest. "

"Nature and Extent of Contamination: Remediation at the site is complete. Based on investigations conducted to date, the primary contaminants of concern for the site include volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs) and metals. Review of on-site data indicates that the on-site contamination does not impact off-site properties or receptors. Soils - Soil contamination was addressed in the Remedial Action by dewatering, excavation and chemical oxidation. Post remediation, remaining soils to a depth of 15 ft. bgs meet UUSCOs for all parameters due to the depth of excavation across the site. All remaining soils at depth meet UUSCOs for all COCs, except for a single detection of Chrysene at 30 ft. bgs beneath Lot 2. Soils pre remediation - The VOCs in the soil included petroleum compounds and chlorinated solvents. During the Remedial Investigation, petroleum compounds exceeding unrestricted use soil cleanup objectives include 1,2,4-trimethylbenzene, 1,3,5-trimethylbenzene, ethylbenzene, xylene, methylene chloride and naphthalene. For example, 1,2,4-trimethylbenzene, was detected at 38 parts-per-million (ppm), exceeding the unrestricted use soil cleanup objective of 3.6 ppm. Tetrachloroethene (PCE), a chlorinated solvent, was found in the soil at 48 ppm, exceeding the unrestricted use soil cleanup objective of 1.3 ppm. SVOCs, metals and pesticides were detected in the subsurface soils. Nearly all of these contaminants were detected near the surface in the historic fill layer, and likely arrived at the site with the deposition of the historic fill material. However, chrysene, an SVOC, was detected beneath the historic fill at 3.1 ppm, exceeding the unrestricted soil cleanup objective of 1 ppm. Lead was detected in the soil at a maximum level of 3,770 ppm, which may classify the soil as hazardous waste. Groundwater - Post Remediation, groundwater beneath the site meets or will meet SCGs for all site-sourced contaminants. The petroleum compounds still being detected in groundwater approximate the ambient water quality standards. As of January 2020, however, on site groundwater sampling shows up to 80 ug/l of PCE in groundwater. Pre Remediation groundwater - The VOCs in the groundwater also consist of petroleum compounds and chlorinated solvents. A viscous petroleum product -- likely fuel oil -- was found in one monitoring well, indicated a layer of free petroleum product floating on the groundwater. PCE was detected in several wells at levels exceeding its New York State groundwater standard; however, the highest PCE concentrations were detected upgradient of any known on-site source area and at the upgradient edge of the site. Several pesticides were detected at concentrations above groundwater standards. Soil Vapor and Sub-Slab Vapor - Post remediation sub-slab samples taken in newly constructed on-site buildings detected PCE at a concentrations as high as 441 micrograms per cubic meter. Pre Remediation Soil Vapor and Sub-Slab Vapor - Several VOCs, including

PCE, were detected in soil vapor and sub-slab vapor samples collected on-site, most of which were not detected in the soil and groundwater. However, PCE was detected in the on-site soil and groundwater. PCE and TCE were detected in sub-slab and soil vapor samples at maximum concentrations of 453 micrograms per cubic meter and 25.8 micrograms per cubic meter, respectively. One soil vapor sample had detections of benzene, toluene, ethylbenzene and xylene (BTEX) totaling 1,466 micrograms per cubic meter. "

Health Problem: "Remedial actions are complete and measures are in place to control the potential for coming in contact with contamination remaining at the site."

Site Description:

"Site Location: The site is located in an urban area at 553 Marcy Avenue in Brooklyn, Kings County. It is identified on New York City tax maps as Block 1747, Lot 1. The site is bordered by Stockton Street on the north, Marcy Avenue on the west and Myrtle Avenue on the south. Site Features: The site is approximately 2.1 acres in size. Currently a new building covering the majority of the site is under construction. The site previously included several attached industrial buildings which were demolished for redevelopment in 2015 and 2016. The remainder of the site was paved parking. Current Zoning and Land Use: Part of the site is zoned as residential with commercial retail businesses on the ground floor (R7D residential with a C2-4 commercial overlay), while the remainder of the site has residential zoning (R6A). The site is currently vacant and the on-site buildings have been demolished. The surrounding area includes multi-family residential buildings, schools, churches and retail stores. The site is located in a Type A en-zone. Past Use of the Site: Commercial and residential development at the site began prior to 1887. Cascade Laundry, a commercial laundry, began operating on part of the site prior to 1918 and expanded onto the other parts of the site over the succeeding decades before closing in 2010. Other past uses of the site include various retail stores, an oil paint factory, a carpet cleaning facility, a bakery, an upholstery factory, a furniture manufacturer, and a chemical factory. At some point in their history, Cascade Laundry used tetrachloroethene (PCE) in their operations, as evidenced by PCE-contaminated soil. Petroleum

contamination was also detected in the on-site soil, likely from leaking underground storage tanks. The top 4-8 feet of soil beneath the site is historic fill, which contains semi-volatile organic compounds (SVOCs), metals and pesticides. Site Geology and Hydrogeology: Subsurface soils at the site consist of historic fill materials to a depth of about 4 to 8 feet below grade. Silty sand and gravel is present immediately below this layer. The elevation of the property is about 30 feet above mean sea level and the land within the immediate area slopes gradually from southeast to northwest. Groundwater at the site is present at a depth of about 25 feet below grade. The groundwater flow direction is northwest. "

Env Problem: "Nature and Extent of Contamination: Remediation at the site is complete. Based on investigations conducted to date, the primary contaminants of concern for the site include volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs) and metals. Review of on-site data indicates that the on-site contamination does not impact off-site properties or receptors. Soils - Soil contamination was addressed in the Remedial Action by dewatering, excavation and chemical oxidation. Post remediation, remaining soils to a depth of 15 ft. bgs meet UUSCOs for all parameters due to the depth of excavation across the site. All remaining soils at depth meet UUSCOs for all COCs, except for a single detection of Chrysene at 30 ft. bgs beneath Lot 2. Soils pre remediation - The VOCs in the soil included petroleum compounds and chlorinated solvents. During the Remedial Investigation, petroleum compounds exceeding unrestricted use soil cleanup objectives include 1,2,4-trimethylbenzene, 1,3,5-trimethylbenzene, ethylbenzene, xylene, methylene chloride and naphthalene. For example, 1,2,4-trimethylbenzene, was detected at 38 parts-per-million (ppm), exceeding the unrestricted use soil cleanup objective of 3.6 ppm. Site Code: 495614
Site Description: "Site Location: The site is located in an urban area at 553 Marcy Avenue in Brooklyn, Kings County. It is identified on New York City tax maps as Block 1747, Lot 1. The site is bordered by Stockton Street on the north, Marcy Avenue on the west and Myrtle Avenue on the south. Site Features: The site is approximately 2.1 acres in size. Currently a new building covering the majority of the site is under construction. The site previously included several attached industrial buildings which were demolished for redevelopment in 2015 and 2016. The remainder of the site was paved parking. Current Zoning and Land Use: Part of the site is zoned as residential with commercial retail businesses on the ground floor (R7D residential with a C2-4 commercial overlay), while the remainder of the site has residential zoning (R6A). The site is currently vacant and the on-site buildings have been demolished. The surrounding area includes multi-family residential buildings, schools, churches and retail stores. The site is located in a Type A en-zone. Past Use of the Site: Commercial and residential development at the site began prior to 1887. Cascade Laundry, a commercial laundry, began operating on part of the site prior to 1918 and expanded onto the other parts of the site over the succeeding decades before closing in 2010. Other past uses of the site include various retail stores, an oil paint factory, a carpet cleaning facility, a bakery, an upholstery factory,

FORMER CASCADE LAUNDRY (Continued)

S118628301

Env Problem: a furniture manufacturer, and a chemical factory. At some point in their history, Cascade Laundry used tetrachloroethene (PCE) in their operations, as evidenced by PCE-contaminated soil. Petroleum contamination was also detected in the on-site soil, likely from leaking underground storage tanks. The top 4-8 feet of soil beneath the site is historic fill, which contains semi-volatile organic compounds (SVOCs), metals and pesticides. Site Geology and Hydrogeology: Subsurface soils at the site consist of historic fill materials to a depth of about 4 to 8 feet below grade. Silty sand and gravel is present immediately below this layer. The elevation of the property is about 30 feet above mean sea level and the land within the immediate area slopes gradually from southeast to northwest. Groundwater at the site is present at a depth of about 25 feet below grade. The groundwater flow direction is northwest. "

"Nature and Extent of Contamination: Remediation at the site is complete. Based on investigations conducted to date, the primary contaminants of concern for the site include volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs) and metals. Review of on-site data indicates that the on-site contamination does not impact off-site properties or receptors. Soils - Soil contamination was addressed in the Remedial Action by dewatering, excavation and chemical oxidation. Post remediation, remaining soils to a depth of 15 ft. bgs meet UUSCOs for all parameters due to the depth of excavation across the site. All remaining soils at depth meet UUSCOs for all COCs, except for a single detection of Chrysene at 30 ft. bgs beneath Lot 2. Soils pre remediation - The VOCs in the soil included petroleum compounds and chlorinated solvents. During the Remedial Investigation, petroleum compounds exceeding unrestricted use soil cleanup objectives include 1,2,4-trimethylbenzene, 1,3,5-trimethylbenzene, ethylbenzene, xylene, methylene chloride and naphthalene. For example, 1,2,4-trimethylbenzene, was detected at 38 parts-per-million (ppm), exceeding the unrestricted use soil cleanup objective of 3.6 ppm. Tetrachloroethene (PCE), a chlorinated solvent, was found in the soil at 48 ppm, exceeding the unrestricted use soil cleanup objective of 1.3 ppm. SVOCs, metals and pesticides were detected in the subsurface soils. Nearly all of these contaminants were detected near the surface in the historic fill layer, and likely arrived at the site with the deposition of the historic fill material. However, chrysene, an SVOC, was detected beneath the historic fill at 3.1 ppm, exceeding the unrestricted soil cleanup objective of 1 ppm. Lead was detected in the soil at a maximum level of 3,770 ppm, which may classify the soil as hazardous waste. Groundwater - Post Remediation, groundwater beneath the site meets or will meet SCGs for all site-sourced contaminants. The petroleum compounds still being detected in groundwater approximate the ambient water quality standards. As of January 2020, however, on site groundwater sampling shows up to 80 ug/l of PCE in groundwater. Pre Remediation groundwater - The VOCs in the groundwater also consist of petroleum compounds and chlorinated solvents. A viscous petroleum product -- likely fuel oil -- was found in one monitoring well, indicated a layer of free petroleum product floating on the groundwater. PCE was detected in several wells at levels exceeding its New York State groundwater standard; however, the highest PCE concentrations were detected upgradient of any known on-site source area and at the upgradient edge of the site. Several pesticides were detected at concentrations above groundwater standards. Soil Vapor and Sub-Slab Vapor - Post remediation sub-slab

samples taken in newly constructed on-site buildings detected PCE at a concentrations as high as 441 micrograms per cubic meter. Pre Remediation Soil Vapor and Sub-Slab Vapor - Several VOCs, including PCE, were detected in soil vapor and sub-slab vapor samples collected on-site, most of which were not detected in the soil and groundwater. However, PCE was detected in the on-site soil and groundwater. PCE and TCE were detected in sub-slab and soil vapor samples at maximum concentrations of 453 micrograms per cubic meter and 25.8 micrograms per cubic meter, respectively. One soil vapor sample had detections of benzene, toluene, ethylbenzene and xylene (BTEX) totaling 1,466 micrograms per cubic meter. "

Health Problem: "Remedial actions are complete and measures are in place to control the potential for coming in contact with contamination remaining at the site."

Site Code: 495614

Site Description: "Site Location: The site is located in an urban area at 553 Marcy Avenue in Brooklyn, Kings County. It is identified on New York City tax maps as Block 1747, Lot 1. The site is bordered by Stockton Street on the north, Marcy Avenue on the west and Myrtle Avenue on the south. Site Features: The site is approximately 2.1 acres in size. Currently a new building covering the majority of the site is under construction. The site previously included several attached industrial buildings which were demolished for redevelopment in 2015 and 2016. The remainder of the site was paved parking. Current Zoning and Land Use: Part of the site is zoned as residential with commercial retail businesses on the ground floor (R7D residential with a C2-4 commercial overlay), while the remainder of the site has residential zoning (R6A). The site is currently vacant and the on-site buildings have been demolished. The surrounding area includes multi-family residential buildings, schools, churches and retail stores. The site is located in a Type A en-zone. Past Use of the

FORMER CASCADE LAUNDRY (Continued)

S118628301

Env Problem:

Site: Commercial and residential development at the site began prior to 1887. Cascade Laundry, a commercial laundry, began operating on part of the site prior to 1918 and expanded onto the other parts of the site over the succeeding decades before closing in 2010. Other past uses of the site include various retail stores, an oil paint factory, a carpet cleaning facility, a bakery, an upholstery factory, a furniture manufacturer, and a chemical factory. At some point in their history, Cascade Laundry used tetrachloroethene (PCE) in their operations, as evidenced by PCE-contaminated soil. Petroleum contamination was also detected in the on-site soil, likely from leaking underground storage tanks. The top 4-8 feet of soil beneath the site is historic fill, which contains semi-volatile organic compounds (SVOCs), metals and pesticides. Site Geology and Hydrogeology: Subsurface soils at the site consist of historic fill materials to a depth of about 4 to 8 feet below grade. Silty sand and gravel is present immediately below this layer. The elevation of the property is about 30 feet above mean sea level and the land within the immediate area slopes gradually from southeast to northwest. Groundwater at the site is present at a depth of about 25 feet below grade. The groundwater flow direction is northwest. "

"Nature and Extent of Contamination: Remediation at the site is complete. Based on investigations conducted to date, the primary contaminants of concern for the site include volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs) and metals. Review of on-site data indicates that the on-site contamination does not impact off-site properties or receptors. Soils - Soil contamination was addressed in the Remedial Action by dewatering, excavation and chemical oxidation. Post remediation, remaining soils to a depth of 15 ft. bgs meet UUSCOs for all parameters due to the depth of excavation across the site. All remaining soils at depth meet UUSCOs for all COCs, except for a single detection of Chrysene at 30 ft. bgs beneath Lot 2. Soils pre remediation - The VOCs in the soil included petroleum compounds and chlorinated solvents. During the Remedial Investigation, petroleum compounds exceeding unrestricted use soil cleanup objectives include 1,2,4-trimethylbenzene, 1,3,5-trimethylbenzene, ethylbenzene, xylene, methylene chloride and naphthalene. For example, 1,2,4-trimethylbenzene, was detected at 38 parts-per-million (ppm), exceeding the unrestricted use soil cleanup objective of 3.6 ppm. Tetrachloroethene (PCE), a chlorinated solvent, was found in the soil at 48 ppm, exceeding the unrestricted use soil cleanup objective of 1.3 ppm. SVOCs, metals and pesticides were detected in the subsurface soils. Nearly all of these contaminants were detected near the surface in the historic fill layer, and likely arrived at the site with the deposition of the historic fill material. However, chrysene, an SVOC, was detected beneath the historic fill at 3.1 ppm, exceeding the unrestricted soil cleanup objective of 1 ppm. Lead was detected in the soil at a maximum level of 3,770 ppm, which may classify the soil as hazardous waste. Groundwater - Post Remediation, groundwater beneath the site meets or will meet SCGs for all site-sourced contaminants. The petroleum compounds still being detected in groundwater approximate the ambient water quality standards. As of January 2020, however, on site groundwater sampling shows up to 80 ug/l of PCE in groundwater. Pre Remediation groundwater - The VOCs in the groundwater also consist of petroleum compounds and chlorinated solvents. A viscous petroleum product -- likely fuel oil -- was found in one monitoring well, indicated a layer of free petroleum product

floating on the groundwater. PCE was detected in several wells at levels exceeding its New York State groundwater standard; however, the highest PCE concentrations were detected upgradient of any known on-site source area and at the upgradient edge of the site. Several pesticides were detected at concentrations above groundwater standards. Soil Vapor and Sub-Slab Vapor - Post remediation sub-slab samples taken in newly constructed on-site buildings detected PCE at a concentrations as high as 441 micrograms per cubic meter. Pre Remediation Soil Vapor and Sub-Slab Vapor - Several VOCs, including PCE, were detected in soil vapor and sub-slab vapor samples collected on-site, most of which were not detected in the soil and groundwater. However, PCE was detected in the on-site soil and groundwater. PCE and TCE were detected in sub-slab and soil vapor samples at maximum concentrations of 453 micrograms per cubic meter and 25.8 micrograms per cubic meter, respectively. One soil vapor sample had detections of benzene, toluene, ethylbenzene and xylene (BTEX) totaling 1,466 micrograms per cubic meter. "

Health Problem: "Remedial actions are complete and measures are in place to control the potential for coming in contact with contamination remaining at the site."

Soils pre remediation - The VOCs in the soil included petroleum compounds and chlorinated solvents. During the Remedial Investigation, petroleum compounds exceeding unrestricted use soil cleanup objectives include 1,2,4-trimethylbenzene, 1,3,5-trimethylbenzene, ethylbenzene, xylene, methylene chloride and naphthalene. For example, 1,2,4-trimethylbenzene, was detected at 38 parts-per-million (ppm), exceeding the unrestricted use soil cleanup objective of 3.6 ppm. Tetrachloroethene (PCE), a chlorinated solvent, was found in the soil at 48 ppm, exceeding the unrestricted use soil cleanup objective of 1.3 ppm. SVOCs, metals and pesticides were detected in the subsurface soils. Nearly all of these contaminants were detected near the surface in the historic fill layer, and likely arrived at the site with the deposition of the historic fill material. However, chrysene, an SVOC, was detected beneath the historic fill at 3.1 ppm, exceeding the unrestricted soil cleanup objective of 1 ppm. Lead was detected in the soil at a maximum level of 3,770 ppm, which may classify the soil as hazardous waste. Groundwater - Post Remediation, groundwater beneath the site meets or will meet SCGs for all site-sourced contaminants. The petroleum compounds still being detected in groundwater approximate the ambient water quality standards. As of January 2020, however, on site groundwater sampling shows up to 80

ug/l of PCE in groundwater. Pre Remediation groundwater - The VOCs in the groundwater also consist of petroleum compounds and chlorinated solvents. A viscous petroleum product -- likely fuel oil -- was found in one monitoring well, indicated a layer of free petroleum product floating on the groundwater. PCE was detected in several wells at levels exceeding its New York State groundwater standard; however, the highest PCE concentrations were detected upgradient of any known on-site source area and at the upgradient edge of the site. Several pesticides were detected at concentrations above groundwater standards. Soil Vapor and Sub-Slab Vapor - Post remediation sub-slab samples taken in newly constructed on-site buildings detected PCE at a concentrations as high as 441 micrograms per cubic meter. Pre Remediation Soil Vapor and Sub-Slab Vapor - Several VOCs, including PCE, were detected in soil vapor and sub-slab vapor samples collected on-site, most of which were not detected in the soil and groundwater. However, PCE was detected in the on-site soil and groundwater. PCE and TCE were detected in sub-slab and soil vapor samples at maximum concentrations of 453 micrograms per cubic meter and 25.8 micrograms per cubic meter, respectively. One soil vapor sample had detections of benzene, toluene, ethylbenzene and xylene (BTEX) totaling 1,466 micrograms per cubic meter. "

Health Problem: "Remedial actions are complete and measures are in place to control the potential for coming in contact with contamination remaining at the site."

BROWNFIELDS:

Name: FORMER CASCADE LAUNDRY
Address: 553 MARCY AVENUE
City,State,Zip: BROOKLYN, NY 11206
Program: BCP
Site Code: 495614
Acres: 2.158
HW Code: C224194
SWIS: 2401
Town: New York City
Record Added Date: 06/03/2014
Record Updated Date: 01/25/2021
Update By: JCGRATHW
Site Description: "Site Location: The site is located in an urban area at 553 Marcy Avenue in Brooklyn, Kings County. It is identified on New York City tax maps as Block 1747, Lot 1. The site is bordered by Stockton Street on the north, Marcy Avenue on the west and Myrtle Avenue on the south. Site Features: The site is approximately 2.1 acres in size. Currently a new building covering the majority of the site is under construction. The site previously included several attached industrial buildings which were demolished for redevelopment in 2015 and 2016. The remainder of the site was paved parking. Current Zoning

Env Problem:

and Land Use: Part of the site is zoned as residential with commercial retail businesses on the ground floor (R7D residential with a C2-4 commercial overlay), while the remainder of the site has residential zoning (R6A). The site is currently vacant and the on-site buildings have been demolished. The surrounding area includes multi-family residential buildings, schools, churches and retail stores. The site is located in a Type A en-zone. Past Use of the Site: Commercial and residential development at the site began prior to 1887. Cascade Laundry, a commercial laundry, began operating on part of the site prior to 1918 and expanded onto the other parts of the site over the succeeding decades before closing in 2010. Other past uses of the site include various retail stores, an oil paint factory, a carpet cleaning facility, a bakery, an upholstery factory, a furniture manufacturer, and a chemical factory. At some point in their history, Cascade Laundry used tetrachloroethene (PCE) in their operations, as evidenced by PCE-contaminated soil. Petroleum contamination was also detected in the on-site soil, likely from leaking underground storage tanks. The top 4-8 feet of soil beneath the site is historic fill, which contains semi-volatile organic compounds (SVOCs), metals and pesticides. Site Geology and Hydrogeology: Subsurface soils at the site consist of historic fill materials to a depth of about 4 to 8 feet below grade. Silty sand and gravel is present immediately below this layer. The elevation of the property is about 30 feet above mean sea level and the land within the immediate area slopes gradually from southeast to northwest. Groundwater at the site is present at a depth of about 25 feet below grade. The groundwater flow direction is northwest. "Nature and Extent of Contamination: Remediation at the site is complete. Based on investigations conducted to date, the primary contaminants of concern for the site include volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs) and metals. Review of on-site data indicates that the on-site contamination does not impact off-site properties or receptors. Soils - Soil contamination was addressed in the Remedial Action by dewatering, excavation and chemical oxidation. Post remediation, remaining soils to a depth of 15 ft. bgs meet UUSCOs for all parameters due to the depth of excavation across the site. All remaining soils at depth meet UUSCOs for all COCs, except for a single detection of Chrysene at 30 ft. bgs beneath Lot 2. Soils pre remediation - The VOCs in the soil included petroleum compounds and chlorinated solvents. During the Remedial Investigation, petroleum compounds exceeding unrestricted use soil cleanup objectives include 1,2,4-trimethylbenzene, 1,3,5-trimethylbenzene, ethylbenzene, xylene, methylene chloride and naphthalene. For example, 1,2,4-trimethylbenzene, was detected at 38 parts-per-million (ppm), exceeding the unrestricted use soil cleanup objective of 3.6 ppm. Tetrachloroethene (PCE), a chlorinated solvent, was found in the soil at 48 ppm, exceeding the unrestricted use soil cleanup objective of 1.3 ppm. SVOCs, metals and pesticides were detected in the subsurface soils. Nearly all of these contaminants were detected near the surface in the historic fill layer, and likely arrived at the site with the deposition of the historic fill material. However, chrysene, an SVOC, was detected beneath the historic fill at 3.1 ppm, exceeding the unrestricted soil cleanup objective of 1 ppm. Lead was detected in the soil at a maximum level of 3,770 ppm, which may classify the soil as hazardous waste. Groundwater - Post Remediation, groundwater beneath the site meets or will meet SCGs for all site-sourced

contaminants. The petroleum compounds still being detected in groundwater approximate the ambient water quality standards. As of January 2020, however, on site groundwater sampling shows up to 80 ug/l of PCE in groundwater. Pre Remediation groundwater - The VOCs in the groundwater also consist of petroleum compounds and chlorinated solvents. A viscous petroleum product -- likely fuel oil -- was found in one monitoring well, indicated a layer of free petroleum product floating on the groundwater. PCE was detected in several wells at levels exceeding its New York State groundwater standard; however, the highest PCE concentrations were detected upgradient of any known on-site source area and at the upgradient edge of the site. Several pesticides were detected at concentrations above groundwater standards. Soil Vapor and Sub-Slab Vapor - Post remediation sub-slab samples taken in newly constructed on-site buildings detected PCE at a concentrations as high as 441 micrograms per cubic meter. Pre Remediation Soil Vapor and Sub-Slab Vapor - Several VOCs, including PCE, were detected in soil vapor and sub-slab vapor samples collected on-site, most of which were not detected in the soil and groundwater. However, PCE was detected in the on-site soil and groundwater. PCE and TCE were detected in sub-slab and soil vapor samples at maximum concentrations of 453 micrograms per cubic meter and 25.8 micrograms per cubic meter, respectively. One soil vapor sample had detections of benzene, toluene, ethylbenzene and xylene (BTEX) totaling 1,466 micrograms per cubic meter. "

Health Problem: "Remedial actions are complete and measures are in place to control the potential for coming in contact with contamination remaining at the site."

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was ROMMEL 4/12/04-Vought-Spill transferred from Mulqueen to Vought as per Rommel. 3/24/06 Diaz - Next steps required - review file, track down contacts. Spill transferred back to Region 2 3/10/08 - Austin - Spill assigned to Ahmed for followup - end 10/27/11 - Austin - Transferring this case from Ahmed to Ketani - end 9/23/13 - Raphael Ketani. I spoke to Heidi Unwin (518) 786-4347, Environmental Specialist II, Environmental Compliance Branch regarding the spill. She said that she had been looking through some old records and discovered that the spill had not been closed out. I told her that the DEC had only two letters stating that the investigation and remediation was going to take place. Ms. Unwin stated that she will send the DEC copies of all of the remediation, sampling and disposal information that she has on file. 10/8/13 - Raphael Ketani. Ms. Unwin sent 4 documents regarding the tank removal and soil excavation. These documents were: the Solution Mechanical Corp. 7/11/96 pre-excavation soil endpoint analytical report; the Solution Mechanical Corp. 7/18/96 post-excavation soil endpoint analytical report; the Solution Mechanical Corp. 7/26/96 tank removal and remediation report; and the NYS Division of Military and Naval

Affairs 10/2/13 Spill Closure Letter. The pre-excavation soil endpoint samples were analyzed for VOCs and SVOCs. Samples were taken from all four sidewalls and two samples from the bottom. The results were either non-detect or well below the CP-51 unrestricted standards. The post-excavation soil endpoint samples were analyzed for VOCs and SVOCs. Samples were taken from all four sidewalls and two samples from the bottom. Samples were also taken from the soil stockpile and around the stockpile. The results were almost entirely non-detect for the endpoints and non-detect to well below standards for the soil stockpile samples. The tank removal and remediation report had a map showing where the tanks and the pump islands had been. Both 2,000 gal. USTs had contained gasoline, even though one was labeled as containing diesel. The cause of the spill was the sweating of product from the joints of the fill pipes and the suction lines. The excavation of the soil had started on 6/24/96. The contaminated soil was shipped to a landfill in Albany, NY. Tanks were cleaned and shipped to a scrap metal facility. Manifests were included for the soil and the tanks. The Spill Closure Letter stated that about 63.4 tons of soil had been excavated. 10/10/13 - Raphael Ketani. The spill case was presented to Hassan Hussein, supervisor Unit C, Region 2, Remediation for closure. Mr. Hussein accepted the closure of the spill case. Based upon the information in the case record, the site has been successfully remediated and there are no threats to the public of the environment. Therefore, I am closing the spill case effective today."

Remarks:

"upon digging out tanks it was discovered that soil was contaminated from gasoline and possibly diesel fuel-area has been cleaned up"

Update By: JHOCONNE
Site Description: "Location: The site is located in the Broadway Triangle section of Brooklyn and is comprised of four tax parcels totaling 71,305 square feet (1.63 acres). The irregular shaped site occupies a full block bounded by Wallabout Street, Harrison Avenue, Union Avenue and Walton Street. Site Features: There are no structures presently on the site. All of the lots are currently used for the storage of trucks and construction equipment. The property is surrounded by an 8 ft high chain-link fence with two gates each on Wallabout Street and Harrison Street, and one gate on Walton Street. Current Zoning and Land Use: The western portion of the site is zoned R8A while the central portion is zoned R7D and the eastern portion is zoned R7A. Each of these zoning designations allow for residential uses. Surrounding land use includes residential apartment buildings to the west, residential apartment buildings and a public school (IS 318) to the north, commercial warehouses, residential buildings and a private school to the east and the Former Pfizer Site C BCP site (site no. C224288) and a charter school to the south. Past Use of the Site: From 1887 through 1918, the site was comprised of mixed commercial and residential properties, including a synagogue, a church, a Mission, laundry, tailor shops and bakeries. A portion of the storage yard of an iron works factory that was replaced by a bottling facility by 1904 was also present at the southwestern-most corner of the site. By 1947, an adhesive manufacturing facility operated in the south-central region of the site at 255/257 Wallabout Street (later Pfizer Building 47), and a lumber yard was present at the west end of the site. A taxi garage located at 249 through 253 Wallabout Street (later Pfizer Building 52) maintained two gasoline underground storage tanks (USTs) and a five-story residential building with

Env Problem:

delivery services at ground level, located at 58/60 Walton Street, was serviced by a 2,000-gallon fuel oil tank installed in the sidewalk. Pfizer started using the western region of the site circa 1954 for employee parking and warehousing purposes. The residential buildings along Harrison Avenue were demolished between 1959 and 1961 and replaced by more parking space for Pfizer employees. A small sheet metal workshop was also present at 262 Wallabout Street, close to the southeast corner of the site. By 1977, the majority of the eastern region of the site had been redeveloped into a parking lot and Pfizer used most of the site for parking and warehousing purposes. The small sheet metal workshop was demolished by 1986 and, between 1991 and 1992, the entire block had been razed and has remained vacant to date. Site Geography and Geology: Subsurface soils consist of historic fill materials to a depth of approximately 7 to 10 feet below the surface, followed by silty-clay and fine sand. According to the USGS topographic map for the area (Central Park Quadrangle), the elevation of the property is approximately 16 feet above mean sea level. The area topography is generally flat with little relief and no significant elevation changes. Groundwater occurs beneath the site at a depth of approximately 6-10 feet below grade under perched water table conditions. Based on previous studies performed at the site, groundwater flow is generally to the east. The site is not located within a designated flood zone area. "

"Soil and groundwater were analyzed for emerging contaminants (ECs), volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), and pesticides. Based upon investigations conducted to date, the primary contaminants of concern include lead and SVOCs. Soil SVOCs and metals exceeding Unrestricted Use Soil Cleanup Objectives (UUSCOs) were detected in soils throughout the site. SVOCs and metals were found to exceed UUSCOs down to 8 feet below ground surface (ft bgs). A total of 5 locations where levels of lead exceeded the hazardous waste threshold were identified across the site. For SVOCs, the maximum concentration of benzo(a)anthracene was 32 parts per million (ppm) as compared to the UUSCO of 1 ppm, benzo(a)pyrene was 25 ppm (UUSCO is 1 ppm), benzo(b)fluoranthene was 23 ppm (UUSCO is 1 ppm), chrysene was 30 ppm (UUSCO is 1 ppm), and indeno(1,2,3-cd)pyrene of 13 ppm (UUSCO is 0.5 ppm). For metals, the maximum concentration of lead was 4,310 ppm (UUSCO is 63 ppm), mercury was 15.7 ppm (UUSCO is 0.18 ppm), arsenic was 81.1 ppm (UUSCO is 13 ppm), and barium was 5,910 ppm (UUSCO is 350 ppm). Only two VOCs (acetone and methyl ethyl ketone) were detected at concentrations slightly exceeding the UUSCOs; however, these are common lab artifacts and are not considered to be site-specific contaminants of concern. Several pesticides were detected at concentrations nominally exceeding their respective UUSCOs, including 4,4-DDD at 0.035 ppm (UUSCO is 0.0033 ppm) and 4,4-DDE at 0.080 ppm (UUSCO is 0.0033 ppm). For PCBs, the maximum concentration of PCB-1260 was 0.18 ppm (UUSCO is 0.1 ppm). Emerging contaminants (ECs) were also detected in soil samples collected from the shallow intervals down to 17 ft bgs. For example, the maximum concentrations of perfluorooctanoic acid (PFOA) and perfluorooctane sulfonic acid (PFOS) were 378 parts per trillion (ppt) and 2,490 ppt, respectively. Data does not indicate any off-site impacts in soil related to this site. Groundwater Concentrations of naturally occurring metals were detected in groundwater at concentrations exceeding the ambient water quality standards (AWQS). The maximum concentration of iron was 871 parts per billion (ppb) (AWQS is 300

S123159099

ppb), manganese was 43,900 ppb (AWQS is 300 ppb), and sodium was 193,000 ppb (AWQS is 20,000 ppb). ECs were also detected in groundwater samples. The maximum concentrations of PFOA and PFOS are 204 parts per trillion (ppt) and 154 ppt, respectively. No VOCs, PCBs or pesticides were detected at concentrations exceeding the applicable AWQS. Data does not indicate any off-site impacts in groundwater related to this site. Soil Vapor Trichloroethene (TCE) was detected in soil vapor at concentrations up to 50.5 micrograms per cubic meter. Data does not indicate any off-site impacts in soil vapor related to this site. "

Health Problem:

"The site is completely fenced, which restricts public access. However, people who enter the site could contact contaminants in soil by walking on the site, digging or otherwise disturbing the soil. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not affected by this contamination. Volatile organic compounds in soil vapor (air spaces within the soil) may move into buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. The potential exists for the inhalation of site contaminants due to soil vapor intrusion for future onsite buildings. Environmental sampling indicates that soil vapor intrusion is not a concern for offsite structures."

DEC Memo: "05/28/10-HRAHMED-Responded to the site as Day-Time-Runner. Met with Bryan Shaw (917 547 0926) from Warren Panzer who are the environmental Consultant for the site and Greg Folk (631 466 6405) from CowDay who are doing the excavation at the site. During excavation they ruptured top of an old abandoned 1080 gal heating oil UST. The tank has some residual oil inside. Noticed no visible contaminated soil. Ask them to hire a contractor to pump out the residual oil from the tank immediately. Afterwards they will pullout the tank excavate the contaminated soil and collect end point samples to confirm the cleanup. A CSL was sent to PRATT institute with the following requirements: 1) Collect endpoint samples from the excavation 2) Register the tank properly 06/16/10-Received closure report from Bryan Shaw of Warrenpanzer. As per the report, on 5/28/10 one 1080 gal tank was discovered 4 ft below grade. The tank was partially filled with oily water mix. Some oily water mix did spill into soil beneath. The tank was pumped out empty the same day. On 6/1/10 the tank was pulled out from the ground. As per visual, olfactory and PID screening the side wall of the excavation was not impacted by oil. they took three endpoint samples from three side walls. They could not collect soil sample from the fourth side because it was a brick wall. To remove the impacted soil from beneath the tank they extend the excavation upto 26 ft below grade and collected a bottom soil sample. All of the end point samples were analyzed for stars 8260 and 8270. All the soil sample analyticals were below TAGM limits. Warrenpanzer will forward the contaminated material manifest as they are available. They will update the PBS registration by including the 1080 gal tank as removed. PBS registration # 2-269751 This case is closed. "

Remarks: "excavation ruptured tank - cleanup in progress"

Town: New York City
Record Added Date: 11/20/2018
Record Updated Date: 06/17/2020
Update By: JHOCONNE
Site Description: "Location The site to be remediated and redeveloped is located in the Brooklyn Triangle section of Kings County and is comprised of four tax parcels totaling 110,040 square feet (2.55 acres). The site is located in the City of New York and Borough of Brooklyn. The irregular shaped site occupies a full block with approximately 485 ft. of frontage along Wallabout Street, 200 feet of frontage on Harrison Avenue, 225 feet of frontage on Union Avenue and 600 feet of frontage on Gerry Street. Site Features There are no structures presently on the site. Current Zoning and Land Use The lot is currently used for the storage of scaffolding and related construction equipment. The property is surrounded by an 8 ft high chain-link fence with one gate on Wallabout Street. The western portion of the site is zoned R8A while the central portion is zoned R7D and the eastern portion is zoned R7A. The lot is currently used for the storage of scaffolding and related construction equipment. Surrounding land use includes residential apartment buildings to the west, former Pfizer Site A to the north, commercial (warehouses), residential buildings and a private school (Bais Ruchel High School) to the east and the and a charter school (Beginning with Children) to the south. The closest school (Bais Ruchel High School) is located 60 feet to the east. Beginning with Children Charter School is located 70 feet to the south and PS 318 is located 375 feet to the north. Past Use of the Site The historic use of the site includes residential homes, Pfizer chemical works and varnish manufacturing in 1887-1918, a lumber yard and the Pfizer chemical works in 1935. By 1947 the Pfizer chemical works occupied the entire property and continued you to do so through the 1995 when the buildings were demolished. Site Geology and Hydrogeology Subsurface soils at the site consist of historic fill materials to a depth of approximately 4 to 13 feet below the surface followed a thick silt and clay layer. According to the USGS topographic map for the area (Central Park Quadrangle), the elevation of the property is approximately 18 feet above the National Geodetic Vertical Datum (NGVD). The area topography is generally flat with little relief and no significant elevation changes. Groundwater occurs beneath the site at a depth of approximately 8-13 feet below grade under perched water table conditions. Based on previous studies performed at the site, groundwater flow is generally west to southwest. No portion of the site is located within a designated flood zone area."

Env Problem: "Soil and groundwater were analyzed for volatile organic compounds (VOCs), semi-volatile organic compounds (SVOCs), metals, polychlorinated biphenyls (PCBs), and pesticides. Soil - SVOCs were reported above Commercial SCOs (benz(a)anthrance, benzo(a)pyrene, benzo(b)fluoranthene, benzo(k)fluoranthene, dibenz(a,h)anthracene, indeno(1,2,3-cd)pyrene) and Restricted Residential Use SCOs (dibenzofuran, flouranthene, phrenenthene, pyrene). Mercury (maximum of 260,000 mg/kg) was reported in soil above commercial and in many case industrial use SCOs across most of the Site. Other metals reported above commercial SCOs include arsenic (maximum of 37.8 mg/kg), barium (maximum of 472 mg/kg) and lead (maximum of 691 mg/kg). Groundwater - Several SVOCs were reported above groundwater

Site Description: "The "Organics/Suciac Block" site is located in the central portion of the Pfizer Inc. facility in the Williamsburg section of Brooklyn, NY. Gerry Street, Harrison Avenue, Union Avenue and Wallabout Street border this block. The site was first developed for chemical manufacturing between 1854-1888. Operations continued there until 1989 and all buildings were demolished by March of 1995. The Organic/Suciac block is situated within a high-density, mixed urban/commercial/ industrial zone. Pfizer decommissioned the Organic/Suciac block with the intent to utilize it for future redevelopment and/or beneficial use. As part of the decommissioning process, all buildings were demolished. The present concrete slab is continuous throughout the Block and varies in thickness from 0.5 and 1.5 feet. In 1997, waste from the site was excavated and disposed off site, which included 18.12 tons of mercury and lead hazardous soils. Also, a total of 1,930 tons of benzene hazardous soils were excavated and disposed off-site. In 1999/2000, the excavated soil (approximately 420.3 tons) was classified as a petroleum contaminated non-hazardous material, and was transported off-site and disposed. Institutional Controls: On June 22, 2001, Pfizer presented the deed restrictions for recording in the Kings County Registrar s Office. These restrictions state that unless additional response actions are performed at the Site to allow its use for residential purposes, the Site shall be prohibited from being used for purposes other than industrial, commercial and/or recreational purposes without the expressed written permission from the Department. "

DEC Region: 2
DER Facility ID: 188627
DEC Memo: "This spill was transferred from DEC Sigona to Rommel on 2/2/04. This spill site has been consolidated under Spill No. 0010852. DEC Sigona called Kevin Murphy Tyree on 1/2/2001. Kevin said he would send the results of the investigation to DEC Sigona. They are finding mainly heavy metals, solvents and light ends. There is a proposal to address the whole site. There has been several investigations according to Mr. Murphy but they could not locate a spill number. This site is adjacent to #6 fuel oil spill investigation and cleanup at Best Metro Towel and Linen, Koscuisko street, Brooklyn. On May 21, 2001, DEC Sigona received addendum to subsurface investigation, dated May 14, 2001, along with subsurface investigation, dated March 2001, by Tyree Bros Environmental Sevices. Sent letter to RP on July 6, 2001. Responsible Party: Dekalb Acquisition Entity, LLC c/o Octagon Properties 35-11 35th Avenue Long Island City, New York 11106 ATT: Mr. John Ritter, Property Manager RE: DEC Spill Investigation Nos. 8603320, 8603330, 8603465, 9000511, 9303221, 9304164 & 0010852 - Dekalb Acquisition Entity, LLC, 585 Dekalb Avenue, Brooklyn, N.Y. (The Site) - Petroleum Bulk Storage (PBS) No. 02-456748. 1993 groundwater sampling from monitoring well No. MW-6, reported concentrations of 1,100 and 2,100 ppb for trichloroethene exceeded the toxic characteristic threshold for hazardous waste of this constituent. Also, mercury and zinc were detected above DEC's recommended cleanup levels when compared to Technical & Administrative Guidance Memorandum (TAGM) Determination of Soil Cleanup Objectives and Cleanup Level's, dated January 24, 1994 There are a number of previous spill reports which must be addressed in the site investigation reports. The following is a summary of previous spill reports listed for this site: Spill No. 8603320 - August 1986 Tank Test Failure for UST Spill No. 8603330 - August 1986 Tank Test Failure for UST Spill No. 8603465 - August 1986 - 2 x 12,000 gallon fuel oil and chemical USTs failed Tank Tests. Spill No. 9000511 - April 1990 - 250 gallon diesel spill from tank overflow. Spill No. 9303221 - June 1993 - Spill of Hazardous Waste from overflow tank. Spill No. 9304164 - July 1993 - Spill of liquid sewage contaminated with lead spilled near UST Area No. 4. Spill No. 0010852 - January 2001 - Discovery of gasoline and diesel contaminated soils during subsurface investigation. It is my understanding that there have been prior site investigations performed in 1993 and 1997, by other consultants. We would need to review these reports, along with any relevant materials to determine whether the above referenced spill cases can be properly closed by the DEC 2/8/05 Received a call from Vinny at Island Tank who indicated that he met Ed Rossan on site during an inspection and gave reports to Ed. Rommel 3/22/06 - Received call from Theodore W. Firetog, Esq. requesting information with regards to spill. Firetog stated that he worked for the current property owner and that a Home Depot had been built on the site. The

Remarks: NYSDEC requested information with regards to any work completed on the site. Firetog responded that his client is gathering the information and will forward to the NYSDEC. Upon receipt of this information a spill review will need to be completed. 7/13/06 - Received Environmental Report on site from Theodore W. Firetog, Esq. Report states that spill site was sampled prior to be regraded and subsequently paved. Groundwater results show no evidence of petroleum contamination in spill area of concern. Spill closed. Sent letter to Firetog and Dekalb Acquisition (RP) on 7/25/06. "

fully complete the project (remediation and tank decommissioning) the Company is required to obtain several permits from the NYCFD. WE hope to have the permits within the next six weeks. 4/25/18-Scott sent the following email Ms. Zhune, in response to your question, an overview follows. Brink's transports and safeguards currency and negotiable instruments in New York City. A secure facility was constructed for Brink's in Brooklyn to allow Brink's armored trucks to unload cash and negotiable instruments. Since security measures prevent armored trucks from being fueled outside the facility, two diesel dispensing pumps were installed inside the facility when the facility was first constructed. Each dispensing pump is (was) connected by a narrow underground pipe to an underground diesel storage tanks located immediately exterior to the building. At some point there was a pressure fluctuation in one of the underground pipes connected to one of the two diesel dispensers inside the facility. The pressure fluctuation was detected by the facility's Veeder-Root pressure monitoring system. As soon as the pressure fluctuation was detected, the dispenser was shut down and oil no longer flowed from the pipe that triggered the Veeder-Root system. The pressure fluctuation was promptly reported to NYSDEC and the FDNY. In an effort to identify the issue, the exterior tanks were tightness was tested by a state certified consultant (the tanks held pressure and passed the test). The facility then contacted the FDNY and NYC agencies and sought authorization to, (i) remove the exterior tanks and underground pipes and, (ii) allow a fuel company to fuel trucks inside the building from a mobile tank truck operated by Diesel Direct, a third-party vendor. Internal fueling of armored truck would obviate the need for underground tanks, interior dispensers and underground pipes, which for environmental reasons was desirable. FDNY advised that interior fueling would require an FDNY issued variance. A variance application was submitted to the FDNY. Over the past seven months in furtherance of the variance application, FDNY inspected the facility several times, and sought a considerable volume of information including engineering plans. Two weeks ago, FDNY advised that justification for a variance was not sufficient and a variance would not issue. The facility has decided after obtaining the necessary permit to have the exterior underground tanks and all associated piping completely removed in and outside the facility (and of course any remediation conducted subject to NYSDEC supervision) and, proceed with an alternate fueling process for its armored vehicles. We anticipate that the existing tanks and piping will be removed within the next two months. In the event there is evidence of a release, remediation will be conducted by a certified environmental consultant, and overseen by Tenen Environmental Consulting and NYSDEC. We will keep you apprised of all progress. If you have any questions, please contact me. 1/10/2019 - Feng - Duty Desk. Received spill 18-10357 at the same site reported by Tenen Environmental. Spoke to Kristin Meisner of Tenen Environmental. They have filed a pre-work notification to DEC PBS unit for tanks and piping closure and removal. Today they exposed the piping and found there was minor stain underneath the piping and had PID reading, so they reported the spill. There are (4) 4,000-gallon diesel USTs located in the parking lot and the piping are running to inside of the building. They haven't exposed the USTs yet. They have already flushed the pipes and the tanks, so no product right now. The tanks have been in services since 1985. No pre-classification soil samples have been done. Unsure if there was any other investigation has been done. Sometime next

week they will start the tank removal process. They plan to overexcavate the soil and will collect soil endpoint samples. No plan for installation of new tanks, and no plan to develop the site. Kristin Meisner Tenen Environmental 646-606-2332 Ext. 104 KMeisner@Tenen-Env.com Searched database and found spill 15-05623 which was reported for line test failure. Briefed to and discussed with Veronica Zhune. The two spills will be consolidated under the old spill 15-05623. 5/14/19-Kristin Meisner from Tenen Environmental emailed the Spill and Tank Closure report dated 5/14/19. Based on the above tank closure activities, remedial activities and the results of the post remedial soil and groundwater samples, Tenen concludes the following: . Four 4,000-gallon diesel USTs and two dispensers were properly decommissioned, accessible piping was removed and a portion of the underground piping was abandoned in place. . Petroleum impacted soil in the area of the dispensers was removed and disposed off-site; . All VOCs in soil were below the commercial Use SCOs and only one 1,2,3trichlorobenzene, was detected above the protection of groundwater SCOs; this compound was not detected in groundwater above the AWQS; . All SVOCs in soil are related to historic fill material; . All VOCs in groundwater were below the AWQS with the exception of five components at low concentrations that are associated with degraded petroleum releases; and, . two SVOCs in groundwater above the AWQS are not related to a petroleum release. Spill Closed. "

DEC Memo: "7/24/2006 - Sangesland spoke to Cris Sawyer at Housing Authority. Housing Authority hired a contractor to pull a tank at this site. During the tank pull, the contractor punched a hole in the bottom of the tank and contaminated soil came up from the ground into the tank. Contractor: Primary Contractor - Vamco Sheet Metal Co, 3090 Rt 9 Coldspring NY Sub Contractor on site - Hudson Meridian Construction Group Hudson Meridian Contact: Mr. Louis Gasparre 917-574-9078 Steve Kraszewski in Monitor section knows about this site. Sawyer asked the contractor to: Pump out bottom of tank and then Dewater the site. 07/25/06: Staff visited the site to witness the removal of one 30K UST which will be replaced by another 30KI double-walled fiberglass coated tank. A second tank, also 30K remains next to the pit, closed in place and filled with concrete slurry. This replacement work is part of the NYCHA Consent Order Schedule C compliance. NYCHA will be performing a site assessment for both tanks. End-point samples will be collected from the excavation pit and additional borings will be placed around the closed-in-place UST. Chris Sawyer was on-site with Ganette Fleming. I instructed them to locate the fill port and fill line and take boring samples from each. One of the borings must go to GW and a GW sample be collected. Two composite end-point samples are required along the sidewall of the excavated tank. Crew has not finished removing the cut pieces of the tank, work will be finished by weeks end. - SK A CSL was sent on 08/03/06 02/06/07 - J.Kann - site reassigned from S. Kraszewski to J.Kann. 07/03/09 - J.Kann - reports for UST closure submitted for Tank 1 and Tank 2. soil samples collected had no VOCs above RSCOs (most were undetected), but a few

Site Description: "Location: Naval Station - Brooklyn is located in a flat industrial area within the New York Naval Shipyard in the Williamsburg section of Brooklyn, north of Flushing Avenue, between Clinton Avenue and Williamsburg Place. Site Features: The East River is 1500 feet west of the site. There are two working electrical substations at the site which have three transformers employing dielectric fluid which formerly contained PCBs. Each of the substations is contained within an area surrounded by concrete walls. They are located in the northern portion of the property, adjacent to the property line. Current Zoning/Use(s): Industrial Historic Use(s): A 1987 Phase I investigation showed that the PCB content of the dielectric fluid in the transformers ranged from 250 to 590 parts per million (ppm). Transformer spills stained slabs and soil located beneath the transformers, with soil contamination ranging from 0.5 to 870 ppm. The PCB containing transformers were subsequently retro-filled.

NAVAL STATION-BROOKLYN, TRANSFORMER AREA (Continued)

S105586295

Remedial work began in the summer of 1994 and concluded in 1995 and included power-washing the transformers and stained slabs and removing hazardous levels of PCB contaminated soils. The areas were then backfilled with crushed stone and secured. Three monitoring wells were installed to determine whether PCBs had contaminated the groundwater beneath the site at Building 7. Three rounds of groundwater samples collected in September 1996, December 1996, and March 1997, showed no detectable concentrations of PCBs. It was determined that further monitoring at this site was not warranted. In July 2012 NYSDEC placed an Environmental Notice on the Transformer Area which requires written approval from NYSDEC prior to any disturbance or excavation of the soil, proper management and/or disposal of any contaminated materials exposed or removed, and prior approval by NYSDEC for any change in use. The Transformer Area has been delisted from the Registry of Inactive Hazardous Waste Disposal Sites in New York State."

Env Problem: "Nature and Extent of Contamination: Remediation at the site is complete, to extent that the Navy was able to work around the active transformers. The primary contaminants of concern at the site, PCB's, were addressed by the removal action completed in 1995. Due to the location in a walled transformer yard beneath the crushed stone site cover, and the limited amounts remaining in the soil, residual PCB contamination in the soils will not impact the East River. Three rounds of groundwater samples were non-detect for PCBs. Special Resources Impacted/ Threatened: None "

Health Problem: "Since some contaminated soils remain at the site below concrete or clean backfill, people will not come in contact with contaminated soils unless they dig below the surface materials. In addition, the site is fenced, which restricts public access. "

Site Description: "Location: Naval Station - Brooklyn is located in a flat industrial area within the New York Naval Shipyard in the Williamsburg section of Brooklyn, north of Flushing Avenue, between Clinton Avenue and Williamsburg Place. Site Features: The East River is 1500 feet west of the site. There are two working electrical substations at the site which have three transformers employing dielectric fluid which formerly contained PCBs. Each of the substations is contained within an area surrounded by concrete walls. They are located in the northern portion of the property, adjacent to the property line. Current Zoning/Use(s): Industrial Historic Use(s): A 1987 Phase I investigation showed that the PCB content of the dielectric fluid in the transformers ranged from 250 to 590 parts per million (ppm). Transformer spills stained slabs and soil located beneath the transformers, with soil contamination ranging from 0.5 to 870 ppm. The PCB containing transformers were subsequently retro-filled. Remedial work began in the summer of 1994 and concluded in 1995 and included power-washing the transformers and stained slabs and removing hazardous levels of PCB contaminated soils. The areas were then backfilled with crushed stone and secured. Three monitoring wells were installed to determine whether PCBs had contaminated the groundwater beneath the site at Building 7. Three rounds of groundwater samples collected in September 1996, December 1996, and March 1997, showed no detectable concentrations of PCBs. It was determined that further monitoring at this site was not warranted. In July 2012 NYSDEC placed an Environmental Notice on the Transformer Area which requires written approval from NYSDEC prior to any disturbance or excavation of the soil, proper management and/or disposal of any contaminated materials exposed or removed, and prior approval by NYSDEC for any change in use. The Transformer Area has been delisted from the Registry of Inactive Hazardous Waste Disposal Sites in New York State."

Env Problem: "Nature and Extent of Contamination: Remediation at the site is complete, to extent that the Navy was able to work around the active

transformers. The primary contaminants of concern at the site, PCB's, were addressed by the removal action completed in 1995. Due to the location in a walled transformer yard beneath the crushed stone site cover, and the limited amounts remaining in the soil, residual PCB contamination in the soils will not impact the East River. Three rounds of groundwater samples were non-detect for PCBs. Special Resources Impacted/ Threatened: None "

Health Problem: "Since some contaminated soils remain at the site below concrete or clean backfill, people will not come in contact with contaminated soils unless they dig below the surface materials. In addition, the site is fenced, which restricts public access. "

Environmental Interest/Information System:

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

 Description: The Navy Barracks are located in the County of Kings, Borough of Brooklyn, City of New York, State of New York. The site is bounded on the North by Flushing Avenue, on the South by Park Avenue, on the East by Vanderbilt Avenue and on the West by Clermont Avenue. The site was improved by a six story concrete building utilized as a military prison and three story brick building used as barrack and for administrative purposes. The NYC Department of Corrections is used as the Brooklyn Correctional Facility. The former military prison building and associated utilities are beneficially used by the present owner the New York City Department of Corrections. The former Navy barrack and administrative building is abandoned and owned by GSA. There are number of underground storage tanks, which were never used by the present owner.

History: As per Declaration of Taking dated 29 January 1941, the Department of the Navy obtained 2.638 acres fee. On 15 April 1975, the Department of the Navy conveyed 2.638 acres fee to GSA. As per quitclaim deed dated 4 June 1979, GSA conveyed 0.294 acre fee to the Department of Health and Hospitals Corporation (HHC) of the City of New York. Said deed did not contain any recapture or restoration clauses but did contain a restrictive clause (to be used public health purposes for a period of

thirty years -from the date of conveyance). As per quitclaim deed dated 22 February 1985, GSA conveyed 2.344 acres fee to the City of New York. Said deed did not contain any recapture, restoration or restrictive clauses. On 8 September 1986, the 0.294 acre fee reverted back to GSA because of a breach of contract by HHC. GSA is still the owner of record of the 0.2 94 acre fee.

 Site Description: "The Kent Avenue Generating Station Site is located in Brooklyn, NY. It is along the waterfront (Wallabout Channel, trib to East River) on the west side of Kent Avenue, south of the intersection with Division Avenue. The site is the location of the former Kent Avenue Generating Station, which has since been demolished. Excepting activities related to building demolition and property rehabilitation, with respect to current use the site is considered inactive. The uses of the surrounding parcels are varied: across Kent Avenue is a NYC Park (Roberto Clemente Ballfield); immediately to the south is the Brooklyn Navy Yard 13 Acre Parcel Site (NYSDEC Site No. 224019A); immediately to the north across Division Avenue are commercial uses; properties to the northeast and to the southeast appear to have residential uses. Prior uses that appear to have led to site contamination include discharges during the period of operation of

the power plant and on-site re-use of prior demolished structures as fill material. A number of environmental investigations of the property have occurred including a Phase II (2000) and other investigations focused on particular issues or areas of the site from 2006 to present. Reclassified to N. See V00732 - Kent Avenue Station Site. Work to be done under VCA Amendment."

Env Problem: "This site has been successfully remediated. The information on the remedy is included under site V00732. The following description was true during the early stages of work at this site. The primary contaminants of concern at the site known at the time include PCBs, asbestos, various metals, petroleum constituents and PAHs. Investigations indicate SCG exceedances of PCB and petroleum compounds in sediments/ sludge contained in a large concrete structure (known as the ash pit); asbestos, metals and PAHs in subsurface soils/fill; and an area of groundwater petroleum contamination in the southwest corner of the property. The significance of the contamination needs to be determined."

S102663001

SWIS: 2401
Region: 2
Town: New York City
Acres: 2.640
Date Record Added: 06/23/2010
Date Record Updated: 06/10/2020
Updated By: DJEATON
Site Description: "Location: The site is located in a mixed-use area along the Brooklyn waterfront. It is bounded by Kent Avenue to the east, Wallabout Channel to the west, Division Avenue to the north, and the Brooklyn Navy Yard to the south. Site Features: The site has been sold to a developer but is still currently vacant and open. In the subsurface, a large concrete-lined pit is present in the northwest corner of the site and along the edge of the Wallabout Channel. A large concrete slab which is part of a former power plant foundation occupies the center of the site. The slab has been covered with clean fill. Current zoning/use. The site is zoned for industrial use, but is currently vacant. It is surrounded by commercial buildings and multiple occupancy residences. Past Use of the Site: The site was previously an electrical generating station and substation from 1906 until the late 1990s. The site was razed from 2007 to 2009. The main sources of contamination were the concrete-lined ash pit storage area and by-products of the electrical generating process which are scattered across the site. Site Geology and Hydrogeology: The site is underlain by a 5 to 10 foot layer of fill material. Under the fill are intermingled layers of silt and sand down to roughly 100 feet below grade. Beneath the silt and sand is a clay confining unit. The water table lies roughly 8 feet below the ground surface. Based on the site's proximity to the Wallabout channel, groundwater levels are probably tidally influenced. The far western edge of the site is built out on piles over the bank of the Wallabout Channel. "
Env Problem: "Remediation at the site is complete. Prior to remediation, the primary contaminants of concern were semi-volatile organic compounds (SVOCs) in soil, volatile organic compounds (VOCs) in groundwater and polychlorinated biphenyls (PCBs) in the ash pit sediments. Remedial actions have successfully achieved soil cleanup objectives for restricted residential use. Residual contamination in the soil, groundwater, and sediment is being managed under a Site Management Plan."
Health Problem: "The site is completely fenced, which restricts public access. Persons who dig below the ground surface may come into contact with contaminants in the subsurface soil. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not affected by this contamination. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. The potential exists for people to inhale site contaminants in indoor air due to soil vapor intrusion in any future on-site building development and occupancy."

DEC Memo: "201150. see eDocs 12/13/06: Transferred from Breen to O'Connell. Spill submitted for closure by Con Ed. This site was a former Con Ed generating station, and previous investigations (circa 1999 through 2002) have found evidence of metals, SVOCs and VOCs in soil and groundwater, however the site is NOT in any remedial program. See also spill nos. 9910753, 9910993, 9911014 and 9911046. (JHO) 12/14/06: spoke with David Rubin, Con Ed Remediation project manager. Apparently the site is undergoing second Phase II for property transfer. Con Ed also plans on demolishing the former gen station building. They expect a summary report of investigation with recommendations for remediation from consultant during 1Q07. I told Dave to make sure DEC receives a copy, since we have a number of outstanding spills related to the site. (JHO) 1/9/08: This spill is closed, track under spill no. 9911014. (MA) "

Remarks: "SPILL WAS ROUGLY 2 GALLONS OF OIL MIXED IN SOIL AT OLD CONED PLANT, NO LONGER IN USE. CON ED NUMBER 201150."

DEC Memo:

"Prior to Sept, 2004 data translation this spill Lead_DEC Field was O'CONNELL 12/9/99: Spoke with Pete Tokarz (Hudson Ave Env. Mgr.) - Drum found while excavating test pit for Phase II investigation. Drum found at about 4 ft below grade. Drum was somewhat porous - some staining on soil and brick/debris. All visible contamination was removed, placed on plastic sheeting with drum and covered. Sample taken from drum for oil ID and PCB analysis.(JHO) 12/10/99 - voice mail update from Rich Roach, Con Ed CIG: quantity of spill upgraded to 25 gallons. Called Stan Piczszatowski (CE ERT) - this estimate is based on amount of contaminated soil surrounding drum, not free-flowing oil. (JHO) 12/14/06: spoke with David Rubin, Con Ed Remediation project manager. Apparently the site is undergoing second Phase II for property transfer. Con Ed also plans on demolishing the former gen station building. They expect a summary report of investigation with recommendations for remediation from consultant during 1Q07. I told Dave to make sure DEC receives a copy, since we have a number of outstanding spills related to the site. (JHO) 01/09/08: This spill is closed, track under spill # 9911014.(MA)"

DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was TIPPLE 9/24/03 There was a Ferric Chloride spill called in to the DEC Hotline by DEP James Daley at 8:37 AM on September 24,2003. Reportedly, the spill was caused by a tank failure. DEC Spill responder Michelle Tipple and Joseph Kudirka from the Water unit responded to this spill. Upon investigation, an 8000 gallon tank of Ferric Chloride had an internal failure and released some of it's contents to a secondary containment tank, this secondary tank released some of the Ferric Chloride into the containment area surrounding the secondary tank. The containment area surrounding the secondary tank had been modified with the installation of a wooden structure secured with steel bolts around the top of the containment. When the chemical hit the bolts they were dissolved, allowing a small amount,10-15 gal of Ferric Chloride beyond the containment areas. Soda Ash was applied to the Ferric Chloride as required by DEP protocol. Mats were placed on the drain inlets in the vicinity to reduce the possibility of the chemical reaching the water. Eagle Brook Pump and repair were in route to remove all product from the tanks and containment area, assess and repair the system. DEP Plant Superintendent Joseph Massaro will keep DEC updated. 9/25/03 Tipple followed up with James Daly- DEP safety. Eagle Brook worked until 4:30 this AM removing product and thoroughly cleaning the tanks and impacted area, all product removed from the site was carried by the

Site Description: "Location: The Site is located at 152 Graham Avenue in the Borough of Brooklyn, Kings County, NY. The site is located in the East Williamsburg section of Brooklyn, New York. The property is bordered by Graham Avenue on the west, by a three-story mixed commercial/residential building to the north, by a four-story mixed commercial/residential building and a three-story mixed commercial/residential building to the south, and by a four-story residential building to the east. The three-story building located to

MAP FINDINGS

TOP HAT CLEANERS (Continued)

1004758111

the southeast of the site also has a dry cleaner on the first floor. Site Features: The 2,500 square foot (0.057 acre) site parcel is occupied by a three-story building built in 1920. The site parcel also contains an open yard area behind (east of) the structure. The first floor is occupied by a dry cleaner and the upper two floors are occupied by residential apartments. Current Zoning and Land Use: The current site use is a dry cleaner (Top Hat Cleaners) on the first floor with residential apartments on the second and third floors. Past Use of the Site: According to the historical records, a dry cleaner has occupied the 152 Graham Ave location since approximately 1960. A Phase I study at the adjacent property (154 Graham Avenue) identified current and prior occupants of the ground floor retail space (pastry shop, shoe retailer and moving company, among others) which were not likely to be a source for chlorinated VOC impacts beneath the site. The report identifies the dry cleaner at 152 Graham Avenue (Top Hat Cleaners) as the most likely source of the contaminants identified in soil vapor. Site Geology and Hydrogeology: The site elevation is approximately 27 feet above mean sea level. Soil lithology consists of two main types of soils. The first soil type was fill material that consisted of fine to medium sand to silt with fine to coarse gravel and traces of brick and other miscellaneous debris. The second type was natural material composed of fine to coarse sand to silt with fine to coarse gravel and little clay. Groundwater was encountered between 17.5 feet and 22.5 feet below ground surface. Groundwater flow was determined to be in the north to northwest direction."

Env Problem:

"Nature and Extent of Contamination: Soil and groundwater were analyzed for volatile organic compounds (VOCs). Based upon investigations conducted to date, the primary contaminant of concern is tetrachloroethene (PCE). Soil - Sampling of soil beneath and behind the site structure was limited due to inability to access the area with a drill rig. Sample results from other media indicate that a source area of higher contaminant concentrations may be present beneath the site structure. Two detections of PCE were observed in soil borings advanced during the Site Characterization. PCE was detected at MW-02 (0.0036 ppm 17 19) and MW-04 (0.0017 ppm 5 6). Both detections are below the NYCRR Part 375 Soil Clean-up Objective of 1.3 ppm for PCE meeting both Unrestricted Use and Protection of Groundwater objectives. Groundwater - PCE was found in groundwater at two of the three boring locations advanced into the water table. Concentrations in contravention of the Class GA Groundwater standard of five (5) ppb were observed at 56 ppb and 10 ppb. Each of these exceedances were located in the public sidewalk immediately off the site parcel. Soil Vapor & Indoor Air A Vapor Intrusion Investigation was performed at the adjacent building to the north (154 Graham Avenue) as part of a real estate transaction. As part of that investigation two sub-slab vapor samples, one basement indoor air sample, and one ambient air sample were collected. At sub-slab location SG2, 43,399 ug/m3 of PCE was detected in soil vapor. (Note that the concentration reported is from a sample that was diluted 600 times. The concentration of PCE in the undiluted sample was 10,171 ug/m3, which exceeded the calibration range of the equipment.) Trichloroethylene (TCE) was detected at 1074 ug/m3 in the diluted sample and at 1504 ug/m3 in the undiluted sub-slab vapor sample. Cis-1,2-dichloroethylene (cis-1,2-DCE) was detected at 2180 ug/m3 in the diluted sample and at 1110 ug/m3 in the undiluted sub-slab vapor sample. Indoor air sampling results identified 44.1 ug/m3 of PCE and

TOP HAT CLEANERS (Continued)

1004758111

0.43 ug/m3 of TCE in the basement air sample. See site no. C224208 for additional updates."

Health Problem: "People may contact contaminated soil or groundwater if they dig below the ground surface. People are not drinking the contaminated groundwater because the area is served by a public water supply that is not affected by this contamination. Volatile organic compounds in the groundwater may move into the soil vapor (air spaces within the soil), which in turn may move into overlying buildings and affect the indoor air quality. This process, which is similar to the movement of radon gas from the subsurface into the indoor air of buildings, is referred to as soil vapor intrusion. The potential exists for the inhalation of site contaminants due to soil vapor intrusion on-site. Additional investigation of the potential for soil vapor intrusion to occur off-site is needed."

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/27/2021	Source: EPA
Date Data Arrived at EDR: 05/03/2021	Telephone: N/A
Date Made Active in Reports: 05/19/2021	Last EDR Contact: 08/04/2021
Number of Days to Update: 16	Next Scheduled EDR Contact: 10/11/2021
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 02/22/2021

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/22/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/23/2021	Telephone: (212) 637-3660

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/22/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/23/2021	Telephone: (212) 637-3660

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/22/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/23/2021	Telephone: (212) 637-3660

ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers for Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

UTM Y (Meters):	4505480.5
Elevation:	24 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5940597 BROOKLYN, NY
Version Date:	2013

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>

<u>NWI Quad at Target Property</u> BROOKLYN	<u>NWI Electronic Data Coverage</u> YES - refer to the Overview Map and Detail Map
--	---

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile West
Site Name:	Naval Station Ny
Site EPA ID Number:	NY5170022250
Groundwater Flow Direction:	NOT AVAILABLE.
Measured Depth to Water:	14 feet in a well located 1 mile southeast of the site.
Hydraulic Connection:	Information is not available about the hydraulic connection between the surficial aquifer (upper glacial till) and underlying aquifer(s). Bedrock is present at an estimated depth of 100 feet.
Sole Source Aquifer:	A sole source aquifer is present at or near the site
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Mesozoic
System: Cretaceous
Series: Upper Cretaceous
Code: uK (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loamy sand
sandy loam
fine sandy loam

Surficial Soil Types: silt loam
loamy sand
sandy loam
fine sandy loam

Shallow Soil Types: sandy loam

Deeper Soil Types: unweathered bedrock
very gravelly - loamy sand
stratified
sandy loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by RSK ENVIRONMENTAL GROUP, LLC were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1928 through 2017. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 200 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EDR Topographic Map Library has been searched by EDR and maps covering the target property location as provided by RSK ENVIRONMENTAL GROUP, LLC were identified for the years listed below. EDR's Historical Topo Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDR's Historical Topo Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the late 1800s.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: "Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property." ASTM also states that "Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself."

EPA's Standards and Practices for All Appropriate Inquiries (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records."

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.

EXECUTIVE SUMMARY: SEARCH DOCUMENTATION

A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of RSK ENVIRONMENTAL GROUP, LLC on Aug 27, 2021.

TARGET PROPERTY

794 Bedford Avenue
Brooklyn, NY 11205

SEARCH METHODS

EDR searches available lists for both the Target Property and Surrounding Properties.

RESEARCH SUMMARY

Building permits identified: **YES**

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

GLOSSARY

General Building Department concepts

- **ICC:** The International Code Council. The governing body for the building/development codes used by all jurisdictions who've adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.
- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections):** This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.
- **Jurisdiction:** This is the geographic area representing the properties over which a Permitting Authority has responsibility.
- **GC:** General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.
- **Sub:** Subordinate contracting companies or subcontractors. Usually a "trades" contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called "trades").
- **Journeyman:** Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.
- **HVAC (Mechanical, Heating & Air companies):** HVAC = Heating, Ventilation, and Air Conditioning.
- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release):** Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPs of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other common reasons for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.
- **"Pull" a permit:** To obtain and pay for a building permit.
- **CBO:** Chief Building Official
- **Planning Department:** The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes
- **Zoning Department:** The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.
- **Zoning District:** A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.
- **PIN (TMS, GIS ID, Parcel#):** Property Identification Number and Tax Map System number.
- **State Card (Business license):** A license card issued to a contractor to conduct business.
- **Building Inspector (Inspector):** The inspector is a building department employee that inspects building construction for compliance to codes.
- **C.O.:** Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.

GLOSSARY

Permit Content Definitions

- **Permit Number:** The alphanumeric designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.
- **Description:** A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use (s) of the property.
- **Permit Type:** Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000

EDR Environmental Lien and AUL Search

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.

Please contact EDR at 1-800-352-0050
with any questions or comments.

BARGAIN AND SALE DEED WITH COVENANT AGAINST GRANTOR (CORPORATION)

THIS IS A LEGALLY BINDING INSTRUMENT. IF NOT FULLY UNDERSTOOD, WE RECOMMEND ALL PARTIES TO THE INSTRUMENT CONSULT AN ATTORNEY BEFORE SIGNING.

THIS INDENTURE, made the 27 day of February, 2020, between:

Joel Iliovits and Ita Iliovits, as Trustees of the LANVITS FAMILY TRUST, having an address at 199 Lee Avenue, Brooklyn, NY, the Grantor,

and

Joel Landau, an individual residing at 53 Lorimer St, Apt. #6B, Brooklyn, NY 11206, the Grantee:

WITNESSETH, that the Grantor, in consideration of Ten Dollars (\$10.00) and other good and valuable consideration paid by the Grantee, does hereby grant and release unto the Grantee, the heirs, successors and assigns of the Grantee forever:

ALL that certain plot, piece or parcel of land with the buildings and improvements thereon erected, situate, lying and being in the Borough of Brooklyn, County of Kings, City and State of New York, more fully described in Schedule A annexed hereto;

BEING and intended to be the same premises conveyed to the Grantor by Correction Deed dated January 30, 2020 and offered for recording contemporaneously herewith in the Office of the City Register of the City of New York.

TOGETHER with the appurtenances and all the estate and rights of the Grantor in and to the said premises.

TO HAVE AND TO HOLD the premises herein granted unto the Grantee, the heirs, successors and assigns of the Grantee forever.

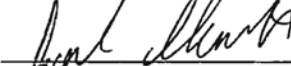

AND the Grantor covenants that the Grantor has not done or suffered anything whereby the said premises have been encumbered in any way whatsoever, except as aforesaid.

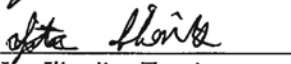

AND this deed is subject to the trust provisions of Section 13 of the New York Lien Law. The words "Grantor" and "Grantee" as used herein shall be construed to read in the plural whenever the sense of this deed so requires.

IN WITNESS WHEREOF, the Grantor has executed this deed the day and year first above written.

The EDR Property Tax Map Report

EDR Property Tax Map Report

Environmental Data Resources, Inc.'s EDR Property Tax Map Report is designed to assist environmental professionals in evaluating potential environmental conditions on a target property by understanding property boundaries and other characteristics. The report includes a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

Thank you for your business.

NEW YORK - EPA Map of Radon Zones

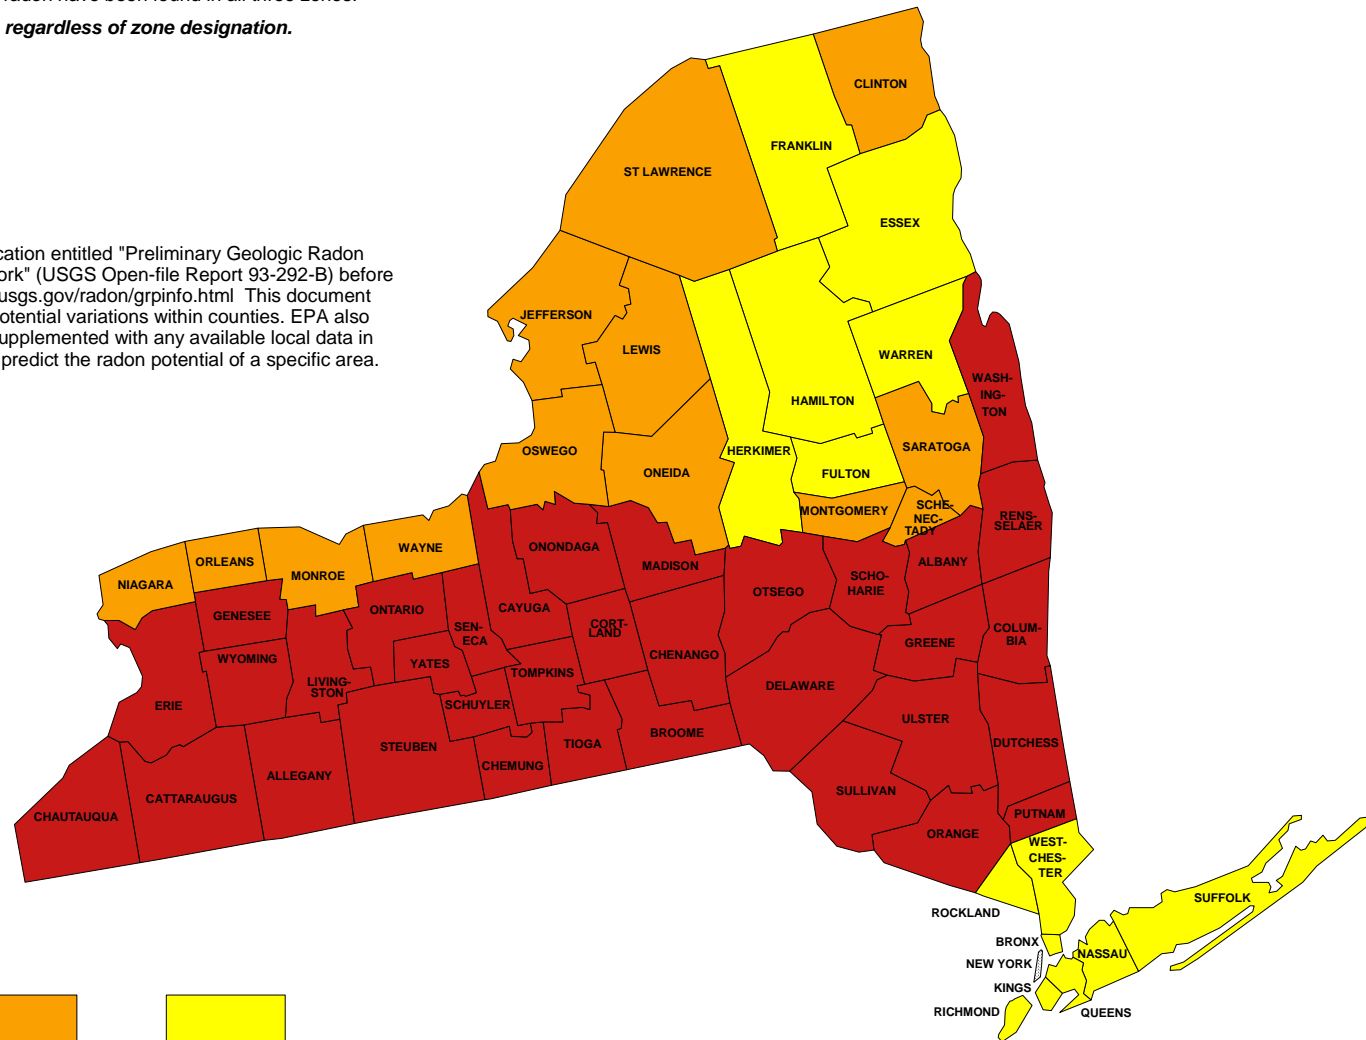

<http://www.epa.gov/radon/zonemap.html>

The purpose of this map is to assist National, State and local organizations to target their resources and to implement radon-resistant building codes.

This map is not intended to determine if a home in a given zone should be tested for radon. Homes with elevated levels of radon have been found in all three zones.

All homes should be tested, regardless of zone designation.

IMPORTANT: Consult the publication entitled "Preliminary Geologic Radon Potential Assessment of New York" (USGS Open-file Report 93-292-B) before using this map. <http://energy.cr.usgs.gov/radon/grpinfo.html> This document contains information on radon potential variations within counties. EPA also recommends that this map be supplemented with any available local data in order to further understand and predict the radon potential of a specific area.

Dear Friends:

This past year has presented our agency, our city, and our nation with historic challenges. The work we do at the Department of Environmental Protection (DEP) has never been more vital to protecting the health of New Yorkers.

Despite the challenges presented by the COVID-19 global pandemic, we have remained focused and disciplined in our commitment to being a world-class water utility and building a sustainable future for all New Yorkers. At DEP, we are no strangers to confronting situations that require quick thinking and innovative solutions. Through all the challenges we faced in 2020, I am proud to report that each day we continued to deliver one billion gallons of the best tap water in the world to more than 9.3 million New Yorkers.

In this report, you will see that New York City's drinking water continued to meet or surpass every national and state standard for quality. These data are based on 43,600 samples that were collected by DEP scientists throughout our reservoir system, and at nearly 1,000 street-side sampling stations in every neighborhood across the city. Those samples were analyzed 530,000 times by scientists working in our four water quality laboratories. Robotic monitoring stations on our reservoirs provided another 2.7 million tests to ensure DEP was sending the best-quality water to New York City at all times.

I want to especially thank the many DEP employees who went above and beyond in 2020, putting their commitment to public service before themselves, and truly embodying DEP's core values. And, as we embark on a new decade, I also want to thank each of you for entrusting DEP with your drinking water supply. We take great pride in delivering the best water to millions of New Yorkers every day.

Sincerely,

A handwritten signature in black ink, appearing to read "Vincent Sapienza". The signature is fluid and cursive.

Vincent Sapienza, P.E.
Commissioner

Throughout the COVID-19 pandemic, DEP's 6,000 dedicated scientists, engineers, and other professionals continued to protect, operate, and maintain New York City's water supply system, delivering high-quality drinking water to millions of New Yorkers around the clock, without interruption

NEW YORK CITY'S WATER SUPPLY SYSTEM

New York City's water supply system provides more than one billion gallons of safe drinking water every day to more than 8.3 million residents of New York City and one million people living in the counties of Westchester, Putnam, Orange, and Ulster. In 2020, we delivered 104 million gallons per day to 74 communities and institutions outside NYC. In all, this system provides nearly half the population of New York State with high-quality drinking water.

New York City gets its drinking water from 19 reservoirs and three controlled lakes spread across a nearly 2,000-square-mile watershed. The watershed is located upstate in portions of the Hudson Valley and Catskill Mountains that are as far as 125 miles north of the city. New York City's water supply system is comprised of two primary surface water supplies called the Catskill/Delaware and Croton. The city also has a permit to operate a groundwater supply in Southeast Queens, although water from that system has not been delivered to customers in many years.

In 2020, New York City received a blend of drinking water from the Catskill/Delaware and Croton supplies. The Catskill/Delaware provided approximately 96 percent of the water, and approximately 4 percent was supplied by Croton. An estimated 10 percent of the water supply was lost due to distribution system leakage.

TREATING OUR DRINKING WATER

CATSKILL/DELAWARE SUPPLY

Due to the very high quality of our Catskill/Delaware supply, New York City is one of only five large cities in the country with a surface drinking water supply that does not utilize filtration as a form of treatment. The Catskill/Delaware supply operates under a filtration waiver, referred to as the “Filtration Avoidance Determination” (FAD), and the water from this supply is treated using two forms of disinfection to reduce microbial risk.

Water is disinfected with chlorine, a common disinfectant added to kill germs and stop bacteria from growing on pipes, and then with ultraviolet (UV) light at the Catskill/Delaware UV Disinfection Facility. The facility, located in Westchester County, is the largest of its kind in the world and is designed to disinfect more than two billion gallons of water per day. At the UV Disinfection Facility, exposure to UV light inactivates potentially harmful microorganisms without changing the water.

DEP also adds food grade phosphoric acid, sodium hydroxide, and fluoride to the water before sending it into distribution. Phosphoric acid is added because it creates a protective film on pipes that reduces the release of metals, such as lead, from service lines and household plumbing. Sodium hydroxide is added to raise the pH which reduces corrosion of household plumbing. Fluoride is added to improve dental protection and is effective in preventing cavities at a federally-approved level of 0.7 mg/L. During 2020, only 0.2 percent of the water produced by Catskill/Delaware supply was not fluoridated.

CROTON SUPPLY

The Croton supply is filtered by the Croton Water Filtration Plant, located underground in the Bronx. The plant has the ability to treat up to 290 million gallons of drinking water each day, which helps to ensure a large enough supply of water for the city to withstand droughts, periodically shut down other parts of the water supply, and respond to the potential effects of climate change. The Croton Water Filtration Plant first began operating in May 2015.

Once water arrives at the filtration plant it undergoes treatment to remove impurities. The treatment processes include coagulation, dissolved air flotation, filtration, and disinfection. During coagulation, chemicals are added to untreated water, causing any particulates to bunch together and become larger particles called floc. Then injected air bubbles float the floc to the top where it is skimmed off using a process called dissolved air flotation. Finally, the water flows through a filter bed removing any remaining particles. Just like the Catskill/Delaware supply, Croton water is disinfected with chlorine and UV light to protect against potentially-harmful microorganisms, and is treated with food grade phosphoric acid, sodium hydroxide, and fluoride. In 2020, DEP upgraded the material in the filter beds from anthracite to granular activated carbon (GAC) to improve the plant’s performance. Once the change was completed, the plant resumed operations on October 27 to December 31, during which time, only 0.6 percent of the water produced by the plant was not fluoridated.

The New Croton Reservoir Dam

TESTING FOR QUALITY DRINKING WATER SAMPLING AND MONITORING

DEP monitors the water in the distribution system, upstate reservoirs and feeder streams, and wells that are potential sources for New York City's drinking water supply. We continuously sample and conduct analyses for numerous water quality parameters, including microbiological, chemical, and physical measures, throughout the watershed and as the water enters the distribution system. DEP also regularly tests water quality at nearly 1,000 water quality sampling stations throughout New York City. In 2020, DEP performed over 363,200 analyses on 31,300 samples from the distribution system, meeting all state and federal monitoring requirements. These data are summarized in tables starting on page 11. Additionally, DEP performed over 166,800 analyses on 12,300 samples from the upstate reservoir watersheds and took more than 2.7 million robotic monitoring measurements to support FAD watershed protection programs and to optimize water quality.

REGULATION OF DRINKING WATER

The sources of drinking water (both tap water and bottled water) include rivers, lakes, streams, ponds, reservoirs, springs, and wells. As water travels over the surface of the land or through the ground, it dissolves naturally-occurring minerals and, in some cases, radioactive material, and can pick up substances resulting from the presence of animals or from human activities.

Contaminants that may be present in source water include microbial contaminants, inorganic contaminants, pesticides and herbicides, organic chemical contaminants, and radioactive contaminants.

To ensure that tap water is safe to drink, the New York State Department of Health (NYSDOH) and the United States Environmental Protection Agency (EPA) prescribe regulations that limit the amount of certain contaminants in water provided by public water systems. The NYSDOH and the federal Food and Drug Administration's (FDA) regulations establish limits for contaminants in bottled water, which must provide the same protection for public health. The presence of contaminants does not necessarily indicate that water poses a health risk. These regulations also establish the minimum amount of testing and monitoring that each system must undertake to ensure that the tap water is safe to drink.

Visit epa.gov/safewater or health.ny.gov for more information about drinking water.

DEP's water quality monitoring program—far more extensive than required by law—demonstrates that the quality of New York City's drinking water remains high and meets all state and federal drinking water standards

PROTECTING OUR WATER AT THE SOURCE

10-YEAR FILTRATION AVOIDANCE DETERMINATION (FAD)

DEP funds and administers a number of watershed protection and pollution prevention programs to maintain the high quality of our drinking water. These science-based strategies are designed to protect New York City's drinking water at its source by keeping pollution out of our reservoirs and the streams, creeks, and rivers that feed them.

NYSDOH issued the most current FAD in 2017 that allows DEP to continue operating the Catskill/Delaware supply without filtration through at least 2027. DEP will commit an estimated \$1 billion over the coming decade to comply with the FAD, which will go towards our watershed programs that conserve watershed lands, upgrade wastewater infrastructure, implement clean water strategies on watershed farms, and manage streams, forests, and other natural resources that affect water quality.

SOURCE WATER ASSESSMENT PROGRAMS

Federal regulations require states to develop and implement source water assessment programs to identify the areas that supply public tap water, inventory contaminants, assess water system susceptibility to contamination, and inform the public of the results. The states are given a great deal of flexibility on how to implement source water assessment programs. These assessments are created using available information to help estimate the potential for source water contamination. Higher susceptibility ratings do not mean that source water contamination has occurred or will occur in a water supply; rather, they indicate the need for water suppliers to implement additional precautionary measures. Because of DEP's extensive watershed protection and pollution prevention programs, NYSDOH does not find it necessary to perform a source water assessment on the New York City water supply.

Water quality monitoring
at Bear Kill which leads to
Schoharie Reservoir

CONSERVING OUR SUPPLY

Although New York City has grown by more than 1.3 million people since 1980, demand for water has dropped by approximately 35 percent—making it one of the most water-efficient large cities in the country.

The average single-family household in New York City uses approximately 70,000 gallons of water each year at a cost of \$3.99 per 100 cubic feet of water (748 gallons), or about \$373 a year. Since nearly all customers also receive wastewater collection and treatment services, which cost about \$594, the combined annual water and sewer charge for the typical New York City household using 70,000 gallons per year is \$967, calculated at fiscal year 2021 rates.

Advances in technology have played a key role in the drop of water consumption, from the replacement of thousands of inefficient toilets through DEP's toilet replacement program, to an automated leak detection program, which helps our customers save both money and water by alerting homeowners to unusual spikes in water consumption. DEP has also partnered with other city agencies, colleges, and businesses to help conserve water by installing more than 400 spray shower timers in NYC Parks playgrounds, 34,000 efficient bathroom fixtures in 402 New York City public schools, and a water reuse station at the Fire Department of the City of New York's (FDNY) Fire Training Academy on Randall's Island which includes a 40,000-gallon underground water storage tank used for calibrating equipment on pumper apparatus.

These, and other recent investments, have reduced overall demand for water by more than 11.2 million gallons per day. By 2022, we plan to nearly double that by conserving 20 million gallons per day through new and ongoing initiatives.

The DOs & DON'Ts of Water Conservation

BATHROOM

- ✓ Do take shorter showers and fill the tub halfway.
- ✗ Don't run water while washing your hands & brushing your teeth.

KITCHEN & LAUNDRY

- ✓ Do run the dishwasher & washing machine only when full.
- ✗ Don't let the water run while washing dishes. Kitchen faucets use 2 to 3 gallons a minute. Filling a basin only takes 10 gallons to wash and rinse.

EVERYWHERE

- ✓ Do install water-saving fixtures.
- ✗ Don't ignore water leaks. Turn taps off tightly.

OUTDOORS

- ✓ Do use a self-closing nozzle on your hose.
- ✗ Don't open fire hydrants.

REPORT LEAKS & WATER WASTE
Call 311

PLANNING FOR THE FUTURE

We are continuing to build upon DEP's legacy of long-term planning and have made significant progress on keystone projects already underway. In 2020, we completed the third year of an all-important capital project to rehabilitate the Catskill Aqueduct. Skilled workers replaced century-old valves along the northern 74 miles of the aqueduct and repaired minor leaks to ensure the aqueduct continues to deliver water from the Catskills to New York City after more than a century in service.

In May 2020, the final segment of steel lining was lowered into the Delaware Aqueduct Bypass Tunnel, marking another significant milestone in our project to repair the longest tunnel in the world. The last of 230 massive steel liners was lowered down an access shaft in the Town of Newburgh. Each steel segment is 16 feet in diameter, 40 feet long, and weighs 106,000 pounds. DEP expected to complete the installation of steel liners by August 2020, but laborers finished this vital portion of the \$1 billion project several months ahead of schedule. In addition to meeting this milestone, we also placed more than 70 percent of the tunnel's finished concrete liner.

This summer, DEP announced the start of subsurface analyses for the future upgrades to the dam and dikes at Ashokan Reservoir. Field work began in August to support future upgrades to the dam and dikes that impound water at the reservoir. The work focuses on gathering soil and bedrock samples that are needed for the engineering and design of upgrades at each structure. The subsurface investigations are connected to the Ashokan Century Program, a comprehensive, multi-year capital program to upgrade the dam, dikes, chambers and other infrastructure at Ashokan Reservoir. The program comprises the largest public works project in the Catskills in more than 50 years.

Work on steel liners for the Delaware Aqueduct Bypass Tunnel (each liner section is 16' in diameter and 40' long)

CRYPTOSPORIDIUM AND GIARDIA

DEP maintains a comprehensive program to monitor its source waters and watersheds for the presence of *Cryptosporidium* and *Giardia*, microscopic organisms that can cause disease. In 2020, DEP collected weekly samples of water leaving Kensico Reservoir, prior to chlorination and UV disinfection, and leaving Hillview Reservoir, prior to secondary disinfection with chlorine. Water leaving New Croton Reservoir was sampled quarterly. Samples were analyzed using EPA Method 1623.1. The *Cryptosporidium* and *Giardia* data for water leaving the Kensico, Hillview, and New Croton reservoirs are presented in the table on page 14 of this report.

While there is no evidence that any cases of cryptosporidiosis or giardiasis have been caused by the New York City water supply, federal and state law requires all water suppliers to notify their customers about the potential risks from *Cryptosporidium* and *Giardia*. Cryptosporidiosis and giardiasis are intestinal illnesses caused by microscopic pathogens, which can be waterborne. Symptoms of infection include nausea, diarrhea, and abdominal cramps. Some people may be more vulnerable to disease causing microorganisms, or pathogens in drinking water than the general population. Immuno-compromised persons, such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly individuals, and infants, can be particularly at risk from infections. These people should seek advice from their health care providers about their drinking water. EPA/CDC guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium*, *Giardia*, and other microbial contaminants are available from EPA's Safe Drinking Water Hotline at 1-800-426-4791.

New York City's Waterborne Disease Risk Assessment Program (WDRAP), a partnership between DEP and DOHMH, helps assess and ensure the microbial safety of NYC's tap water. Under WDRAP, NYC conducts disease surveillance for *Cryptosporidium* and *Giardia* to track incidence and to examine patterns and potential risk exposures in the population. The city also conducts syndromic surveillance for gastrointestinal symptoms to monitor trends to ensure identification of any waterborne disease outbreak, should one occur. Disease and syndromic surveillance continued to indicate that there have been no outbreaks of *Cryptosporidium* and *Giardia* attributed to tap water consumption in New York City.

Throughout the COVID-19 pandemic, DEP scientists continued their work to insure the high-quality of New York City's drinking water supply

LEAD IN DRINKING WATER: FREQUENTLY ASKED QUESTIONS

IS THERE LEAD IN MY DRINKING WATER?

New York City's award-winning tap water is delivered virtually lead-free through 7,000 miles of lead-free aqueducts, tunnels, and water mains in the city's water supply system. However, homes built prior to 1961 may have lead service lines (which connect your house to the city's water main in the street), and some homes, regardless of the year they were built, could have household plumbing and internal fixtures that contain lead. Although New York City takes extensive steps to protect water in homes that may have lead in their plumbing, lead from plumbing may still be released into a home's drinking water. It is possible that lead levels at your home may be higher than at other homes in the community as a result of materials used in your home's plumbing. DEP is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components.

HOW CAN I FIND OUT IF I HAVE A LEAD SERVICE LINE?

Visit nyc.gov/leadfree to view an interactive map. This map offers historical information largely based on third-party plumbing records, supplemented, in some cases by information gathered during inspections.

HOW CAN I TEST THE WATER IN MY HOME?

DEP offers free lead test kits to all New York City residents. Call 311 or visit nyc.gov/apps/311 to request a free lead test kit. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline (1-800-426-4791) or at epa.gov/safewater/lead.

WHAT ARE THE HEALTH EFFECTS OF LEAD?

Exposure to lead can cause serious health problems, especially for pregnant women, infants, and young children. For more information, visit nyc.gov/lead.

How can I limit my lead exposure?

Run Your Tap

for 30 seconds to 2 minutes before using water for drinking or cooking, when your water has been sitting for several hours.

Use Cold Water

for cooking, drinking, or preparing infant formula. Hot tap water is more likely to contain lead and other metals.

Remove & Clean

the faucet screen monthly (also called an aerator), where small particles can get trapped.

Hire

a licensed plumber to identify and replace plumbing fixtures and/or service line that contain lead.

DEP scientist performing water testing at the NYC Water Quality Distribution Laboratory

HOW TO READ THE NEW YORK CITY 2020 DRINKING WATER QUALITY TESTING RESULTS

The following section of this report compares the quality of your tap water to federal and state standards for each parameter (if applicable). The monitoring results show that New York City's drinking water met all drinking water standards in 2020.

The following tables reflect the compliance monitoring results for all regulated and non-regulated parameters, the number of samples collected, the range of values detected, the average of the values detected, and the possible sources of the parameters, unless otherwise footnoted. The monitoring frequency of each parameter varies and is parameter specific. Data presented are for the Catskill/Delaware and Croton supplies, which were the only sources of water in 2020. The table on page 15 represents those parameters monitored for, but not detected in any sample.

Most of our data are representative of 2020 testing; concentrations of parameters or contaminants do not change frequently.

THE NEW YORK CITY 2020 DRINKING WATER QUALITY TESTING RESULTS

DETECTED CONVENTIONAL PHYSICAL AND CHEMICAL PARAMETERS							
PARAMETER	NYSDOH MCL (Highest Level Allowed)	EPA MCLG (Ideal Goal)	# SAMPLES	RANGE	AVERAGE	MCL VIOLATION	LIKELY SOURCES IN DRINKING WATER
Alkalinity (mg/L CaCO ₃)	-		297	14 - 76	20	No	Erosion of natural deposits

LEAD AND COPPER RULE SAMPLING AT RESIDENTIAL WATER TAPS

PARAMETER	NYSDOH AL	EPA MCLG (Ideal Goal)	90% OF YOUR LEVELS WERE LESS THAN	RANGE	# SAMPLES EXCEEDING AL	Exceedance	LIKELY SOURCES IN DRINKING WATER
Copper (mg/L)	1.3	1.3	0.204	0.005 - 0.640	0 out of 411	No	Corrosion of household plumbing
Lead (µg/L)	15	0	11	ND - 120	28 out of 411	No	Corrosion of household plumbing

CRYPTOSPORIDIUM AND GIARDIA SAMPLING FROM SOURCE WATER LEAVING RESERVOIRS ⁽¹⁹⁾

PARAMETER	RESERVOIR	# SAMPLES	# SAMPLES POSITIVE	RANGE	LIKELY SOURCES IN DRINKING WATER
<i>Cryptosporidium</i> (oocysts/50L)	Kensico	52	3	0 - 1	Animal fecal waste
	Hillview	52	2	0 - 1	
	Croton	4	0	0	
<i>Giardia</i> (cysts/50L)	Kensico	52	35	0 - 17	Animal fecal waste
	Hillview	52	17	0 - 5	
	Croton	4	3	0 - 8	

UNITS AND ABBREVIATIONS

CaCO₃ = calcium carbonate

CFU/mL = colony forming units per milliliter

/cm = per centimeter

D = detected parameter

°F = degrees Fahrenheit

µg/L = micrograms per liter (10⁻⁶ grams per liter)

µS/cm = microsiemens per centimeter

mg/L = milligrams per liter (10⁻³ grams per liter)

MPN/100mL = most probable number per 100 milliliters

ND = parameter is not detected

NDL = no designated limits

NTU = nephelometric turbidity units

/50L = per 50 liters

DEFINITIONS

Action Level (AL):

The concentration of a contaminant, which, if exceeded, triggers treatment or other requirements that a water system must follow.

Maximum Contaminant Level (MCL):

The highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible, using the best available treatment technology.

Maximum Contaminant Level Goal (MCLG):

The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

Maximum Residual Disinfectant Level (MRDL):

The highest level of a disinfectant allowed in drinking water. The addition of a disinfectant is necessary for control of microbial contaminants.

Maximum Residual Disinfectant Level Goal (MRDLG):

The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contamination.

Treatment Technique (TT):

A required process intended to reduce the level of a contaminant in drinking water.

90th Percentile Value:

The values reported for lead and copper represent the 90th percentile. A percentile is a value on a scale of 100 that indicates the percent of a distribution that is equal to or below the value. The 90th percentile is equal to or greater than 90 percent of the lead and copper values detected at your water system.

NOT DETECTED PARAMETERS

Conventional Physical and Chemical Parameters:

Antimony, Arsenic, Asbestos, Beryllium, Cadmium, Cyanide, Gross alpha, Lithium, Mercury, Nitrite, Selenium, Silver, Thallium, Uranium

Principal Organic Contaminants:

Benzene, Bromobenzene, Bromochloromethane, Bromomethane, n-Butylbenzene, sec-Butylbenzene, tert-Butylbenzene, Carbon tetrachloride, Chlorobenzene, Chloroethane*, Chloromethane, 2-Chlorotoluene, 4-Chlorotoluene, Dibromomethane, 1,2-Dichlorobenzene, 1,3-Dichlorobenzene, 1,4-Dichlorobenzene, Dichlorodifluoromethane, 1,1-Dichloroethane, 1,2-Dichloroethane, 1,1-Dichloroethene, cis-1,2-Dichloroethylene, trans-1,2-Dichloroethylene, 1,2-Dichloropropane, 1,3-Dichloropropane, 2,2-Dichloropropane*, 1,1-Dichloropropene, cis-1,3-Dichloropropene, trans-1,3-Dichloropropene, total 1,3-Dichloropropene, Ethylbenzene, Hexachlorobutadiene, Isopropylbenzene, p-Isopropyltoluene, Methylene chloride, n-Propylbenzene, Styrene, 1,1,1,2-Tetrachloroethane, 1,1,2,2-Tetrachloroethane, Tetrachloroethylene, Toluene, 1,2,3-Trichlorobenzene, 1,2,4-Trichlorobenzene, 1,1,1-Trichloroethane, 1,1,2-Trichloroethane, Trichloroethene, Trichlorofluoromethane, 1,2,3-Trichloropropane, 1,3,5-Trimethylbenzene, m,p-Xylene, o-Xylene, total Xylene

Specified Organic Contaminants:

Alachlor, Aldicarb (Temik), Aldicarb sulfone, Aldicarb sulfoxide, Aldrin, Atrazine, Benzo(a)pyrene, Butachlor, Carbaryl, Carbofuran (Furadan), Chlordane, 2,4-D, 1,2-Dibromo-3-chloropropane, Di(2-ethylhexyl)adipate, Dicamba, Dieldrin, Dinoseb, 1,4-Dioxane, Diquat, Endothal, Endrin, Ethylene dibromide (EDB), Glyphosate, Heptachlor, Heptachlor epoxide, Hexachlorobenzene, 3-Hydroxycarbofuran, Lindane, Methomyl, Methoxychlor, Methyl-tertiary-butyl-ether (MTBE), Metolachlor, Metribuzin, Oxamyl (Vydate), Pentachlorophenol, Perfluorooctanesulfonic acid (PFOS), Perfluorooctanoic acid (PFOA), Picloram, Polychlorinated biphenyls (PCBs), PCB 1016 Aroclor, PCB 1221 Aroclor, PCB 1232 Aroclor, PCB 1242 Aroclor, PCB 1248 Aroclor, PCB 1254 Aroclor, PCB 1260 Aroclor, Propachlor, Simazine, 2,3,7,8-TCDD (Dioxin), Toxaphene, 2,4,5-TP (Silvex), Vinyl chloride

Unspecified Organic Contaminants:

Acenaphthene, Acenaphthylene, Acetochlor, Acetone, Acifluorfen, Allyl chloride, Ametryn, t-amyl ethyl ether, tert-Amyl methyl ether, Anthracene, Atraton, Bentazon, Benzo[a]anthracene, Benzo[b]fluoranthene, Benzo[g,h,i]perylene, Benzo[k]fluoranthene, beta-BHC, Bromacil, Bromoethane, 1,3-Butadiene, 2-Butanone (MEK), Butylate, Butylated hydroxytoluene (BHT), Butylbenzylphthalate, tert-Butyl ethyl ether, Caffeine, Carbon Disulfide, alpha-Chlordane, gamma-Chlordane, trans-Chlordane, Chlorfenvinphos, Chlorobenzilate, 2-Chlorobiphenyl, 4-Chlorobiphenyl, 1-Chlorobutane, Chlorodifluoromethane, Chloroneb, Chlorothalonil (Draconil, Bravo), Chlorpropham, Chlorpyrifos (Dursban), Chrysene, Cyanazine, Cycloate, 2,4-DB, DCPA (Dacthal), 2,4-DDD, 4,4'-DDD, 2,4-DDE, 4,4'-DDE, 2,4-DDT, 4,4'-DDT, DEET, Diazinon, Dibenz[a,h]anthracene, 3,5-Dichlorobenzoic acid, 2,4'-Dichlorobiphenyl, Dichlorprop, Dichlorvos (DDVP), Diethyl ether, Diethylphthalate, Di-isopropyl ether, Diisopropyl methylphosphonate, Dimethipin, Dimethoate, Dimethylphthalate, Di-n-Butylphthalate, 2,4-Dinitrotoluene, 2,6-Dinitrotoluene, Di-N-octylphthalate, Diphenamid, Disulfoton, Endosulfan I, Endosulfan II, Endosulfan sulfate, Endrin aldehyde, Endrin Ketone, EPTC, Ethion, Ethoprop, Ethyl methacrylate, Etridiazole, Fenarimol, Fluoranthene, Fluorene, Fluridone, alpha-HCH, beta-HCH, delta-HCH, 2,2',3,4,4',5,5'-Heptachlorobiphenyl, 2,2',3,4,4',5'-Hexachlorobiphenyl, 2,2',3,4',5',6-Hexachlorobiphenyl, 2,2',4,4',5,5'-Hexachlorobiphenyl, Hexachloroethane, Hexachlorocyclopentadiene, Hexazinone, Indeno[1,2,3-cd]pyrene, Isophorone, Malathion, Methiocarb, Methyl acetate, Methyl iodide, Methyl parathion, 4-Methyl-2-pentanone (MIBK), Mevinphos, MGK264 - isomer a, MGK264 - isomer b, Molinate, Naphthalene, Napropamide, Nitrofen, cis-Nonachlor, trans-Nonachlor, Norflurzon, Oxyfluorfen, Paraquat, Parathion, Pebulate, Pendimethalin, 2,3,3',4',6-Pentachlorobiphenyl, 2,3',4,4',5-Pentachlorobiphenyl, Pentachloroethane, Perfluorobutanesulfonic acid, Perfluorodecanoic acid, Perfluorododecanoic acid, Perfluoroheptanoic acid, Perfluorohexanesulfonic acid, Perfluorohexanoic acid, Perfluorononanoic acid, Perfluorotetradecanoic acid, Perfluorotridecanoic acid, Perfluoroundecanoic acid, cis-Permethrin & trans-Permethrin, Permethrin (mixed isomers), Phenanthrene, Phorate, Phosphamidon, Profenofos, Prometon, Prometryn, Pronamide, Propazine, Propoxur (Baygon), Pyrene, Simetryn, 2,4,5-T, Tebuconazole, Tebuthiuron, Terbacil, Terbutylazine, Terbutryn, 2,2',3,5'-Tetrachlorobiphenyl, 2,2',5,5'-Tetrachlorobiphenyl, 2,3',4',5-Tetrachlorobiphenyl, Tetrachlorovinphos, Tetrahydrofuran, Thiobencarb, Triademefon, Tribufos, 2,2',5-Trichlorobiphenyl, 2,4,4'-Trichlorobiphenyl, Trichlorotrifluoroethane (Freon 113), Trifluralin, 1,2,4-Trimethylbenzene, Vernolate, Vinclozolin

2020 MONITORING DATA FOOTNOTES

- (1) EPA Secondary MCL: NYSDOH has not set an MCL for this parameter.
 - (2) Monitored for under the Fourth Unregulated Contaminant Monitoring Rule (UCMR4) in 2018 and 2019. UCMR4 included source water monitoring for bromide and total organic carbon; no MCL has been established for these parameters.
 - (3) Value represents MRDL, which is a level of disinfectant added for water treatment that may not be exceeded at the consumer's tap without an unacceptable possibility of adverse health effects. The MRDL is enforceable in the same manner as an MCL and is the calculated running annual average. Data presented are the range of individual sampling results and the highest of the four quarterly running annual averages.
 - (4) Determination of MCL violation: If a sample exceeds the MCL, a second sample must be collected from the same location within two weeks, or as soon as practical. If the average of the two results exceeds the MCL, then an MCL violation has occurred.
 - (5) Action Level (not an MCL) measured at-the-tap. The data presented in this table were collected from sampling stations at the street curb. For at-the-tap monitoring, see the Lead and Copper Rule Sampling at Residential Water Taps table.
 - (6) A Langelier Index of less than zero indicates corrosive tendencies.
 - (7) Hardness of up to 3 grains per gallon is considered soft water; between 3 and 9 is moderately hard water.
 - (8) If iron and manganese are present, the total concentration of both should not exceed 500 µg/L. One exceedance of the iron MCL occurred at site 30150 (East Village, 10009) on 7/7/20 following an emergency shutdown of the water main.
 - (9) Only detected in one sample: lead was detected at site 11750 (City Island, 10464) on 6/2/20, nickel was detected at site 22950 (Clinton Hill, 11205) on 7/7/20, and Bis(2-Ethylhexyl)phthalate was detected at site 1SCL1 (Van Cortlandt Village, 10463) on 11/17/20 at the method reporting limit. In all other samples the parameter was not detected.
 - (10) NYSDOH established Optimal Water Quality Parameters (OWQP) under the Lead and Copper Rule which includes a range for pH and ortho-phosphate which are presented here. The reported average value for pH is the median value.
 - (11) Water containing more than 20 mg/L of sodium should not be used for drinking by people on severely restricted sodium diets. Water containing more than 270 mg/L of sodium should not be used for drinking by people on moderately restricted sodium diets.
 - (12) Turbidity is a measure of cloudiness of the water. Turbidity is monitored because it is a good indicator of water quality, because high turbidity can hinder the effectiveness of disinfection, and because it is a good indicator of the effectiveness of our filtration system.
 - (13) This MCL for turbidity is the monthly average rounded off to the nearest whole number. Data presented are the range of individual sampling results and the highest monthly average from distribution sites.
 - (14) This MCL for turbidity is on individual readings taken every four hours at the unfiltered Catskill/Delaware source water entry point. Value presented is the highest individual sampling result.
 - (15) This is a Treatment Technique performance standard for the Croton Filtration Plant. The value presented is the highest single combined filter effluent turbidity measurement which occurred on 11/25/20. In 2020, 100% of turbidity results were <0.3 NTU.
 - (16) Results for t-Butyl alcohol are only reported as detected (D) or not detected (ND).
 - (17) The MCLs for HAA5 and TTHMs are the calculated locational running annual average. The data in the Range column are the minimum and maximum values of all sample sites monitored in the distribution system whether for compliance purposes or not. The values in the Average column are the highest locational running annual averages under the Stage 2 Disinfectant and Disinfection By-Products Rule.
 - (18) If a sample and its repeat sample are both positive for coliform bacteria and one of the two samples is positive for *E. coli*, then an MCL violation has occurred.
 - (19) Samples are collected prior to final disinfection or filtration. Positive results indicate (oo)cyst detection, not viability or infectivity.
- * Chloroethane and 2,2-Dichloropropane were incorrectly reported as having been monitored for in 2015 to 2019 in those year's reports. Monitoring for these two parameters, prior to 2020, last occurred in 2014 when they were not detected.

HILLVIEW RESERVOIR CONSENT JUDGEMENT

The Hillview Reservoir is the final stop for drinking water from the Catskill/Delaware System before it enters the city's distribution system. The City and DEP entered into a Consent Decree and Judgement with the United States and New York State, effective May 15, 2019, which sets forth a schedule of compliance for the City to cover the Hillview Reservoir as required by the Long Term 2 Enhanced Surface Water Treatment Rule (40 C.F.R §141.714). DEP and the City timely complied with all scheduled commitments due under the Decree in 2020.

CONTAMINANTS QUESTIONS

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the EPA's Safe Drinking Water Hotline at 1-800-426-4791.

APPENDIX J – Transaction Screen Questionnaire

ENVIRONMENTAL SITE ASSESSMENT TRANSACTION SCREEN QUESTIONNAIRE

This document is an excerpt of Practice E1528-06: Standard Practice for Environmental Site Assessments: Transaction Screen Process, which is under the jurisdiction of ASTM Committee E50 on Environmental Assessment as is the direct responsibility of Subcommittee E50.02 on Commercial Real Estate Transactions. This questionnaire represents only Sections 5 and 6 of Practice E 1528-06 and should not be construed as being the complete standard. It is necessary to refer to the full standard prior to using this questionnaire. COPYRIGHT © 2006 ASTM INTERNATIONAL, West Conshohocken, PA. Prior edition copyrighted 2000. Stock # ADJE152806. For the complete standard, or to order additional copies of this questionnaire, contact ASTM Customer service at (610) 832-9585.

5. Introduction to Transaction Screen Questionnaire

5.1 *Process*--The *transaction screen process* consists of asking questions contained within the *transaction screen questionnaire* of owners and occupants of the *property*, observing site conditions at the property with direction provided by the *transaction screen questionnaire*, and, to the extent *reasonably ascertainable*, conducting limited research regarding certain government records and certain standard historical sources. The questions asked of owners are the same questions as those asked of occupants.

5.2 *Guide*--The *transaction screen questionnaire* is followed by a guide designed to assist the person completing the *transaction screen questionnaire*. The guide to the *transaction screen questionnaire* is set out in Sections 7-10 of this practice. The guide is divided into three sections: Guide for Owner/Occupant Inquiry, Guide to Site Visit, and Guide to Government Records/Historical Sources Inquiry.

5.2.1 To assist the *user*, its employee or agent, or the preparer in preparing a report, the guide repeats each of the questions set out in the *transaction screen questionnaire* in both the guide for owner/occupant inquiry and the guide to *site visit*. The questions regarding government records/historical sources inquiry are also repeated in the guide to that section.

5.2.2 The guide also describes the procedures to be followed to determine if reliance upon the information in a prior *transaction screen* is appropriate under this practice.

5.2.3 A *user*, his employee or agent, or preparer conducting the *transaction screen process* should not use the *transaction screen questionnaire* without reference to or without familiarity with the guide based on prior use of the guide.

5.3 The *user* may either conduct the *transaction screen process*, or delegate it to an employee or agent or may contract with a third party to prepare the questionnaire on behalf of the *user*. No matter who prepares the questionnaire, the *user* remains responsible for the decision to conduct limited environmental *due diligence* and the impact of that decision on risk management.

5.4 The preparer conducting the *transaction screen process* should use good faith efforts in determining answers to the questions set forth in the *transaction screen questionnaire*. The *user* should take time and care to check whatever records are in the *user's* possession and forward relevant information or specialized knowledge to the preparer.

5.5 *Knowledge*--All answers should be given to the best of the owner's or occupant's knowledge. The most knowledgeable person available should be chosen to answer the questions.

5.5.1 While the person conducting the *transaction screen* has an obligation to ask the questions in the *transaction screen questionnaire*, others may have no obligation to answer them.

5.5.2 The *transaction screen questionnaire* and the *transaction screen guide* sometimes include the phrase "to the best of your knowledge." This phrase does not impose a constructive knowledge standard. It is intended as an assurance to the person being questioned that he or she is not obligated to search out information he or she does not currently have in order to answer the particular question.

5.6 *Conclusions Regarding Affirmative or Unknown Answers*--Once a *transaction screen questionnaire* has been completed, it shall be presented to the user. Subject to 5.6 through 5.7, an affirmative, unknown, or no response is presumed to be a *potential environmental concern*. If any of the questions set forth in the *transaction screen questionnaire* are answered in the affirmative, the preparer must document the reason for the affirmative answer. If any of the questions are not answered or the answer is unknown, the *user* should document such nonresponse or answer of unknown and evaluate it in light of the other information obtained in the *transaction screen process*, including, in particular, the site visit and the government records/historical sources inquiry. If the *user* decides no further inquiry is warranted after receiving no response, an answer of unknown, or an affirmative answer, the *user* must document the reasons for any such conclusion.

5.6.1 Upon obtaining an affirmative answer, an answer of unknown or no response, the *user* should first refer to the guide. The guide may provide sufficient explanation to allow a *user* to conclude that no further inquiry is appropriate with respect to the particular question.

5.6.2 If the guide to a particular question does not, in itself, permit a user to conclude that no further inquiry is appropriate, then the user should consider other information obtained from the *transaction screen process* relating to this question. For example, while on the site performing a *site visit*, a person may find a storage tank on the *property* and therefore answer Question 10 of the *transaction screen questionnaire* in the affirmative. However, during or subsequent to the owner/occupant inquiry, the owner may establish that substances now or historically contained in the tank (for example, water) are not likely to cause contamination.

5.6.3 If either the guide to the question or other information obtained during the *transaction screen process* does not permit a *user* to conclude no further inquiry is appropriate with respect to such question, then the user must determine, in the exercise of the *user's* reasonable business judgment, based upon the totality of unresolved affirmative answers or answers of unknown received during the *transaction screen process*, whether further inquiry may be limited to those specific issues identified as of concern.

5.7 *Presumption*--A presumption exists that further inquiry is necessary if an affirmative answer is given to a question or because the answer was unknown or no response was given. In rebutting this presumption, the *user* should evaluate information obtained from each component of the *transaction screen process* and consider whether sufficient information has been obtained to conclude that no further inquiry is necessary. The *user* must determine, in the exercise of the *user's* reasonable business judgment, the scope of such further inquiry.

5.8 *Further Inquiry*--Upon completing the *transaction screen questionnaire*, if the *user* concludes that further inquiry or action is needed (for example, consult with an environmental consultant, contractor, governmental authority, or perform additional governmental and/or historical records review), the *user* should proceed with such inquiry. (Note that if the *user* determines to proceed with a Phase I Environment Site Assessment, the *user* may apply the current Practice E 1527 or alternatively the provisions of EPA's regulation "Standards and Practices for All Appropriate Inquiries," 40 C.F.R. Part 312.)

5.9 *Signature*--The user and the preparer of the *transaction screen questionnaire* must complete and sign the questionnaire as provided at the end of the questionnaire.

6. Transaction Screen Questionnaire

6.1 *Persons to Be Questioned*-The following questions should be asked of (1) the current owner of the *property*, (2) any major occupant of the *property* or, if the *property* does not have any *major occupants*, at least 10 % of the occupants of the *property*, and (3) in addition to the current owner and the occupants identified in (2), any *occupant* likely to be using, treating, generating, storing, or disposing of *hazardous substances* or *petroleum products* on or from the *property*. A major occupant is any *occupant* using at least 40 % of the leasable area of the *property* or any anchor tenant when the *property* is a

shopping center. In a multifamily *property* containing both residential and commercial uses, the *preparer* does not need to ask questions of the residential *occupants*. The *preparer* should ask each person to answer all questions to the best of the respondent's *actual knowledge* and in good faith. When completing the *site visit* column, the *preparer* should be sure to observe the *property* and any buildings and other structures on the *property*. The guide to this *transaction screen questionnaire* (see Sections 7-10) provides further details on the appropriate use of this questionnaire. (See Note 2.)
NOTE 2-Unk = "unknown" or "no response."

Description of Site Address:

Question	Owner			Occupants (if applicable)			Observed During Site Visit		If yes, provide description
1a. Is the property used for an industrial use?	Yes <input type="radio"/>	No <input checked="" type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	
1b. Is any adjoining property used for an industrial use?	Yes <input type="radio"/>	No <input checked="" type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	
2a. Did you observe evidence or do you have any prior knowledge that the property has been used for an industrial use in the past?	Yes <input type="radio"/>	No <input checked="" type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	
2b. Did you observe evidence or do you have any prior knowledge that any adjoining property has been used for an industrial use in the past?	Yes <input type="radio"/>	No <input checked="" type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	
3a. Is the property used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?	Yes <input type="radio"/>	No <input checked="" type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	
3b. Is any adjoining property used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?	Yes <input type="radio"/>	No <input checked="" type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	
4a. Did you observe evidence or do you have any prior knowledge that the property has been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?	Yes <input type="radio"/>	No <input checked="" type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	
4b. Did you observe evidence or do you have any prior knowledge that any adjoining property has been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard or landfill, or as a waste treatment, storage, disposal, processing, or recycling facility (if applicable, identify which)?	Yes <input type="radio"/>	No <input checked="" type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	
5a. Are there currently any damaged or discarded automotive or industrial batteries, pesticides, paints, or other chemicals in individual containers of >5 gal (19 L) in volume or 50 gal (190 L) in the aggregate, stored on or used at the property or at the facility?	Yes <input type="radio"/>	No <input checked="" type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	
5b. Did you observe evidence or do you have any prior knowledge that there have been previously any damaged or discarded automotive or industrial batteries, or pesticides, paints, or other chemicals in individual containers of >5 gal (19 L) in volume or 50 gal (190 L) in the aggregate, stored on or used at the property or at the facility?	Yes <input type="radio"/>	No <input checked="" type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	
6a. Are there currently any industrial drums (typically 55 gal (208 L)) or sacks of chemicals located on the property or at the facility?	Yes <input type="radio"/>	No <input checked="" type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	
6b. Did you observe evidence or do you have any prior knowledge that there have been previously any industrial drums (typically 55 gal (208 L)) or sacks of chemicals located on the property or at the facility?	Yes <input type="radio"/>	No <input checked="" type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	
7a. Did you observe evidence or do you have any prior knowledge that fill dirt has been brought onto the property that originated from a contaminated site?	Yes <input type="radio"/>	No <input checked="" type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>

Question	Owner			Occupants (if applicable)			Observed During Site Visit		If yes, provide description
7b. Did you observe evidence or do you have any prior knowledge that fill dirt has been brought onto the property that is of an unknown origin?	Yes <input type="radio"/>	No <input checked="" type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	
8a. Are there currently any pits, ponds, or lagoons located on the property in connection with waste treatment or waste disposal?	Yes <input type="radio"/>	No <input checked="" type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	
8b. Did you observe evidence or do you have any prior knowledge that there have been previously, any pits, ponds, or lagoons located on the property in connection with waste treatment or waste disposal?	Yes <input type="radio"/>	No <input checked="" type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	
9a. Is there currently any stained soil on the property?	Yes <input type="radio"/>	No <input checked="" type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	
9b. Did you observe evidence or do you have any prior knowledge that there has been previously, any stained soil on the property?	Yes <input type="radio"/>	No <input checked="" type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	
10a. Are there currently any registered or unregistered storage tanks (above or underground) located on the property?	Yes <input type="radio"/>	No <input checked="" type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	
10b. Did you observe evidence or do you have any prior knowledge that there have been previously, any registered or unregistered storage tanks (above or underground) located on the property?	Yes <input type="radio"/>	No <input checked="" type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	
11a. Are there currently any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the property or adjacent to any structure located on the property?	Yes <input type="radio"/>	No <input checked="" type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	
11b. Did you observe evidence or do you have any prior knowledge that there have been previously, any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the property or adjacent to any structure located on the property?	Yes <input type="radio"/>	No <input checked="" type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	
12a. Is there currently evidence of leaks, spills or staining by substances other than water, or foul odors, associated with any flooring, drains, walls, ceilings, or exposed grounds on the property?	Yes <input type="radio"/>	No <input checked="" type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	
12b. Did you observe evidence or do you have any prior knowledge that there have been previously any leaks, spills, or staining by substances other than water, or foul odors, associated with any flooring drains, walls, ceilings or exposed grounds on the property?	Yes <input type="radio"/>	No <input checked="" type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	
13a. If the property is served by a private well or non-public water system, is there evidence or do you have prior knowledge that contaminants have been identified in the well or system that exceed guidelines applicable to the water system?	Yes <input type="radio"/>	No <input checked="" type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	
13b. If the property is served by a private well or non-public water system, is there evidence or do you have prior knowledge that the well has been designated as contaminated by any government environment health agency?	Yes <input type="radio"/>	No <input checked="" type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	
14. Does the owner or occupant of the property have any knowledge of environmental liens or governmental notification relating to past or recurrent violations of environmental laws with respect to the property or any facility located on the property?	Yes <input type="radio"/>	No <input checked="" type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	Unk <input type="radio"/>			
15a. Has the owner or occupant of the property been informed of the past existence of hazardous substances or petroleum products with respect to the property or any facility located on the property?	Yes <input type="radio"/>	No <input checked="" type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	Unk <input type="radio"/>			
15b. Has the owner or occupant of the property been informed of the current existence of hazardous substances or petroleum products with respect to the property or any facility located on the property?	Yes <input type="radio"/>	No <input checked="" type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	Unk <input type="radio"/>			
15c. Has the owner or occupant of the property been informed of the past existence of environmental violations with respect to the property or any facility located on the property?	Yes <input type="radio"/>	No <input checked="" type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	Unk <input type="radio"/>			
15d. Has the owner or occupant of the property been informed of the current existence of environmental violations with respect to the property or any facility located on the property?	Yes <input type="radio"/>	No <input checked="" type="radio"/>	Unk <input type="radio"/>	Yes <input type="radio"/>	No <input type="radio"/>	Unk <input type="radio"/>			

Question	Owner	Occupants (if applicable)	Observed During Site Visit	If yes, provide description
16. Does the owner or occupant of the property have any knowledge of any environmental site assessment of the property or facility that indicated the presence of hazardous substances or petroleum products on, or contamination of, the property or recommended further assessment of the property?	Yes <input type="radio"/> No <input checked="" type="radio"/> Unk <input type="radio"/>	Yes <input type="radio"/> No <input type="radio"/> Unk <input type="radio"/>		
17. Does the owner or occupant of the property know of any past, threatened, or pending lawsuits or administrative proceedings concerning a release or threatened release of any hazardous substance or petroleum products involving the property by any owner or occupant of the property?	Yes <input type="radio"/> No <input checked="" type="radio"/> Unk <input type="radio"/>	Yes <input type="radio"/> No <input type="radio"/> Unk <input type="radio"/>		
18a. Does the property discharge waste-water (not including sanitary waste or storm water) onto or adjacent to the property and/or into a storm water system?	Yes <input type="radio"/> No <input checked="" type="radio"/> Unk <input type="radio"/>	Yes <input type="radio"/> No <input type="radio"/> Unk <input type="radio"/>	Yes <input type="radio"/> No <input type="radio"/>	
18b. Does the property discharge waste water (not including sanitary waste or storm water) onto or adjacent to the property and/or into a sanitary sewer system?	Yes <input type="radio"/> No <input checked="" type="radio"/> Unk <input type="radio"/>	Yes <input type="radio"/> No <input type="radio"/> Unk <input type="radio"/>	Yes <input type="radio"/> No <input type="radio"/>	
19. Did you observe evidence or do you have any prior knowledge that any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries, or any other waste materials have been dumped above grade, buried and/or burned on the property?	Yes <input type="radio"/> No <input checked="" type="radio"/> Unk <input type="radio"/>	Yes <input type="radio"/> No <input type="radio"/> Unk <input type="radio"/>	Yes <input type="radio"/> No <input type="radio"/>	
20. Is there a transformer, capacitor, or any hydraulic equipment for which there are any records indicating the presence of PCBs?	Yes <input type="radio"/> No <input checked="" type="radio"/> Unk <input type="radio"/>	Yes <input type="radio"/> No <input type="radio"/> Unk <input type="radio"/>	Yes <input type="radio"/> No <input type="radio"/>	

Government Records/Historical Sources Inquiry
(See guide, Section 10)

21. Do any of the following federal, state, or tribal government record systems list the property or any property within the search distance noted below (where available):	Approximate Minimum Search Distance, miles (kilometres)	Yes <input type="radio"/>	No <input checked="" type="radio"/>	
Federal NPL site	1.0	Yes <input type="radio"/>	No <input checked="" type="radio"/>	
Federal Delisted NPL site	0.5	Yes <input type="radio"/>	No <input checked="" type="radio"/>	
Federal CERCLIS	0.5	Yes <input type="radio"/>	No <input checked="" type="radio"/>	
Federal CERCLIS NFRAP site	0.5	Yes <input type="radio"/>	No <input checked="" type="radio"/>	
Federal RCRA CORRACTS facilities	1.0	Yes <input type="radio"/>	No <input checked="" type="radio"/>	
Federal RCRA non-CORRACTS TSD	0.5	Yes <input type="radio"/>	No <input checked="" type="radio"/>	
Federal RCRA generators	property and adjoining properties	Yes <input type="radio"/>	No <input checked="" type="radio"/>	
Federal institutional control/engineering control registries	property only			
Federal ERNS	property only	Yes <input type="radio"/>	No <input checked="" type="radio"/>	
State and tribal lists of hazardous waste sites identified for investigation or remediation:				
State-and tribal-equivalent NPL	1.0	Yes <input type="radio"/>	No <input checked="" type="radio"/>	
State-and tribal-equivalent	0.5	Yes <input type="radio"/>	No <input checked="" type="radio"/>	
State-and tribal-landfill and/or solid waste disposal site lists	0.5	Yes <input type="radio"/>	No <input checked="" type="radio"/>	
State-and tribal-leaking storage tank lists	0.5	Yes <input type="radio"/>	No <input checked="" type="radio"/>	
State and tribal registered storage tank lists	property and adjoining properties	Yes <input type="radio"/>	No <input checked="" type="radio"/>	
State and tribal institutional control/engineering control registries	property only	Yes <input type="radio"/>	No <input checked="" type="radio"/>	
State and tribal voluntary cleanup sites	0.5	Yes <input type="radio"/>	No <input checked="" type="radio"/>	
State and tribal Brownfield sites	0.5	Yes <input type="radio"/>	No <input checked="" type="radio"/>	
22. Based upon a review of fire insurance maps (10.2.3) or local street directories (10.2.3), all as specified in the guide, are any buildings or other improvements on the property or on an adjoining property identified as having been used for an industrial use or uses likely to lead to contamination of the property?		Yes <input type="radio"/>	No <input checked="" type="radio"/>	Unavailable <input type="radio"/>

Result N/A

The Owner questionnaire answers were provided was completed by:

Name Joel Landau
Title Owner
Firm _____
Address 794 Bedford Ave Brooklyn NY 11205
Phone Number (718)594-7194
Date 9/1/2021
Role (s) at the site Owner
Number of years at the site 1
Relationship to use (e.g. principal, employee, agent, consultant) Owner

The Occupant questionnaire answers were provided by:

Name _____
Title _____
Firm _____
Address _____
Phone Number _____
Date _____
Role (s) at the site _____
Number of years at the site _____
Relationship to use (e.g. principal, employee, agent, consultant) _____

The Site Visit questionnaire was completed by:

Name _____
Title _____
Firm _____
Address _____
Phone Number _____
Date _____
Role (s) at the site _____
Number of years at the site _____
Relationship to use (e.g. principal, employee, agent, consultant) _____

It is the user's responsibility to draw conclusions regarding affirmative or unknown answers.

The Government Records and Historical Sources Inquiry questionnaire was completed by:

Name _____
Title _____
Firm _____
Address _____
Phone Number _____
Date _____
Role (s) at the site _____
Number of years at the site _____
Relationship to use (e.g. principal, employee, agent, consultant) _____

User's relationship to the site (for example, owner, prospective purchaser, lender, etc.)

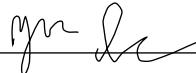

If the preparer (s) is different from the user, complete the following:

Name of User _____
User's Address _____
User's Phone Number _____

Copies of the completed questionnaires have been filed at:

Copies of the completed questionnaires have been mailed or delivered to:

Preparer represents that to the best of the preparer's knowledge the above statements and facts are true and correct and to the best of the preparer's actual knowledge no material facts have been suppressed or misstated.

Signature: 
Date: 9/1/2021

Signature: _____
